The overall POLIS count will therefore exceed the departmental count.

Travel Expenditure

Mr. Spearing asked the Chancellor of the Exchequer if he will state separately the costs incurred by Civil Service Departments in 1984 in respect of rail, air and travel by motor car, respectively.

Mr. Hayhoe: The information requested is not held centrally. In 1983-84 expenditure on travel and subsistence for the Civil Service amounted to £206 million. Approximately half of this was travel.

Income Statistics (West Midlands)

Mrs. Renée Short asked the Chancellor of the Exchequer if he will list the number of citizens residing in the west Midlands county who presently earn *(a)* £5,000 to £9,999, *(b)* £10,000 to £14,999, *(c)* £15,000 to £19,999, *(d)* £20,000 to £24,999, *(e)* £25,000 to £29,999 and *(f)* more than £30,000.

Mr. Moore: The most recent county information on earned income is for 1982-83. Estimates based on a sample survey are as follows. The income of wives has been aggregated with that of their husbands.

Range of earned income before tax £	*Number of single people and married couples thousands*
5,000 to 9,999	785
10,000 to 14,999	229
15,000 to 19,999	50
20,000 to 24,999	17
25,000 to 29,999	9
30,000 and over	8

Business Expansion Scheme

Dr. McDonald asked the Chancellor of the Exchequer (1) if he will publish the study of the business expansion scheme, commissioned by the Treasury and undertaken by Peat, Marwick and Mitchell;

(2) if he will list the categories of companies benefiting from the business expansion scheme in 1983-84 and 1984-85 ; and if he will give the number of companies in each category;

(3) if he will publish an analysis in the *Official Report* of the average rate of tax relieved by the deductions under the business expansion scheme.

Mr. Moore: I shall let the hon. Member have replies as soon as possible.

Turnover Taxes (Harmonisation)

Dr. McDonald ask the Chancellor of the Exchequer if he will publish in the *Official Report* annexes (1), (2), (3), (5), (6) and (7) to the letter sent by the Commissioners of Customs and Excise to the European Commission on 28 December 1977 concerning derogations under article 27(5) of the sixth Council directive on the harmonisation of turnover taxes.

Mr. Hayhoe: I shall let the hon. Member have a reply as soon as possible.

Manufacturing Industry

Mr. Fisher asked the Chancellor of the Exchequer what was private sector investment in manufacturing industry in each of the last 20 years, expressed in *(a)* cash terms, *(b)* as a percentage of 1964-65 figures, *(c)* real terms, adjusted for inflation and *(d)* as a percentage of the 1964-65 figure adjusted for inflation.

Mr. Moore: Figures for private sector investment in manufacturing industry are not yet available for 1984-85. Figures are given in the table for calendar years up to and including 1984.

*Private Sector Manufacturing Investment**

	(a) Current prices £ million	*(b) Percentage of 1965 figure (from (a))†*	*(c) Constant 1980 prices* £ million	*(d) Percentage of 1965 figure (from (c))†*
1965	1,397	100	6,355	100
1966	1,467	105	6,450	101
1967	1,362	97	5,978	94
1968	1,487	106	6,311	99
1969	1,696	121	6,896	109
1970	1,964	141	7,385	116
1971	1,893	136	6,482	102
1972	1,737	124	5,511	87
1973	2,165	155	6,183	97
1974	2,782	199	6,720	106
1975	3,041	218	5,879	93
1976	3,316	237	5,497	86
1977	4,190	300	5,996	94
1978	5,221	374	6,709	106
1979	6,162	441	7,088	112
1980	6,175	442	6,175	97
1981	5,097	365	4,665	73
1982	5,238	375	4,493	71
1983	5,463	391	4,454	70
1984	6,422	460	5,014	79

* Excluding leased assets. This exclusion has the effect of reducing the percentages given in columns *(b)* and *(d)* given the growth of leasing in the 1970s.

† All percentages rounded to the nearest whole number.

Exchange Rates

Mr. Gould asked the Chancellor of the Exchequer, further to the answer dated 14 May, *Official Report*, column *85*, concerning real exchange rates, whether he will provide figures for the increases in the normal rate since the fourth quarter of 1984 together with an explanation of what is covered by wholesale export prices.

Mr. Ian Stewart: The wholesale export price data used in my answer of 14 May derived from line 63 of the relevant country tables of the IMF's "International Financial Statistics", which is available in the House of Commons Library. The definitions vary from country to country, and can be found in the footnotes to those tables.

Percentage changes in sterling's nominal exchange rates against the currencies requested between the fourth quarter of 1984 (average) and the latest available date (29 May 1985) are as follows:

	Percentage change
Dollar/sterling	+3·8
Yen/sterling	+6·3
Deutschmark/sterling	+4·9
French franc/sterling	+4·3
Belgian franc*/sterling	+4·8
Italian lira/sterling	+8·3
Dutch guilder/sterling	+5·0

* The Luxembourg franc has the same external value as the Belgian franc.

Afforestation (Tax Relief)

Mr. Kirkwood asked the Chancellor of the Exchequer if he will make it his policy that tax reliefs for afforestation awarded under schedule D should be made available only with the approval of the Forestry Commission over the siting and design of each forest.

Mr. Moore: I have noted the hon. Member's suggestion but I would refer him to the answer I have given to the hon. Member for East Lothian (Mr. Home Robertson) today.

Helsinki Final Act

Mr. James Lamond asked the Chancellor of the Exchequer how many copies of the Helsinki final act were printed by Her Majesty's Government; and how many have been sold to the public since the signing of the Act on 1 August 1975.

Mr. Hayhoe: 5,800 copies have been printed. HMSO did not separately categorise sales to the public until 1977, but only about 300 in all are left in stock.

Export Subsidies (Follow-on Benefits)

Mr. Hickmet asked the Chancellor of the Exchequer if he will place in the Library a copy of the National Economic Development Office report on evidence about the follow-on benefits arising from projects gained with export subsidies as referred to in paragraph 4.3 of the report by the Comptroller and Auditor General on fixed rate export finance; and if he will make a statement.

Mr. Lawson: A copy of the National Economic Development Office report on "Follow-on business arising from Government export support" has been placed in the Library. I understand that a copy has already been sent to the Public Accounts Committee in connection with its inquiry into fixed rate export finance. The Government will respond to any report it makes in the normal way.

Capital Distribution and Taxation

Mr. Meacher asked the Chancellor of the Exchequer if he will publish a table setting out the distribution of *(a)* capital holdings, *(b)* capital transfer tax liability and *(c)* capital gains tax liability, in each case according to the distribution of earned income.

Mr. Moore: I regret that information is not available in the form requested.

Customs and Excise

Mr. Wainwright asked the Chancellor of the Exchequer, for the purposes of cash limits, what total amounts were deducted from gross expenditure of HM Customs and Excise in 1984-85 in respect of sales of material confiscated by HM Customs and Excise, rents from sub-letting of premises, and other commercial items.

Mr. Hayhoe: Final expenditure figures for 1984-85 for HM Customs and Excise are not yet available. The most recent estimate is that a net sum of £3,204,372 was realised from the sale of seized goods. None of this was deducted from gross expenditure since the whole amount was paid directly into the consolidated fund. There were no receipts from the sub-letting of premises. Taking 'other commercial items' to mean sales of fixed assets and of stores, the latest estimate is that £241,778 was realised and was used to offset gross expenditure.

Mr. Neil Hamilton asked the Chancellor of the Exchequer if he will list the provisions under which Her Majesty's Customs and Excise seeks to require a person, in connection with any assigned matter, as defined in the Customs and Excise Management Act 1979, to produce, furnish or deliver any document, or cause any document to be produced, furnished or delivered, or permit the Commissioners of Customs and Excise, or a person authorised by them to inspect any document or to make or take extracts from or copies of or remove any document; and *(a)* which of these provisions are not concerned with the assessment, collection and enforcement of value-added tax, car tax, customs duties, excise duties, betting and gaming duties or any penalties or interest related thereto and *(b)* which of these provisions Her Majesty's Customs and Excise seek to apply to third parties.

Mr. Hayhoe [*pursuant to his reply*, 17 May 1985, c. *247*]: The following are the provisions under which Her Majesty's Customs and Excise may seek to require a person, in connection with an assigned matter, as defined in the Customs and Excise Management Act 1979, to produce, furnish or deliver a document or cause a document to be produced, furnished or delivered or permit the Commissioners of Customs and Excise or a person authorised by them to inspect a document or to make or take extracts from or copies of or remove a document.

The provisions starred may be applied to third parties.

These provisions may be used as appropriate either for the assessment, collection and enforcement of taxes and duties or for the enforcement of prohibitions on importation.

There are also provisions of general application under the criminal law which are used by officers of Her Majesty's Customs and Excise. Customs officers may collect and seize documents as evidence in the same way as police officers may do so. Those powers are modified in the police and Criminal Evidence Act 1984, which is applied to Customs and Excise by section 114, and which is intended to come into force in 1986. There are also specific procedural rules, once proceedings have commenced in the courts, which deal with documentary evidence. Under section 7 of the Bankers' Books Evidence Act 1879 a court may order that a bank permit inspection

and copying of its books. Under section 14 of the Crown proceedings Act 1947 the High Court may order the production of certain accounts and documents. Or a court may order that a witness attend court and produce such documents as are named in the summons to attend. In these respects Her Majesty's Customs and Excise is in the same position as any other party to proceedings.

There are, in addition to the above provisions of United Kingdom legislation, directly applicable provisions of Community law covering a wide and diversified field of activity where are commonly to be found requirements to furnish documents as a condition, for example, of the release of goods. It has not been possible, in the time available, to identify and collate these cases for inclusion in this reply.

PAYE System

Mr. Grylls asked the Chancellor of the Exchequer what progress he is making in putting the pay-as-you-earn system on to a more cumulative system; and when he expects to put national insurance contributions and pay-as-you-earn calculations side by side in same deduction tables.

Mr. Moore: [*pursuant to his reply*, 24 May 1985, c. *561*]: I take it from the context that my hon. Friend means "a non-cumulative system". The Green Paper on reform of personal taxation, to be published later this year, will discuss a range of possible developments, including non-cumulation for PAYE and closer integration between the tax and social security systems.

FOREIGN AND COMMONWEALTH AFFAIRS

Middle East

Mr. Pike asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the situation in the middle east.

Mr. Luce: I refer the hon. Member to the answer I gave earlier to my hon. Friend the Member for Westbury (Mr. Walters).

Parliamentary Questions

Mr. Peter Bruinvels asked the Secretary of State for Foreign and Commonwealth Affairs how many and what percentage of the questions set down on the Order Paper for priority written answer by him, including Overseas Development questions, in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Mr. Renton: Details, which have been drawn from departmental statistics, are as follows:

Department/Period	*Number of Priority Written Questions*	*Number of Holding Replies*	*Percentage*
June 1983 to November 1984 Diplomatic wing	1,075	*22	2·04
(ODA)	(305)	(5)	(1·63)
November 1984 to Whit Recess 1985 Diplomatic wing	508	10	1·96
(ODA)	(162)	†(12)	(7·4)

* figure includes 9 similar questions given a single holding reply.
† figure reflects 12 similar questions which received a single holding reply.

Mr. Peter Bruinvels asked the Secretary of State for Foreign and Commonwealth Affairs how many parliamentary questions (including Overseas Development questions) have been answered by Ministers in his Department in each of the last three complete Sessions, and the current Session to date; if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Renton: Details, which are drawn from departmental statistics, are as follows:

	Oral	*Priority Written*	*Written*	*Total*	*Sub Totals*
November 1981 to November 1982					
Diplomatic wing	545	655	458	1,658	1,927
(ODA)	(89)	(90)	(90)	(269)	
November 1982 to 13 May 1983					
Diplomatic wing	424	467	326	1,217	1,505
(ODA)	(71)	(110)	(107)	(288)	
(Election 9 June. State opening 22 June 1983)					
June 1983 to October 1984					
Diplomatic wing	728	1,075	487	2,290	2,920

Diplomatic wing	2,256	2,705	1,669	6,630	
(ODA)	(346)	(667)	(548)	(1,561)	
Grand Totals	2,602	3,372	2,217	8,191	8,191

Mr. William Beausire

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on developments in the case of the Anglo-Chilean citizen, William Beausire, who disappeared in 1974; and what representations have recently been made to the Chilean authorities on this case.

Mr. Renton: The Chilean authorities say that their investigations about Mr. Beausire's disappearance have produced no result. In February 1985 they suspended further judicial review of all such cases pending presentation of new evidence. We are continuing to press them for a satisfactory explanation. The matter is also being pursued with the Argentine Government through the Swiss protecting power. In January 1985, we were informed that there was no evidence in the report of the Argentine National Commission of the Disappearance of Persons about Mr. Beausire.

Chile

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs whether Her Majesty's Government will review, or have already reviewed, relations with the Chilean Government in the light of the imposition of the state of siege in November 1984 and its subsequent renewal in May 1985.

Mr. Renton: As I made clear to the hon. Member on 9 May 1985 at column *494*, we naturally take account of changing circumstances in Chile.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs in which particular circumstances, and in which specific individual cases of human rights violations, the British embassy has intervened in the period since full diplomatic relations were restored with the Government of Chile in 1980.

Mr. Renton: As I told the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes) on 28 March, the Chilean Government are well aware of our concern about human rights violations in Chile, both general and particular. We have made this clear to them on numerous occasions both formally and informally, on a bilateral basis and with our European partners.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs whether the deputy under-secretary Sir William Harding, met the opposition Democratic Popular Movement, Socialist Bloc and the Democratic Alliance coalitions during his recent visit to Chile; and if he will specify the groups and their representatives which he met.

Mr. Renton: As I told the hon. Member for Carrick, Cumnock, and Doon Valley (Mr. Foulkes) on 28 March, at column 317, Sir William Harding met a wide range of Chilean opinion during his visit in February, including members of the Government, democratic opposition parties, trade union leaders and human rights groups.

Mr. Pedro Fernandez Lembach

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what communications Her Majesty's Government have had with the Chilean authorities about the case of Pedro Fernandez Lembach; what information he has as to the conditions in which he is living at present; whether he has been visited by embassy staff; and whether there have been any developments in the prisoner's application for his sentence to be commuted to one of exile.

Mr. Renton: As Sr Fernandez Lembach is a Chilean national we have no formal standing to intervene with the Chilean authorities on his behalf nor any right of access to him. But we have made clear to them that if Sr Lembach's sentence were commuted to one of exile, we would issue him with a United Kingdom visa. The Chilean Ministry of Justice has informed Her Majesty's ambassador in April that it is not yet prepared to consider commuting Sr Lembach's sentence.

Angola

Rev. Martin Smyth asked the Secretary of State for Foreign and Commonwealth Affairs whether the British Government representatives at the United Nations Organisation will meet the South-West Africa People's Organisation's representatives in the United Nations Organisation to discuss human rights in Angola.

Mr. Rifkind: No. We have constantly made clear our concern about human rights abuses in southern Africa. SWAPO is well aware of our views.

Rudolf Hess

Mr. Nicholls asked the Secretary of State for Foreign and Commonwealth Affairs if he has received a reply to the request made to the Soviet Union in November 1984 for the release of Rudolf Hess.

Mr. Renton: Yes. On 9 May the Soviet embassy confirmed the refusal of the Soviet authorities to release Rudolf Hess. Despite this disappointing response, we will continue to urge that he should be released on humanitarian grounds.

Berlin

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs if there has been any change in the agreement recorded in the letter from the three high commissioners to the Federal German Chancellor concerning the exercise of reserve rights relating to Berlin, as amended by letter No. 10 of 23 October 1954.

Mr. Renton: There has been no change to the letter of 26 May 1952 from the three allied high commissioners to the Federal Chancellor on the exercise of the reserved rights relating to Berlin, in the version of letter X of 23 October 1954.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what is the contribution made by the Federal German Government to British forces stationed in Berlin as part of the allied military forces there.

Mr. Renton: The estimated contribution to the cost of British Forces Berlin by the Government of the Federal Republic of Germany in 1985-86 will be £98·7 million.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what is the total amount of funds provided by the Federal German Government

towards the military establishments provided by the United Kingdom in West Berlin; and how much was provided by the United Kingdom for the past three years.

Mr. Renton: It is estimated that the Government of the Federal Republic of Germany have paid the following in respect of British forces Berlin:

	£ million
1983-84	71·8
1984-85	82·3
1985-86	98·7

The cost to the United Kingdom of maintaining ground forces in Berlin is estimated to be:

	£ million
1983-84	42
1984-85	47
1985-86	49

The costs to the United Kingdom of maintaining the small Royal Air Force presence in Berlin cannot be separately identified.

Grenada

Mr. Parry asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on Her Majesty's Government's relations with Grenada.

Mr. Renton: Our relations with Grenada, a fellow member of the Commonwealth, are warm and friendly. We welcomed the return of elected, parliamentary Government to Grenada in December 1984, and we are playing our part, together with other aid donors, in assisting recovery of the Grenadian economy.

The Prime Minister of Grenada, the Hon. Herbert Blaize, visited London as our guest from 18 to 25 May. It was a successful visit, which further strengthened our relationship.

El Salvador

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs whether Her Majesty's Government have raised with the United Nations High Commissioner for Refugees the question of the relocation programme of Salvadorean refugees from the Honduras border back to El Salvador.

Mr. Renton: Her Majesty's ambassador in Tegucigalpa maintains regular contact on all refugee matters in Honduras with the local representative of the United Nations High Commissioner for Refugees (UNHCR). Since 1983, we have given over £1 million to UNHCR and other relief organisations for humanitarian programmes in central America. We have also contributed about £725,043 to such work through the European Community.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs when the two Salvadorean army officers are coming to the United Kingdom.

Mr. Renton: No dates have yet been fixed.

Council of Ministers

Mr. Cyril D. Townsend asked the Secretary of State for Foreign and Commonwealth Affairs if he will publish in the *Official Report* a statement of forthcoming business in the European Community Council of Ministers.

Mr. Rifkind: The usual written forecast was deposited in the House earlier today. Heads of State and Government will meet at the European Council in Milan on 28 and 29 June. At present ten meetings of the Council of Ministers are scheduled for June.

The Industry Council is meeting today (3 June) to discuss progress on the Community action plan for telecommunications; a proposed programme for research and development in advance communications technologies for Europe (RACE); the Community's attitude to competing satellite systems; and a declaration of intention to consider establishing a legal framework for the protection of semi-conductor chip design. Ministers may also discuss preliminary work for compiling a directory of member states' present testing and approval arrangements; proposals to remove the competitive disadvantage which Community sugar and starch regimes impose on the European biotechnology industries; and certain proposals on direct broadcasting by satellite (DBS) transmission standards and reception protection measures.

The Education Council is meeting today (3 June) to discuss a draft Resolution on equality of opportunity for boys and girls in education; conclusions on the European dimension in education; co-operation in higher education as a basis for Community future policy and co-operation between Higher Education and Industry; the recognition of the doctorate of the European University Institute of Florence; and its future work programme.

The Research Council is due to meet on 4 June to discuss a number of research and development topics including the tritium handling laboratory; the European synchrotron radiation laboratory (which supplies an intense source of X-rays for use in a range of scientific research fields); a programme for research and development in advance communications technologies for Europe (RACE); and an idea to encourage the use of information technologies as an aid to improve the social welfare of society (IRIS).

The Internal Market Council is expected to meet on 10 June to discuss the draft directives on the rights of establishment of architects, the mutual recognition of qualifications and rights of establishment of pharmacists, and the co-ordination of laws relating to self-employed commercial agents. Ministers will also consider the Commission's proposed timetable for the completion of the internal market and may consider the draft regulation to establish an European economic interest grouping.

The Economic and Finance Council is expected to meet on 11 June to discuss implemention of budget discipline in relation to the 1986 budgetary procedures. It will also consider the European monetary system; the draft 20th value added tax directive which deals with compensation payments for German farmers; the progress report of the unit trust directive concerning the harmonisation of the laws, regulations and administrative provisions; and discuss employment in preparation for the next European Council. Ministers may also consider the Euratom lending ceiling.

The Agriculture Council is expected to meet on 11 and 12 June to complete its discussions on the Commission's price proposals for cereals and rapeseed.

The Labour and Social Affairs Council is due to meet on 13 June to consider the draft decision on the comparability of vocational training qualifications; draft amendments to the regulation on social security; a draft regulations on social security in Greenland; and the draft resolution on a Community migration policy. Ministers will also discuss the draft directives on industrial noise, parental leave, occupational social security schemes and self-employed women and women in agriculture. The draft "Vredeling" directive, the draft directive on part-time work, the European social fund regional statistical mechanism and the draft recommendation on voluntary workers overseas are also likely to be discussed.

The Foreign Affairs Council is due to meet on 18 and 19 June to consider the Commission's draft regulation on integrated Mediterranean programmes (IMPs), revised in the light of the agreement reached at the 29 and 30 March European Council; and preparations for the 28 and 29 June European Council. Ministers will also prepare the Community positions for the EC/Israel co-operation council and for the EC/Yugoslavia co-operation council, both of which are due to be held in the margins, and for the EC/ACP joint council which is due to meet in Luxembourg on 21 June. It may discuss a draft negotiating mandate for an EC/central America co-operation agreement and may review developments in current difficulties between the Community and the United States in the steel sector.

The Energy Council is expected to meet on 20 June to discuss the Commission's proposals for new programmes of support for energy demonstration projects and projects for technological development in the hydrocarbon sector; the review of energy pricing policy; the Commission paper on oil refining; state aids for the coal industry; possibly new Community energy objectives for 1995.

The Environment Council is likely to meet on 25 June to consider a draft directive to tighten existing limits on vehicle exhaust emissions, in line with the agreement reached at the last meeting of the Council; a draft directive on the control of emissions from large combustion plant; a new Commission proposal on trade in seal products; the draft directive to control the discharge of dangerous waste into water; and a Commission proposal to extend the scope of an existing directive so as to prohibit entirely the marketing and use of polychlorinated biphenyls (PCBs) and polychlorinated terphynols (PCTs).

SCOTLAND

Female Remands

Mr. Stephen Ross asked the Secretary of State of Scotland what was the average period of custodial remand for female custodial remand prisoners in Scotland for the years 1982, 1983, and 1984.

Mr. Ancram The estimated average period of custodial remand for female prisoners received on remand in Scotland during 1982 was 18 days, and for 1983 was 16 days. Information for 1984 is not yet available.

Female Prisoners

Mr. Stephen Ross asked the Secretary of State for Scotland what was the average length of custodial sentence of female prisoners in Scotland in each of the years 1982, 1983 and 1984.

Mr. Ancram: The table provides information on the average length of sentence of female prisoners received into custody under sentence in the years 1982 and 1983. Information for 1984 is not yet available.

No. of Days

	1982	*1983*
Adult direct receptions	105	106
Under 21 direct receptions	68	86
Fine defaulter receptions	16	16
Total	52	48

Note: excludes life and other indeterminate sentences.

Parliamentary Questions

Mr. Peter Bruinvels asked the Secretary of State for Scotland how many and what percentage of the questions set down on the Order Paper for priority written answer by him in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Mr. Younger: The Information sought could only be provided at disproportionate cost. However, a sample scrutiny of records relating to part of Session 1983-84 indicates that holding replies account for approximately 1·5 per cent. of all written answers. The records on which the sample scrutiny is based do not differentiate between priority written and ordinary written replies.

Mr. Peter Bruinvels asked the Secretary of State for Scotland how many parliamentary questions have been answered by Ministers in his Department in each of the last three complete Sessions, and the current Session to date; if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Younger: The number of questions answered by Scottish Office Ministers is shown in the table.

Session	*House of Commons*		*House of Lords*
	**Oral*	*†Written*	
1981-82	447	1,602	104
1982-83	288	1,229	38
1983-84	493	2,537	155
1984-85 (22 May 1985)	215	1,143	56

Source: POLIS.

* The count represents the total number of oral questions actually reached with supplementaries counted as separate questions.

† The count includes all priority and ordinary written questions, plus those orals questions which were not reached. Additionally those followed by substantive replies at a later date, are counted as two questions.

Elderly Persons

Mr. Adley asked the Secretary of State for Scotland if he will list the 10 areas in Scotland with the highest incidence of elderly people in the population.

Mr. John MacKay: The 10 districts or islands areas with the highest percentage of resident population of pensionable age at 30 June 1984 are as follows. The Scotland figure is shown for comparison.

District or Islands Area	*Percentage of pensionable age**
Wigtown	22
Berwickshire	22
Tweeddale	22
Sutherland	22
Skye & Lochalsh	22
Roxburgh	22
Ettrick & Lauderdale	21
Western Isles	21
North East Fife	21
Argyll & Bute	20
Scotland	17

* Males 65 and over; Females 60 and over.

Rates

Mr. Millan asked the Secretary of State for Scotland if he will give an estimate of the likely cost that would arise under the Rating (Revaluation Rebates) (Scotland) Bill if the level at which relief was given is 2·5 times or 2·75 times the previous rating valuations.

Mr. Younger: I do not have the information on which to base a reliable estimate, and to ask the rating authorities to do the calculations specially does not seem to me a worthwhile use of resources. It is clear, however, since the average revaluation multiplier for all domestic property in Scotland is 2·7, that if the threshold for revaluation rate rebates were reduced to the levels suggested, there would be a very large increase in the numbers qualifying, and a substantial increase in the rebate costs, and in the administrative costs.

Mr. Millan asked the Secretary of State for Scotland if he will give the percentage increases in total valuation for domestic and commercial subjects, respectively, arising from the recent revaluation for each rating authority in Scotland and for Scotland as a whole.

Mr. Younger: The percentage increases in total rateable values between 1 April 1984 and 1 April 1985 are given in the table.

	Domestic	*Commercial*
Borders	180	170
Central	160	130
Dumfries & Galloway	170	190
Fife	150	140
Grampian	180	180
Highland	160	160
Lothian	170	110
Strathclyde	170	110
Tayside	170	130
Orkney	160	70
Shetland	170	50
Western Isles	150	190
Scotland	170	130

These figures include the effect of adding new subjects to and deleting old subjects from the valuation rolls, and of changes to the classification of subjects, as well as the revaluation.

Mr. Millan asked the Secretary of State for Scotland if he will give the total number of domestic and commercial ratepayers, respectively, for each rating authority in Scotland and for Scotland as a whole and his estimate of the number and percentage in each category in each authority and for Scotland as a whole who are likely to benefit from the provisions in the Rating (Revaluation Rebates) (Scotland) Bill.

Mr. Younger: Complete information in the detail requested is not yet available. An estimate of the number of properties which might qualify and of the cost of rebates in Scotland as a whole is contained in the explanatory and financial memorandum to the Bill.

Mr. Millan asked the Secretary of State for Scotland what percentage reduction in the total rates burden for domestic and commercial ratepayers, respectively, in each rating authority and for Scotland as a whole he estimates will result from the relief provided for in the Rating (Revaluation Rebates) (Scotland) Bill.

Mr. Younger: This information is not available.

PAYMASTER GENERAL

Parliamentary Questions

Mr. Peter Bruinvels asked the Paymaster General, how many Parliamentary questions have been answered by him in the last Session, and the current Session to date; if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Gummer: I became Paymaster General in September last year. Since then I have answered four oral questions, one ordinary written question and one priority written question.

NORTHERN IRELAND

Bankruptcies

Mr. John David Taylor asked the Secretary of State for Northern Ireland how many bankruptcies have been notified to his Department in each year since 1979.

Dr. Boyson: Following is the information:

Year	*Bankruptcies*
1979	24
1980	29
1981	54
1982	60
1983	67
1984	102
1985 Jan/ April	48

Female Prisoners

Mr. Stephen Ross asked the Secretary of State for Northern Ireland what was the average length of custodial sentence of female prisoners in Northern Ireland in each of the years 1982, 1983 and 1984.

Mr. Scott: The information for determinate custodial sentences for females is as follows:

Year	Average (months)
1982	7·9
1983	8·3
1984	4·3

Mr. Stephen Ross asked the Secretary of State for Northern Ireland what was the average period of custodial remand for female custodial remand prisoners in Northern Ireland for the years 1982, 1983 and 1984.

Mr. Scott: The average number of days spent in custody from first remand to termination of trial, for females tried on indictment in 1983 and 1984, was 125·5 and 105·4 respectively. A comparable figure for 1982 is not available.

Messrs Hyster

Mr. John David Taylor asked the Secretary of State for Northern Ireland if he has had negotiations with Messrs. Hyster, prior to the announcement last week of the location of its new European plant; and if he will make a statement.

Dr. Boyson: The Industrial Development Board made contact with the president of Hyster in June of last year following rumours of a possible new European project. At that stage the company gave no indication of such a project. Contact was maintained and in December it became evident that the company was considering a manufacturing operation for component parts, possibly in the Republic of Ireland. The Industrial Development Board followed up with the company the possibility of a Northern Ireland location for this investment but Hyster made it clear that it had already ruled out a United Kingdom location. The company has now decided to locate the plant in Holland.

Emergency Provisions Legislation (Detentions)

Mr. Stephen Ross asked the Secretary of State for Northern Ireland how many persons were detained under the Emergency Provisions (Northern Ireland) Acts in each year since 1973.

Mr. Scott: The information is available for the following years only.

Year	Number of persons arrested by HM forces	Number of persons arrested by Royal Ulster Constabulary
1978 (from 1 June)	1,884	1,186
1979	2,572	2,035
1980	1,629	1,719
1981	1,993	2,555
1982	1,288	1,901
1983	476	1,222
1984	241	1,326
1985 (to 30 April)	34	384

Note: Persons initially arrested by members of HM forces and handed over to the Royal Ulster Constabulary may be subsequently re-arrested by the police and so appear in both sets of figures.

Parliamentary Questions

Mr. Peter Bruinvels asked the Secretary of State for Northern Ireland how many and what percentage of the questions set down on the Order Paper for priority written answer by him in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Dr. Boyson: 207 or 36 per cent. and 138 or 32 per cent. respectively.

Source: Departmental statistics.

Mr. Peter Bruinvels asked the Secretary of State for Northern Ireland how many parliamentary questions have been answered by Ministers in his Deartment in each of the last three complete Sessions, and the current Session to date; if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Dr. Boyson: Following is the information:

	Oral*	Priority written	Ordinary Written
1981-82	176	244	493
1982-83	174	248	449
1983-84	240	585	941
1984-85†	229	505	406

* Includes all questions tabled, whether reached or not, but does not include supplementaries.

† Up to and including 24 May 1985.

Source: Departmental statistics.

Plastic Bullet Weapons

Mr. Corbyn asked the Secretary of State for Northern Ireland whether his Department has any plans to replace the plastic bullet weapons currently used in Northern Ireland with the Arwen 37 plastic bullet gun.

Mr. Scott: No.

Housing

Mr. John David Taylor asked the Secretary of State for Northern Ireland how many houses the Northern Ireland Housing Executive has at Portaferry, Kircubbin, and Portavogie; what is the present waiting list at each of these three locations; and what is the Northern Ireland Housing Executive's future building programme at each of these three locations.

Mr. Chris Patten: This is a matter for the Northern Ireland Housing Executive, but I understand from the chairman that the information is not readily available; I shall reply to the right hon. Gentleman as soon as possible.

Commercial Explosives

Mr. Maginnis asked the Secretary of State for Northern Ireland what percentage of commercial explosives recovered in Ulster can be traced back to the Irish Republic; and if he will define this in terms of weight.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Home-made Explosives

Mr. Maginnis asked the Secretary of State for Northern Ireland what percentage of the component elements for home-made explosives recovered in Ulster can be traced back to the Irish Republic; and if he will define this in terms of weight.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Terrorism

Mr. Maginnis asked the Secretary of State for Northern Ireland (1) how many incidents in the frontier area of Ulster during the past three years can be directly related to terrorist incursions from the Irish Republic; and if he will list these;

(2) how many incidents in the frontier area of Ulster during the past three years can be directly related to terrorist activity from within the Irish Republic; and if he will list these;

(3) how many formal apologies Her Majesty's Government have received from the Irish Republic's Government during the past three years concerning terrorist incursions or activity emanating from their territory.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Killeen (Bomb Incident)

Mr. Maginnis asked the Secretary of State for Northern Ireland whether the official statement from Dublin that the Killeen bomb was not detonated from within the Irish Republic was made in response to any specific allegation that it had been; and whether it has been possible to establish conclusively the detonation point.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Policing Policy

Mr. Maginnis asked the Secretary of State for Northern Ireland what proposals for future policing within Ulster have been discussed with the Irish Republic's Government; who has taken part in these discussions; if the Chief Constable of the Royal Ulster Constabulary has been consulted; and whether he agrees with these proposals.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Lear Fan Ltd.

Mr. Arnold asked the Secretary of State for Northern Ireland if he will make a statement about the implications of the decision of Lear Fan Ltd. to cease trading.

Dr. Boyson: On 23 May the board of directors of Lear Fan Limited resolved at a meeting in Los Angeles to cease trading.

I understand the directors took this decision because of continuing delays encountered in obtaining certification of the Lear Fan 2100 aircraft and the steep decline in the market for executive turbo-prop aircraft which had resulted in a serious deterioration of the long-term prospects of the company.

On 28 May the company indicated that it would be making an appropriate filing under the United States bankruptcy code. On 29 May the Government appointed Mr. Michael Jordan of Cork Gully as receiver under Her Majesty's Government's first fixed and floating charge to secure the company's assets in Northern Ireland and to represent the Government's interests in the assets and technology in the United States.

At 23 May 1985, a sum of $4·79 million was still to be provided by the Government, under the 1982 financial assistance agreement. As a result of the company's decision to cease trading the Government were released from this remaining funding commitment. The private investment consortium, Zoysia Corporation (since 1982 principal shareholders in the holding company of Lear Fan Ltd.), had, earlier, fulfilled all its funding commitments under the 1982 Agreement.

The amounts committed by Her Majesty's Government to the Lear Fan Project are as follows:

Funding prior to September 1982	£25.32 million
Under the September 1982 Agreement	£17·87 million

In addition, between 1980 and 1985, payment of non-selective assistance under training, temporary short-time working, keyworkers, security staff and redundancy payment schemes were made totalling—£1·28 million.

On 28 May the Ulster Investment Bank recalled its loan to the company of $15 million (£11·81 million pounds sterling). This loan had been guaranteed by the Government in July 1980 and the guarantee was renewed in October 1982 as part of the September 1982 financial assistance agreement. With repayment of this guarantee the total amount investment by Her Majesty's Government in the Lear Fan project is £56·28 million. Private investment since 1979 totals about $100 million.

The receiver will advise the Government as to the value of the company's assets but it is already clear that the company has no major financial resources from which a substantial proportion of the total investment could be recovered. The position with regard to the technology is complex involving the Government and other parties. The Government are taking legal advice on this matter.

The sums invested by the Government and the private sector essentially represented venture capital in development of a high-technology project. It is a great disappointment that the company was not able to overcome the technical problems within the timescale required for a successful commercial development.

The failure cannot in any way be blamed on the Northern Ireland work force. Indeed, its loyalty and contribution to the project is to be praised. Had this high-risk venture, which has involved substantial private investment, succeeded, it would have contributed greatly to employment and to the economy of Northern Ireland.

AGRICULTURE, FISHERIES AND FOOD

Draize Eye Irritancy Test

Mr. Wigley asked the Minister of Agriculture, Fisheries and Food how many representations he has received since 1 January concerning the Draize eye irritancy test; and if he will make a statement.

Mrs. Fenner: I have received 13 representations this year. I would refer the hon. Member to the replies I gave the hon. Member for Woolwich (Mr. Cartwright) on 15 April and my hon. Friend the Member for Holland with Boston (Mr. Body) on 22 April respectively.

Beef

Mr. Beggs asked the Minister of Agriculture, Fisheries and Food if he will estimate the cost to beef producers in Northern Ireland of delays in export refund payments made by the Intervention Board for Agriculture; and if he will give a figure for the cost per head of cattle sold.

Mr. MacGregor: I refer the hon. Member to the reply given to him by my hon. Friend the Parliamentary Secretary on 9 May at column *494*.

Intervention Stores

Mr. Beggs asked the Minister of Agriculture, Fisheries and Food if he is satisfied that all stores for intervention grain in Great Britain are vermin and weather-proof.

Mr. MacGregor: Intervention stores are required to have adequate protection against weather and pests. They are inspected before grain is taken in and periodically during storage.

Mr. Beggs asked the Minister of Agriculture, Fisheries and Food what is the normal period during which intervention grain is held in storage in Great Britain.

Mr. MacGregor: Intervention grain has remained in store in Great Britain for varying periods in recent seasons, reflecting changes in domestic and world supply and demand for grain.

Mr. Beggs asked the Minister of Agriculture, Fisheries and Food what is the present cost per tonne per month for storage of intervention grain.

Mr. MacGregor: I refer the hon. Member to the reply I gave to the hon. Member for Sheffield, Brightside (Miss Maynard) on 7 March at column *567*.

Parliamentary Questions

Mr. Peter Bruinvels asked the Minister of Agriculture, Fisheries and Food how many and what percentage of the questions set down on the Order Paper for priority written answer by him in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Mr. Jopling: I regret that this information is not available.

Mr. Peter Bruinvels asked the Minister of Agriculture, Fisheries and Food how many parliamentary questions have been answered by Ministers in his Department in each of the last three complete Sessions, and the current Session to date: if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Jopling: The information requested is as follows:

	Session			
	1981-82	*1982-83*	*1983-84*	**1984-85*
Questions tabled as Oral	316	209	403	227
Questions tabled as priority written	434	287	700	469
Questions tabled as written	552	363	713	586
Total	1,302	859	1,816	1,282

* As at 17 May 1985

Source: Departmental statistics. It should be noted that the count produced by the POLIS system in the House Library will differ from the above figures, in that on POLIS:

(a) the oral count includes only those oral questions actually reached, plus supplementaries counted as separate questions, and

(b) the written count includes orals not reached, writtens, priority writtens and holding replies all counted as separate questions.

The overall POLIS count will therefore exceed the Departmental count.

Pigmeat

Mr. Geraint Howells asked the Minister of Agriculture, Fisheries and Food how much pigmeat is consumed per head of population in the United Kingdom at the present time; what were the corresponding figures for each of the last five years; and if he will make a statement.

Mrs. Fenner: The information requested is as follows:

*Consumption of pigmeat in the United Kingdom**

kg/head

	1980	*1981*	*1982*	*1983*	*†1984*
Pork	12·5	12·7	13·0	13·2	12·4
Bacon and Ham	9·1	8·8	8·4	8·4	8·3

* Supplies for consumption adjusted for stock changes but excluding net imports of pigmeat in processed products.
Estimates are in terms of product weight.
† Provisional.

Alachlor

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food whether he will make a statement on the carcinogenicity, replacement studies, clearance and use of Alachlor.

Mrs. Fenner: Further to my reply to the hon. Member on 27 March 1985, the clearance and uses of alachlor have been subjected to a preliminary review by the Advisory Committee on Pesticides. The committee concluded that the existing required safety precautions were adequate for its current limited United Kingdom uses and recommended reducing clearance to the provisional commercial level pending detailed assessment of the replacement data. The recommendation has been accepted and the assessment is proceeding.

Pesticides

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food what plans he has for setting performance targets and quantitative criteria and for publishing threshold pest infestation levels for spraying in relation to pesticide use.

Mrs. Fenner: My Department's Agricultural Development and Advisory Service already operate a comprehensive weekly pest and disease intelligence service which indicates in particular where pests have not reached a threshold and where spraying would not be justified.

The present MAFF research and development programme is strongly oriented towards the determination of economic damage thresholds for the major pests and diseases. Collecting this type of biological information uses considerable resources and thresholds have to be validated over several seasons. We now have the

information for a number of pests including wheat bulb fly, leatherjackets, cereal aphids, several oilseed rape pests, flea moths and the major pests of apples.

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food whether the introduction of criteria of efficacy under the Food and Environment Protection Bill will enable the Government to assess from year to year whether or not the policy of reducing pesticide usage to a minimum consistent with food production is being achieved.

Mrs. Fenner: The Government's intention is that the introduction of efficacy criteria into statutory arrangements for the pre-market screening of pesticides will contribute towards reducing pesticide usage to the minimum consistent with efficient food production. It will enable Ministers to ensure that no pesticide is released into the environment unless its use is demonstrably beneficial to agriculture, horticulture, food storage, wood preservation or public health and hygiene.

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food what information has been received from the West German Government regarding the prohibition of Paraquat in that country; and what steps are being taken to perpetuate the long-term experiment involving Paraquat application to soils at the Yarnton weed research laboratory.

Mrs. Fenner: I will reply to the hon. Member as soon as possible.

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food when his Department will begin to review each pesticide with existing clearance under the pesticides safety precaution scheme, in relation to carcinogenicity, mutagenicity and teratogenicity.

Mrs. Fenner: The Government already keep pesticides under review in relation to all aspects of safety including those listed by the hon. Member. We intend to introduce a system of regular reviews of all pesticides under the proposed statutory arrangements and this will commence as soon as the necessary statutory provisions are in place.

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food to what exent his Department relies on farmers taking advice on the use of pesticides from agrochemical merchants and their representatives.

Mrs. Fenner: My Department's Agricultural Development and Advisory Service (ADAS) offers advice on site to individual farmers and supplements this with promotional events, press articles and provision of a wide range of advisory literature. Nevertheless, we support the British agrochemical standards inspection scheme which ensures by examination that distributors' staff are adequately trained in crop protection and competent to give advice.

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food whether he will estimate the environmental cost of pesticides in use and their health and safety effect on the environment.

Mrs. Fenner: I regret that the information requested could be provided only at disproportionate cost.

Milk Quotas

Mr. Nicholson asked the Minister of Agriculture, Fisheries and Food if he will now allocate the total quota released to date by the United Kingdom outgoers scheme to all exceptional hardship cases and to small producers equally throughout the United Kingdom.

Mr. Jopling: I refer the hon. Member to the reply given to him earlier today by my right hon. Friend the Prime Minister.

Hill Livestock Compensatory Allowances

Dr. David Clark asked the Minister of Agriculture, Fisheries and Food on how many occasions since 1982 farmers in the less-favoured areas have been refused hill livestock compensatory allowances on all or part of their flocks, on the grounds that stocking levels are causing damage to semi-natural vegetations and wildlife communities; and whether any farms refused such allowances were situated in either a site of special scientific interest or a national park.

Mr. MacGregor: I regret that information in the form requested is not available.

Food Storage

Mr. Nellist asked the Minister of Agriculture, Fisheries and Food if, in relation to the storage of surplus European Economic Community foodstuffs in Coventry and Warwickshire, he will give the latest information as to (i) location of store, (ii) nature of commodity, (iii) quantity of commodity and (iv) value of commodity, all at the latest available date.

Mr. Jopling: Intervention food stocks in Coventry and Warwickshire on 30 April, the latest date for which figures are available, were as shown, values calculated at the buying-in price for that date.

		Tonnes	*£*
Beef	Nuneaton	45	131,000
	Warwick	52	151,000
Butter	Nuneaton	1,140	2,200,000
Breadwheat	Coventry	2,119	283,000

State Aid

Mr. Body asked the Minister of Agriculture, Fisheries and Food whether he will list the applications made by him for a derogation by the Council of Ministers under article 93 of the Treaty of Rome.

Mr. Jopling: There have been none.

"Devon Ray"

Mr. Steen asked the Minister of Agriculture, Fisheries and Food, (1) pursuant to the answer of 20 May, *Official Report*, column *363*, what are the implications of the requirements of the Fishing Vessel (Financial Assistance) Scheme 1983 in respect of the 'Devon Ray'; and what further steps are required so that the Devon Ray satisfies the decommissioning within the terms of the scheme;

(2) what specific steps have not been fulfilled by Mr. Wakeham in relation to the 'Devon Ray', which are preventing it being decommissioned within the requirements of the Fishing Vessel (Financial Assistance) Scheme 1983.

Mr. MacGregor [*pursuant to his reply*, 24 May 1985, c. 582]: The specific steps not fulfilled are those discussed with the solicitors acting for Mr. Wakeham in November 1984 and confirmed by us in writing on 5 December 1984. These are: conversion work on the galley, the deck saloon and the wheelhouse to the satisfaction of the local district inspector.

WALES

Parliamentary Questions

Mr. Peter Bruinvels asked the Secretary of State for Wales how many and what percentage of the questions set down on the Order Paper for priority written answer by him in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Mr. Nicholas Edwards: In the Parliamentary Sessions 1983-84 and 1984-85 to date the number and percentage of priority written questions receiving a holding reply are 13 (1·5 per cent.) and three (0·6 per cent.) respectively.

Mr. Peter Bruinvels asked the Secretary of State for Wales how many parliamentary questions have been answered by Ministers in his Department in each of the last three complete Sessions, and the current Session to date; if he will break down these figures into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Nicholas Edwards: The information requested is as follows:

Session	*Oral*	*Priority written*	*Ordinary written*	*Total*
1981-82	122	361	498	981
1982-83	77	300	399	776
1983-84	296	851	724	1,871
1984-85*	166	465	237	868

* To 24 May 1985.

Source: Departmental statistics. It should be noted that the count produced by the POLIS system in the House Library will differ from the above figures, in that on POLIS

(a) the oral count includes only those oral questions actually reached, plus supplementaries counted as separate questions, and

(b) the written count includes Orals not reached, Writtens, Priority Writtens and holding replies all counted as separate Questions.

The overall POLIS count will therefore exceed the departmental count.

Dogs (Sheep Deaths)

Mr. Geraint Howells asked the Secretary of State for Wales how many sheep have been killed by dogs in Wales during the last six months; what were the corresponding figures for each of the last five years; and if he will make a statement.

Mr. Nicholas Edwards: Statistics of sheep reported killed by dogs ceased to be kept centrally after 1978.

Departmental Staff

Mr. Geraint Howells asked the Secretary of State for Wales what proportion of civil servants employed in his Department *(a)* in Cardiff and *(b)* in London, respectively, are (i) specialists and (ii) administrators; and how many in each office speak Welsh.

Mr. Nicholas Edwards: The following is the information requested:

Percentage of total Welsh Office staff in post as at 1 May 1985

	Percentage
Staff employed in London	
1. Staff other than administrators	
(a) Professional and technical staff	0·05
(b) Support staff	0·45
2. Administrators	1·00
Staff employed in Cardiff	
1. Staff other than administrators	
(a) Professional and technical staff	11·7
(b) Support staff	10·6
2. Administrators	45·3

A total of two officers employed in London and 145 officers in Cardiff speak Welsh.

Cardigan Bypass

Mr. Geraint Howells asked the Secretary of State for Wales if he has any plans to build the Cardigan bypass within the next three years; and if he will make a statement.

Mr. John Stradling Thomas: The provisional programme envisages that the bypass should be ready to start in 1988 subject to satisfactory completion of engineering design and of the statutory procedures. The actual start will depend on the availability of resources.

Business Grants

Mr. Barry Jones asked the Secretary of State for Wales how long, on average, it takes for a new business in Wales to receive *(a)* a definite decision upon application for Government grant-aid and *(b)* Government grant-aid upon successful application, from the date at which the application was made.

Mr. Nicholas Edwards: A wide range of Government grants provided for by different statutory powers is potentially available to new businesses in Wales. These grants involve differing methods of appraisal, approval and payment. Information in the form requested could be provided only at disproportionate cost.

Development Board for Rural Wales

Mr. Barry Jones asked the Secretary of State for Wales by how much in real terms the budget of the Development Board for Rural Wales has increased between 1980-81 and 1984-85; and if he will list the moneys given to the Development Board for Rural Wales in each of the financial years 1980-81 to 1984-85.

Mr. John Stradling Thomas: I refer the hon. Gentleman to the reply given to him by my right hon. Friend on 26 November 1984 at column *345* for details of the Development Board for Rural Wales' outturn expenditure for the period 1980-81 — 1983-84 and financial allocation for 1984-85. As explained in the reply comparison in the terms asked for is not directly possible. Government programmes are no longer planned on a constant price basis. However, by applying the gross domestic product deflator and at 1983-84 prices, the figures for 1980-81 and 1984-85 would be £9·5 million and £9·3 million respectively.

Milk Quotas

Mr. Nicholson asked the Secretary of State for Wales what is the anticipated volume of outgoers quota required to restore to base year production levels the quotas of small milk producers in Wales.

Mr. Nicholas Edwards: I refer the hon. Gentleman to the reply he was given by my hon. Friend the Minister of State, Ministry of Agriculture, Fisheries and Food, on 20 May 1985 at column *354*. Separate figures, for England and Wales could not be obtained except at disproportionate cost.

Mr. Nicholson asked the Secretary of State for Wales what amount of milk quota is required to meet 100 per cent. exceptional hardship awards made by the dairy produce tribunals for Wales.

Mr. Nicholas Edwards: Separate figures for Wales are not available and could not be obtained except at disproportionate cost.

SOCIAL SERVICES

Housing Benefit

Mr. Best asked the Secretary of State for Social Services if he will make a statement on the circumstances in which a local authority may (i) withhold housing benefit from an assessed recipient if it is shown that the recipient is not paying rent to the landlord in private rented property and (ii) pay housing benefit directly to a landlord of an assessed recipient as rent in the event of non-payment of rent when the recipient does not consent to such a course of action.

Mr. Whitney: The housing benefits regulations provide that a local authority may withhold payment of a rent allowance if it is satisfied that the claimant is not paying his rent regularly. Payment will be reinstated when the authority is satisfied that the claimant will discharge, on receipt of the money, his liability to his landlord.

A rent allowance may be paid direct to the landlord without the tenant's consent if the tenant is 13 weeks, or more, in arrears with his rent. Payment must be made direct to the landlord where an authority has been notified that the DHSS local office is paying to the landlord an amount towards arrears, deducted from the claimant's supplementary benefit.

Family Practitioner Committees

Mr. Weetch asked the Secretary of State for Social Services if he will list the names of the members of the Suffolk family practitioner committee giving their professional occupations and length of service on the committee.

Mr. Kenneth Clarke: The following members were appointed to the newly constituted Suffolk FPC on 1 April 1985. The dates in brackets are the dates of appointment to earlier committees.

Name	*Occupation*
Mr. Arthur Nicholls *(Chairman)*	Management consultant (1974)
Mr. Joseph A. Bird	Solicitor (1974)
Mr. Michael L. Butterworth	General dental practitioner (1982)
Mrs. Alison E. Child	Housewife (1981)
Dr. Ronald Duncan	General medical pratitioner (1983)
Dr. Thomas H. Fairbairn	General medical practitioner (1960)
Mrs. Marion S. Fairman-Smith	Organiser: Newmarket day centre
Mrs. Joan M. Gibbs	Housewife
Dr. Brian M. Goss	General medical practitioner
Mr. Canham J. J. Grayston	Retired
Mr. Martin Holmes	Farmer (1984)
Ms. Eileen M. Jacob	Housewife
Mr. Adrian Kitchener	Dispensing optician
Dr. Walter Marshall	General medical practitioner (1973)
Dr. David S. Meldrum	General medical practitioner (1974)
Councillor Sir MacDonald Miller of Glenlee (Bt)	Retired (1982)
Mr. Anthony S. Owen	Solicitor
Mr. Forbes A. Powrie	Pharmacist (1984)
Mr. Alfred W. Reeve	Assistant director of social services
Mr. Peter I. M. Ross	Ophthalmic optician (1971)
Dr. Kailash Sarda	General medical practitioner (1983)
Mr. Arthur J. Sheels	Artist
Mrs. Violet O. Smith	Retired
Mr. John W. Taylor	Pharmacist
Dr. Ian R. Wallace	General medical practitioner (1975)
Mr. Wilfred Watkin	General dental practitioner (retired) (1957-72)
Mrs. Elizabeth M. Wiles	Housewife
Mr. Kenneth V. Williams	General dental practitioner (1974)

The places reserved for a nurse and for an ophthalmic medical practitioner and one of the generalist places are vacant at present.

Mr. Weetch asked the Secretary of State for Social Services whether he has concluded his considerations relating to the possible changes in the procedure of family practitioner committees; and if he will make a statement.

Mr. Kenneth Clarke: We have introduced a number of procedural changes since the enactment of the Health and Social Security Act 1984. These are covered by:

Procedural considerations	
FPC Accountability	HC (FP) (84) 37
Financial information systems	HC (FP) (84) 6
Financial directors	HC (FP) (84) 9
Arrangements for personnel	HC (FP) (85) 12
Annual accounts	HC (FP) (85) 4
Internal audit	HC (FP) (85) 6
Losses and special payments	HC (FP) (85) 7
FPCs (Establishment) Order 1984 (SI 1984 No. 1946)	HC (FP) (85) 1
FPCs Establishment Order 1985 (SI 1985 No. 301)	HC (FP) (85) 5
FPCs (Consequential Modifications) Order 1985 (SI 1985 No. 39)	HC (FP) (85) 2
FPCs (Membership and Procedure) Regulations 1985 (SI 1985 No. 213)	HC (FP) (85) 3
FPC Accommodation and equipment	HN (FP) (84) 38
Community Health Councils Regulations 1985 (SI 1985 No. 304)	HC (85) 11
Joint Consultative Committees Order 1985 (SI 1985 No. 305)	HC (FP) (85) 8
Management arrangements for FPCs	HC (FP) (85) 10

The framework for the new family practitioner committees is now established but I cannot say that procedural considerations are complete. They may need amendment from time to time to take account of reviews of FPC performance and of policy developments.

Mr. Weetch asked the Secretary of State for Social Services if he will list the family practitioner committees in England which regularly publish annual reports.

Mr. Kenneth Clarke: The following family practitioner committees regularly publish annual reports:

Avon
Birmingham
Bromley
Cambridgeshire
Cheshire
City and East London
Croydon
Cumbria
Durham
East Sussex
Greenwich and Bexley
Hampshire
Hereford and Worcester
Hertfordshire
Kent
Kirklees
Lancashire
Leicestershire
Liverpool
Merton, Sutton and Wandsworth
Newcastle
Norfolk
North Yorkshire
Nottinghamshire
Oxford
St. Helens and Knowsley
Sandwell
Sheffield
Stockport
Suffolk
Tameside
Walsall
Warwickshire
West Sussex
Wolverhampton

In future, under arrangements introduced this year, all family practitioner committees will be required to identify their aims and policies and report annually on progress in achieving them. I expect a clear explanation of this information to be published by each FPC.

Overseas Visitors (Health Treatment)

Mr. Tom Cox asked the Secretary of State for Social Services what was the total amount of money received in payment for health service treatment by overseas visitors to the United Kingdom in 1984.

Mr. Kenneth Clarke: The latest available information is on an income basis, rather than cash received, and relates to the financial year 1983-84, in which income in the United Kingdom from patients resident overseas was just under £2 million.

Drugs

Rev. Martin Smyth asked the Secretary of State for Social Services (1) how many instances of failures under the drug testing scheme were attributable to defective generic medicinal products;

(2) how many instances of failures under the drug testing scheme were attributable to defective proprietary medicinal products.

Mr. Kenneth Clarke: We do not hold this information centrally.

Rev. Martin Smyth asked the Secretary of State for Social Services (1) how many instances of failures under the regional health authority quality control laboratories scheme were attributable to defective generic medicinal products;

(2) how many instances of failures under the regional health authority quality control laboratories scheme were attributable to defective proprietary medicinal products.

Mr. John Patten: We are not aware of the regional health authority quality control laboratories scheme to which the hon. Member refers.

NHS Hospitals (Fires)

Mr. Skinner asked the Secretary of State for Social Services how many fires occurred in National Health Service hospitals in 1980, 1981, 1982, 1983 and 1984, respectively.

Mr. John Patten: The readily available information relates to fires in hospitals (including Nursing homes and non-NHS hospitals) in 1980-83. The information is published by the Home Office in "Fire Statistics United Kingdom". Figures for such fires in 1980-1983 are:

	Number
1980	2,106
1981	2,081
1982	2,213
1983	2,243

The figure for 1984 is not yet available.

Information on National Health Service hospitals alone could be provided only at disproportionate cost.

Hip Replacement

Mr. Penhaligon asked the Secretary of State for Social Services if he will list for each district health authority in England the current waiting list for a total hip replacement; and if he will make a statement.

Mr. John Patten: The information requested is not collected centrally. Information on waiting lists for admission to hospital is available centrally the speciality of treatment and not by operation.

Generic Medicines

Rev. Martin Smyth asked the Secretary of State for Social Services whether he remains satisfied with the quality of generic medicines available for National Health Service patients.

Mr. Kenneth Clarke: Yes. I refer the hon. Member to my reply on 4 December 1984 to the hon. Member for Carmarthen (Dr. Thomas) at column *163*.

Queen Elizabeth II Hospital (Welwyn)

Mr. Murphy asked the Secretary of State for Social Services when the proposed expansion of the Queen Elizabeth II hospital in Welwyn garden city is expected to commence; and if he will make a statement.

Mr. John Patten: This is a matter for the North-West Thames regional health authority to decide. I suggest my hon. Friend writes to the chairman of that authority for the information he requires.

Pirate Radio (Advertising)

Mr. Austin Mitchell asked the Secretary of State for Social Services whether the advertisement for his Department and its services on the pirate Skyline radio at 7.28 pm on Monday 13 May was solicited or paid for by his Department; what steps he is taking to stop or encourage further broadcasts of this type; and whether he

will make a statement on the broadcasting of his Department's public service announcements on pirate radios.

Mr. Whitney: We were unaware of the advertisement broadcast on the unlicensed broadcasting station Skyline Radio on Monday 13 May. Certainly neither this Department nor the Central Office of Information, which originates and distributes public service announcements on behalf of Government Departments for free broadcast, would consider paying for or soliciting advertising on any unlicensed broadcasting station.

As the hon. Member knows, action on the unlicensed use of radio is a matter for my right hon. Friend the Secretary of State for Trade and Industry.

"International Years" (Funding)

Mr. Squire asked the Secretary of State for Social Services what funding his Department has given in each year since 1979 to *(a)* international year of the child, *(b)* international year of the disabled and *(c)* international youth year.

Mr. John Patten: The Department has supported a wide range of projects and initiatives connected with the international year of the child, the international year of the disabled, and international youth years through, for example, grants to voluntary organisations, funding of conferences, publications and research and the servicing of co-ordinating committees; I regret that this expenditure cannot, however, be separately identified.

Dental Ailments

Mr. Gerald Howarth asked the Secretary of State for Social Services how many man hours his Department estimates to have been lost through dental ailments during each of the last five years.

Mr. Kenneth Clarke: It is not possible to provide a comprehensive estimate of the number of man hours lost through dental disease. The only statistics available relate to those claiming sickness benefit in respect of dental and oral conditions in the period to 1982-83. The following number of days of certified incapacity through this cause for periods of four days or more were recorded in the last five years for which we have statistics:

	Days
1978-79	733,000
1979-80	866,000
1980-81	761,000
1981-82	664,000
1982-83	642,000

Preventive Dentistry

Mr. Gerald Howarth asked the Secretary of State for Social Services what evaluation his Department is undertaking in respect of preventative dentistry techniques.

Mr. Kenneth Clarke: A joint working party drawn from our Department and the British Dental Association is currently considering the potential effectiveness of fissure sealants in relation to the general dental services.

Restorative Dentistry

Mr. Gerald Howarth asked the Secretary of State for Social Services how much was spent by the National Health Service on restorative dentistry in each of the last five years.

Mr. Kenneth Clarke: The estimated gross cost of restorative dentistry provided under the general dental service in each of the last five years was as follows:

	£ million
1980	190·01
1981	225·20
1982	249·77
1983	256·50
1984	282·10

We cannot separately identify the costs of restorative treatment provided under the community and hospital dental services.

Mr. Gerald Howarth asked the Secretary of State for Social Services how many National Health Service patients were treated for restorative dentistry in each of the last five years.

Mr. Kenneth Clarke: We do not have information on the number of patients treated for restorative dentistry. The number of treatments provided under the general and community dental services in each of the last 5 years was as follows:

Year	*General dental service*	*Community dental service*
1980	13,840,190	2,518,174
1981	13,855,230	2,272,519
1982	13,972,780	2,052,837
1983	14,029,890	1,817,338
1984	14,077,180	n.a.

The available information relating to restorative dentistry provided under the hospital dental service is as follows:

Year	*In-patient cases*	*Day cases*	*New out-patient attendances*
1980	—	247	20,505
1981	8	115	27,922
1982	34	179	42,549
1983	47	188	42,350
1984	n.a.	n.a.	n.a.

These figures exclude treatment provided in hospitals by general dental practitioners.

Mentally Disordered Offenders

Mr. Irving asked the Secretary of State for Social Services what steps he is taking to ensure that regional health authorities accept mentally disordered offenders into their care under the Mental Health Act 1983.

Mr. Kenneth Clarke: We have met representatives of each regional health authority to discuss their obligation to provide a comprehensive system of care for mentally disordered people, including offenders. The Mental Health Act 1983 did not provide courts with powers to direct regional health authorities to accept a mentally disordered offender into their care, but it did provide them with power, under section 39 of the Act, to require regional health authorities to provide them with

information about the facilities available, in their areas or elsewhere, for persons in respect of whom the courts are minded to make a hospital order. In 1984 regional health authorities received requests from courts in respect of 29 such offenders and few difficulties seem to have arisen in finding hospital places for offenders who were detainable under the Mental Health Act. Health authorities have no power to detain other mentally disordered offenders.

Parliamentary Questions

Mr. Peter Bruinvels asked the Secretary of State for Social Services how many and what percentage of the questions set down on the Order Paper for priority written answer by him in *(a)* Session 1983-84 and *(b)* the current Session to date have initially received a holding reply.

Mr. Fowler: The information requested is as follows:

Questions for priority written answer

Session	Total	Initial Holding Reply	Percentage
(a) 1983-84	4,014	456	11·3
(b) 1984-85*	2,434	319	13·1

* To 24 May.
Source: Departmental Statistics.

Mr. Peter Bruinvels asked the Secretary of State for Social Services how many parliamentary questions have been answered by Ministers in his Department in each of the last three complete Sessions, and the current Session to date; if he will break these figures down into questions tabled as oral questions, priority written questions and ordinary written questions, respectively; and if he will make a statement.

Mr. Fowler: The information requested is as follows:

Session	Type of Question			Total
	Oral	Priority Written	Ordinary Written	
1981-82	564	2,210	1,756	4,530
1982-83	416	1,474	1,284	3,174
1983-84	773	4,014	2,967	7,754
1984-85*	357	2,434	1,603	4,394

* To 24 May.
Source: Departmental Statistics.

Elderly Persons

Mr. Adley asked the Secretary of State for Social Services if he will list the 20 areas in England and Wales with the highest incidence of elderly people in the population.

Mr. John Patten: The required information is shown in the table.

Percentage of resident population of pensionable age: 30 June 1983*

Local Authority	Percentage
Worthing (West Sussex)	35
Rother (East Sussex)	35
Eastbourne (East Sussex)	33
Christchurch (Dorset)	32
West Somerset	32
Tendring (Essex)	32
Arun (West Sussex)	31
East Devon	31
Bournemouth (Dorset)	30
Hove (East Sussex)	30
South Wight (Isle of Wight)	30
Torbay (Devon)	30
Thanet (Kent)	28
Colwyn (Clwyd)	28
Teignbridge (Devon)	27
Rhuddlan (Clwyd)	27
Hastings (East Sussex)	26
Wealden (East Sussex)	26
North Norfolk	26
Aberconwy (Gwynedd)	26
England and Wales	18

* Males aged 65 and over, females aged 60 and over.
Source: OPCS Monitor PP1 84/4.

Mr. Fisher asked the Secretary of State for Social Services what proportion of health expenditure was accounted for by people over the age of *(a)* 65 years and *(b)* 75 years in each of the last 10 years.

Mr. John Patten: The Department makes estimates of hospital and community health services and family practitioner services expenditure by broad age groups which differ slightly from the breakdown requested. The estimated percentage of total expenditure on these services spent on people aged 65 and over, and those aged 75 and over, for each of the years 1978-79 to 1982-83 is in the table. Estimates for 1983-84 are not yet ready; comparable information for earlier years is not readily available.

England

	Estimated percentage of HCHs and FPS expenditure on people aged	
	(a) 65 and over per cent.	*(b)* 75 and over per cent.
1978-79	39	23
1979-80	41	24
1980-81	42	25
1981-82	42	25
1982-83	42	26

Organophosphorus Pesticides

Mr. Campbell-Savours asked the Secretary of State for Social Services what investigations of the effects of organophosphorus pesticides on the blood serum-cholinesterase levels of the general public living in areas subject to aerial spraying are being or will be conducted or are planned by his Department.

Mr. John Patten: None. Procedures exist for blood to be tested for cholinesterase levels as quickly as possible to enable a full clinical assessment of anyone complaining of exposure to organophosphorus or carbamate pesticides. The Department's booklet—"Pesticide Poisoning: notes for the guidance of medical practitioners" issued to all GPs —and to hospital accident and emergency departments —sets out the relevant advice.

Crop Spraying

Mr. Campbell-Savours asked the Secretary of State for Social Services what information is being made available to the general public living in areas subjected to crop spraying of the health effects of crop spraying.

Mr. John Patten: It would not be practicable to issue such advice to the general public. Properly conducted crop

spraying should not give rise to adverse health effects. However, anyone who is concerned about possible health effects should consult his general practitioner. A booklet — "Pesticide Poisoning: notes for the guidance of medical practitioners"—has been issued to all GPs and to hospital accident and emergency departments.

Islington

Mr. Corbyn asked the Secretary of State for Social Services if he will state the current number of men and women residing in the London borough of Islington who are in receipt of state retirement pensions.

Mr. Whitney: I refer the hon. Member to my reply on 22 May to the hon. Member for Newham, North-West (Mr. Banks) at column *470*.

Mr. Corbyn asked the Secretary of State for Social Services if he will state the number of recipients, and the total amounts, of *(a)* death grant, *(b)* maternity allowance, *(c)* special diet supplement and *(d)* special laundry supplement, claimed in the area of north Islington during the past year.

Mr. Whitney: The area of north Islington is served by three local offices: Hoxton, Finsbury Park and Highgate. Figures are not available to show either the number of recipients of death grant, maternity allowance, and additional requirements in supplementary benefit cases for diet or laundry or the total amounts paid.

However, the number of claims for death grant and maternity allowance in the year ending 9 April 1985 were as follows:

	Death Grant	*Maternity Allowance*
Hoxton	797	790
Finsbury Park	883	1,057
Highgate	1,142	1,184
Totals	2,822	3,031

Mr. Corbyn asked the Secretary of State for Social Services if he will state the number of unemployed young people aged 16 and 17 years currently in receipt of supplementary benefit, and the weekly total amount paid to this age group, in the area of north Islington.

Mr. Whitney: The information requested is not available.

Mr. Corbyn asked the Secretary of State for Social Services if he will estimate how many families in Islington are eligible for family income supplement.

Mr. Whitney: I regret that this information is not available. Family income supplement claims are dealt with by one centre at Blackpool and no information is maintained about claims from particular local areas.

Cervical Cancer Screening

Mr. Dobson asked the Secretary of State for Social Services, further to his answer of 21 May to the hon. Member for Holborn and St. Pancras, *Official Report*, column *399*, whether all the family practitioner committees referred to have cervical cancer screening schemes covering all health districts in their areas; how many of the schemes of recall or call in operation or proposed, respectively, cover only women over 35 years; and how many cover younger women as well.

Mr. Kenneth Clarke: We do not have this detailed local information centrally.

Medical Manpower Units

Mrs. Renée Short asked the Secretary of State for Social Services what action he proposes to take arising from the findings published in the report by the Comptroller and Auditor General on hospital-based medical manpower units within the National Health Service.

Mr. Kenneth Clarke: We will wait for a report from the Public Accounts Committee before deciding whether any action would be justified.

Hospital Consultants

Mrs. Renée Short asked the Secretary of State for Social Services what consultations he intends to seek with chairmen of district and regional health authorities to discuss with them the progress which they have made in implementing the guidelines issued by his Department to increase the proportion of hospital consultants to junior doctors.

Mr. Kenneth Clarke: This subject could be raised as part of the annual ministerial review process in the case of any region where we considered it a suitable subject for a review of progress.

Drugs Trials

Mrs. Renée Short asked the Secretary of State for Social Services when he expects to be meeting representatives of the Medicines Commission to discuss with them recommendations made by the Royal College of Physicians in respect of legislation to protect healthy people who volunteer for drugs trials.

Mr. Kenneth Clarke: The report of the Royal College's working party is not expected to become available to the Medicines Commission until the autumn. In the light of that report the commission will reconsider whether there is a need for further safeguards, and will then advise us what action, if any, it considers should be taken.

Paraplegics and Quadraplegics

Mrs. Renée Short asked the Secretary of State for Social Services what plans he has to raise the level of treatment facilities within the National Health Service for paraplegics and quadraplegics in domestic or hospital environments.

Mr. Newton: It is for health authorities to determine the level of the provision of services for paraplegics and quadraplegics within the National Health Service having regard to established national policies and priorities.

Home Helps

Mr. Fisher asked the Secretary of State for Social Services what information he has as to how many people aged 65 years and over are in receipt of home helps.

Mr. John Patten: Figures on the total number of cases attended during a sample week are collected and published annually by the Chartered Institute of Public Finance and Accountancy in its report "Personal Social Services Statistics". Its latest report, which includes returns from only 74 per cent. of social services authorities in England, shows that during the week beginning 7 November 1983 home helps attended a total of 388,159 cases involving people aged 65 years and over.

Hospital Beds

Mr. Fisher asked the Secretary of State for Social Services what proportion of hospital beds were occupied by people over the age of *(a)* 65 years and *(b)* 75 years in each of the last 10 years.

Mr. John Patten: The information requested is given in the table.

NHS hospitals England

Year	*Estimated percentage of all occupied hospital beds occupied by:* *(a) patients aged 65 and over*	*(b) patients aged 75 and over*
1974	43	25
1975	45	26
1976	46	27
1977	47	28
1978	48	29
1979	48	29
1980	49	30
1981	49	31
1982	50	31
1983 (provisional)	51	33

Population Statistics

Mr. Fisher asked the Secretary of State for Social Services what is his latest estimate for the size of the male and female population in *(a)* 1991, *(b)* 1996 and *(c)* 2001.

Mr. John Patten: The latest projections by the Government Actuary of the population in England and Wales, Great Britain and the United Kingdom for males and females are given in the table.

Mid-1983 based principal Population Projections

thousands

	1991	*1996*	*2001*
Males			
England and Wales	24,457	24,756	24,997
Great Britain	26,904	27,193	27,418
United Kingdom	27,702	28,012	28,251
Females			
England and Wales	25,672	25,895	26,068
Great Britain	28,284	28,486	28,633

State Pensions

Mr. Fisher asked the Secretary of State for Social Services what is his latest estimate for Government expenditure on state pensions in *(a)* 1991, *(b)* 1996 and *(c)* 2001.

Mr. Whitney: I shall let the hon. Member have a reply as soon as possible.

Kidney Dialysis

Mr. Fisher asked the Secretary of State for Social Services how many people with kidney complaints were receiving dialysis treatment in each of the last five years.

Mr. John Patten: According to information supplied by the European Dialysis and Transplant Association, the number of renal patients receiving dialysis treatment in the United Kingdom in each of the last five years for which figures are available was as follows:

Number of patients on treatment at 31 December

	Number
1978	2,997
1979	3,378
1980	3,825
1981	4,442
1982	4,933

Mr. Fisher asked the Secretary of State for Social Services how many people were refused kidney dialysis treatment in each of the last five years.

Mr. John Patten: This information is not available centrally. Whether or not an individual patient is accepted for treatment is a matter for the clinical judgment of the doctors concerned.

Mr. Fisher asked the Secretary of State for Social Services what has been the expenditure on kidney dialysis in each of the last five years.

Mr. John Patten: This information is not available centrally.

NHS (Professional Staff)

Mr. Hoyle asked the Secretary of State for Social Services if he will break down, by grade and sex, the numbers of staff in the following professions in the National Health Service *(a)* speech therapists, *(b)* clinical psychologists, *(c)* hospital pharmacists, *(d)* medical laboratory scientific officers, *(e)* medical physics technicians and *(f)* physiological measurement technicians.

Mr. Kenneth Clarke: The figures requested are shown in the table.

NHS scientific and professional staff—England as at 30 September 1983 (whole-time equivalents)†*

Grades	*Total*	*Male*	*Female*
Speech Therapists

Central Pensions Branch, Longbenton

Mr. Beith asked the Secretary of State for Social Services what guidance is currently being given to clerical grades at his Department's central pensions branch at Longbenton about the extent to which they may engage in political activities; and whether this guidance has been recently changed.

Mr. Newton: The extent to which staff may engage in political activities is laid down in the Department's staff rules and staff code. Clerical grades at Longbenton have standing permission to engage in all the national and local political activities open to the intermediate group (as defined in the Civil Service pay and conditions of service code) of which they are a part. Following recent revision of the rules for the Civil Service as a whole the members of this group who have standing permission are required to inform local management of intended political activities prior to taking them up.

Legionnaire's Disease

Mr. Frank Field asked the Secretary of State for Social Services if any outbreak of Legionnaire's disease has been reported in any hospitals in the Wirral and Liverpool area; and if he will make a statement.

Mr. Kenneth Clarke: One isolated case was recently admitted to a Liverpool hospital and Legionnaire's disease was later confirmed. A second suspected case was admitted to a Wirral hospital but the disease has not been confirmed. I am afraid that it appears to be a feature of this disease that isolated sporadic cases occur regularly all over the country and no specific origin of the infection is usually detected.

Southwark

Ms. Harman asked the Secretary of State for Social Services how much was spent on unemployment benefit and other benefits to unemployed people in Southwark in *(a)* 1979, *(b)* 1980, *(c)* 1981, *(d)* 1982, *(e)* 1983 and *(f)* 1984.

Mr. Whitney: I regret that this information is not available and could be obtained only at disproportionate cost.

Sweeteners

Mr. Dykes asked the Secretary of State for Social Services whether any studies have been undertaken by his Department on the possibility of a relationship existing between the consumption of intense sweeteners at present and projected levels with the incidence of disorders such as anorexia nervosa and bulimia, especially in young people.

Mr. John Patten: We have not undertaken any such studies.

Filipinos

Mr. Wilkinson asked the Secretary of State for Social Services what is the estimated Filipino population at present resident in the United Kingdom.

Mr. John Patten: Results from the 1981 census show that about 12,000 people born in the Philippines were resident in Great Britain in April 1981.

NHS Hospitals (Private Management)

Mr. Meacher asked the Secretary of State for Social Services which district health authorities have been involved in discussions with American corporations regarding the contracting-out of management of National Health Service hospitals; which American corporations were involved in each case; and what stage discussions have reached in each case.

Mr. Kenneth Clarke: Such discussions do not have to be reported to us. We are aware that Portsmouth and South East Hampshire, and Lewisham and North Southwark health authorities have held preliminary discussions with American Medical International about management of their private patients' wings. We are encouraging innovation and improvement in the management of hospitals and we would look sympathetically at any proposals that emerged from discussions between any health authority and any company with a good track record of hospital management. I cannot see the relevance of the nationality of the company concerned and our judgments would not be affected one way or the other if the ownership of the company happened to be American.

NHS (Expenditure)

Mr. Meacher asked the Secretary of State for Social Services (1) how many National Health Service hospital beds have been closed each year since 1979 as a result of the closure of wards within hospitals that still remained open; and in which hospitals these beds were located in each case;

(2) what has been the level of expenditure on the National Health Service each year since 1955; what has been the real increase each year in terms of *(a)* the retail price index and *(b)* National Health Service pay and prices; and what was the level of National Health Service expenditure each year as a percentage of gross national product.

Mr. Kenneth Clarke: I shall let the hon. Member have replies as soon as possible.

Committee on Safety of Medicines

Mr. Haynes asked the Secretary of State for Social Services (1) if he is satisfied that, throughout their service, present and past members of the Committee on Safety of Medicines having a connection with a pharmaceutical company have maintained a level of objectivity consistent with their status as committee members; and if he will make a statement;

(2) if he will indicate the length of service on the Committee on Safety of Medicines of each of its members;

(3) if he will take steps to ensure that the Committee on Safety of Medicines is wholly independent in its membership from the pharmaceutical industry;

(4) how many members of the Committee on Safety of Medicines have any connection, financial or otherwise, with pharmaceutical companies; and if he will name them;

(5) if he will name the organisations employing each member of the Committee on Safety of Medicines;

(6) if he will list the current members of the Committee on Safety of Medicines.

Mr. Kenneth Clarke [*pursuant to his reply*, 10 May 1985, c. *545-6*]: The members of the committee are:

Committee Member	*Period of Service (Years)*	*Position Held*
Professor Sir Abraham Goldberg (Chairman) MD DSc FRCP FRSE	5	Regius Professor of the Practice of Medicine Gardiner Institute University of Glasgow
Professor A. W. Asscher BSc MD FRCP	1½	Professor of Renal Medicine University of Wales
Professor A. M. Breckenridge MSc MD FRCP	2¼	Professor of Clinical Pharmacology Liverpool University
Dr. C. M. Castleden MD FRCP	1½	Consultant Geriatrician Leicester General Hospital
Mr. W. M. Darling OBE FPS	5	Community Pharmacist South Tyneside
Professor J. W. Dundee MD PhD FRCP FFARCS	5	Professor of Anaesthetics Queens University Belfast

Professor M. W. Greaves MD PhD FRCP	1½	Professor of Clinical Dermatology St. Johns Hospital for Diseases of the Skin, London
Dr. J. M. Holt MA MSc MD FRCP	5	Consultant Physician John Radcliffe Hospital Oxford

Committee Member	Period of Service (Years)	Position Held
Professor D. Hull BSc FRCP DObst RCOG DCH	4	Professor of Child Health University Hospital & Medical School Nottingham
Professor H. S. Jacobs BA MD FRCP	1½	Professor of Reproductive Endocrinology The Middlesex Hospital Medical School
Dr. B. L. Pentecost MD FRCP	1½	Consultant Physician Birmingham
Professor M. D. Rawlins	6	Professor of Clinical Pharmacology University of Newcastle-upon-Tyne
Dr. J. W. G. Smith MD FRCPath FFCM FI Biol Dip Bact	7	Director, National Institute for Biological Standards and Controls London
Professor M. P. Vessey MD FFCM FRCP (Ed) FRCGP	7	Professor of Social and Community Medicine University of Oxford
Dr. D. M. B. Ward MB ChB	1½	General Practitioner Glasgow
Professor H. K. Weinbren BSc MD FRCPath	7	Professor of Experimental Pathology Royal Postgraduate Medical School Hammersmith Hospital

I have every reason to believe that members of the committee—for whose work we are most grateful—have maintained the highest level of integrity, objectivity and professional expertise.

Except for the director of the National Institute of Biological Standards and Control, which is a Government-financed body, all members of the committee are employed in the academic and National Health Service fields. It is desirable that members in these fields should have a good understanding of the work of the pharmaceutical industry. Members of the committee were informed at the time of their appointment that they are required to declare to the head of our Department's medicines division, in confidence, any consultancies they hold with pharmaceutical companies. Four members of the present committee have done so. Members are also required to declare any interest which they may have in any application or other matter before the committee, and if the interest is a direct one they take no part in the committee's consideration of this item. All such declarations of interest are recorded in the committee's minutes.

The present members of the committee have all been appointed on the basis that declarations of interest would be regarded as confidential and we propose to respect that confidence. We intend to draw up arrangements however whereby, for future appointments to the committee, information about relevant interests can become a matter of public record. I will make a further statement in due course.

Smoking Diseases

Mr. Meadowcroft asked the Secretary of State for Social Services, pursuant to the reply of 17 April, *Official Report*, column *215*, if he will break down the figure of £170 million per annum cost to the NHS of diseases to which smoking is a major contributory factor into the cost of *(a)* inpatient treatment *(b)* outpatient and inpatient treatment and *(c)* family practitioner services.

Mr. John Patten [*pursuant to his reply*, 23 May 1985, c. *546-47*]: The figure of £170 million is the estimated cost to the National Health Service of illnesses to which smoking is a major contributory factor. About 85 per cent. of the total is attributable to outpatient and inpatient treatment and 15 per cent. to consultations with general practitioners.

Food Labelling

Mr. Meacher asked the Secretary of State for Social Services why his latest guidelines on food labelling exclude data on carbohydrates and fibre content; and if he will reconsider the possibility of requiring data on these items to be included.

Mrs. Fenner: I have been asked to reply.

We have recently issued draft guidelines on voluntary nutrition labelling which provide for both the carbohydrate and fibre content of foods to be declared.

Written Answers to Questions

Tuesday 4 June 1985

ATTORNEY-GENERAL

Cumbria (Alleged Bribery and Corruption)

Mr. Franks asked the Attorney-General (1) why the Director of Public Prosecutions decided not to institute criminal proceedings arising out of the allegations made by a Cumbrian county councillor of attempted bribery and corruption in connection with land for private housing development contained in the Cartmel and Furness local plan prepared by the planning department of the South Lakeland district council;

(2) if he will place in the Library a transcript of the tape recording arranged by the Barrow-in-Furness division of the Cumbria county constabulary and submitted to the Director of Public Prosecutions relating to a meeting and conversation with a Cumbrian county councillor during which there was an alleged attempt at bribery and corruption in connection with land for private housing development contained in the Cartmel and Furness local plan;

(3) if he will place in the Library copies of the statements taken by the Cumbrian county constabulary from the chief planning officer and a member of staff on the South Lakeland district council relating to allegations of bribery and corruption concerning the Cartmel and Furness local plan and submitted to the Director of Public Prosecutions.

The Attorney-General: The Director of Public Prosecutions did not institute criminal proceedings arising out of these allegations because he considered that the evidence did not justify a prosecution. When the Director of Public Prosecutions has reached a decision not to institute criminal proceedings in a particular case it is not his policy to give his reasons or to make the evidence available upon which he reached that decision.

NATIONAL FINANCE

Soccer Transfers

Mr. Greenway asked the Chancellor of the Exchequer if he will make it his policy to impose a 50 per cent. levy on soccer transfers; and if he will make a statement.

Mr. Hayhoe: My right hon. Friend the Chancellor of the Exchequer has no plans to impose such a levy.

Departmental Staffs

Mr. Neil Hamilton asked the Chancellor of the Exchequer what was the number of staff-in-post in central Government Departments at 1 April.

Mr. Peter Rees: At 1 April 1985 there were 599,026 staff-in-post — 497,967 non-industrials and 101,059 industrials the number of civil servants has fallen by 133,249, or 18·2 per cent., since the beginning of the last Parliament.

After adjustment for a revised MOD target, the latest staff-in-post figures show that the 1 April 1985 aggregate target was more than achieved by some 4,700.

Tax Offices (Reorganisation)

Mr. Neil Hamilton asked the Chancellor of the Exchequer if he will make a statement about the Inland Revenue's plans for reorganisation of tax offices in the charge of principal inspectors of taxes.

Mr. Moore: An Inland Revenue committee completed last year a review of these offices, which handle much specialised work and deal with the tax liabilities of the largest financial, commercial and industrial concerns. The Board of Inland Revenue has approved the committee's recommendations, the main feature of which is the centralisation of the files for companies in those large groups in a tax district headed by a principal inspector of taxes. In all, around 12,000 files will be centralised, mostly within the central London area. The movement of files will begin shortly and should be substantially completed by March 1986.

Business Expansion Scheme

Dr. McDonald asked the Chancellor of the Exchequer if he will publish the study of the business expansion scheme, commissioned by the Treasury and undertaken by Peat, Marwick and Mitchell.

Mr. Moore [*pursuant to his reply*, 3 June 1985]: I intend to publish results from this study in due course. Messrs. Peat, Marwick and Mitchell is due to submit its final report by end October of this year.

Dr. McDonald asked the Chancellor of the Exchequer if he will list the categories of companies benefiting from the business expansion scheme in 1983-84 and 1984-85; and if he will give the number of companies in each category.

Mr. Moore [*pursuant to his reply*, 3 June 1985]: It is estimated that at least £100 million was invested under the business expansion scheme in 1983-84 in more than 500 companies. Detailed information is currently available about 397 of these companies. The table analyses them into broad trade group. It is too early to provide similar information about 1984-85 investments.

Companies receiving investments in 1983-84 by broad trade group

Trade	*Number*
Manufacturing	156
Service industries	112
Wholesale and retail distribution	79
Construction	23
Agriculture, horticulture and fishing	10
Others	17
TOTAL	397

Dr. McDonald asked the Chancellor of the Exchequer if he will publish an analysis in the *Official Report* of the average rate of tax relieved by the deductions under the business expansion scheme.

Mr. Moore [*pursuant to his reply*, 3 June 1985]: The average rate of tax relief for investments under the business expansion scheme in 1983-84 was about 50 per

cent. Figures are not yet available for 1984-85. An analysis of marginal tax rates of BES investors in 1983-84 is as follows:

Marginal income tax rate per cent.*	*Percentages of investors*
30	10
40-55	35
60-70	30
75	25
TOTAL	100

* Including the investment income surcharge, where appropriate.

Turnover Taxes

Dr. McDonald asked the Chancellor of the Exchequer if he will publish in the *Official Report* annexes (1), (2), (3), (5), (6) and (7) to the letter sent by the Commissioners of Customs and Excise to the European Commission on 28 December 1977 concerning derogations under article 27(5) of the sixth Council directive on the harmonisation of turnover taxes.

Mr. Hayhoe [*pursuant to his reply*, 3 June 1985]: In view of their length, I have placed them in the Library and am sending copies to the hon. Member.

EMPLOYMENT

Job Vacancies

Mr. Neillst asked the Secretary of State for Employment if he will publish a table showing for each principal careers office the number of job vacancies at the latest available date.

Mr. Peter Morrison: The following table shows the number of unfilled vacancies at careers offices in Great Britain as at 3 May 1985.

Unemployment Statistics

Mr. Gordon Wilson asked the Secretary of State for Employment what was the percentage increase in unemployment over the past 10 years in *(a)* the United Kingdom, *(b)* the European Economic Community countries as a whole and *(c)* the Organisation for Economic Co-operation and Development countries as a whole.

Mr. Alan Clark: The following information is available in the Library.

Percentage increase in unemployment 1974 to 1984

	Per cent.
United Kingdom	456
European Community	310
OECD	178

Notes: OECD excludes Iceland for which information is not available. Based on annual averages for the two years.
Sources: Statistical Office of the European Communities; OECD "Main Economic Indicators".

Job Creation and Training

Mr. Steen asked the Secretary of State for employment if he will list each of the Government-aided schemes aimed at reducing unemployment and the estimated cost of each for the financial year 1984-85; how much will be spent by way of the Manpower Services Commission for job creation, training schemes, the young worker schemes and other special measures designed to help young people; and what is the total amount of public money to be made available to reduce unemployment and create training opportunities.

Mr. Peter Morrison: The table shows expected expenditure (excluding administration costs) on each of the schemes funded by my Department or the Manpower Services Commission designed to promote and preserve employment opportunities or encourage training, including schemes for young people.

	1984-85 Provisional outturn	*1985-86 Estimates*
DE—Run Schemes		
Job Release Scheme (full-time)	280·1	195·0
Job Release Scheme (part-time)	0·2	6·6
Job Splitting Scheme	0·2	6·6
Temporary Short Time Working Compensation Scheme*	6·1	—
Training Loans Scheme† (proposed pilot project)	—	5·0
Careers Service Strengthening Scheme	11·6	12·3
Young Workers Scheme‡	41·3	32·0
DE—Schemes and Programmes Administered by MSC		
Community Programme‖	524·2	714·0
Community Industry	23·9	25·2
MSC—Run Schemes and Programmes		
Enterprise Allowance Scheme	76·8	111·1
Voluntary Projects Programme	9·3	12·1
Adult and Occupational Training	256·8	261·7
Work-related non-Advanced Further Education	—	65·0
Youth Training Scheme¶	785·1	781·1
Technical and Vocational Education Initiative	26·2	38·4
Total	2,041·8	2,266·1

* Closed for applications 31 March 1984.
† Provisional figures; pilot unlikely to start before early 1986.
‡ Closes for applications 31 March 1986.
‖ Includes small residual expenditure on former community enterprise programme (closed 2 October 1982) and increases announced in the Budget.
¶ Includes small residual expenditure on earlier schemes including youth opportunities programme (closed 31 March 1983).

Departmental Cash Limits

Mr. Baldry asked the Secretary of State for Employment, whether any changes will be made to the cash limits for his Department's Votes.

Mr. Tom King: Subject to parliamentary approval of the necessary Supplementary Estimate, the cash limit for Class IV, Vote 12 will be increased by £140,000,000 from £725,950,000 to £865,950,000. This is to provide for the expansion of the community programme from 130,000 to 230,000places by June 1986, as announced in the Chancellor's Budget statement on 19 March. The increase will be an addition to the public expenditure planning total.

A supplementary Estimate will also be presented for approval to increase the cash limit for Class Iv, Vote 14 by £573,000 from £13,741,000 to £14,314,000. This is to cover the costs of the work research unit, which was transferred to ACAS on 1 May 1985. Subject to parliamentary approval of a revised Estimate there will be a corresponding reduction of £573,000 from £249,260,000 to £248,687,000 in the cash limit for Class IV, Vote 16.

Youth Training Scheme

Mr. Baldry asked the Secretary of State for Employment whether local results are available from the Manpower Services Commission's survey of leavers from the youth training scheme.

Mr. Peter Morrison: The Manpower Services Commission conducts a regular survey of young people who have left the youth training scheme. Questionnaires are sent to a 15 per cent. sample of leavers in each month some three months after they leave the scheme.

The survey provides national results each month and regional results each quarter. Local results relate to the areas covered by each of the commission's training division's 55 area offices. This is the smallest geographical area for which the survey can provide results.

The first area results cover leavers between July-September 1984. I have arranged for them to be placed in the library. The next set of area results will cover the period October 1984 to March 1985. This is because a 15 per cent. sample of leavers for the next three-month period (October — December 1984) is not large enough to provide reliable area results.

Skillcentres

Dr. Blackburn asked the Secretary of State for Employment whether decisions have been reached on the skillcentre closures proposed in the Skillcentre Training Agency's business plan set out in MSC 84/66; and if he will make a statement.

Mr. Tom King: On 21 February I informed the House in an oral statement that I had asked the Manpower Services Commission to implement the agency's proposals as set out in its business plan. I asked the chairman to make quite sure in doing so that when any closures were involved they should not take place until satisfactory alternative provisions had been identified. I also asked for the fullest consultation to take place with the staff and trade unions, with particular regard to negotiating new working practices designed to help the overall efficiency of the network and avoiding compulsory redundancies wherever possible.

I made it clear that the proposals for the reorganisation of the skillcentres made sense as a necessary step in improving the cost-effectiveness of training programmes, thus enabling substantial expansion in training opportunities, for unemployed as well as employed people, throughout the country.

The chairman of the Manpower Services Commission wrote today to me and to my right hon. Friends the Secretaries of State for Scotland and for Wales to say that he has completed his examination of alternative provision in areas where skillcentre closures were proposed taking account of representations made by hon. Members, local authorities and others. He is satisfied that satisfactory alternative provision exists in all areas. He has also fully re-appraised the business prospects of each centre, including any local offers of support, new business and changes in costs. As a result he has decided, in consultation with my right hon. Friends and myself, to authorise the chief executive of the skillcentre training agency to implement the business plan except for Twickenham skillcentre and the Southampton skillcentre annex where a financial case exists for their retention.

ENVIRONMENT

Asbestos (Faslane Base)

40. **Mr. Bruce** asked the Secretary of State for the Environment whether he is satisfied with the precautions taken by his Department to ensure the safe removal of asbestos adjacent to the Faslane base.

Sir George Young: Yes.

Local Government Reform

Mrs. Roe asked the Secretary of State for the Environment what has been the cost of answering questions to him relating to the abolition of the Greater London council in the current Session.

Mr. Patrick Jenkin: This information is not available. But in my view, the high cost of answering some questions was scarcely warranted by the usefulness of the information sought.

Rate Support Grant

Mr. Soames asked the Secretary of State for the Environment if he proposes to make any changes in the cash limit for the rate support grant Vote.

Mr. Patrick Jenkin: Subject to parliamentary approval of the necessary revised Estimate, the cash limit for Class XVIII, Vote 1 will be reduced by £400,000,000 from £9,172,000,000 to £8,772,000,000. Although I have yet to take formal decisions on the implementation of the abatement of block grant for 1985-86, this reduction flows from the proposals in the "Rate Support Grant Report (England) 1985-86" (approved by the House on 16 January 1985) and takes account of budgeted expenditure figures received from local authorities. It also reflects a recalculation of grant entitlements for 1982-83 in the light of the latest information about outturn expenditure in respect of that year. The proposed altered grant entitlements for 1985-86 and 1982-83 will be subject to the approval by the House of the relevant rate support grant supplementary reports. I hope to lay these reports before the House before the summer adjournment.

Land Registers

Mr. Amess asked the Secretary of State for the Environment what arrangements he is making to enable the public to consult the computerised version of the land registers.

Mr. Macfarlane: I recently opened a new computerised service to make it easier to search the land registers. The service is available for a trial period at the headquarters of my Department, where the public will be able to search the registers for districts in Greater London and my Department's south-western, eastern, north-western and northern regions. The registers for the remaining districts will be made available in due course.

A charge will be made for use of the computerised registers, but the original volumes will continue to be available as hitherto, without charge.

Computer Installations

Mr. Tony Banks asked the Secretary of State for the Environment if he will list all computer installations (hardware and peripherals) in his Department, indicating for each its location, make, type, configuration, operating system, systems soft-ware, age and planned life.

Sir George Young [*pursuant to his reply*, 3 June 1985]: The information has been placed in the Library.

EDUCATION AND SCIENCE

Pilot Schemes

Mr. Soames asked the Secretary of State for Education and Science whether he is yet in a position to announce the terms of reference and membership of the National Steering Committee to oversee the records of achievement pilot schemes.

Sir Keith Joseph: My right hon. Friend the Secretary of State for Wales and I have now set up this committee.

The terms of reference are:

1. To steer, monitor and evaluate the pilot schemes for records of achievement receiving support under the Education Support Grants scheme, with particular reference to the objectives and issues for consideration identified in the Government's July 1984 policy statement.
2. To oversee the work of the professional evaluating team which the Department of Education and Science is to fund from its research budget.
3. To report to the Secretaries of State in the autumn of 1988 on the experience gained and on the implications for introducing records of achievement for all pupils in secondary education in England and Wales, and to prepare draft national guidelines for such records and recording systems.

The members of the committee will be:

Mr. P. A. Clarke, Principal, Harrogate College of Further Education.
Mrs. M. W. Corke, Chairman, The West Midlands Examinations Board.
Mr. J. D. Dutton, Headmaster, Richmond School, North Yorkshire.
Mr. B. W. Fletcher, Deputy Head, St. Thomas' High School, Devon.
Mr. J. L. Glasscock, Divisional Managing Director, Civil Division, British Aerospace plc.
Mr. D. B. Moy, Manager, Senior Management Development, J. Sainsbury plc.
Mr. M. Payn, Chief Adviser, Cumbria County Council.
Mr. J. D. Perry, TVEI Evaluator, School of Education, Leicester University.
Mr. A. Pickavance, Chief Education Officer, Calderdale Metropolitan Borough Council.
Miss M. Reid, Deputy Director, National Foundation for Educational Research.
Mrs. M. Rogers, Deputy Head, The Dene School, Cleveland.
Professor M. Shipman, Roehampton Institute of Higher Education.
Mr. B. H. Whitfield, Managing Director, Hautin Limited.
Mr. R. J. Whittaker, Deputy Secretary, Joint Matriculation Board.

Mr. A. J. C. Edwards and Mr. S. W. Cosser of the Department of Education and Science will be chairman and secretary respectively. Assessors will be provided by the Welsh Office, Her Majesty's Inspectorate and the Secondary Examinations Council.

The committee will be supported by a team of evaluators from the Open University and Bristol University. The joint directors of the team will be Professor Desmond Nuttall of the Open University and Dr. Patricia Broadfoot of Bristol University.

Student Grants

Mr. Soames asked the Secretary of State for Education and Science what student grant levels will be for the academic year 1985-86; and if he will make a statement.

Sir Keith Joseph: Local authorities were informed on 31 May that the main rates of grant will be increased by 3 per cent. in the academic year 1985-86. For undergraduates the main rates will be:

	£
London	2,165
Elsewhere	1,830
Home	1,480

The parental contribution scale will be adjusted upwards in line with earnings, the contributions from those in the middle and upper reaches of the scale will be increased. The minimum maintenance award will be abolished, but parents will not be expected to contribute towards the cost of tuition fees.

For post graduate students in receipt of studentships the main rates will be:

	£
London	3,265
Elsewhere	2,665
Home	1,960

Legionnaire's Disease

Mr. Peter Griffiths asked the Secretary of State for Education and Science what fundamental research into the origins, spread and treatment of legionnaire's disease has been conducted by the Medical Research Council in the last five years; and what research is planned for future years.

Sir Keith Joseph: I understand that since the beginning of 1980 the Medical Research Council has funded four projects on Legionnaire's disease. The total cost of these projects is approximately £136,000. The details of the work are as follows:

Pathogenesis, pathology and disease processes in experimental infection with legionella pneumophila
Disease processes and mechanisms by immunity in experimental legionella pneumophila infection
The use of gas liquid chromatography in the identification of

legionella pneumophila
Monoclonal antibodies to legionella pneumophila and related organisms.

The MRC is also funding other research on respiratory infections which could be relevant to our understanding of Legionnaire's disease. The council is always willing to consider soundly based research proposals for support through its research grant scheme in competition with other applications.

Lower Attaining Pupils Programme

Mr. Soames asked the Secretary of State for Education and Science what proposals he has to evaluate and disseminate the lesson arising from the lower attaining pupils programme; and if he will make a statement.

Sir Keith Joseph: The lower attaining pupils programme, which currently embraces 12 pilot projects in 13 LEAs, began in September 1983. It is therefore in its second academic year. I have invited four more authorities to join the programme in 1985. Some 100 secondary schools are presently involved. The programme is designed principally to improve the educational attainments of pupils aged 14 to 16 for whom present public examinations at 16-plus are not appropriate and who are not benefiting fully from school; and to develop new forms of curricular provision and teaching approaches. Most of the LEAs introduced new approaches in the classroom in September 1983, but four authorities used the first year for planning and inservice training. It is therefore premature to draw substantive conclusions on the outcome of the programme. The Department has commissioned the National Foundation for Educational Research to evaluate the programme as a whole, and each individual project will be evaluated by the authorities concerned. Her Majesty's Inspectorate is also assessing the quality of the work in the schools in the normal ways. The central and local evaluators will increasingly be in a position to draw conclusions from the work. The Department will therefore be sponsoring in the early part of the next academic year, and jointly with the NFER, a conference of participants to make an assessment of progress and to exchange experience. The programme is an important element of the policies set out in the White Paper "Better Schools" (Cmnd. 9469) for raising standards of achievement for pupils of all abilities. I am encouraged by the response of schools and authorities in this demanding and complex area. I also welcome the dissemination of ideas and approaches that has already taken place as a result of initiatives by individual authorities. I hope that the pilot projects will indicate new approaches to giving curricular provision a practical and relevant slant, not only for the target group in question, but across a wider ability range.

Engineering and Technology Programme

Mr. Soames asked the Secretary of State for Education and Science whether he plans to include any public sector institutions of higher education in the engineering and technology programme announced on 19 March.

Sir Keith Joseph: In the light of further advice from representatives of industry, my right hon. Friend the Secretary of State for Wales and I have invited the National Advisory Body for Public Sector Higher Education, in association with the Wales Advisory Body, to offer advice on institutions of particular strength in this area to which resources under the second phase of this programme might be allocated. As in the first phase of the programme, industrial commitment to institutions will be an important criteria for inclusion in the programme.

HOME DEPARTMENT

Primates (Caging)

Mr. Boyes asked the Secretary of State for the Home Department if he intends to support research and development into caging for primates; and if he will make a statement.

Mr. Mellor: I am afraid that at present I have nothing to add to the reply I gave to a question from the hon. Member on 7 May, at column 331.

Cumbria (Alleged Bribery and Corruption)

Mr. Franks asked the Secretary of State for the Home Department if he will call for a report from the chief constable of Cumbria on the progress of inquiries into allegations of attempted bribery and corruption concerning land for private development in the Cartmel and Furness local plan prepared by the planning department of the South Lakeland district council.

Mr. Giles Shaw: I understand from the chief constable of Cumbria that following an allegation of corruption made to his officers on 5 January an investigation was undertaken and a report submitted to the Director of Public Prosecutions, who has recommended that no further action be taken in the case.

PRIME MINISTER

Gainsborough

Q9. **Mr. Leigh** asked the Prime Minister if she will pay an official visit to Gainsborough.

The Prime Minister: I have at present no plans to do so.

Graduates

Q13. **Mr. Andrew F. Bennett** asked the Prime Minister what steps the Government are taking to increase the numbers of graduates in the late 1980s and early 1990s.

The Prime Minister: My right hon. Friend the Secretary of State for Education and Science announced on 19 March, at column 482, a decision to allocate £43 million over the academic years 1985-86 and 1987-88 for the provision of extra places to increase the number of graduates and postgraduates in engineering and technology. "The Development of Higher Education into the 1990s" (Cmnd. 9524) was published on 21 May. It sets out the Government's thinking on future access to higher education and our intention to maintain a distinct emphasis on technological and directly vocational courses at all levels.

Lambeth

Q103. **Mr. John Fraser** asked the Prime Minister if she will pay an official visit to the Lambeth inner city partnership area.

The Prime Minister: I have at present no plans to do so.

Energy Efficiency

Mr. Speller asked the Prime Minister if she is satisfied with co-ordination between the Departments of Energy and the Environment concerning energy efficiency in buildings; and if she will make a statement.

The Prime Minister: Yes. I refer my hon. Friend to the reply that I gave to the hon. Member for Orkney and Shetland (Mr. Wallace) on 19 April at columns 293-94.

European Cup Final (Relief Fund)

Mr. Chope asked the Prime Minister how the Government's contribution to the relief fund, which was offered in her letter to Signor Craxi following the disaster at the European Cup Final, will be financed.

The Prime Minister: A Supplementary Estimate on the Vote for International Subscriptions, Special Payments etc. (Foreign and Commonwealth Office) (Class II, Vote 2) will be presented in due course to cover the urgent expenditure on this new service. Pending parliamentary approval of this Supplementary Estimate, the Government's contribution will be financed by a repayable advance from the Contingencies Fund. This additional expenditure will be charged to the Reserve and therefore does not add to the planned total of public expenditure.

Engagements

Mr. Leigh asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

Mr. Peter Bruinvels asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

Mr. Greenway asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

Mr. Marlow asked the Prime Minister if she will list her official engagements for Tuesday 4 June.

The Prime Minister: This morning I had meetings with ministerial colleagues and others. In addition to my duties in this House I shall be having further meetings later today. This evening I hope to have an audience of Her Majesty the Queen.

AGRICULTURE, FISHERIES AND FOOD

Food Additives

Mr. Coombs asked the Minister of Agriculture, Fisheries and Food what research his Department is currently undertaking into the dietary effect of food additives.

Mrs. Fenner: Research into the potential effects of additives on humans is presently funded by this Ministry at various centres in the United Kingdom. The objectives of this research are to determine whether or not there are validated adverse reactions to food additives both in the general population and in a group of asthmatic children; to investigate the relationship between the clinical effects and food additives; and to elucidate the physiological changes, if any, which have occurred.

Mr. Fry asked the Minister of Agriculture, Fisheries and Food (1) what foods are prohibited from having E320 and E321 additives in them;

(2) if he will list those foods for family consumption which allow additives E320 and E321.

Mrs. Fenner: The use of additives E320 (Butylated hydroxyyanisole) and E321 (Butylated hydroxtoluene) is strictly controlled by the Antioxidants in Food Regulations 1978 (SI 1978 No. 105) as amended. Schedule 3 of the regulations defines the permitted uses and specified levels of E320 and E321 in a number of food ingredients including dairy products for manufacturing, and anhydrous edible oils and fats. Their use in food intended for babies or young children is specifically prohibited with the exception of certain vitamin A preparations.

Mr. Dykes asked the Minister of Agriculture, Fisheries and Food if, with a view to carrying out the recommendation contained in paragraph 33 of the report by the Food Additives and Contaminents Committee on the "Review of Sweeteners in Food", published in 1982 (FAC/REP/34), he will now undertake a survey of the number of food and drink products currently being, or shortly to be, marketed in the United Kingdom which contain the intense sweetener Aspartame.

Mrs. Fenner: No. As I have explained to my hon. Friend before, most recently on 18 March 1985, at column *403*, information on the intake of all permitted sweeteners will be collected and reviewed within the next four years. The Food Additives and Contaminants committee endorsed the recommendation of the Committee on Toxicity of Chemicals in Food, Consumer Products and the Environment that the collection of this information should be carried out when sufficient time has been allowed for the market to stabilise. The market is still developing and it would be inappropriate to start a review yet.

EC (Warehouses)

Mr. Ron Davies asked the Minister of Agriculture, Fisheries and Food if he will list all the European Economic Community warehouses and their locations in Wales; and what amount of what product is being stored there.

Mr. Jopling: Intervention stocks in Wales on 30 April, the latest date for which figures are available, were as follows:

	Tonnes
Beef	
Rhyl	186
Cardiff	790
Skimmed Milk Powder	
St. Clears	960
Llandysul	979
Bedwas	2,259
Butter	
Cardiff	8,563
Swansea	2,178
Newport	675
Rhyl	948
Milford Haven	480
Whitland	280

Beer (Imported Malt)

Mr. Sheerman asked the Minister of Agriculture, Fisheries and Food what percentage of British brewed beer is brewed from imported malt.

Mr. MacGregor: No information is available on the amount of imported malt used in United Kingdom brewing. Malt imports in recent years have accounted for around 2 to 4 per cent. of malt supplies on the United Kingdom market.

French Malt

Mr. Sheerman asked the Minister of Agriculture, Fisheries and Food what action he is taking in the European Community about French subsidies to malt supplied to British brewers.

Mr. MacGregor: The EC Commission is responsible for monitoring all aids given by member states with a view to ensuring they are compatible with Community rules. We are constantly on the alert for national aids to agriculture that appear to breach the treaty. I am fully prepared to refer substantiated cases to the Commission.

Mr. Sheerman asked the Minister of Agriculture, Fisheries and Food what representations he has received concerning French malt producers supplying British brewers; and if he will make a statement.

Mr. MacGregor: None. We have a two-way trade in malt with France and our exports have exceeded our imports in each of the past three years.

WALES

Skimmed Milk (Intervention Stocks)

Mr. Ron Davies asked the Secretary of State for Wales, pursuant to his answer of 8 March 1985, *Official Report*, columns *620-1*, concerning the levels of skimmed milk held in an intervention store in Bedwas, why the information requested was denied on grounds of commercial confidentiality.

Mr. Nicholas Edwards: I regret that the withholding of the information requested on 8 March 1985 was mistaken. The amount of skimmed milk stored at Bedwas on the given dates as requested is as follows:

	Tonnes
31 May 1985	2,210
28 February 1985	5,530
30 November 1984	9,979
31 May 1984	9,976

TRADE AND INDUSTRY

Confectionery

Mr. Sumberg asked the Secretary of State for Trade and Industry (1) what action he is proposing to take to protect British export trade against the possible extension of higher United States duties or quotas on various European Community products including United Kingdom confectionery;

(2) if he will make a statement on the implications for the United Kingdom of the investigation being carried out by the United States International Trade Commission into the desirability of extending United States quotas on sweetened cocoa powder to other chocolate and confectionery products.

Mr. Channon: In January of this year the United States extended the scope of existing import restrictions on certain sugars and sugar-containing products. This was an interim measure, pending the outcome of an investigation by the US International Trade Commission of imports of products containing sugar. It provoked a sharp response from the United States' international trading partners, including the European Commission, within whose competence such matters lie. My right hon. Friend the Secretary of State for Trade and Industry took the opportunity of his visit to Washington last month to repeat these concerns. Subsequently, on 17 May, the US Government decided to lift some of the restrictions imposed in January with effect from 19 May.

Those of the new restrictions which remain in force after 19 May are of limited concern to United Kingdom exporters, though the Government consider them to be without justification. But among other products under consideration by the ITC are a number in which we have a substantial export trade to the United States, in particular sugar confectionery, chocolate confectionery and preserves and marmalades. This trade could be seriously affected by the imposition of quota restrictions or increases in duties. We, and our European Community partners, will be urging the US Government not to give in to domestic protectionist pressures but to adhere to the commitment given at last month's Bonn economic summit on the avoidance of protectionism.

Export Credits Guarantee Department

Mr. Gould asked the Secretary of State for Trade and Industry to what factors, and in what proportions, he attributes the £400 million loss recorded by the Export Credits Guarantee Department; and if there is any indication that the fraud of which the Export Credits Guarantee Department, with other insurers, has been the victim and which is currently being investigated by the fraud squad, played any significant part.

Mr. Channon: ECGD's cash deficit of £392·5 million at 31 March 1985 reflects the Department's recent record claims payments, which have far outstripped premium and interest income. About 20 per cent. of these claims have arisen from private buyer default; the balance is principally due to shortages of foreign exchange in the major debtor countries. It is expected that these latter claims will be recovered in accordance with the terms of international debt rescheduling agreements. In the interim, ECGD will pay interest at commercial rates on its borrowings from the Consolidated Fund. I have seen no evidence which suggests that fraud has been a significant contributory factor.

Local Enterprise Agencies

Mr. Peter Bruinvels asked the Secretary of State for Trade and Industry if he will publish in the *Official Report* all local enterprise agencies currently operating, giving their full address and details of jobs placed.

Mr. Trippier: I shall reply to my hon. Friend as soon as possible.

Small Firms Centres

Mr. Peter Bruinvels asked the Secretary of State for Trade and Industry if he will list all small firms centres giving the number of inquiries handled in each of the past three years; and if he will make a statement.

Mr. Trippier: The numbers of inquiries handled by each of the Department's small firms centres are as follows:

Small Firms Centre	*1982-83*	*1983-84*	*1984-85*
Region			
Birmingham (West Midlands)	24,527	29,824	26,587
Bristol (South West)	24,549	28,757	24,746
Cambridge (Eastern)	22,792	25,699	23,228
Leeds (Yorkshire and Humberside)	25,901	27,172	25,050
London (South East)	41,741	58,362	42,300
Manchester/ Liverpool (North West)	35,377	39,345	29,998
Newcastle (North West)	19,860	21,405	17,210
Nottingham (East Midlands)	23,596	29,049	27,147
Reading* (Southern)	281	28,658	25,825

* Reading small firms centre opened in March 1983

The small firms centres have continued to meet successfully the demands placed upon them by small businesses. The generally higher level of inquiries in 1983-84 is believed to have resulted mainly from the major publicity campaign for the small firms service in early 1983 and the 1983 Budget, which included a number of measures to help small firms. Computerisation within the small firms centres, completed early this year, and the repackaging of the Department's "Support for Business" schemes have improved the speed and quality of the service the small firms centres can offer.

Local Enterprise Week

Mr. Peter Bruinvels asked the Secretary of State for Trade and Industry if he will report on the recent Local Enterprise Week giving details of each undertaking known to his Department; and if he will make a statement.

Mr. Trippier: I shall reply to my hon. Friend as soon as possible.

Mr. Ian MacGregor

Mr. Boyes asked the Secretary of State for Trade and Industry if the performance fee for Mr. MacGregor's period at British Steel has yet been determined; what criteria are being used; and if he will make a statement.

Mr. Norman Lamont: I refer the hon. Member to my reply of 16 November 1984, at column 370, on this subject. The decision of the review committee will be made known after BSC's accounts for the year to end-March 1985 are available. Copies of the committee's criteria were placed in the Library of the House on 15 April 1981.

British Telecom (Shares)

Mr. Gould asked the Secretary of State for Trade and Industry whether City firms involved in the sale of British Telecom shares, as underwriters and in other capacities, had any privileged access to the shares; and whether the same limitations as applied to the general public, in terms of the maximum number of shares allotted to each purchaser, also applied to such firms and their employees.

Mr. Butcher: I shall reply to the hon. Member as soon as possible.

Beer

Mr. Sheerman asked the Secretary of State for Trade and Industry if he will introduce regulations to prevent beer made in Britain from malt imported at subsidised prices from France being marketed with labels describing it as British beer.

Mr. Fletcher: I see no case for a measure of this kind.

Burdens on Business Report

Mr. Yeo asked the Secretary of State for Trade and Industry when he intends to act on the proposals in the burdens on business report relating to accounting and audit requirements for small companies.

Mr. Fletcher: My Department published a consultative document today inviting comments on those proposals and other options, including the exemption of all small companies from the statutory audit requirement. Comments are requested by 30 September. The Government will consider changes in present requirements in the light of the consultation. Copies of the consultative document have been placed in the Library.

Rolls-Royce (Privatisation)

Mr. Chope asked the Secretary of State for Trade and Industry when he intends to appoint external advisers in connection with the privatisation of Rolls-Royce.

Mr. Pattie: It remains the Government's intention to see Rolls-Royce returned to the private sector during the course of the present Parliament. I welcome the company's results for 1984, which show a return to profit and, although a longer period of profitability will be required before the company can be returned to the private sector, I intend to appoint a merchant bank shortly to give preliminary advice to the Department in connection with the company's privatisation.

OVERSEAS DEVELOPMENT

Ethiopia (Port Charges)

Mr. Michael Forsyth asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement regarding the levying of port charges on emergency food packages by the Ethiopian Government.

Mr. Raison: The Ethiopian Maritime and Transit Services Corporation levies port charges on all aid goods. If these are sent to the Relief and Rehabilitation Commission they attract a concessionary agency fee of $3·81 per metric tonne. If not, they attract the full commercial rate averaging $12·60 per metric tonne. We

support the efforts of the World Food Programme to negotiate a reduction in the agency fee for all relief consignments. Overall, Ethiopian port charges are generally in line with those at other African ports.

SCOTLAND

Fife Regional Council

Mr. Henderson asked the Secretary of State for Scotland if he will estimate the differences in rate poundage between Fife regional council's actual budget and a budget conforming to guidelines; and what percentage reduction in the council's expenditure would be necessary to reduce the budget to conform with the guidelines.

Mr. Ancram: If Fife regional council had conformed to its guideline in 1985-86, its rate poundage would have been 50p instead of 54p. A 4·8 per cent. reduction in planned expenditure would enable the council to meet its guideline.

Mr. Henderson asked the Secretary of State for Scotland what is the position of Fife in a list of regional councils in order of rate poundage charged in 1975 and 1985, respectively.

Mr. Ancram: In 1975-76, Fife regional council had the seventh highest rate poundage among regional councils, in 1985-86 the highest.

Mr. Henderson asked the Secretary of State for Scotland if he will take selective action to return to ratepayers the product of expenditure in excess of guidelines of Fife regional council.

Mr. Ancram: My right hon. Friend has to have close regard to the precise terms of the statute before initiating action against a local authority on the grounds that it is planning excessive and unreasonable expenditure. Although Fife's planned percentage excess over guideline is the highest of any regional council and will attract a severe RSG penalty, my right hon. Friend does not consider that the authority is planning excessive and unreasonable expenditure which would justify selective action in terms of section 5 of the Local Government (Scotland) Act 1966.

Labour Statistics

Mr. Wilson asked the Secretary of State for Scotland if he will publish in the *Official Report* a list of travel-to-work areas showing the latest percentage unemployment in each; and if he will attach corresponding figures for October 1982, claimant based, and October 1982, registration based.

Mr. Allan Stewart: I refer the hon. Member to my right hon. Friend's letter of 22 October 1984. The information is available in the Library. It should be noted that the areas to which the latest available rates relate do not correspond with those for October 1982 because of the redefinition of the travel-to-work areas in August 1984.

Mr. Wilson asked the Secretary of State for Scotland what has been the percentage increase in unemployment in Scotland over the past 10 years.

Mr. Allan Stewart: The percentage increase in unemployment in Scotland, based on annual averages between 1974 and 1984, is estimated to have been 330 per cent.

Mr. Wilson asked the Secretary of State for Scotland how many people under the age of 21 years in *(a)* Scotland, *(b)* Glasgow, *(c)* Edinburgh, *(d)* Aberdeen and *(e)* Dundee have never had a job since leaving school.

Mr. Allan Stewart: The information is not available in the precise form requested. However, unemployment figures for school leavers, who are defined as people who have not entered employment since leaving full-time education, are available in the Library for the areas requested by the age categories of under 18, aged 18, aged 19 and over.

Mr. Wilson asked the Secretary of State for Scotland how many school leavers were unemployed in Scotland in January 1984 and January 1985.

Mr. Allan Stewart: I refer the hon. Member to my right hon. Friend's letter of 22 October 1984. The information requested is available in the Library.

Forestry

Mr. Simon Hughes asked the Secretary of State for Scotland whether he intends to alter the balance of public subsidy away from the establishment of upland plantations towards the management of existing farm woods.

Mr. John MacKay: No. The Government will continue to give support to both the establishment of upland plantations and the management of existing farm woods.

FOREIGN AND COMMONWEALTH AFFAIRS

NATO (Greece and Turkey)

41. **Mr. Hickmet** asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement upon the effect upon the North Atlantic Treaty Organisation's south eastern flank of relations between Greece and Turkey.

Mr. Renton: We very much regret any differences which arise between our two allies over the issue and hope they can soon be resolved in order to minimise any disruptive effect on NATO business.

Citizenship of Zimbabwe Act 1984

Mr. Cyril D. Townsend asked the Secretary of State for Foreign and Commonwealth Affairs what advice his Department is giving to British citizens affected by the Citizenship of Zimbabwe Act 1984.

Mr. Rifkind: They are being advised that the Zimbabwean legislation abolishes dual citizenship with effect from 1 December 1985. Similar restrictions on the possession of another nationality are contained in the laws of many countries, including a number in the Commonwealth. It is for each individual who holds both British and Zimbabwean citizenship to decide what course to adopt.

I understand that, under Zimbabwean law and regulations dual citizens who wish to opt for mono-Zimbabwean citizenship must sign a declaration to that effect in the Zimbabwean Registrar General's Department. If they have a British passport, they are obliged to submit it to the Zimbabwean authorities, who will subsequently return it to the British high commission. Dual British-Zimbabwean citizens who do not take this action will, in Zimbabwean law, become mono-British citizens on 1 December 1985.

Under the British Nationality Act 1981, British citizenship can be lost only by those who voluntarily renounce it and whose declaration of renunciation is registered at the Home Office in accordance with the British Nationality Act 1981. A person who renounces British citizenship in order to retain or acquire some other citizenship or nationality is entitled to re-acquire it by registration, but this provision may be taken advantage of only once. International practice precludes British consular protection being afforded to dual British/Zimbabwean citizens in Zimbabwe and this will of course continue to be the case for those who opt for Zimbabwean citizenship. Persons who renounce their British citizenship will be ineligible for British consular protection in any country.

United Kingdom—USSR Hot Line

Mr. Boyes asked the Secretary of State for Foreign and Commonwealth Affairs what technology is used in the hot line between Britain and the Union of Soviet Socialist Republics.

Mr. Luce: The technology used enables the exchange of printed messages in the language of the originator over cable or radio channels which are directly and continuously available between the two capitals.

Mr. Boyes: asked the Secretary of State for Foreign and Commonwealth Affairs, pursuant to paragraph 116 of the defence Estimates, whether the hot line between Britain and the Union of Soviet Socialist Republics *(a)* requires modernisation, *(b)* is proof against the electro-magnetic pulse generated by a number of kiloton range nuclear explosions in central and northern Europe and *(c)* is regularly tested.

Mr. Luce: *(a)* In its present form the hot line is adequate for the exchange of printed messages for which purpose it was established. The scope for use of other systems is constantly under review; *(b)* No; *(c)* Yes.

NORTHERN IRELAND

Student Awards

Mr. Hume asked the Secretary of State for Northern Ireland (1) what aspects of student travel awards he is prepared to review; and what financial or adminstrative limitations there will be on such a review;

(2) what consideration he has given to the recent assessment of the impact of changes in student travel award scheme by the Association of Education and Library Boards; and if he will make a statement.

Mr. Scott: My Department felt unable to accept the validity of the figures presented to me by the Association of Education and Library Boards. For this reason—and with the full consent of the association—officers of the Department in collaboration with the boards are currently engaged in an exercise which will, in effect, extend earlier sample surveys to a much fuller review of available data.

I have already given an assurance that if the evidence arising from the survey shows clearly that, as a direct consequence of the introduction of the flat rate travel grants, Northern Ireland students are generally in a worse position than their counterparts in England and Wales, I shall be prepared to re-examine the situation with a view to seeing what, if anything, might reasonably be done to alleviate their position.

Mr. Hume asked the Secretary of State for Northern Ireland what funds his Department has allocated for discretionary student awards, higher value and lower value, for use by each of the education and library boards and by his Department for the next academic year.

Mr. Scott: Funds are allocated to education and library boards on a financial year basis. The approved financial schemes for the current financial year allow for the following provision for discretionary awards:

	£000's
Belfast	609
North-Eastern	851
South-Eastern	612
Southern	660
Western	723

The distribution of these funds between higher value and lower value awards is a matter for the education and library boards and the actual distribution for the next academic year has yet to be determined.

Mr. Hume asked the Secretary of State for Northern Ireland if he will make a statement outlining the number of discretionary awards allocated by each of the education and library boards and his Department for the current academic year indicating the numbers of higher value and lower value awards, the numbers of minimum and maximum awards, the numbers of living at home and living away from home awards, the numbers of applications for awards and the total amount allocated by each awarding agency.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Housing Benefits

The Rev. Martin Smyth asked the Secretary of State for Northern Ireland if he will make a statement about the review being carried out by officials of housing benefits in Northern Ireland.

Mr. Chris Patten: I shall reply to the hon. Gentleman as soon as possible.

SOCIAL SERVICES

Griffiths Committee

39. **Mr. Pavitt** asked the Secretary of State for Social Services if he will publish in the *Official Report* a table showing the list of recommendations of the Griffiths committee which he has approved, those he is still considering and those he has rejected.

Mr. Kenneth Clarke: We have accepted the main aims of the report of the National Health Service management inquiry team led by Mr. Roy Griffiths, and all the team's recommendations are currently being implemented. Within our Department we have established the Health Services Supervisory Board and NHS Management Board, as recommended by the team. Members of the NHS Management Board have been drawn from the private sector, the National Health Service and the civil service. Health authorities have also made considerable progress in putting themselves in a position to carry out the general management function. To date 13 regional and 166 district general managers have been appointed and work is under way to implement new management structures, develop management budgeting and strengthen accountability in line with the NHS management inquiry report.

Disabled People

Mr. Deakins asked the Secretary State for Social Services to what extent the needs of the disabled have been taken into account in the social security reviews, especially in relation to single payments for those in receipt of supplementary benefit.

Mr. Newton: Benefits specifically for sick and disabled people were not included in the social security review, the outcome of which was published yesterday in a Green Paper, "Reform of Social Security", (Cmnds. 9517-9519). The Green Paper, however, makes it clear that the Government's objective in this field, as in others, is to move towards a more coherent system. Useful progress has already been made by such measures as the ending of the invalidity trap and the introduction of severe disablement allowance, and we have set in hand a major new survey to obtain up-to-date information about the extent and effects of disablement. The results of this survey will enable these benefits to be reviewed in their turn.

Meanwhile, the importance the Government attach to special needs of disabled people is reflected in the Green Paper proposals relating to other benefits. The structure of the proposed new income support scheme includes a special premium for long-term sick and disabled people, which will also be reflected in the new simpler housing benefit arrangements. A more generous disregard of earnings will also be applied in the new income support scheme.

Nursing Homes (Member's Correspondence)

Mr. Mudd asked the Secretary of State for Social Services when the hon. Member for Falmouth and Camborne may expect a reply to his letter of 11 April, on behalf of Mr. D. L. Jones and Mrs. B. M. K. Wild, regarding his Department's contributions towards charges for nursing homes, to the hon. Member for Oxford, West and Abingdon (Mr. Patten).

Mr. Whitney: I replied to my hon. Friend today.

Limited List Prescribing

Dr. Roger Thomas asked the Secretary of State for Social Services if he will extend the availablity of mucolytic and expectorant medications available under the limited lists of drugs available for respiratory diseases in areas with an unusually high incidence of such diseases, some industrially induced; and if he will make a statement.

Mr. Kenneth Clarke: We will shortly be setting up a committee to keep the selected list under review, to ensure that it continues to meet all clinical needs at the lowest possible cost to the National Health Service. One of the first tasks of this committee will be to reconsider the position of mucolytics and expectorants if they are asked to do so by the manufacturers.

District Health Authorities

Mr. Pavitt asked the Secretary of State for Social Services how many managers have now been appointed for district health authorities; and of these how many were nurses.

Mr. Kenneth Clarke: To date, 166 of the 191 district health authorities have appointed general managers, three of whom are nurses. In addition, one of the 13 regional general managers appointed so far is a nurse. We remain convinced of the vital need to attract and appoint nurses of the required management ability to posts in general management. We are pressing authorities to continue to pay particular attention to this as they move towards filling general manager posts at unit level.

Newcastle Office (Dispute)

Mr. Boyes asked the Secretary of State for Social Services what was the total cost of the strike at the Newcastle social security centre of computer operators in 1984; if he will break down the cost into its component parts; and if he will make a statement.

Mr. Newton: Our latest estimate of the cost of the strike in 1984-85 is £145 million made up as follows:

	£ million
(a) Payments to the Post Office for operating the emergency payment procedures	110
(b) Extra staff and overtime in this Department and the Department of Employment	34
(c) Publicity, extra postage on payments etc.	5
(d) Offset by savings on salaries of the strikers and on postage of order books from Newcastle	4

National Insurance Appeals Tribunals

Mr. Alfred Morris asked the Secretary of State for Social Services what consultations were held prior to the recent change in the composition of national insurance appeals tribunals; what was the purpose of the change; what its effect has been; what representations he has received on this matter; and if he will make a statement.

Mr. Newton: The changes in the procedures for selecting members of social security appeal tribunals, made under section 16 of the Health and Social Security Act 1984, were designed to increase the range of representation on tribunal panels.

The Council on Tribunals was formally consulted and the Department was aware of the views of the Trades Union Congress and the Confederation of British Industry. Altogether some 100 representations were received from interested parties on this issue.

The president of the social security appeal tribunals has made known his wish to create broadly based panels of tribunal members containing not only representatives from both sides of industry but also from groups representing, for example, disabled people, ethnic minorities, women and pensioners who either live or work in the area. It is too early as yet to say what effect the changes have had on the composition of tribunal members since the term of appointment is for five years. I am advised that the president maintains regular contact with representative bodies on the selection of panel members and I am not aware of any difficulties encountered in the selection process.

Moorfields Eye Hospital (Glaucoma Patients)

Mr. Pavitt asked the Secretary of State for Social Services if he will publish in the *Official Report* the number of patients suffering from glaucoma treated as outpatients, and the number treated as inpatients, at Moorfields eye hospital in each of the last five years.

Mr. John Patten: The information requested is not available centrally. The hon. Member may wish to write to the chairman of the Moorfields eye Hospital special health authority, who may be able to give him the required information.

Doctors (Expenses)

Mr. Hickmet asked the Secretary of State for Social Services (1) if he will list those matters in respect of which general practitioners receive indirect expenses; and if he will quantify the average value of each of the same to individual general practitioners;

(2) what instructions he has given to family practitioner committees in relation to the direct and indirect expenses of part-time general practitioners; and if he will make a statement;

(3) pursuant to his reply of 25 March, *Official Report*, column 97, and 4 April, *Official Report*, column 767, if he will list and describe in the fullest reasonable particularity the nature and value of the individual expenses incurred by general practitioners.

Mr. Kenneth Clarke [*pursuant to his reply*, 16 May 1985, c. *214*]: The remuneration arrangements are designed to reimburse to general medical practitioners as a body that portion of the expenses they incur which is appropriate to the provision of general medical services. Some of these expenses are paid in whole or in part directly to those incurring them. These include:

Estimated average payment per general practitioner in England in 1984-85

	£
1. Rent and Rates	2,287
2. Ancilliary staff salaries (70 per cent.) and employers NI contributions	4,971
3. GP trainees' salaries and associated costs	1,146
4. The cost of employing locums during sickness, confinement or prolonged study leave	67
5. The cost of drugs and appliances dispensed by doctors	3,965
6. Costs under the doctors' retainer scheme	11

That part of the expenses listed which is not directly reimbursed and all other expenses incurred in providing general medical services are reimbursed indirectly through fees and allowances. These include expenses such as car running costs and other travelling expenses, heating, lighting, postage, medical and surgical supplies and equipment, telephone, stationery, non-structural repairs and maintenance, computers, furnishings, office machinery, salaries of medical assistants, payments to locums other than those employed in circumstances when the direct reimbursement of these costs is appropriate and payments for the use of deputising services.

The total amount of the expenses which are to be reimbursed indirectly is determined from information obtained in confidence from the Inland Revenue for a sample of general medical practitioners and is built into fees and allowances by the Review Body on Doctors and Dentists Remuneration. The review body concluded that on average £10,830 per doctor in Great Britain should be reimbursed indirectly in 1984-85. It is not possible to attribute this to the individual expenses of individual doctors. The average amount paid to doctors in England in 1984-85 through fees and allowances, together with the direct reimbursements listed above and the average improvement grant paid of £138, was £46,280.

The criteria governing the eligibility of general medical practitioners for the direct reimbursement of expenses and the reimbursement of fees and allowances (many of which include an element for expenses not otherwise reimbursed), and where appropriate the rate, are laid down in the "Statement of Fees and Allowances".

Dispensing Doctors (Discount Inquiry)

Mr. Hickmet asked the Secretary of State for Social Services, pursuant to his reply of 16 April, *Official Report*, column 166, why his Department undertook a dispensing doctors' discount inquiry in 1983; what were its terms of reference; what were its conclusions; if he will place a copy in the Library; and if he will make a statement;

(2) what steps his Department is taking to ensure that dispensing doctors account for all discounts they receive as from 1 April from drugs' manufacturers and wholesalers.

Mr. Kenneth Clarke [*pursuant to his reply*, 16 May 1985, c. *218*]: In their twelfth report the Doctors' and Dentists' Review Body invited the health Departments and the profession to consider whether there should be some adjustment to their recommendations to take account of the differential between the net incomes of dispensing and non-dispensing doctors. As a result the inquiry was conducted with terms of reference to establish if, and if so by how much, dispensing doctors were able to purchase their drugs below the value at which they were reimbursed by prescription pricing bodies.

The inquiry found that, on the basis of purchases for the months of April to June 1983, there were wide variations in the size of discount obtained, but that dispensing doctors as a group were able to obtain discount averaging about 5 per cent. General medical practitioners' practice accounts have always shown the actual cost of drugs purchased so that, as I explained in my reply to my hon. Friend on 14 March, at columns *243-44*, actual expenses due to the profession as a body are, and always have been, calculated after deduction of discount. The amount of expenses distributed to the profession as a whole is therefore correct whatever the average discount adjustment. To ensure that the reimbursement of drug costs to

individual doctors matches as nearly as possible costs actually incurred it may be necessary to repeat the discount inquiry from time to time.

This inquiry was jointly commissioned by the Health Departments and general medical services committee of the British Medical Association. The doctors concerned, who were disclosing details of their remuneration and business practices, were given an undertaking that the information they supplied would be treated in the strictest confidence and used only for the purposes of the inquiry. Their suppliers were given a similar undertaking. It would not therefore be appropriate to place a copy in the Library.

Legionnaire's Disease

Mr. Dobson asked the Secretary of State for Social Services if he will make a statement on Government-funded research into legionnaire's disease, giving details of each project funded since 1979, including the grant or budget, the number of researchers involved, the date of commencement of the project and the date of completion in the case of each project.

Mr. Kenneth Clarke [*pursuant to his reply*, 16 May 1985, c. *255*]: Since 1979 research into Legionnaire's disease has been carried out in the laboratories of the Public Health Laboratory Services and in universities. Available information on Government-funded research is in the table.

	Project Title	*Research Institute*	*Funded by*	*Grant £*	*Date commenced*	*Date completed*
1.	Legionnaires disease: Pathogenesis, Pathology and disease processes in experimental infection with legionella pneumophilia	Department of Pathogenic Microbes, PHLS Centre for Applied Microbiology and Research, Porton Down	MRC	36,067	1982	Continuing
2.	Legionnaires disease: disease processes and mechanisms of immunity in experimental legionella pneumophilia infection	As above	MRC	33,906	1983	Continuing
3.	The use of gas liquid chromatography in the identification of legionella pneumophilia	Department of Bacterial Metabolism, PHLS, Colindale Avenue, London	MRC	37,656	1980	1984
4.	Monoclonal antibodies to legionella pneumophilia and related organisms	Sir William Dunn School of Pathology, Oxford	MRC	27,987	1981	1984
5.	To obtain further information about the incidence of legionnaires disease in Scotland	University of Glasgow, Department of Infectious Diseases, Ruchill Hospital, Glasgow	SHHD	5,933	1979	1980
6.	Investigation into legionnaires disease and other infections among package tourists and other travellers (extension of No. 5)	As above	SHHD	5,746	1980	1982
7.	Study of legionella pneumophilia in water systems and air conditioning equipment	Communicable Disease Surveillance Centre	DHSS	98,859	1981	1984

Note: Since the number of researchers required for a project may vary during its progress it is not practicable to give detailed information.

DEFENCE

Crisis Management

3. **Mr. McKelvey** asked the Secretary of State for Defence what improvements have been made to his Department's plans for crisis management since April 1982.

Mr. Stanley: Crisis management arrangements are regularly reviewed and exercised. It would be neither practicable nor, on security grounds, possible to list the detailed changes which have been made to crisis management plans since April 1982. However, I refer the hon. Member to paragraphs 204 to 206 of "The Falklands Campaign: The lessons" (Cmnd. 8758).

Royal Small Arms Factory, Enfield

12. **Mr. Eggar** asked the Secretary of State for Defence if he will make a statement on the future likely work load of the Royal small arms factory, Enfield.

Mr. Butler: The Royal small arms factory at Enfield is now preparing for production of the first batch of the new infantry small arms weapon system, SA 80. This order is for 175,000 weapons and will provide the factory with a good base load for the next four years. There are a number of other Ministry of Defence orders in prospect. However, as with the other divisions of Royal Ordnance plc, the future work load of Enfield will depend on its ability to win orders from MOD and elsewhere in a competitive and commercial environment.

Falkland Islands

15. **Mr. Parry** asked the Secretary of State for Defence if he will make a statement on his visit to the Falkland Islands between 11 and 14 May.

Mr. Stanley: I refer the hon. Member to the reply I gave to the hon. Member for Falkirk, West (Mr. Canavan) on 24 May at column *599*.

Sea Wolf Missile Launchers

16. **Mr. Leigh** asked the Secretary of State for Defence how many lightweight Sea Wolf missile launchers it is intended that there should be in the type 23 procurement programme.

Mr. Lee: None. As my right hon. Friend told the House on 12 April 1984, at columns 527-39, our intention is to fit the vertical launch version of Sea Wolf to the type 23 frigate. This weapon is currently undergoing development.

Aish and Dowty Rotol Companies (Defence Procurement)

18. **Mr. Campbell-Savours** asked the Secretary of State for Defence what progress is being made in his negotiations related to defence procurement with Aish and Company and Dowty Rotol and Company.

Mr. Lee: We have reached agreement with Aish and Co. concerning a number of contracts and sub-contracts on which post costing investigations have been completed.

Ministry of Defence police investigations concerning Dowty Rotol Ltd. have just been completed and their report is being considered within the Department.

General Belgrano

19. **Mr. Dalyell** asked the Secretary of State for Defence if he is satisfied that he had seen all Government papers relating to the sinking of the General Belgrano prior to his speech in the House on that subject on 18 February.

Mr. Stanley: My right hon. Friend has no reason to suppose that he was not fully briefed on the main facts relating to the sinking of the General Belgrano before he made his speech on 18 February. I understand that there are a great number of such documents and it would not have been practical for my right hon. Friend to have read every single one himself.

Central Ordnance Depots

20. **Mr. Baldry** asked the Secretary of State for Defence if he is satisfied with the work of the central ordnance depots.

Mr. Lee: The Army's central ordnance depots give a very good service. However, as in all areas of defence, we are always looking for means of improving performance and value for money.

Departmental Houses (Basingstoke)

21. **Mr. Hunter** asked the Secretary of State for Defence how many houses formerly owned by his Department in the Basingstoke constituency have been sold to tenants.

Mr. Lee: Twenty-six houses in my hon. Friend's constituency have been sold to tenants since 1973. The freeholds of a further 40 properties, previously sold on a leasehold basis have been purchased by the tenants. Others are in the process of being offered for sale.

European Fighter Aircraft

22. **Mr. Robert Atkins** asked the Secretary of State for Defence if he will make a statement on the progress of international discussions on the proposed European fighter aircraft.

Mr. Butler: I have nothing to add to the answer I gave to my hon. Friend and to my hon. Friend the Member for Beverley (Sir P. Wall) on 23 May at columns *499-500*.

29. **Mr. Stan Thorne** asked the Secretary of State for Defence whether he will give further information regarding the future of the European fighter aircraft project.

Mr. Butler: I have nothing to add to the answer I gave to my hon. Friends the Members for Beverley (Sir P. Wall) and for South Ribble (Mr. Atkins) on 23 May at columns *499-500*.

Nuclear Warheads (Transportation)

23. **Mr. Roy Hughes** asked the Secretary of State for Defence what recent representations he has received about the hazard to the civilian population of transportable nuclear warheads.

Mr. Stanley: The Ministry of Defence has received a number of letters from hon. Members, local authorities and members of the public about the safety of nuclear weapons in transit.

Trident Missiles

24. **Mr. Nellist** asked the Secretary of State for Defence if he is satisfied with the progress of the Trident programme.

Mr. Butler: Yes.

30. **Mr. Terlezki** asked the Secretary of State for Defence what is his most recent estimate of the number of jobs which will be created in the United Kingdom by the Trident D5 programme.

Mr. Butler: As I stated in my reply to the hon. Member for Kingston upon Hull, North (Mr. McNamara) on 1 April 1985, at column *511*, the British Trident programme is expected to create, on average, approximately 9,000 job opportunities directly and 7,000 indirectly throughout the period of procurement, with a total of 170,000 man years of direct employment in the United Kingdom and 130,000 indirect man years over the programme as a whole. The number of job opportunities will run at about 17,000 direct and 13,000 indirect during the peak years. In addition, there are a number of British companies competing for work on the American Trident 2 programme, with the potential for further jobs being created in the United Kingdom.

Mr. Boyes asked the Secretary of State for Defence whether a calculation has been made of the number of casualties that would occur were Trident to be fired; and whether this forms a necessary part of an assessment of the deterrent value of the Trident system.

Mr. Butler: The number of casualties that would occur if a United Kingdom Trident missile were to be fired would depend on the targets selected. As was made clear in open government document 80/23, however, the

Government's concept of deterrence is concerned essentially with posing a potential threat to key aspects of Soviet state power.

Cruise Missiles

25. **Mr. Tony Lloyd** asked the Secretary of State for Defence if he remains satisfied with the safety of cruise missile installations in the United Kingdom.

Mr. Stanley: Safety aspects of these installations remain under close review.

Strategic Defence Initiative

26. **Mr. Phillip Oppenheim** asked the Secretary of State for Defence what progress is being made in discussions about participation in research for the strategic defence initiative.

Mr. Butler: We remain in close touch with our allies on all aspects of this important subject.

Arms Control Unit

27. **Mr. Terry Lewis** asked the Secretary of State for Defence if he will make a statement on the work of the arms control unit in his Department.

31. **Mr. Alton** asked the Secretary of State for Defence whether he will make a statement on the role of the arms control unit.

Mr. Stanley: I refer the hon. Members to the reply I gave to the hon. Member for Meirionnydd Nant Conwy (Mr. Thomas) earlier today.

35. **Mr. Evans** asked the Secretary of State for Defence what current initiatives are being undertaken by his Department's arms control unit; and if he will make a statement.

Mr. Stanley: My Department's defence arms control unit is advising my right hon. Friend on how best to support the Government's policy of balanced and verifiable arms control in all the various arms control negotiations.

Warsaw Pact Manoeuvres (Observers)

28. **Mr. James Lamond** asked the Secretary of State for Defence how many observers from his Department have been present at military manoeuvres of the Warsaw pact countries as a result of the signing of the Helsinki Final Act.

Mr. Stanley: Three—two in 1978 and one in 1979.

Royal Dockyards

32. **Mr. Hicks** asked the Secretary of State for Defence how many representations he has received about the future management structure of the royal dockyards since publishing his consultative paper; and if he will make a statement.

Mr. Lee: The Ministry of Defence has received some 80 written representations on subjects relating to the future of the royal dockyards since 17 April. They have concerned various aspects of the proposals and the process of consultation, and express a variety of views. In addition there has been continuing expression of interest from the commercial sector.

NATO (Ministerial Discussions)

33. **Mr. Barron** asked the Secretary of State for Defence if he will make a statement on the latest ministerial discussions in the North Atlantic Treaty Organisation.

Mr. Johnston asked the Secretary of State for Defence whether he will make a statement on recent ministerial discussions in the North Atlantic Treaty Organisation.

Mr. Stanley: Eurogroup Ministers met in Brussels on 21 May and Defence Planning Committee Ministers did so on 22 May for their normal spring meeting. Copies of the communiqués issued following both meetings have been placed in the Library.

NATO Contracts

34. **Mr. John Mark Taylor** asked the Secretary of State for Defence if he will make a statement concerning the United Kingdom's success rate in gaining procurement contracts from North Atlantic Treaty Organisation countries in the last two years; and how this compares with the corresponding performance of the United Kingdom's allies in the organisation.

Mr. Butler: There are no complete NATO statistics available from which the information requested can be drawn.

American Miniaturised Atomic Mine

36. **Mr. Kirkwood** asked the Secretary of State for Defence whether the plans to develop a new American miniaturised atomic mine have been revealed to the North Atlantic Treaty Organisation; and if he will make a statement.

Mr. Stanley: I understand that this is an aspect of the United States defence programme which is of course a matter for the United States Government. It has not been considered by NATO.

European Approach to Defence

37. **Mr. Wareing** asked the Secretary of State for Defence what proposals he plans to put before the European allies in the context of the commemoration of 40 years of peace in Europe, for the development of a more cohesive and distinctive European approach to defence.

Mr. Stanley: The North Atlantic Alliance, of which the United States contribution is an integral and fundamental component, remains the foundation of our security policy. We shall, however, continue to seek to strengthen the European pillar of the transatlantic bridge, by means such as those described in chapter 3 of the "Statement on the Defence Estimates 1985" (Cmnd. 9430-1).

Nuclear Weapons

38. **Mr. Janner** asked the Secretary of State for Defence what is the average distance between the place of deployment of British nuclear weapons and their refurbishment and maintenance depots.

Mr. Stanley: An average figure would not be meaningful without a statement of the basis on which it is

calculated, which could not be provided without conflicting with the practice of successive Governments in neither confirming nor denying the presence of nuclear weapons at specific locations, nor commenting on methods or routes used for transporting weapons.

Air Staff Target 404

Mr. Wiggin asked the Secretary of State for Defence how many representations he has received from hon. Members on the subject of air staff target 404 and the future of the British helicopter industry.

Mr. Butler: During the last 12 months my right hon. Friend and I received 42 letters from right hon. and hon. Members, many of whom forwarded correspondence from constituents, trade unionists and other interested parties.

In that period, hon. Members also asked four questions in the House.

Irish Forces Personnel (Training)

Rev. Martin Smyth asked the Secretary of State for Defence what arrangements exist between the British Government and the Republic of Ireland Government for the training of Republic of Ireland military and naval personnel in the United Kingdom.

Mr. Lee: The Republic of Ireland enjoys the benefit of arrangements for military training we make for all friendly Governments.

Force Levels

Sir David Price asked the Secretary of State for Defence if he is satisfied that current force levels enable him to fulfil all his existing defence commitments and that all specialist services are up to strength.

Mr. Stanley: Successive Governments have recognised that our primary commitment is to NATO, and United Kingdom force levels meet our NATO obligations. We also maintain an out of area capability which is based on giving selected units, whose main roles are within the NATO area, the ability to deploy rapidly at long range in a crisis. Our forces and their capabilities are described in the "Statement on the Defence Estimates 1985" (Cmnd. 9430, volumes 1 and 2). As far as specialists are concerned, there are some shortfalls against requirements in certain areas.

TRANSPORT

M6 (Service Station)

Mr. Maclean asked the Secretary of State for Transport when he will accept and implement the offer for a service station on the M6 motorway made by Westmoreland Motorway Services.

Mrs. Chalker: The offer by the present operators, Westmoreland Motorway Services Limited, for a 50-year lease of the Tebay west service area on the M6, has been accepted. My formal acceptance will be issued very soon to the firm.

Bus Services (Deregulation)

Mr. Parry asked the Secretary of State for Transport what recent representations he has received concerning pensions in the context of the deregulation of bus services.

Mr. David Mitchell: I have received many representations in respect of pensions for National Bus Company employees, in connection with our proposals to transfer the company's operations to the private sector. I have repeated the Government's undertaking to ensure that the assets of the pension schemes are fully adequate at the time of privatisation to discharge their responsibilities. I have also received representations in respect of pensions for employees of PTE and municipal bus undertakings in connection with the proposals in the Bill to transfer them to public transport companies owned by their parent authorities. I have replied that the Government wish to facilitate an option which will allow employees to remain in the local government superannuation scheme, and we are pursuing this with local government representatives.

Aircraft Safety

Mrs. Dunwoody asked the Secretary of State for Transport if he is satisfied that the methods used by the Civil Aviation Authority in testing aircraft safety, with respect to emergency exits is adequate; and whether it includes live tests with representative passenger samples.

Mr. Ridley: Yes. The CAA requires, before it grants a certificate of airworthiness for aircraft capable of carrying more than 44 passengers, to be satisfied by a practice test that it can be evacuated in conditions simulating a real emergency and in the time the authority specifies. The authority requires that the "passengers" taking part in these tests shall not have prior knowledge of the situation. Detailed data are recorded, to enable the authority to judge the effect of changes in the seating arrangements which airlines may wish to make after initial certification.

British Rail

Mr. Cash asked the Secretary of State for Transport what recent discussions he has had with the chairman of British Rail about the amount of notice to be given to passengers of major changes to operating schedules and about the issuing of revised timetables before such changes come into effect.

Mr. David Mitchell: None. But the chairman and I are agreed on both the need to give as much advance notice as possible and in our regret that some of the local information leaflets about the changes in May were not available in time.

Written Answers to Questions

Wednesday 5 June 1985

AGRICULTURE, FISHERIES AND FOOD

Coast Protection

Mr. Harris asked the Minister of Agriculture, Fisheries and Food whether any changes to Votes and cash limits for which he is responsible are proposed as a result of the change in departmental responsibility for coast protection.

Mr. Jopling: Responsibility for coast protection was transferred to my Department from 1 April. A Supplementary Estimate will be sought for Class III Vote 3 Agricultural Support, Animal Health, Land Drainage and Flood Protection (Ministry of Agriculture, Fisheries and Food), which is not subject to a cash limit, to provide for grant-aid of up to £11 million to local authorities undertaking approved coast protection schemes. This will be accompanied by a revised Estimate and corresponding reduction in Class VIII Vote 1 Local Environmental and Planning Services, etc. England (Department of the Environment).

Subject to parliamentary approval of the necessary Supplementary Estimates, the cash limit for Class III Vote 4 Agricultural and Food Services and Support for the Fishing Industry (Ministry of Agriculture, Fisheries and Food) will be increased by £408,000 from £144,365,000 to £144,773,000 to provide for externally commissioned research and development work on coast protection.

At the same time a revised Estimate will be presented and the cash limit for Class VIII Vote 5 Central Administration and Environmental Research (Department of the Environment) reduced by £454,000 from £148,819,000 to £148,365,000. This reduction includes £33,000 in respect of the administrative expenditure associated with coast protection work, which if required will be made available subject to parliamentary approval of the necessary Supplementary Estimate to MAFF later in the year, and £13,000 in respect of the transfer of funds, again subject to parliamentary approval of the necessary Supplementary Estimate, from the Department of the Environment to the Department of Education and Science to support additional expenditure on housing management studentships funded by that Department on behalf of the Department of the Environment.

These changes to MAFF Votes correspond with the provisions previously made by the Department of the Environment for the same purposes. No overall change in public expenditure is involved.

NORTHERN IRELAND

Terrorism

Mr. Stephen Ross asked the Secretary of State for Northern Ireland (1) if he will publish in the *Official Report* the number of persons who were initially detained under other Acts, and were charged under the Prevention of Terrorism (Temporary Provisions) Acts in each of the years of the operation of the Acts;

(2) how many persons detained under the Prevention of Terrorism (Temporary Provisions) Acts were charged with *(a)* offences under the Acts and *(b)* offences under other Acts in each of the years of the operation of the Acts.

Mr. Scott: The information in regard to persons detained in Northern Ireland is as follows:

*Persons detained under other Acts and charged under the Prevention of Terrorism (Temporary Provisions) Acts 1974, 1976 and 1984**

	Number
1974	—
1975	—
1976	—
1977	19
1978	13
1979	10
1980	10
1981	3
1982	9
1983	3
1984	—
Totals	67

Persons detained under the Prevention of Terrorism (Temporary Provisions) Acts 1974, 1976 and 1984

	*(a) charged under the Acts**	*(b) charged under other Acts or with common law offences†*
1974	—	—
1975	—	2
1976	—	130
1977	—	81
1978	1	71
1979	3	48
1980	2	101
1981	2	152
1982	5	333
1983	9	464
1984	—	258
Totals	22	1,640

Notes:

* Some of these persons were also charged under other Acts.

† To identify separately persons charged with statutory offences and persons charged with common law offences would involve disproportionate cost.

Plastic Bullets (Injury Statistics)

Mr. Parry asked the Secretary of State for Northern Ireland how many people have been injured by plastic bullets in each of the past six years to the latest date.

Mr. Scott: Records of injuries thought to have been caused by batton rounds were first collated in March 1981. The figures for each year since then are as follows:

	Number
1981 (since 17 March)	202
1982	4
1983	7
1984	37
1985 (to 31 May)	1

Primary School Education

Mr. John David Taylor asked the Secretary of State for Northern Ireland what plans he has for the future of primary school education in Ballyhalbert, Co. Down; and if he will make a statement.

Mr. Scott: On 24 May 1985 the Department of Education for Northern Ireland approved a proposal submitted by the South-Eastern Education and Library Board that Ballyeasborough primary school should close when Victoria primary school, Ballyhalbert, is rebuilt with appropriate permanent accommodation. It also approved the board's proposal to rebuild Victoria primary school for the four teacher category. Progress of the scheme to construction stage will depend on the degree of priority which the board is prepared to accord the project, as well as the overall availability of finance for school building.

Armagh Prison (Strip Searching)

Mr. William Powell asked the Secretary of State for Northern Ireland what steps he is taking to explain to the public the strip-searching procedure at Her Majesty's prison, Armagh.

Mr. Scott: I and my ministerial colleagues take every opportunity, in our statements, correspondence and media interviews, to explain the reason for and nature of strip-searching. In addition my right hon. Friend has today published a booklet setting out the facts in full. This will be distributed widely in the United Kingdom and abroad; and I have arranged for copies to be made available to the House.

HOME DEPARTMENT

Leeds Prison

Mr. Waller asked the Secretary of State for the Home Department whether he has any plans to relieve the overcrowding at Leeds prison.

Mr. Brittan: Leeds is the most overcrowded local prison in the country. On 4 June 1985 there were 1,292 prisoners there, occupying certified normal accommodation for 624. The staff at Leeds have responded magnificently to the burdens placed upon them, but it would not be responsible to let the present situation continue.

I have, therefore, decided that, in order to relieve the pressure on Leeds, Hull prison should cease to function as a dispersal prison and should assume a local prison role as soon as possible.

In order for Hull to make its contribution as a local prison it will be necessary to increase outlets in the north of the country for sentenced adult male prisoners. I have concluded that this should be done by changing the role of Thorp Arch remand centre to a category C prison.

A discreet post-war wing at Hull will function as a remand centre for young offenders and will take all the juveniles who currently go to Thorp Arch. The other prisoners currently assigned to Thorp Arch will be divided between the Hull remand centre and Leeds prison, where every effort will continue to be made to keep prisoners under 21 separate from the rest of the population. While I naturally regret the movement of prisoners under 21 from a wholly separate establishment to a local prison, these changes will produce one very important improvement. Dividing the population between Hull and Leeds will make visiting markedly easier for the very great majority of the prisoners' families and legal advisers.

It will not be possible to absorb Hull's entire existing population in other suitable establishments immediately. Some 30 long-term prisoners, including category A prisoners, will therefore be retained in A wing at Hull until the new dispersal prison at Full Sutton opens in 1987. The wing will aim to operate a normal dispersal prison regime during this period and is not to be seen as one of the separate units recommended by the Control Review Committee.

I believe that these changes, taken in the round, will enable us to use our resources flexibly and to the best effect. In particular, the intolerable pressure on Leeds will be relieved and the way to improve the regime there will be opened. Detailed planning and discussion will now go ahead on the ground: the target date for the changes is November this year.

Chief Education Officer for the Prison Service

Mr. Greenway asked the Secretary of State for the Home Department, pursuant to his answer to the hon. Member for Ealing, North on 17 May, *Official Report*, column *235*, why it was not considered appropriate to upgrade the post of Chief Education Officer for the Prison Service to grade 5; and if he will make a statement.

Mr. Mellor: The duties of the post, which have been carefully examined by senior management and by Home Office staff inspectors, are considered to fall short of the stringent criteria for inclusion in the unified grading structure at level 5.

Prisons (Building Programme)

Mr. Kilroy-Silk asked the Secretary of State for the Home Department what is the estimated total cost of building the 16 new prisons within the prison building programme.

Mr. Mellor: Approximately £340 million at current prices.

Immigration (Sponsorship)

Mr. Dicks asked the Secretary of State for the Home Department what checks are normally carried out by the immigration authorities into the credentials of those seeking to act as sponsors for new arrivals to the United Kingdom; and whether such checks were carried out in all cases when examining those seeking to sponsor Tamils arriving from Sri Lanka.

Mr. Waddington: Most people sponsoring passengers arriving in the United Kingdom are their relatives or friends. In some cases before leave to enter or temporary admission is given the sponsor is interviewed by the immigration officer to confirm maintenance and accommodation for the passenger. If there is any reason to doubt the immigration status of the sponsor this is also checked. Similar considerations apply to those sponsoring Tamils arriving from Sri Lanka who seek asylum.

Mr. Dicks asked the Secretary of State for the Home Department what responsibilities are normally placed upon those who seek to sponsor new arrivals to the United

Kingdom; and whether such responsibilities were placed upon those who came forward to sponsor Tamils arriving from Sri Lanka.

Mr. Waddington: The responsibility for complying with the terms of temporary admission or of any period of leave to enter lies with the person to whom it is given rather than with the sponsor.

Tamils

Mr. Dicks asked the Secretary of State for the Home Department how many Tamils have been allowed to enter the United Kingdom since 1 January; and how many have since been deported.

Mr. Waddington: The relevant statistics are not routinely maintained by ethnic origin. In the quarter ended 31 March 1985, 5,093 persons holding Sri Lankan passports were admitted to the United Kingdom. No Sri Lankan has been deported between 1 January and 31 May 1985, but 15 Tamils refused entry on arrival were removed between 20 May and 4 June.

Firearms Act

Mr. Ron Davies asked the Secretary of State for the Home Department if, in the light of recent disclosures of the contents of the report of Sir John McKay's working party on the administration of the Firearms Act 1968, he will now place a copy of the report in the Library; and if he will make a statement.

Mr. Giles Shaw: I shall reply as soon as possible.

Mr. Ron Davies asked the Secretary of State for the Home Department if he will make a statement concerning his Department's recent recommendations to chief officers of police with regard to the Firearms Act 1968 concerning the zeroing of rifles for general sporting purposes and vermin control.

Mr. Giles Shaw: As a result of various representations, further consideration has been given to paragraph 21 of the report of the working party on the administration of the Firearms Act 1968 concerning territorial restrictions. Following consultation with the Association of Chief Police Officers, chief officers have been advised that the zeroing provision should be extended as a matter of course to those who hold certificates for vermin control and general sporting purposes as well as for deer shooting. All chief officers have been asked to amend the advice contained in the report accordingly.

Mr. Ron Davies asked the Secretary of State for the Home Department if he will make a statement regarding his recent working party's report into the administration of the Firearms Act 1968, as to *(a)* when he proposes to call for submissions from responsible bodies and organisations, *(b)* by what date such submissions should be received for consideration, *(c)* which organisations he will ask for such submissions, *(d)* on what date the review will take place, *(e)* which organisations will be personally requested to appear before the review body and *(f)* who will represent the Association of Chief Police Officers and the Home Office, respectively, on the proposed review body.

Mr. Giles Shaw: We intend to seek the views of the police and a cross-section of shooting organisations shortly on the operation of the working party's recommendation on the territorial condition, but I am not yet in a position to give further details.

Mr. Ron Davies asked the Secretary of State for the Home Department what guidance his Department issued to chief constables *(a)* before April 1984 and *(b)* since April 1984 regarding the circumstances in which a firearms certificate issued under the Firearms Act 1968 should have attached to it a condition stipulating that the firearms and ammunition to which the certificate relates should not be capable of firing in bursts.

Mr. Giles Shaw: Chief officers of police were advised in 1978 that consideration should be given to the imposition of the following condition in cases where it is not possible to specify precisely the weapon which a certificate holder is authorised to acquire:

"The firearms to which this certificate relates shall not be capable of firing in bursts".

No further advice has been issued to chief officers of police since then.

Court Records (Access)

Mr. Ron Davies asked the Secretary of State for the Home Department if he is satisfied with the degree of access to court records given to magistrates, lawyers and law students in their own locality and for purposes of research.

Mr. Mellor: Yes, but if there is any particular problem which the hon. Member has in mind perhaps he would write to me.

TRANSPORT

Channel Fixed Link

Mrs. Dunwoody asked the Secretary of State for Transport if he will explain Government policy on the replacement to the A20 between Folkestone and Dover in the light of the assertion in the Department's invitation to promoters on the channel fixed link that this would be built under any circumstances and the Minister's suggestion in the Department's press release of 14 May that this would be very unlikely if the fixed link were not to go ahead.

Mr. Ridley: Improvements to the A20 between Folkestone and Dover remain firmly programmed in the Government's plans. These improvements were not planned to be completed before around the early 1990s. The precise alignment, design and standards of the improvements will depend significantly on the outcome of the British and French Government's decisions on whether or not a Channel fixed link—of whatever sort—is to proceed. This decision is expected to be made about the end of this year. And this timetable should not materially affect the eventual completion date of the necessary improvements.

"Motorways—A National Asset"

Mr. Maude asked the Secretary of State for Transport what was the cost of producing and distributing the leaflet "Motorways—A National Asset".

Mrs. Chalker: One and a half million copies of the leaflet "Motorways—A National Asset" were produced at a total cost of £30,275.

Distribution was free through motorway service areas in England, the motoring organisations, Freight Transport Association, the Road Haulage Association, filling stations and police forces.

Airline Pooling Arrangements

Mr. McCrindle asked the Secretary of State for Transport what progress has been made by the European Economic Community in obtaining details of airline pooling arrangements; and if he will make a statement.

Mr. Michael Spicer: In March 1983 the European Commission asked all member states to provide details of inter-airline commercial agreements and the Government did so in accordance with Community obligations. The Commissioner for Transport has recently announced that the Commission is instituting proceedings under Article 169 of the Treaty of Rome against seven member states who have not so far provided the information.

Private Rail Sidings (Grants)

Mrs. Dunwoody asked the Secretary of State for Transport if he will list the numbers of private sidings financed using section 8 grants by British Rail, in each year since such grants began, giving the total annual expenditure on section 8 grants in each of these years in both constant and cash prices.

Mr. Ridley: So far 166 grants have been awarded under section 8 of the Railways Act 1974, including 31 in Scotland and 21 in Wales. Most of them included provisions related either to the installation of new private sidings or work on the alteration and replacement of existing sidings. The total value of section 8 grants in each year from 1975, in both constant and cash prices is as follows:

Year	*Number of grants awarded*	*Value of grants at 1985 prices £ million*	*Cash value of grants £ million*
1975	3	1·295	0·485
1976	15	5·379	2·287
1977	19	8·240	3·988
1978	23	16·931	9·048
1979	17	7·504	4·686
1980	20	10·226	7·582
1981	7	5·311	4·330
1982	14	3·863	3·367
1983	17	6·487	5·912
1984	18	7·872	7·497
1985 to date	13	5·679	5·679
	166	78·787	54·861

British Rail (Investment Plans)

Mrs. Dunwoody asked the Secretary of State for Transport if he will list each of the investment plans for British Rail, which have had to be submitted to Her Majesty's Government for approval since May 1979, where the application was either rejected or withdrawn, distinguishing which were withdrawn and which rejected, and showing the cost in cash terms in each case.

Mr. Ridley: The information is as follows:

Investment Project	*Date Submitted*	*Action*	*Cost* £ million*
Construction of 3 HST sets for East Coast Main Line†	17 September 1979	Rejected	6·0
Freight Rolling Stock Rolling Programme	9 April 1980	Withdrawn	136·5
Harwich-Zeebrugge train ferry	24 April 1980	Withdrawn	39·5
Advanced Passenger Train for West Coast Main Line (including fixed works)	17 July 1980	Withdrawn	214·5
Advanced Passenger Train for West Coast main line (advance authority for long-lead items)	19 August 1980	Withdrawn	34·5
EMU Rolling Programme	15 December 1980	Withdrawn	114·0
120 Mk III coaches‡	4 November 1982	Withdrawn	23·0
3 fast ferries for Portsmouth—Ryde service	29 March 1983	Rejected	7·5
Cambridge—Royston electrification‖	11 July 1983	Rejected	2·0

* Costs are at prices prevailing at the time of submission.
† Part of a larger submission: 4 HST sets, worth £9·5 million, were approved.
‡ Part of a larger submission: 60 Mk III coaches, worth £11 million, were approved.
‖ Part of a larger submission: Cambridge—Bishops Stortford electrification, worth £10 million, was approved.

Buses

Mrs. Dunwoody asked the Secretary of State for Transport what information he has as to the number of passenger journeys undertaken in *(a)* each passenger transport executive area and *(b)* in each municipal bus service area in each of the last 10 years.

Mr. Ridley: The number of passenger journeys by public transport in areas served by passenger transport executives is publicly available in the three-year plans prepared by each PTE in accordance with the Transport Act 1983. Similar information is not available for areas served by municipal operators. Both PTE and municipal bus operators supply the number of passenger journeys made on their own services to the Department but on the understanding that only aggregate data are published. Total passenger journeys for these operators for the last eleven years are given in table 2.12 in "Transport Statistics Great Britain 1973-1983" HMSO, a copy of which is in the House of Commons Library.

Mr. Hanley asked the Secretary of State for Transport whether he has approved London Buses Ltd's proposal for further new bus purchases in 1986 and 1987.

Mrs. Chalker: I have approved the purchase of 260 new buses in 1986-87 at a cost of £16 million. The new buses will be the first in London Buses' fleet to be

equipped with new design features which will speed up boarding times and improve access for elderly and disabled people. This decision is another example of the Government's commitment to investment by LRT and their subsidiaries in a more modern and efficient public transport system.

Mrs. Dunwoody asked the Secretary of State for Transport what information he has as to total spending on public transport by each passenger transport executive and each municipal bus service, for each of the last 10 years, showing the percentage contribution towards the total provided by central Government, in each year in each case.

Mr. Ridley: The following tables show the information readily available:

(a) expenditure by Metropolitan County Councils on revenue grants to PTEs, and by district councils with their own bus services on the running of those services, in the period between 1979-80 and 1983-84; and

(b) capital expenditure in respect of PTEs and municipal bus undertakings in the period between 1976-77 and 1983-84.

Direct contributions to these undertakings from central Government comprise fuel duty rebate and new bus grants, details of which are shown in their accounts. PTE and municipal undertakings are primarily funded by their parent authorities which receive substantial grant from central Government towards their general expenditure, which it is not possible to identify in respect of any particular head of spending.

† Provisional.

ENVIRONMENT

Local Government Reform

Mr. Portillo asked the Secretary of State for the Environment what preparations he is making to set up the residuary bodies under part VII of the Local Government Bill.

Mr. Kenneth Baker: Under Clause 56 of the Local Government Bill, my right hon. Friend is required to establish the residuary bodies on an appointed day or days before the abolition date and to appoint between five and 10 members, including a chairman, to each body.

The residuary bodies will have a considerable job to do between Royal Assent and abolition. They will be identifying the property, rights, and liabilities which will fall to them; they will be preparing to assume their tasks at abolition; they will be identifying and approaching the staff they need; and they will be approaching the successor authorities to ensure that, in the course of the transition to the new structure, satisfactory arrangements are made for specialist GLC or MCC units whose services are needed after abolition.

With that in mind, we are taking a number of steps to ensure that the residuary bodies can be set up as soon as is practicable after enactment of the Local Government Bill and can make rapid progress on these tasks.

First, we have commissioned studies, one by Price Waterhouse in respect of London and one by Peat, Marwick, Mitchell in respect of the metropolitan counties, on setting up the residuary bodies and preparing for the assumption of their responsibilities at abolition.

Second, we are taking steps to identify suitable members of each residuary body. We intend to make initial appointments of a Chairman and perhaps two or more key members of each body on an advisory basis—in accordance with normal precedent—before the Bill is enacted. Parliamentary approval to the expenditure involved in the period before the residuary bodies are formally established is being sought in the Main Supply Estimate for the Department's Central Administration and

Environmental Research Vote, Class VIII, Vote 5. Pending that approval the urgent expenditure will be met by repayable advances from the Contingencies Fund.

In order to facilitate close and effective working between the residuary bodies and successor authorities, we have provided, in an amendment to Clause 56 of the Bill, that one of the members of each residuary body will be appointed from among the members of, and after consultation with, the joint preparatory committee required to be established by the borough and district councils in each area under clause 94.

In making these appointments we shall be looking for individuals committed to winding-up the residuary bodies in the shortest timescale. The qualities we shall be seeking include general financial experience; public and local government confidence — in relation particularly to management of debt and pension funds; and property expertise.

I am pleased to be able to announce that Sir Godfrey Taylor, current chairman of the Southern water authority and a past chairman of the Association of Metropolitan Authorities, has accepted my right hon. Friend's invitation to serve in an advisory capacity with a view to his formal appointment in due course as chairman of the London residuary body. On his formal appointment he will be resigning as chairman of Southern water.

These initial appointments will not prejudge the filling of other appointments after Royal Assent. We regard it as essential that each residuary body should work closely with local government in its area. Experience of local government as elected members or officers will be desirable, but should not be such as to give rise to conflicts of interest in regard to the residuary bodies' dealings with successor authorities.

Mount Pleasant Airport

Mr. Dalyell asked the Secretary of State for the Environment what further expenditure after 1 June he contemplates by the Property Services Agency on the Mount Pleasant airport.

Sir George Young: The Property Services Agency estimates that £89 million will be spent on the construction of Mount Pleasant airport after 1 June 1985. This does not include expenditure under the separate project providing Army accommodation and a port.

Green Belt

Mr. Proctor asked the Secretary of State for the Environment if he will make a statement concerning the concept of country new towns in the green belt.

Mr. Macfarlane: Proposals for such developments would require planning consent in the usual way. Circular 14/85 sets out my right hon. Friend's policy on development in green belt, and Circular 15/84 on land and housing development.

Football and Horse Racing

Mr. Dicks asked the Secretary of State for the Environment, over the past five years, how much Government support has been provided and on what basis for *(a)* horse racing and *(b)* association football.

Mr. Macfarlane: The Government have provided no financial support for horse racing over the past 5 years. The available figures on the Sports Council's grant aid for association football over the period are set out in the following table:

	£
1980-81	
Current grants to the governing bodies	35,862
The Football and the Community Scheme	188,075
1981-82	
Current grants to the governing bodies	28,075
The Football and the Community Scheme	230,045
1982-83	
Current grants to the governing bodies	22,291
The Football and the Community Scheme	384,625 (estimate)
1983-84	
Current grants to the governing bodies	24,323
Capital grants to the governing bodies	199,819
The Football and the Community Scheme	130,175
1984-85	
Current grants to the governing bodies	26,268
Capital grants to the governing bodies	251,885

The governing bodies of association football will also have received grants for capital works prior to 1983-84. Up until that year, however, the Sports Council did not keep records on capital grants paid to individual sports.

Hazardous Waste Inspectorate

Mr. Watson asked the Secretary of State for the Environment when he will publish the first report of the hazardous waste inspectorate; and if he will make a statement.

Mr. Patrick Jenkin: I am glad to welcome the first report of the Hazardous Waste Inspectorate published today. Copies have been placed in the Libraries of both Houses. The report amply justifies the Government's decision to set up this small team of experts to advise on the problems of disposing of hazardous chemical waste. Their initial assessment provides us with a valuable picture of the general standards of hazardous waste management in the United Kingdom.

The report is based on 700 visits, mainly to local authorities and waste disposal facilities, and also to waste producers and regulatory bodies. It shows a disturbing situation. It describes a level of performance in both public and private sectors which too frequently falls below acceptable standards. It offers no evidence of harm to public health. But the report points to failures on the part of operators in their disposal practices, and on the part of authorities in monitoring compliance with licensing requirements and good practice, as reflected in guidance issued by my Department.

The situation calls for prompt action on the part of all concerned. Higher standards of waste management can and should be achieved across the country. Wide variations in standards of site licensing, inspection and enforcement and in levels of charging cause serious distortions in the market. This makes it difficult for responsible operators to invest in a range of high standard disposal facilities.

The Government will therefore meet both the local authority associations and the industry within the next few weeks to discuss what measures they propose to take

within available resources, to secure improvements and to carry out their duties more effectively. Action will be needed in close co-operation with the Health and Safety Executive and its inspectorates concerned.

We will also be considering whether changes should be made to strengthen the law in this field, particularly in relation to tightening up the provisions for enforcement of licensing control. Furthermore, following the recently completed review of the regulations on special waste we are considering a range of proposals concerning waste disposal issues including the possibility of enhancing the responsibilities of waste producers.

EDUCATION AND SCIENCE

Teachers of the Deaf

Mr. Alfred Morris asked the Secretary of State for Education and Science how the decision not to remove specialist qualifications for teachers of the deaf was announced; and what subsequent publicity has been given to the decision.

Mr. Dunn: The decision was announced in paragraph 146 of the White Paper "Better Schools" (Cmnd. 9469). Around 2,000 copies of the White Paper have been distributed, some to organisations which had expressed an interest in the question of specialist qualifications for teachers of the deaf.

Teacher Training

Mr. Freud asked the Secretary of State for Education and Science whether he will list those institutions providing teacher training which offer non-standard entry opportunities.

Mr. Dunn: It is open to any institution providing initial teacher training to admit as special entrants mature applicants who lack the conventional entry qualifications for first degree studies, provided that the institution and its validating body are satisfied that such students have suitable personal qualities, appropriate experience of adult and working life, the intellectual capacity to complete a degree course successfully and competence in the use and understanding of mathematics and English language. A number of teacher training institutions have arrangements whereby they admit students who have successfully completed special access courses, which have been developed to prepare candidates for entry to higher education without the normal entry qualifications. Under the criteria for the approval of initial teacher training courses issued in April 1984, however, at least 75 per cent. of the students entering any one course should possess the normal qualifications for entry to a first degree course, in other words the special entrants should not form more than 25 per cent. of the intake.

Mr. Freud asked the Secretary of State for Education and Science what representations he has received concerning the possible closure of the teacher training course at the Polytechnic of North London.

Mr. Dunn: As at 3 June my right hon. Friend had received four representations concerning the proposal made by the Secretariat of the National Advisory Body for Public Sector Higher Education regarding the future of initial teacher training at the Polytechnic of North London. The representations drew attention to the particular contribution made by the polytechnic to the training of teachers of ethnic minority origin.

Mr. Freud asked the Secretary of State for Education and Science whether he will make a statement on the proposed closure of the teacher training course at the Polytechnic of North London.

Mr. Dunn: Following my right hon. Friend's announcement of target intakes to initial teacher training for the period 1986-89, the National Advisory Body for Public Sector Higher Education and the Welsh Advisory Body were asked to advise on the distribution of intakes between public sector institutions. As a first stage in that process the Secretariat of the National Advisory Body issued proposals to institutions as a basis for consultation. I cannot anticipate what advice the National Advisory Body will submit in respect of individual institutions or what decisions my right hon. Friend will take in the light of that advice.

Mr. Freud asked the Secretary of State for Education and Science whether he will list the establishments offering teacher training which have special provision for *(a)* candidates from ethnic minorities and *(b)* offering experience of teaching ethnically mixed classes.

Mr. Dunn: As indicated in a reply which I have given to another question from the hon. Member today, a number of teacher training institutions have arrangements whereby they admit candidates without the conventional entry qualifications for first degree studies who have successfully completed special access courses for entry to higher education. Such students may include candidates of ethnic minority origin, but information about the number of teacher training students from ethnic minorities is not currently collected. Criteria for the approval of initial teacher training courses issued in April 1984 require that all students should be prepared to teach the full range of pupils whom they are likely to encounter in an ordinary school, with their diversity of ethnic and cultural origins. My right hon. Friend considers that efforts should be made by all teacher training institutions to give all their students some experience of ethnically mixed schools. Many institutions, including those in areas without substantial ethnic minority populations, already take steps to ensure that their students are provided with such experience.

Mr. Freud asked the Secretary of State for Education and Science what steps he is taking to increase the numbers of trainee-teachers from ethnic minorities in the light of the Swann report.

Mr. Dunn: As indicated in my right hon. Friend's statement to the House on 14 March at column 452 and my answer to the hon. Member for Wolverhampton, North-East (Mrs. Short) on 19 April, at column 291 my right hon. Friend intends to consult the education service and representatives of the ethnic minorities on ways to increase the proportion of the teacher force recruited from ethnic minority groups. He hopes to be able to make a further statement shortly.

Exchange Teachers

Mr. Freud asked the Secretary of State for Education and Science, pursuant to his reply to the hon. Member for Cambridgeshire, North-East of 24 April, *Official Report*,

column 471, whether he will describe the mechanism used by his Department to take fluctuations in exchange rates into account in considering the payment of allowances to teachers on exchange in the United States of America.

Sir Keith Joseph: To ensure full and effectively planned use of the cash-limited Government resources available generally for teacher exchange programmes in any one year, which are designed to cover both the teacher's return air fare and a settlement allowance, a rate of assistance is set for the forthcoming academic year, in consultation with those concerned in the joint advisory committee in respect of each exchange country. In the case of the United States of America, this takes account of long-term forecasts of fluctuations expected in the dollar-pound exchange rate over the year in question and of anticipated movements in air travel rates compared to those affecting exchanges to other countries in the schemes.

Teachers' Unions (Membership)

Mr. Freud asked the Secretary of State for Education and Science, pursuant to his reply to the hon. Member for Cambridgeshire, North-East of 14 May, *Official Report*, column 106, whether he will appoint an independent body to carry out the review of membership numbers of the teachers' unions or to audit the numbers submitted to him.

Sir Keith Joseph: No. I shall exercise the powers given to the holder of my office under section 1 of the Remuneration of Teachers Act 1965 directly, as my predecessors have always done.

Colleges (Staff Ratios)

Mr. Hancock asked the Secretary of State for Education and Science what percentage change there has been in the student to staff ratios in colleges other than polytechnics over the period 1975 to 1984.

Sir Keith Joseph: Based on a sample of colleges, the percentage change in student: staff ratios for advanced level work between 1974-75 and 1983-84 was as follows:

1974-75 SSR	*1983-84* SSR	*Percentage change*
7·7	9·0	16·9

The ratios are calculated as full-time equivalent student load divided by the full-time equivalent number of lecturers who are involved in teaching.

Similar information in respect of non-advanced level work was not collected prior to 1979-80, and it is therefore not possible to calculate an overall percentage change in student: staff ratios for the period in question.

Student Grants

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science if he will estimate the additional cost of awarding all students in higher education a full maintenance grant in each of the categories *(a)* 18 years plus, *(b)* 19 years plus, *(c)* 20 years plus and *(d)* 21 years plus.

Sir Keith Joseph [*pursuant to the reply*, 20 May 1985, c. *309*]: The following are the estimated costs for England and Wales. They are necessarily based on a number of assumptions and thus provide an order of magnitude of the potential costs involved, rather than any precise estimation.

Age of student	*Cost in 1983-84 £ million*
18+	192
19+	163
20+	114
21+	65

SCOTLAND

Tilhill Forestry Limited

Mr. Kirkwood asked the Secretary of State for Scotland whether forestry ploughing operations have been carried out by Tilhill Forestry Limited on land at Shielsknowe, Leithope Forest near Cartertar, Border Region, after refusal of grant aid by the Forestry Commission, and without the approval of the Department of Agriculture and Fisheries for Scotland.

Mr. John MacKay: Yes. Almost the whole of the area for which grant aid was refused has now been ploughed and planting is expected to be completed soon.

As I said in my reply to the hon. Member for Glasgow, Shettleston (Mr. Marshall) on 8 May at column *442* about the planting operations at Crichness, the Forestry Commission takes a serious view, which my right hon. Friend shares, of planting proceeding before a decision on grant aid has been taken. He is even more concerned over the action taken by the applicant in the Shielsknowe case as the Forestry Commission had in fact refused the grant application in respect of the greater part of the area after consultations with other authorities, including the Department of Agriculture and Fisheries for Scotland. This is only the second significant case of this nature since the present consultation procedures were introduced in 1974. My right hon. Friend will nevertheless be watching the situation very carefully.

Broadleaved Woodlands

Mr. Ron Davies asked the Secretary of State for Scotland how many forestry grant scheme applications for planting of broadleaved woodlands *(a)* consisting solely of broadleaves and *(b)* in mixture with conifers were approved for grant in each year since 1981-82.

Mr. John MacKay: This information is not available in the form requested.

Mr. Ron Davies asked the Secretary of State for Scotland what are the objectives of the Forestry Commission's policy of diversification by broadleaves of predominantly coniferous upland forests; and how its management practices in re-stocking of forests aim to achieve those objectives.

Mr. John MacKay: The Forestry Commission uses broadleaved trees in predominantly coniferous upland forests in order to enhance the forest landscape, to increase the diversity of wildlife habitat and to extend the recreational interest.

Management practices in restocking aim to make the most of any naturally occurring broadleaved woodland supplemented by planting where practical, particularly in conjunction with watercourses and the fringes of wetlands and open areas where it will increase the interest and enjoyment of visitors.

PRIME MINISTER

Industrialists (Meeting)

Mr. Dalyell asked the Prime Minister whether she will place in the Library the statement given by Mr. Bernard Ingham about her meeting with 26 leading industrialists on Tuesday 21 May.

The Prime Minister: I have placed in the Library the press notice issued by my office on my meeting on May 21, 1985 with leading industrialists to discuss their part in the national effort to increase the number of students studying engineering and technology in higher education.

Mr. Dalyell asked the Prime Minister (1) what representations she made at her meeting with 26 leading industrialists on Tuesday 21 May about supporting engineering courses; and what was their reply;

(2) what response she had from 26 leading industrialists at her meeting with them on Tuesday 21 May about committing their firms to giving substantial and continuing practical help to polytechnics and universities.

The Prime Minister: My colleagues and I had a very useful discussion with the industrialists about the part they can play in the national effort to increase the number of students studying engineering and technology in higher education, in the light of the Government's recently announced £43 million programme to expand relevant first degree and postgraduate output.

The industrialists said that they welcome, and fully supported, the Government's initiative to increase the output of engineering and technology graduates and postgraduates. They committed their firms to giving substantial and continuing practical help to the universities and polytechnics benefiting from the Government's programme. They offered more up-to-date equipment, more help with teaching staff and with the design of relevant courses, and they undertook to provide more sandwich course places and to sponsor more students.

WALES

Orthopaedic Waiting Lists

Dr. Roger Thomas asked the Secretary of State for Wales what percentage of patients on orthopaedic waiting lists have to wait for over 12 months for the appropriate inpatient surgical treatment in each of the health authorities in Wales.

Mr. Wyn Roberts: The available information is given in the following table and refers to the numbers of non-urgent cases waiting for traumatic and orthopaedic surgery at 30 September 1984.

Health Authority	*Percentage of cases on waiting list for 12 months or more*
Clwyd	9·9
East Dyfed	4·4
Gwent	26·9
Gwynedd	17·5
Mid Glamorgan	53·6
Pembrokeshire	42·3
Powys	—
South Glamorgan	37·1
West Glamorgan	9·0

Tinnitus

Dr. Roger Thomas asked the Secretary of State for Wales (1) if he will list by name and location the aural consultants who have a special interest in the investigation and treatment of tinnitus including the prescribing of masking devices;

(2) how many patients suffering from severe intractable tinnitus have been supplied with masking devices in each of the health authorities in Wales; what percentage this is of patients attending ear, nose and throat clinics annually because of this condition; and what has been the cost of providing such apparatus for the last 12 months for which figures are available;

(3) if he will estimate the percentage of cases referred to aural consultants in each of the health authorities in Wales because of tinnitus who are suffering from the condition because of their present or past occupations.

Mr. Wyn Roberts: This information is not held centrally.

Forestry Commission

Mr. Ron Davies asked the Secretary of State for Wales by what mechanisms the Forestry Commission reached agreement with the Welsh water authority and Fountain Forestry Ltd. over site preparations of the land at Blaen-y-Cwm, Llanbrynmair Moors, Powys.

Mr. John Stradling Thomas: Following consultations between Forestry Commission, the local authorities, the Nature Conservancy Council and the Severn-Trent water authority on a forestry grant scheme application for land at Blaen-y-Cwm, Llanbrynmair Moors, Powys, the owners, for whom Fountain Forestry acted as agents, agreed to enter into a deed of covenant with the water authority governing the manner in which the site preparations would be carried out. The Forestry Commission's approval to the grant application was conditional upon this convenant being executed.

DEFENCE

Hunt Class Vessels

Mr. Chope asked the Secretary of State for Defence if he will make an announcement about the 12th and 13th Hunt class mine counter-measures vessels.

Mr. Lee: I am pleased to announce that following competitive tendering the order for the 12th and 13th Hunt class MCMV's was placed with Vosper Thornycroft (UK) Ltd yesterday.

Mk. 19 Grenade Launcher

Mr. McNamara asked the Secretary of State for Defence if he will outline the kind of threat which necessitates the use by United Kingdom forces of 15 Mk. 19 automatic grenade launchers.

Mr. Lee [*pursuant to his reply*, 3 June 1985, c. *63*]: The Mk. 19 automatic grenade launcher is a standard infantry weapon for defence against armed attack.

Mr. McNamara asked the Secretary of State for Defence (1) if he will make a statement concerning the installation of the Mk. 19 automatic grenade launcher at Greenham common;

(2) whether other American airbases in the United Kingdom will be equipped with the Mk. 19 automatic grenade launcher.

Mr. Lee [*pursuant to his replies*, 3 June 1985, c. *63-64*]: I understand that this standard infantry weapon is being issued to a number of USAF bases in Europe, including the United Kingdom.

NATIONAL FINANCE

Customs and Excise (Computer Programmers)

Mr. Teddy Taylor asked the Chancellor of the Exchequer (1) how many persons have resigned from the programming and experts computer sections of the computer services division of Customs and Excise headquarters in Southend in each of the past three years; and if he will make a statement;

(2) what estimate he has made of the gap between the salary levels of computer programmers in the computer services division of the Customs and Excise headquarters in Southend and comparable positions in private industry in the south-east of England; and what steps he will take to narrow the differential;

(3) why the headquarters of Customs and Excise in Southend have initiated a new programme to engage a private firm to undertake a major computer-based project for the computer services division; and if he will make a statement;

(4) if he will introduce a regional variation in additional payments to ensure that the Customs and Excise computer services division is in a position to offer comparable salaries to those in private industry; and if he will make a statement.

Mr. Hayhoe: I shall let my hon. Friend have a reply as soon as possible.

THE ARTS

Government Support

Mr. Dicks asked the Parliamentary Under-Secretary of State answering in respect of the Arts what has been the total of Government support for the arts over the past five years; and on what basis it has been provided.

Mr. Waldegrave: This information is given in the 1985 "Public Expenditure" White Paper (Cmnd. 9428, Volume II, chapter 3.5 on the arts and libraries programme), a copy of which is in the Library.

FOREIGN AND COMMONWEALTH AFFAIRS

EC (Office Accommodation, Ealing)

Mr. Greenway asked the Secretary of State for Foreign and Commonwealth Affairs if he will give the addresses of any office accommodation in the London borough of Ealing which the European Economic Community is expected to take over; what is the cost of such accommodation; and if he will make a statement.

Mr. Rifkind: We are pressing the case for London to be the site of the proposed EC Trademark office. But it has not yet been decided in which EC member state the office will be established, let alone its precise location.

Gibraltar

Mr. John David Taylor asked the Secretary of State for Foreign and Commonwealth Affairs if Gibraltarians will be issued with the new European Community passport; and if he will make a statement.

Mr. Rifkind: I can confirm that Gibraltarians will be issued with common format passports.

Angola (Refugee Camps)

Rev. Martin Smyth asked the Secretary of State for Foreign and Commonwealth Affairs (1) whether any representative of the British Government has visited any refugee camp in Angola;

(2) whether any representative of the British Government has visited any camp in Angola administered by the South West Africa People's Organisation; and if he will make a statement.

Mr. Rifkind: No representative of Her Majesty's Government has visited either a refugee camp in Angola, or a camp administered by the South West Africa People's Organisation in Angola during the last four years, the period of which records are readily available.

Rev. Martin Smyth asked the Secretary of State for Foreign and Commonwealth Affairs whether, pursuant to his reply to the hon. Member for Epping Forest (Sir J. Biggs-Davison) on 17 May, *Official Report*, column *254*, it is British Government policy to rely solely on the office of the United Nations High Commissioner for Refugees to monitor and act on human rights violations in the South West Africa People's Organisation camps.

Mr. Rifkind: We are naturally concerned about all violations of human rights wherever they occur. The United Nations High Commissioner for Refugees, as the international body charged with ensuring the welfare of refugees, is in the best position to decide whether any violations of human rights have indeed occurred in SWAPO refugee camps.

ENERGY

Energy Conservation

46. **Mr. Alton** asked the Secretary of State for Energy whether he is satisfied with progress made with energy conservation in industry.

Mr. David Hunt: Though much remains to be done, there is now a great deal of activity. Over 16,000 senior executives have attended the 40 breakfast-time briefings we have held throughout the country over the last 18 months, and three-quarters have gone on to take action to cut their energy costs.

EMPLOYMENT

EC (Unemployment Rates)

Mr. Prescott asked the Secretary of State for Employment if he will give the unemployment rates in percentage and absolute terms in each of the European Economic Community countries.

Mr. Peter Bottomley: Following is the information, available in the Library, relating to April 1985, using

national unadjusted series compiled by the Statistical Office of the European Communities (SOEC) and also including standardised unemployment rates compiled by the Organisation for Economic Co-operation and Development (OECD). The latter are only available in the form of rates. The national unadjusted figures are not comparable because of differences in definitions and coverage of the statistics, while the OECD standardised rates take account of these differences as far as possible. The rates calculated by SOEC are based on the percentage of civilian working population, while the OECD standardised rates are calculated as a percentage of the total labour force.

EC Unemployment

	SOEC Unadjusted, national definitions		*OECD Standardised rates*	
	Thousands	*Percentage rate*	*Latest month*	*Percentage rate*
Belgium	546·2	13·2	March	14·1
Denmark	263·0	9·7	*	*
France	2,338·3	10·3	March	10·1
Germany	2,304·6	8·6	March	8·8
Greece	79·5	2·1	*	*
Ireland	228·0	17·6	*	*
Italy	2,928·1	12·8	October 1984	10·0
Luxembourg	2·7	1·7	*	*
Netherlands	748·1	13·1	March	13·3
United Kingdom	3,272·6	12·4	March	13·5

* not available

Air Pollution

Mr. Simon Hughes asked the Secretary of State for Employment if he will publish the management study referred to in the annual district report for 1983 carried out in district L of the Industrial Air Pollution Inspectorate of the effectiveness of means used to obtain compliance with the legal requirements of air pollution control legislation.

Mr. Peter Bottomley: The Health and Safety Executive propose to publish shortly a paper on measuring the effectiveness of the Executive's field activities.

Disabled People

Mr. Alfred Morris asked the Secretary of State for Employment how many, and what, aids and adaptations the Manpower Services Commission has financed to help disabled people in each of the last five years; and how many people have been abble to take up employment as a result.

Mr. Alan CLark: The number of new aids financed by the Manpower Services Commission in each of the last five years was as follows:

	Number
1980-81	775
1981-82	765
1982-83	1,067
1983-84	1,268
1984-85	1,640

The number of adaptations financed was:

	Number
1980-81	83
1981-82	94
1982-83	117
1983-84	170
1984-85	145

Aids issued included electronic braille storage and retrieval devices, electric wheelchairs, telephone amplifiers and micro computers. Adaptations financed included ramps for wheelchair users, stairlifts and toilet alterations.

Approximately 1,675 disabled people were able to take up employment during this period as a result of these measures.

Factory Inspectors

Miss Boothroyd asked the Secretary of State for Employment how many factories in the west midlands were visited by factory inspectors for each of the last five years for which records are available; what percentage this figure represents of the total number of factories in the area; and whether he is satisfied with the present number of factory inspectors in post in the west midlands.

Mr. Peter Bottomley [*pursuant to his reply*, 27 March 1985, c. *226-7*]: I wish to correct the statistics given in my reply, which should have read as follows:

	Number of premises visited	*Percentage of premises visited in relation to the total number of premises in the area per cent.*
1985 to date	1,252	6
1984	3,289	17
1983	4,792	24
1982	4,891	31
1981	5,065	18
1980	figures not available	

TRADE AND INDUSTRY

Privatisation

9. **Mr. Heddle** asked the Secretary of State for Trade and Industry what effects upon the performance of British industry have resulted from the privatisation programme of his Department.

Mr. Tebbit: In general, companies returned to the private sector have recorded both increases in efficiency and improved performance. This has benefited not just the companies concerned, but their customers and the economy as a whole.

Research and Development

10. **Mr. Dormand** asked the Secretary of State for Trade and Industry if he will make a statement on the progress of Government action to disperse research and development activities of private firms and public bodies to the regions.

Mr. Trippier: No. It is not Government policy to influence the location of private sector research and development activities. There are currently no plans to relocate DTI laboratories to other regions.

"Burdens on Business" (Review)

21. **Mr. Ashdown** asked the Secretary of State for Trade and Industry what factors he took into account when reaching his conclusions on recommendations arising from the review "Burdens on Business".

Mr. Trippier: We have not yet announced conclusions on most of the recommendations. They are being urgently followed up in our drive to reduce the burden of regulation on business as a whole, which is being co-ordinated by my right hon. and noble Friend, the Minister without Portfolio.

Secondary Schools (Mini-enterprises)

22. **Mrs. Ann Winterton** asked the Secretary of State for Trade and Industry what his Department is doing to encourage the spread of mini-enterprises in secondary schools.

Mr. Trippier: We have set ourselves a target to encourage each secondary school to carry out some form of enterprise activity during 1986.

Warship Building Yards

23. **Mr. Hirst** asked the Secretary of State for Trade and Industry what progress has been made in privatising the warship building yards.

Mr. Norman Lamont: My right hon. Friend the Secretary of State announced on 25 March that he had given his consent to the sale of Yarrow Shipbuilders to GEC. Brooke Marine has been sold to a management consortium. I expect the sales of all the warship yards to be completed by 31 March 1986.

British Leyland

24. **Sir John Farr** asked the Secretary of State for Trade and Industry what is the policy of Her Majesty's Government towards the funding of BL development plans for its new lean-burn engine.

Mr. Norman Lamont: BL's engine plans are covered in the company's corporate plan. This does not request further Government funding for BL.

Special Steels Industry

25. **Mr. Hardy** asked the Secretary of State for Trade and Industry if he proposes to approve the establishment of an absolute monopoly in special steel production in the United Kingdom.

Mr. Norman Lamont: We are still considering the phoenix II joint venture proposals from BSC and GKN for their engineering and special steels businesses. The competition effects of the phoenix II proposals will be among the factors taken into account.

Scottish Highlands and Islands

26. **Mr. Kennedy** asked the Secretary of State for Trade and Industry if he will make a statement on the overseas trading potential of the highlands and islands of Scotland; and if he will make a statement.

Mr. Channon: I am satisfied that the Highlands and Islands of Scotland have a great deal to offer markets overseas. The region makes a significant contribution to the United Kingdom's export performance, through its exports of the wide range of goods produced in the area, including Scotch whisky, Harris tweed, high quality textiles and knitwear, craft goods, electronics and engineering and food products.

Manufacturing Industry (North-west)

27. **Mr. Pike** asked the Secretary of State for Trade and Industry what steps his Department proposes to take to reverse the decline of the manufacturing industries in the north-west.

Mr. Trippier: The Government are continuing their policies of revitalising both the national and regional economies, providing a healthy economic framework in which manufacturing industry can continue to invest, expand and become increasingly more competitive in both home and overseas markets. In addition to the various forms of Government financial assistance available, we are successfully building on the natural resilience and ability to generate self-help at the industrial level that is inherent in many parts of the north-west. This is shown by the continuing rapid growth of new firms in the north-west; between the end of 1979 and the end of 1983 it has been estimated that the stock of business actually increased by 7 per cent.

Trading Policy

28. **Mr. Kirkwood** asked the Secretary of State for Trade and Industry what account Her Majesty's Government take of human rights considerations when formulating their policy towards Government trading with another country.

Mr. Channon: The Government believe that civil trade with other countries should be governed by commercial considerations. However, human rights are one of the many factors taken into account when examining licences to export defence or paramilitary equipment.

East Midlands (Innovation Programme)

29. **Mr. Leigh** asked the Secretary of State for Trade and Industry if he will make a statement on the progress of the innovation programme on the east midlands.

Mr. Norman Lamont: The Department's support for innovation is a national facility and is not targeted specifically on any one area. However, since the start of SFI in May 1982, some 8 per cent. of all applications received were from firms based in the east midlands and

to date £30·1 million of assistance has been offered to east midlands firms out of a total of £451·5 million committed nationally.

Waste Recycling

30. **Mr. Bendall** asked the Secretary of State for Trade and Industry if he will make a statement on progress to date made by the Parliamentary Under-Secretary with co-ordinating responsibility for waste recycling.

Mr. Trippier: I have received a considerable amount of correspondence and advice about my new role. I will be consulting other Ministers shortly about matters which span Departmental responsibilities. I am also planning a number of visits to selected recycling plants and research organisations in order to promote the cause of economic recycling and to identify priorities.

Chemical Weapons

31. **Mr. Mikardo** asked the Secretary of State for Trade and Industry whether licences are required for the export of chemical weapons or of weapons-grade chemicals; and if he will make a statement.

Mr. Channon: Chemical weapons are under export licensing control, as are the most common chemical intermediates which could be used to make chemical weapons. The position is kept constantly under review.

Small Businesses (Data Base)

32. **Mr. Bellingham** asked the Secretary of State for Trade and Industry when he proposes to introduce a data base on small businesses for the following separate categories: one to 20 employees, 21 to 50 employees, 51 to 100 employees and 101 to 200 employees.

Mr. Trippier: I am aware of the value of information on businesses by sizebands of employees but, having considered the matter with other departments concerned, I have at present no proposals to impose what could be regarded as an additional form-filling burden on small businesses.

Local Enterprise Week

33. **Mr. Thurnham** asked the Secretary of State for Trade and Industry what reactions he has received about the arrangements for Local Enterprise Week.

Mr. Trippier: During Local Enterprise Week 1985 some 700 events were organised throughout the country and I visited close on 60 small firms organisations in 40 towns. I believe the week was very successful in attracting publicity for the impressive range of locally based organisations providing support, at community level, to help small businesses set up and grow.

44. **Mr. Carttiss** asked the Secretary of State for Trade and Industry whether he will make a statement on the outcome of his Department's Local Enterprise Week.

Mr. Trippier: During Local Enterprise Week 1985 just over 700 events were organised throughout the country and I visited close on 60 small firms organisations in 40 towns. I believe the week was very successful in attracting publicity for the impressive range of locally based organisations providing support, at community level, to help small businesses set up and grow.

Small Businesses

34. **Mr. Andy Stewart** asked the Secretary of State for Trade and Industry if he will make a statement on the current availability of funding for small businesses.

Mr. Trippier: Most funding for small businesses comes from the banks and other financial institutions, which have taken a number of initiatives in recent years to improve the range and availability of funds. Government incentives, notably the loan guarantee scheme and the business expansion scheme, have also assisted in extending the finance available to small firms from both institutions and individuals.

Steel Works (Sheffield)

35. **Mr. Flannery** asked the Secretary of State for Trade and Industry if he has recently held discussions with the chairman of the British Steel Corporation regarding the projected closure of the British Steel Corporation Tinsley Park works in Sheffield; and if he will make a statement.

Mr. Norman Lamont: I have not discussed this closure with the chairman. It is a matter for the commercial judgment of the Corporation.

Manufacturing Industry

36. **Mr. Kenneth Carlisle** asked the Secretary of State for Trade and Industry what proportion of the United Kingdom's manufacturing output was exported during the last 12 months.

Mr. Channon: The lastest available figures are for the 12 months ended June 1984. During that period the ratio of exports to United Kingdom manufacturers' sales was approximately 27 per cent.

Monopolies and Mergers Commission

37. **Mr. Holt** asked the Secretary of State for Trade and Industry if he is satisfied with the operation of the Monopolies and Mergers Commission; and if he will make a statement.

Mr. Channon: Yes.

Airbus Industrie

38. **Mr. Colvin** asked the Secretary of State for Trade and Industry when and how the management and accounting procedures of Airbus Industrie are to be changed.

Mr. Trippier: Since 1 April 1985, there have been several new appointments to the senior management team of Airbus Industrie. As in any industrial company, the new management will be reviewing AI's performance and procedures, and improvements will be discussed with the industrial partners as and when necessary.

Romania

39. **Mr. Andrew Hunter** asked the Secretary of State for Trade and Industry what discussions on trade have taken place recently with representatives of the Romanian Government.

Mr. Channon: The 12th annual session of the UK-Romanian trade commission took place in London 15-19 April 1985, during which I met the leader of the Romanian

delegation, Deputy Minister Stanciu. A series of wide ranging discussions on trade and associated matters took place that week.

Manchester Steel Ltd.

40. **Mr. Litherland** asked the Secretary of State for Trade and Industry what action he has taken to seek to secure the future of Manchester Steel Ltd.; and if he will make a statement.

Mr. Norman Lamont: The future of Manchester Steel's operations are for the company's new owners to decide on their commercial merits.

Small Firms

41. **Mr. Patrick Thompson** asked the Secretary of State for Trade and Industry what measures he is taking to encourage small firms to seek appropriate advice and training.

Mr. Trippier: I believe that both advice and training are vital to the success of small businesses. Indeed, evidence clearly indicates that the success rate amongst small firms is significantly higher when they take advantage of advice and training. This is why a major theme of Local Enterprise Week 1985 has been to demonstrate the wide range of business services, training and advice available to small firms within their own locality.

To demonstrate the value of training in business my Department and the Manpower Services Commission recently jointly produced a video called "The Road to Success". Over 1,100 copies of the video have been provided to local organisations to show to those involved in small businesses during Local Enterprise Week and subsequently.

Aerospace Industry

42. **Mr. Robert Atkins** asked the Secretary of State for Trade and Industry what further representations he has received about the future of the British aerospace industry.

Mr. Trippier: My right hon. and hon. Friends are in touch with representatives of the British aerospace industry who regularly make their views known to them as issues arise which affect the future of the industry.

Batteries

43. **Mr. Andrew F. Bennett** asked the Secretary of State for Trade and Industry if he will make a statement on the extent of import penetration of overseas-manufactured batteries into the United Kingdom.

Mr. Channon: Import penetration of overseas manufactured batteries into the United Kingdom has risen from 18 per cent. in 1980 to 37 per cent. in 1984. Despite this rise, the United Kingdom still retains a positive balance of trade in batteries, though this has been in decline since 1980.

Inward Investment

45. **Dr. Mawhinney** asked the Secretary of State for Trade and Industry what help his Department gives to British organisations seeking to attract inward investment to the United Kingdom.

Mr. Channon: In addition to DTI funding of the promotional activities of the five English regional development organisations, the Invest in Britain Bureau within my Department, in collaboration with all the main British public sector inward investment bodies and the private sector, is mounting a major promotional campaign —Britain Means Business—over the coming year. The campaign will be in addition to the bureau's normal promotional activities, and will aim to consolidate and improve upon the United Kingdom's standing as the preferred location in Europe for direct investment from overseas.

Helicopter Industry

Mr. Wiggin asked the Secretary of State for Trade and Industry how many representations he has received from hon. Members on the subject of the Westland W.30 helicopter and the future of the British helicopter industry.

Mr. Butcher: My colleagues and I have received several representations from hon. Members on this subject including three letters during the course of the last six months.

Insolvency Bill (Directors' Liability)

Sir David Price asked the Secretary of State for Trade and Industry whether the provisions of the Insolvency Bill in respect of the personal liability of directors will require any subsequent amendment to the Companies Acts.

Mr. Fletcher: In formulating its proposals in the Insolvency Bill in relation to wrongful trading the Government considered that such proceedings should be available only to the liquidator and that therefore any imposition of personal liability on directors and others should benefit creditors as a whole. As a consequence, to maintain a consistent approach, Sec 630 of the consolidating Companies Act 1985 (which was previously Sec 332 of the Companies Act 1948) will be amended so that the civil remedy under the "fraudulent trading" clause will also be available only to a liquidator. Creditors will no longer be able to institute proceedings for their own individual benefit.

I am not aware of any other contemplated or consequential amendments to the Companies Act 1985 in this respect although the Insolvency Bill proposals are of course still before this House for approval.

EC (Non-tariff Barriers)

Mr. Amess asked the Secretary of State for Trade and Industry if he is satisfied with the progress being made in the dismantling of non-tariff trade barriers within the European Economic Community; and if he will make a statement.

Mr. Channon: Useful progress has been made recently with agreement on the single customs document and the new approach to standards, and we shall be pressing for decisions on the liberalisation of trade in financial, professional and transport services when the Commission's action programme on the internal market is presented to the European Council in July.

EC (Exports)

Mr. Marlow asked the Secretary of State for Trade and Industry if he will make it his policy to encourage British exporters to the EEC to sell cif.

Mr. Channon: It is already the normal practice of my Department and of the British Overseas Trade Board to recommend to exporters there prices should be quoted cif in the local currency.

British Railways Board (Property Report)

Mr. Yeo asked the Secretary of State for Trade and Industry when the Monopolies and Mergers Commission report on the British Railways Board's property activities will be published.

Mr. Fletcher: The report is published today. The Commission was asked to report on British Rail's efficiency and costs in relation to its property activities, including the acquisition, management, development and disposal of land.

The Commission notes that British Rail recognises that the future outlook for its property activities is one of a declining work load on sales of surplus property and growing work on developing and managing operational land for commercial purposes. It also notes that the work load in managing the unrewarding tail of burdensome properties will continue.

The Commission makes a number of specific recommendations aimed at improving the management of British Rail's property, including the appointment of a director of property of equal status with British Rail's other functional and sector heads, responsible for maximising return from the whole estate, and for a member of the British Railway's Board to be given specific responsibility for property matters.

The Commission believes that better procedures are needed for releasing land no longer required for operational use. Greater use of private sector expertise is recommended in several areas of the board's activities, including in identifying and valuing the potential of land no longer required, where more positive procedures are recommended for assessing the scope for enhancing realisable values.

The Commission also made some criticism of the implementation of BR's programme of property sales.

The Commission acknowledges the board's success in developing and exploiting its operational estates, but considers that a more systematic review of development opportunities would be beneficial; that greater competition between developers should be encouraged; and that marketing techniques should be improved, again perhaps drawing on outside expertise.

The report highlights British Rail's large number of unattractive, low value properties including closed branch lines, and suggests that the sale of such properties at prices which do not fully cover the selling costs involved might nevertheless be in the board's longer term interests if it brings relief from subsequent management costs. But such decisions need to be taken against more accurate assessments of the costs of retaining and managing each property. The report also recommends a review of British Rail's liabilities in respect of property no longer needed for the railway.

The Commission also recommends a range of proposals aimed at improving the operational efficiency of the board including a computer-based financial and management accounting and costing system.

Finally, as is usual in such references, the Commission was asked to consider whether the board is pursuing a course of conduct which operates against the public interest. They conclude that while their inquiries identified room for improvement in many areas none of the shortcomings identified, taken singly or together, could be judged to operate against the public interest. The board will be producing its preliminary response to the Commission's findings in three to four months and my right hon. Friend, the Secretary of State for Transport, will make a statement on this response at that time.

Institute of Production Engineers (Exhibition)

Sir Geoffrey Johnson Smith asked the Secretary of State for Trade and Industry if he will arrange for an exhibition relating to the Institute of Production Engineers to be displayed in the Upper Waiting Hall during the week commencing Monday 10 June.

Mr. Butcher: Yes. Arrangements have been made for such an exhibition in the Upper Waiting Hall to take place from Monday 10 June to Friday 14 June 1985.

Local Enterprise Agencies

Mr. Peter Bruinvels asked the Secretary of State for Trade and Industry if he will publish in the *Official Report* all local enterprise agencies currently operating giving their full address and details of jobs placed.

Mr. Trippier [*pursuant to the reply*, 4 June 1985, c. *134*]: A list of the names and addresses of the 252 local enterprise agencies currently operating has been placed in the House of Commons Library. The Department has no information on the jobs saved or created by individual agencies.

Mr. Peter Bruinvels asked the Secretary of State for Trade and Industry if he will report on the recent Local Enterprise Week giving details of each undertaking known to his Department; and if he will make a statement.

Mr. Trippier [*pursuant to the reply*, 4 June 1985, c. *135*]: During Local Enerprise Week 1985 some 700 events were organised throughout the country by many different undertakings and it would therefore be impossible to list each one.

Early reaction to the Week has been very positive according to feedback reaching my department.

I was particularly pleased by the support generated at community level to help small businesses start up and grow and the success of Local Enterprise Week in attracting publicity to those locally based organisations.

SOCIAL SERVICES

Smoking (Premature Deaths)

Mr. Pavitt asked the Secretary of State for Social Services how many letters he has sent to district health authorities or to community physicians advising them that time and money should not be used in informing hon. Members of premature deaths due to cigarette smoking.

Mr. John Patten: None. One district health authority chairman has received copies of correspondence between an hon. Member and my right hon. and learned Friend, in which he expressed the opinion that the postage to hon. Members of purely campaigning material was an inappropriate charge on National Health Service funds.

Departmental Records

Mr. Ashdown asked the Secretary of State for Social Services if he will publish a list of the official forms used by staff of his Department to record *(a)* work done and *(b)* information obtained in the investigation of actual or suspected fraud by social security claimants.

Mr. Whitney: During an investigation into social security benefit fraud, staff may use any of the following official forms to record either work done and/or information obtained:

Memoranda Sheet
Narrative Report
Employer's Statement of Earnings
Witness Statement
Record of Interview
Special Investigator's Report
Report of missing Order Book/Girocheque

Mr. Ashdown asked the Secretary of State for Social Services whether photographs or copies of photographs have been obtained by staff of his Department through liaison with the police in the investigation of actual or suspected fraud by social security claimants.

Mr. Whitney: Neither photographs nor copies of photographs of social security claimants are obtained from any source in connection with benefit fraud investigations.

Member's Correspondence

Mr. Mudd asked the Secretary of State for Social Services (1) when the hon. Member for Falmouth and Camborne may expect a reply to his letter of 20 March, regarding lodging charges, to the hon. Member for Braintree (Mr. Newton);

(2) when the hon. Member for Falmouth and Camborne may expect a reply to his letter of 27 February, regarding his Department's contributions towards charges for nursing homes, to the hon. Member for Oxford, West and Abingdon (Mr. Patten).

Mr. Whitney: I have written to my hon. Friend today.

Reye's Syndrome

Mr. Ashley asked the Secretary of State for Social Services how many cases of Reye's syndrome in the United Kingdom and Northern Ireland were reported to the communicable diseases surveillance centre in each year since the voluntary scheme was started.

Mr. John Patten: The number of cases of Reye's syndrome notified to the communicable diseases surveillance centre under the voluntary reporting scheme is as follows:

Number of cases (per calendar year)	*Northern Ireland*	*England, Wales and Scotland*
1982	9	39
1983	13	40
1984	14	57

Mr. Ashley asked the Secretary of State for Social Services how many times the Committee on Safety of Medicines has examined the alleged association between Reye's syndrome and aspirin; when were these occasions; what evidence has been considered; whether there has been liasion with the United States Food and Drug Administration; and when it expects to conclude its present consideration of the syndrome.

Mr. Kenneth Clarke: I refer the right hon. Member to my replies to him on 13 March and 3 April at columns *168-9* and *637*. The committee has been in contact with the office of the United States Surgeon General of the Public Health Service, with the centre for diseases control in Atlanta, and with bodies in the United Kingdom. The committee gave further consideration to this issue at its April 1985 meeting. Their advice is that the available evidence has not established a causal link between aspirin use and Reye's syndrome. The committee intends to keep this issue under review and will consider any new evidence that becomes available.

Mr. Ashley asked the Secretary of State for Social Services if he will give the figures for each year for which they are available of the number of deaths in the United Kingdom and in Northern Ireland from Reye's syndrome; and if he will give figures for the same year and for the same age group for the deaths from whooping cough.

Mr. John Patten: The available figures are given in the table.

The numbers of deaths from Reye's syndrome have been obtained from the communicable diseases surveillance centre, which since August 1981 has run a surveillance scheme jointly with the British Paediatric Association. The deaths are those which meet either the clinical and biochemical or the histological criteria as used in their case definition for Reye's syndrome.

The figures for deaths from whooping cough are among those routinely collected by the Office of Population Censuses and Surveys.

Number of deaths reported to BPA-CDSC Reye's Syndrome Surveillance Scheme and the number of deaths from whooping cough (ICD(9)033) United Kingdom, Northern Ireland 1982 to 1984

	Total under 15	*Under 1*	*1-4*	*5-9*	*10-14*
UNITED KINGDOM					
1982					
Reye's Syndrome	27	9	9	4	5
Whooping Cough	16	12	3	—	1
1983					
Reye's Syndrome	*22	8	8	3	2
Whooping Cough	5	3	2	—	—
1984					
Reye's Syndrome	29	12	10	4	3
Whooping Cough	1	1	—	—	—
NORTHERN IRELAND					
1982					
Reye's Syndrome	2	2	—	—	—
Whooping Cough	—	—	—	—	—
1983					
Reye's Syndrome	2	2	—	—	—
Whooping Cough	—	—	—	—	—

	Total under 15	Under 1	1-4	5-9	10-14
1984					
Reye's Syndrome	1	—	1	—	—
Whooping Cough	—	—	—	—	—

* One age not known

Mr. Ashley asked the Secretary of State for Social Services, pursuant to his reply *Official Report*, 3 April, columns *635-6*, if his Department has any explanation for the higher incidence of Reye's syndrome in Northern Ireland than in England and Wales.

Mr. John Patten: It is too early to draw conclusions about any apparent difference in the estimated incidence; it may be explained in part by a greater diagnostic awareness and readiness to report the condition. The communicable diseases surveillance centre will continue to monitor reported cases.

Speech Therapists

Mr. Alfred Morris asked the Secretary of State for Social Services what representation he has received from the student committee of the College of Speech Therapists concerning remuneration of speech therapists supervising students; what reply he is sending; and if he will make a statement.

Mr. Kenneth Clarke: I have received a petition from the Student Committee of the College of Speech Therapists and National Union of Students about the payment of allowances to speech therapists supervising students on clinical placements. Payment of these allowances, where appropriate, is a matter for individual health authorities. They have been asked to honour an existing Whitley Council agreement and the Student Committee has been so advised.

Poliomyelitis

Mr. Alfred Morris asked the Secretary of State for Social Services how many people have contracted polio in the last five years; and what action is being taken to ensure complete vaccination of the population.

Mr. John Patten: The number of poliomyelitis cases reported to the communicable diseases surveillance centre in respect of England and Wales is as follows:

	Number
1980	2
1981	6
1982	3
1983	3
1984	3

We are committed to a voluntary immunisation policy. Polio immunisation is an integral part of the childhood immunisation programme and as such is continuously promoted by health professionals and through literature published by the Government funded Health Education Council.

Cochlear Implants

Mr. Alfred Morris asked the Secretary of State for Social Services how many cochlear implants have been performed on deaf children; what have been the results of these operations; and if he will make a statement.

Mr. John Patten: We are not aware that any deaf children in England have been given a cochlear implant, which is a technique still at an experimental stage. I understand that, although they have been used for some profoundly deaf adults, the fitting of such devices to children is not regarded as appropriate by most British clinicians since their use could prevent the children from benefiting from other possible developments in years to come.

Autistic People (Services)

Mrs. Renée Short asked the Secretary of State for Social Services (1) what is his policy towards the recommendations which have been submitted to him by the Birmingham and district society for autistic children in respect of special residential/day facilities for autistic adults in the west midlands;

(2) if he will make resources available to localities in the west midlands region to enable them to make provision for the construction of residential autistic communities.

Mr. John Patten: I shall write to the hon. Member once we have had the opportunity to consider the recent correspondence from the Birmingham and district society copied to us for information. It is for health and local authorities to determine the detailed provision of service for autistic people in their areas in the light of local needs and the availability of resources, and I understand that the regional health authority is inviting the society to a meeting to discuss its ideas.

NHS (Hospital Closures)

Mrs. Renée Short asked the Secretary of State for Social Services if he will list the number of hospitals for the mentally handicapped which have either closed down or have had a reduction in staff manpower in the west midlands region in each single year since 1979.

Mr. Kenneth Clarke: No hospitals for the mentally handicapped have been approved for complete closure in the west midlands region since 1979. Information on the number of staff employed in such hospitals for the period 1979 to 1982 can be found in the publications, "The Facilities and Services of Mental Illness and Mental Handicap Hospitals in England", copies of which are in the Library. For more recent information, the hon. Member may wish to write to the chairman of the West Midlands regional health authority.

NHS (Expenditure)

Mr. Meacher asked the Secretary of State for Social Services how many National Health Service hospital beds have closed each year since 1979 as a result of the closure of wards within hospitals that still remained open; and in which hospitals these beds were located in each case.

Mr. Kenneth Clarke [*pursuant to his reply*, 3 June 1985, c. *108*]: I see no sensible purpose in keeping centrally a full inventory of furniture in each of our

hospitals. We only acquire information centrally on permanent partial closures when they are sufficiently significant to require formal consultation. In every case bed closures are only approved by Ministers when they are no longer necessary for patient care and the resources involved can be put to better use elsewhere. The total number of beds involved in such closures, by year of approval is as follows:

	Number of beds
May to December 1979	n/a
January to December 1980	17
January to December 1981	705
January to December 1982	262
January to December 1983	598
January to December 1984	785
January to March 1985	207

n/a=Not available.

Note: The above figures do not include the closures at six hospitals for which we do not have information on bed numbers. These hospitals are indicated in the following table.

Details of the individual hospitals are as follows:

Partial hospital closures (permanent) approved

Written Answers to Questions

Thursday 6 June 1985

ATTORNEY-GENERAL

Broadcasting Offences

Mr. Gorst asked the Attorney-General whether any infringements of the Marine Etc. Broadcasting Offences Act by the United Kingdom-based companies whose products and services have been advertised or promoted on Laser 558, have been brought to his attention; and what prosecutions he proposes to initiate.

The Attorney-General: Certain possible infringements of the nature specified have been drawn to the attention of the Director of Public Prosecutions and either have been or are being investigated by the police at his request. In a number of cases the investigation has disclosed no offence under the Act by any United Kingdom-based company. However the director is awaiting a report in relation to the current investigations.

"Killing for Company"

Dr. Mawhinney asked the Attorney-General, further to his answer to the hon. Member for Peterborough. *Official Report,* 11 March, column 5, when he intends to tell the hon. Member for Peterborough whether he will prosecute the author and publishers of "Killing for Company: The Case of Dennis Nilsen."

The Attorney-General: I do not intend to institute any proceedings under the Obscene Publications Act 1959 against the author or publishers of "Killing for Company: The Case of Dennis Nilsen."

TRADE AND INDUSTRY

Import Penetration

Mr. Gould asked the Secretary of State for Trade and Industry if he will set out the basis of the assertion by the Minister of State, the hon. Member for Kingston upon Thames (Mr. Lamont), on 1 May, *Official Report,* column *246,*that every 1 per cent. increase in import penetration costs British industry 250,000 jobs.

Mr. Norman Lamont: The correct figure should have been 80,000 jobs.

House of Fraser

Mr. Gould asked the Secretary of State for Trade and Industry if he will publish in the *Official Report* any information concerning the financial backers behind the successful bid to take over the House of Fraser which was available to him at the time of his decision not to refer the bid to the Monopolies and Mergers Commission or which has become available since then.

Mr. Fletcher: For reasons of commercial confidentiality the Secretary of State does not publish the information available to him in connection with his consideration of mergers.

Value Added and Managed Data Services

Mr. Wood asked the Secretary of State for Trade and Industry when the consultative document on the future licensing of value added and managed data services will be published; and if he will make a statement.

Mr. Butcher: The consultative document has been published today. Copies may be obtained from the Library.

The current 1982 VANS general licence needs to be revised in order to take account of the Telecommunications Act 1984; to give effect to the commitment given in October 1984 on the future licensing of managed data network services; and to correct the anomlies that have come to light since the grant of the general licence in October 1982. At the same time it is proposed that the opportunity should be taken to carry out a significant liberalisation of the licensing requirements governing the provision of enhanced telecommunication services.

The consultative document sets out the Government's thoughts on these issues. We wish to take account of the views of all those with an interest in the provision of enhanced services concerning their future licensing and are asking for comments to be submitted by the end of July

Manufactures

Mr. Austin Mitchell asked the Secretary of State for Trade and Industry what is his estimate of the volume of world trade in manufactures in 1984 as a percentage of the 1980 figure; and how this compares with the corresponding figures for the United Kingdom.

Mr. Channon: Since 1980, the volume of world trade in manufactures, as measured by the exports of the main manufacturing countries, is estimated to have increased by around 13 per cent. The corresponding figure for the United Kingdom is about 2 per cent.

PRIME MINISTER

Pay Review Bodies

Mr. Forth asked the Prime Minister if she will make a statement on the reports of the pay review bodies.

The Prime Minister: The 1985 reports of the Armed Forces Pay Review Body, the Doctors' and Dentists' Review Body and the Review Body for Nursing Staff, Midwives, Health Visitors and Professions Allied to Medicine have been published today. Copies are now available in the Vote Office. The Government are grateful to the members of the review bodies for these reports and for the time and care which they have put into their preparation. The report of the Top Salaries Review Body has not yet been submitted to the Government.

The report of the Armed Forces Pay Review Body recommends increases which would add 7·3 per cent. to the armed forces' 1985-86 pay bill. These recommendations will be implemented in full from 1 April 1985. The additional costs in excess of the 3 per cent. allowance in the defence budget for increases in pay and prices will be offset by economies or reductions elsewhere in the defence programme.

The report of the Doctors' and Dentists' Review Body recommends increases which would in 1985-86 add 6·4

per cent. (including increases in distinction awards to consultants) to the pay bill for hospitals and community health services and 6·2 per cent. to the pay bill for the non-cash-limted family practitioner services. The recommendations will be implemented with effect from 1 June 1985. The additional costs to the pay bill of the cash-limited services in 1985-86 will be 5·4 per cent. and for the family practitioner services 5·2 per cent.

The reports of the Review Body for Nursing Staff, Midwives, Health Visitors and Professions Allied to Medicine incorporate the results of the reviews of the salary scales of these professions on which this body has been working since its establishment in 1983. These reports accordingly recommend a range of salary increases for different grades which would add 9·0 per cent. to the 1985-86 pay bill for these groups. The increases in basic pay recommended for qualified nurses and midwives in the main clinical grades range from 8·4 per cent. to 14·3 per cent. and for analogous grades in the professions allied to medicine from 7·6 per cent. to 16·6. There are lower increases recommended for trainees, unqualified staff and administrative grades. The recommendations will be implemented in two stages. All members of these groups will receive an increase of 5 per cent. (or the whole amount of the award where this is less) from 1 April 1985, with the balance of the recommended increases, which embody the review body's proposals for salary restructuring, on 1 February 1986. By that date the salary scales recommended by the review body will be in full operation. The additional costs to the pay bill of the cash-limited services in 1985-86 will be 5·6 per cent.

The cost of these awards in 1985-86 for the health authorities will be met within existing cash limits.

Pensions will be based on the salaries actually in payment in accordance with the principle set out in my written answer on 13 April 1984 at column *383*.

The pay rates and scales resulting from the decisions will be promulgated as soon as possible. The Government will be considering separately certain recommendations on points of detail.

Israeli Foreign Minister

Q23. **Mr. Latham** asked the Prime Minister whether she will make a statement on her meeting with the Foreign Minister of Israel, Mr. Yitzhak Shamir.

The Prime Minister: I refer my hon. Friend to the answer that I gave him on Tuesday 4 June at columns *149-150*.

Engagements

Mr. Tony Lloyd asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mrs. Clwyd asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Leigh asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Peter Bruinvels asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Parry asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Pike asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Greenway asked the Prime Minister if she will list her official engagements for Thursday 6 June.

Mr. Marlow asked the Prime Minister if she will list her official engagements for Thursday 6 June.

The Prime Minister: This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in this House I shall be having further meetings later today. This evening I will be attending a dinner given by Premier Zhao Ziyang of the People's Republic of China.

Nicaragua

Mr. Teddy Taylor asked the Prime Minister if she will raise at the next meeting of the Council of Ministers the action taken by the President of the Common Market Commission in providing aid and a special trade agreement with the Republic of Nicaragua; and if she will make a statement.

The Prime Minister: The European Community has not entered into any special trade agreement with the Republic of Nicaragua. The only aid provided to Nicaragua has been in the framework of the Community's regular food aid programme and its programme for non-associated developing states, which have to be approved by the Council of Ministers under standard procedures.

ENERGY

Atomic Energy Special Constabulary

Mr. D. E. Thomas asked the Secretary of State for Energy if the Atomic Energy special constabulary ever takes part in exercises which are not strictly related to nuclear installations.

Mr. Goodlad: No.

Coal Industry

Mr. Gordon Brown asked the Secretary of State for Energy how many jobs have been lost in the coal industry since January 1984 in *(a)* Scotland and *(b)* Great Britain; and how many jobs he expects to be lost in the next three years.

Mr. David Hunt: I understand from the National Coal Board that the number of men on colliery books on 7 Janauary 1984 was 13,436 in Scotland and 186,164 in Great Britain. On 18 May 1985 the numbers were 9,705 and 168,416 respectively. I can make no estimate of future numbers, which will depend on a number of factors.

Gas Industry (Privatisation)

Dr. Glyn asked the Secretary of State for Energy if, when considering the privatisation of the gas industry, he will give full consideration to and opportunity for workers' participation n the industry.

Mr. Buchanan-Smith: As my right hon. Friend said in his statement to the House on 7 May, we propose to make generous provision to enable all who work in the industry to acquire shares and thus to take a new stake in the company's performance and success.

Offshore Licensing

Mr. Wilson asked the Secretary of State for Energy if he will publish figures in the *Official Report* to show the amounts received in the financial year 1984-85 from their share of offshore licensing revenue by *(a)* the Isle of Man and *(b)* Northern Ireland.

Mr. Buchanan-Smith: The amounts paid to the Isle of Man and Northern Ireland during the financial year 1984-85 were £2,763,157 and £51,174,030 respectively.

OVERSEAS DEVELOPMENT

Dublin Plan (Food Aid)

Mr. Bowen Wells asked the Secretary of State for Foreign and Commonwealth Affairs (1) what information was provided at the European Commission's co-ordination meeting *(a)* on 21 February and *(b)* on any subsequent date, concerning the quantities of the Community share of the emergency food assistance promised under the Dublin Plan which have arrived in Ethiopia, Sudan, Chad, Mali, Mauritania, Niger and Burkina Faso;

(2) what information he now possesses concerning the quantities of the Community share of the emergency food assistance promised under the Dublin plan which have arrived in Ethiopia, Sudan, Chad, Mali, Mauritania, Niger and Burkina Faso.

Mr. Raison: A further co-ordination meeting was held on 31 May by the European Commission and the member states of the European Community. The following information on deliveries was made available, which brings up to date and revises that provided to my hon. Friend on 14 May at columns 93-4.

Deliveries of food aid between December 1984 and May 1985 by the European Community, tonnes of wheat or wheat equivalent

	Committed before 4 December	*Committed after 4 December*	*Total*
Ethiopia	70,000	*54,000	124,000
Sudan	10,500	*46,500	57,000
Chad	16,000	*27,100	43,100
Mali	8,000	30,000	38,000
Mauritania	8,000	—	8,000
Niger	17,000	15,000	32,000
Burkina Faso	5,500	11,000	16,500

* includes some foods other than cereals expressed in equivalent cereal quantities.

Africa (Food Shortages)

Mr. Bowen Wells asked the Secretary of State for Foreign and Commonwealth Affairs what steps are taken by his Department to ensure that Her Majesty's Government are kept informed of the extent to which European Community pledges in connection with the current food shortages in Africa have been implemented.

Mr. Raison: I refer my hon. Friend to the answer given to him on 13 May, at columns 19-20.

HOUSE OF COMMONS

Private Members' Bills

Mr. Adley asked the Lord Privy Seal (1) if he will list the Bills which have been presented under the ten-minute rule for each year since 1970; what was the name of the principal sponsor; which Bills have been *(a)* accepted and *(b)* rejected by the House; and which in category *(a)* have subsequently entered the statute book;

(2) if he will list the Bills which have been drawn in the top 20 in the ballot for each year since 1970; what was the name of the principal sponsor; and which of these Bills has subsequently been enacted;

(3) if he will list the Bills, other than Government Bills, not presented under the ten-minute rule or drawn in the top 20 ballot, which have been published for each year since 1970; what was the name of the principal sponsor; and which of these Bills has subsequently reached the statute book.

Mr. Biffen: The information is not held centrally in the form that is requested and could be obtained only at disproportionate cost.

List of Members

Mr. McQuarrie asked the Lord Privy Seal if he will make a statement as to why there are no copies of the List of Members available for the use of right hon. and hon. Members from the Vote Office in the Members' Lobby.

Mr. Biffen: The List of Members, which is issued by the Vote Office for the use of Members, is published twice a year in January and June. The new list is about to be printed and will be made available as soon as possible. Stocks of the present list have run out, and it is not considered financially viable to order a reprint.

TRANSPORT

Philippine Airlines

Mr. Gerald Howarth asked the Secretary of State for Transport what discussions have taken place recently between his Department and Philippine Airlines concerning his decision last year to terminate the three-year-old reciprocal agreement on landing rights; and if he will make a statement.

Mr. Wilkinson asked the Secretary of State for Transport (1) when next negotiations will continue between his Department and Philippine Airlines on the Government's decision concerning permit CAIR/PR/5; and if he will make a statement;

(2) what reasons were given to the Philippine Government for his decision to cancel the air agreement that allowed Philippine Airlines to operate three flights per week between Manila and London.

Mr. Michael Spicer: Under article 13 of the United Kingdom-Philippines air services agreement of 13 January 1955, there is no requirement to give reasons with a notice of termination. The notice of termination was the result of a disagreement about the number of frequencies required to meet demand consistently with fair competition on the route between the United Kingdom and the Philippines.

Representatives of the British and Philippines aeronautical authorities met in May to discuss future arrangements for scheduled services between their two countries. They asked their respective airlines to discuss future needs on the London-Manila and Hong Kong-Manila routes and to report their conclusions before Government consultations resume in July.

I hope that the consultations will lead to a resolution of the existing dispute and that new arrangements will be made for the continuation of air services between the two countries on a mutually acceptable basis.

Air Traffic (Landing Agreements)

Mr. Gerald Howarth asked the Secretary of State for Transport what existing landing agreements in the far east and Asia which could involve British companies are coming up for renegotiation in 1985.

Mr. Michael Spicer: We believe that air services agreements should provide the basis for fair competition between the airlines of each country.

The only air services agreement affecting the far east and Asia which is subject to formal renegotiation this year, is that with the Philippines.

Mr. Gerald Howarth asked the Secretary of State for Transport how many times in the last five years his Department has been taken to court by foreign airlines about landing agreements; and what was the judgment in each case.

Mr. Micheal Spicer: Over the last five years there have been two court cases involving permits for foreign airlines. Last year a provisional variation of Philippine Airlines' permits was upheld by the High Court in June but quashed by the Court of Appeal when made final in July. There has not yet been a full hearing on the current case involving Iberia Airlines.

London-Australia Air Services

Mr. Wilkinson asked the Secretary of State for Transport what is the share in percentage terms of the London-Australian transit market for the most recent year available and the last five years of *(a)* the Malaysian Airline system, *(b)* Singapore Airlines, *(c)* Philippine Airlines, *(d)* Indonesia Airlines, *(e)* Thai Airways, *(f)* Cathay Pacific and *(g)* British Airways.

Mr. Michael Spicer: It is not the Department's practice to disclose commercial information about the activities of individual airlines.

Okehampton Bypass

Mr. Andrew F. Bennett asked the Secretary of State for Transport what progress has been made on the design and statutory procedures for the northern route of the Okehampton bypass; and when he expects construction work on the bypass to start.

Mrs. Chalker: As with any new road scheme, the detailed design and statutory procedures for such a project would take several years.

Thames Piers

Mr. Evennett asked the Secretary of State for Transport if he will make a statement on the future of the Thames piers presently owned and operated by the Greater London council.

Mrs. Chalker: In a consultation document issued last July, it was proposed that the piers be transferred to the boroughs in which they are situated. Representations have since been received from a number of interested parties stressing the importance of the piers to passenger and pleasure boat operators on the Thames and hence to the amenity and leisure uses of the river. The function of promoting such uses of the Thames rests with the Thames water authority. We have therefore reached the view that the most appropriate successor authority for the piers would be the Thames water authority, which is willing to take them on and operate them.

British Airports Authority

Mr. Michael Forsyth asked the Secretary of State for Transport what plans he has to seek professional financial advice in connection with the proposed privatisation of the British Airports Authority.

Mr. Ridley: The Department of Transport will be appointing financial advisers in connection with the proposed privatisation of the British Airports Authority. Merchant banks interested in being considered for this work are being invited to make written submissions to the Department by 14 June.

British Rail (Surplus Land)

Mr. Alexander asked the Secretary of State for Transport if he will state his policy towards the sale of British Rail's surplus land in the light of the Monopolies and Mergers Commission's report on British Rail's property activities, Cmnd. 9532.

Mr. David Mitchell: The Government's general policy towards British Rail—as towards all other public authorities — is that all land surplus to requirements should be offered for sale as soon as practicable.

The MMC makes no criticism of the board's decision to sell its surplus property, but it says that the implementation of this decision was deficient in some respects and I have asked the board to produce a detailed response to these points, when it replies to the report later in the year.

I welcome the considerable contribution that BR has made to its finances from the sales programme so far. The MMC has made a number of constructive proposals for improving BR's handling of its property, and I shall be looking to British Rail to come forward with continuing programmes for the disposal of further surplus land. It is not the function of public authorities to speculate in the property market, and it is in the interests of the country and the railway that surplus land should be put to productive use in the private sector without delay.

WALES

Nuclear Waste

Mr. Best asked the Secretary of State for Wales what plans are envisaged for the location of possible future nuclear waste depositories in Wales; and what geological work has been carried out to date.

Mr. Wyn Roberts: It is the task of the Nuclear Industry Radioactive Executive to identify and develop disposal facilities for low and intermediate level radioactive wastes in the United Kingdom.

NIREX is currently giving priority to seeking at least two possible sites, in addition to Elstow in Bedfordshire, for a near-surface facility for shorter-lived wastes and is expecting to report later in the year. Any detailed geological investigations to confirm the suitability of the chosen sites will follow the procedure announced by my right hon. Friend the Secretary of State for Environment on 24 January 1985 at column 1146.

NHS Hospitals (Mid-Glamorgan)

Mr. Ron Davies asked the Secretary of State for Wales whether Mid-Glamorgan area health authority has been approached by any private medical company with a view to private sector management of National Health Service hospitals within the county or has been or is involved in any negotiations on this basis.

Mr. Wyn Roberts: I am informed that the authority has not been approached and is not involved in any such negotiations.

Afforestation

Mr. Ron Davies asked the Secretary of State for Wales if he will give the area of land newly afforested in the year to 31 March distinguishing between *(a)* coniferous plantations and other forestry schemes and *(b)* those proportions planted by the Forestry Commission and private landowners, respectively.

Mr. Stradling Thomas: The information is as follows:

New Planting

Types of Planting	*Forestry Commission (hectares)*	*Private Landowners (hectares)*	*Totals (hectares)*
Conifers	147	884	1,031
Broadleaves	12	34	46
TOTALS	159	918	1,077

These figures are provisional. Planting statistics for 1984-85 will be published by the Forestry Commission in its next annual report.

Felling Licences

Mr. Ron Davies asked the Secretary of State for Wales how many Forestry Commission felling licences have been granted to private individuals or organisations in Wales in the year to 31 March; and what was the total area of hard and softwood timber so felled.

Mr. Stradling Thomas: The total number of felling licences granted by the Forestry Commission for the thinning and clear felling of woodland in Wales in the year to 31 March 1985 was 139. The total area of timber felled under licence in the year is not known as the Forestry Commission does not normally monitor the situation on the ground after granting a licence, unless replanting conditions are involved and these conditions are due to be fulfilled.

EMPLOYMENT

Labour Statistics

Mr. Jim Callaghan asked the Secretary of State for Employment how many persons under the age of 21 years were unemployed in Rochdale in the years 1982, 1983 and 1984.

Mr. Alan Clark: The following information is available in the Library. The numbers of persons under the age of 20 years, who were unemployed in the former Rochdale travel-to-work area in October of 1982, 1983 and 1984 were 1,542, 1,534 and 1,563, respectively. Figures are not available for those aged under 21.

Mr. Tony Banks asked the Secretary of State for Employment how many people under the age of 25 years have been unemployed for *(a)* between six months and one year, *(b)* between one year and two years and *(c)* more than two years in the London borough of Newham.

Mr. Alan Clark: The following information is in the Library. On 11 April 1985, the latest date for which an analysis of unemployment by age and duration is available, in the East Ham, Plaistow and Stratford jobcentre areas, which correspond closely to the London borough of Newham, 1,946 had been unemployed for between six months and one year, 1,286 for between one year and two years and 954 for over two years.

Mr. Tony Banks asked the Secretary of State for Employment how many pople under the age of 21 years in *(a)* the London borough of Newham, *(b)* the London borough of Croydon, *(c)* the city of Westminster and *(d)* the London borough of Southwark have never had a job since leaving school.

Mr. Alan Clark: The following information is in the Library.

Unemployed school leavers—9 May 1985

London Borough	*Under 18 years*	*18 years*
Newham	616	262
Croydon	309	186
Westminster	223	156
Southwark	487	264

No information is separately available of those aged 19 and 20 years.

Southampton Skillcentre

Mr. Chope asked the Secretary of State for Employment whether he will make a further statement on the future of the Southampton skillcentre and annexe.

Mr. Peter Morrison: I refer my hon. Friend to my right hon. Friend's reply to my hon. Friend the Member for Dudley, West (Dr. Blackburn) on 4 June 1985 at column *125*. The chairman of the Manpower Services Commission has decided to retain the provision at Southampton. He took this decision in the light of a reappraisal of the financial viability of the annexe, following commitment of local support for further business for it, with which my hon. Friend was associated.

Community Programmes (Leicester)

Mr. Peter Bruinvels asked the Secretary of State for Employment (1) if he is yet in a position to report on the renewal by Leicester city council of its various community programme projects; and if he will list the organisations involved and the numbers of people liable to be on the various programmes;

(2) how many places have been allocated under various community programme projects within Leicester city council for the period 1985-86; how this compares with the previous 12 months; and if he will make a statement;

(3) how many places have been allocated under community programme projects within the city of Leicester; and how this compares with the previous 12 months.

Mr. Peter Morrison: I shall reply to my hon. Friend as soon as possible.

Asbestos Removal (Faslane)

Mr. Gordon Brown asked the Secretary of State for Employment if there will be any danger to the adjacent work force at Faslane through windborne asbestos during removal.

Mr. Peter Bottomley: No.

Mr. Gordon Brown asked the Secretary of State for Employment how many Health and Safety Executive staff will be allocated to supervise the removal of asbestos from Faslane.

Mr. Peter Bottomley: None. Responsibility for ensuring the safe removal of asbestos lies with those undertaking the work. Such work is subject to the Health and Safety at Work etc. Act 1974 and associated legislation. The Health and Safety Executive is the enforcing authority at these sites.

Health and Safety

Mr. Dobson asked the Secretary of State for Employment what legislative and non-legislative changes have been made to the provision for health and safety at work since 1979.

Mr. Peter Bottomley: Since 1979 20 sets of health and safety regulations imposing new controls have been made and a substantial volume of outdated legislation has been repealed, revoked or amended. Eight approved codes of practice and a considerable amount of guidance literature have been published by the Health and Safety Commission and Executive.

Mr. Dobson asked the Secretary of State for Employment if he will list the numbers killed or injured in each standard category of employment at their place of work in each year since 1979.

Mr. Peter Bottomley: I shall reply to the hon. Member as soon as possible.

Mr. Dobson asked the Secretary of State for Employment if he has any proposals for improving health and safety at work; and if he will make a statement.

Mr. Peter Bottomley: The Health and Safety Commission programmes of work, which my right hon. Friend has approved, are set out in its "Plan of Work 1985-86 and Onwards."

Parental Leave

Mr. Meadowcroft asked the Secretary of State for Employment whether he intends to support the proposed European Economic Community directive on parental leave when he meets with the European Economic Community Council of Ministers; and if he will make a statement.

Mr. Peter Bottomley: We are analysing the responses of interested parties in the United Kingdom to our recent consultation exercise on this draft directive, and my right hon. Friend will bear these views in mind when the Council of Ministers discusses the subject. The Government's view is that the matters covered by the draft directive are best dealt with between employers and employees according to their own priorities, needs and circumstances rather than by Government or Community intervention. The Government are also concerned at the potential costs and administrative burden such a measure would impose on employers, and we strongly believe that here and in Europe we should be focusing our energies and efforts on the main problem that faces us all — unemployment — rather than on improving the position of people who already have jobs.

ENVIRONMENT

Cayman Turtle Farm

Mr. Frank Cook asked the Secretary of State for the Environment if Her Majesty's Government intend to permit future imports of products from the Cayman turtle farm.

Mr. Waldegrave: Applications to import products of captive-bred turtles from the Cayman turtle farm will continue to be considered on their merits by my Department, in the light of scientific advice from the Nature Conservancy Council. Article VII of the convention on international trade in endangered species of wild fauna and flora specifically allows imports of captive-bred specimens of species such as sea turtles, which are listed on appendix I of the convention.

The Cayman turtle farm has already had considerable success in breeding turtles in captivity, both for commercial purposes and to assist in the conservation of endangered wild turtles. The farm has not taken any turtles or eggs from the wild since 1978.

Mr. Frank Cook asked the Secretary of State for the Environment what quantity of turtle products have been imported into the United Kingdom from the Cayman turtle farm since 1 January 1984.

Mr. Waldegrave: The Department's records show that the following turtle products have been imported into the United Kingdom from the Cayman turtle farm since 1 January 1984:

14 pieces of shell
8 shells
20 skins
36 scutes

Turtles (Products)

Mr. Frank Cook asked the Secretary of State for the Environment if Her Majesty's Government intend to permit imports of products from any turtles coming from the wild or from ranches.

Mr. Waldegrave: In accordance with the European Council CITES regualation (No. 3626/82) the Department does not normally permit the import of wild sea turtle products. Imports of ranched sea turtle products may be permitted in some circumstances.

Radioactive Waste

Mr. Best asked the Secretary of State for the Environment if he intends to conduct a public inquiry into options for radioactive waste storage and disposal.

Mr. Waldegrave: The options for radioactive waste management are currently being examined by the Environment Select Committee, which is receiving evidence from a number of organisations and individuals. We shall take its report fully into account in subsequent decisions, along with the views of the radioactive waste management advisory committee, the conclusions of the study of best practicable environmental options being undertaken following the Holliday report, and other studies carried out by my Department. The reports containing this material will be published, and will be the product of an extensive process of consultation and inquiry which I am confident will ensure that the best options have been identified for the future.

Sea Pollution

Mr. Simon Hughes asked the Secretary of State for the Environment why the Control of Pollution (Territorial Sea) Regulations 1984 have been revoked.

Mr. Waldegrave: The Control of Pollution (Territorial Sea) Regulations 1984 were made under section 56 of the Control of Pollution Act 1974 and were designed to bring certain small areas of esturial water within the control of

part II of that Act. Section 56 permits only the prescription of areas of "territorial sea"; it has now been concluded that all esturial waters cannot be properly covered by the term "territorial sea". The 1984 regulations were therefore largely ineffective in controlling that small part of the esturial waters which they were designed to cover.

Multiple Occupation

Mr. Chris Smith asked the Secretary of State for the Environment when he expects to publish the results of his Department's pilot survey of houses in multiple occupation, forming the first part of its research on houses in multiple occupation.

Sir George Young: I refer the hon. Member to the answer which I gave to my hon. Friend, the Member for Staffordshire, Moorlands (Mr. Knox) on 3 June at columns 33 and 34.

Dolphins and Killer Whales

Mr. Portillo asked the Secretary of State for the Environment what is his policy towards applications to import dolphins or killer whales into the United Kingdom.

Mr. Waldegrave: My Department has not granted any permits to import dolphins or killer whales since 1983. I am aware of public concern, and it is clear that there are widely differing opinions about the value of dolphinaria. I have therefore decided to appoint an independent adviser to consider whether the educational, research and breeding benefits of dolphinaria and similar establishments in the United Kingdom are of sufficient value to justify the import and display of live cetaceans. Advice will also be sought on the standards that should be applied to dolphinaria if they can be justified on educational, research or breeding grounds. The review will also take account of recent EC CITES regulations which increased the conservation status of small cetaceans. The views of operators and conservation bodies will also be sought. I am currently arranging for a suitable adviser to be appointed, and I hope to make a further announcement shortly. Any applications to import further dolphins or killer whales from the wild to the United Kingdom will be determined in the light of this review, which I expect to complete within six months from the date of the appointment of my adviser.

Asbestos Removal (Faslane)

Mr. Gordon Brown asked the Secretary of State for the Environment how much asbestos to be removed from Faslane is in the loch itself; and whether any is situated in the area where it is intended to pile drive for the new jetty.

Sir George Young: A recent survey has found traces of asbestos on the bed of the loch where some of the new jetties are to be built and consideration is now being given to the further corrective action, if any, required to deal with such waste. The present contract to decontaminate part of the site does not extend to the loch.

Accident Prevention

Mr. Dobson asked the Secretary of State for the Environment what advice his Department has issued since 1979 to local authorities on planning, engineering and building in the context of accident prevention.

Sir George Young: A circular was issued in March 1984 on planning controls and hazardous developments. The Department has written on six occasions to local authorities advising them of circumstances in which certain types of dwellings may present safety risks as a result of possible structural instability. This advice concerned Airey houses, Orlit dwellings, Bison wall-frame dwellings, Taylor Woodrow-Anglian buildings and other dwellings constructed of large load-bearing panels. The Building Research Establishment has published advice from time to time to local authorities and others on building safety.

Social Needs

Mr. Dobson asked the Secretary of State for the Environment what new indications of social needs have been developed by his Department since 1979.

Sir George Young: The list of indicators used for assessing social need in relation to the designation of local authorities under the Inner Urban Areas Act 1978 was originally set out in a written parliamentary reply on 13 June 1978, at columns 468-78. Additional information derived from the national dwelling and housing survey (1977-79) was reflected in revisions to the list of indicators, shown in a parliamentary reply on 14 May 1981, at columns 324-30. Since then the list has remained unchanged, although new information about deprivation derived from the 1981 census and other sources has subsequently been taken into account. A note by my Department (Information Note No. 2), listing the indicators and explaining how they are applied, was placed in the Library of the House on 15 February 1983.

Housing Improvements

Mr. Dobson asked the Secretary of State for the Environment if he will list the total expenditure by local authorities on improvements to their own housing stock in each year since 1978-79 at constant prices.

Sir George Young: Total expenditure by local authorities in England on improvements to their own housing stock, including conversion, capitalised repairs, energy conservation and environmental works, in 1984-85 prices is as follows:

	£ million
1978-79	852
1979-80	1,101
1980-81	860
1981-82	723
1982-83	1,040
1983-84	1,185
1984-85	*1,095

* Forecast.

Unfit Dwellings

Mr. Dobson asked the Secretary of State for the Environment if he will list the number of unfit dwellings cleared by local authorities in each year since 1978-79.

Sir George Young: Estimated numbers of dwellings demolished or closed under slum clearance action in each year from 1978-79 to 1983-84 appeared in table 3 of the Department's press notice number 6 published on 9 January; a copy is available in the Library.

Homes for the Elderly

Mr. Shersby asked the Secretary of State for the Environment (1) what is the total amount of public funds made available by the Housing Corporation during each of the past five years for the provision of homes for the elderly;

(2) what is the amount of public funds made available by the Housing Corporation during each of the past five years for the provision of homes for the elderly by the Abbeyfield Society.

Sir George Young: Since 1981-82, the Housing Corporation has financed the development costs of housing association projects within an approved development programme agreed by my right hon. Friend. The Housing Corporation's estimate of expenditure on schemes for the elderly, including leasehold schemes for the elderly, since 1981-82 is as follows:

	£ million
1981-82	129
1982-83	165
1983-84	182
1984-85	*195
1985-86	†226

* provisional estimate of out-turn expenditure
† allocation

Detailed expenditure on provision by the Abbeyfield Society is not readily available. In these years, this has represented between 2 and 4 per cent. of the corporation's expenditure on schemes for the elderly.

Hazardous Waste Disposal

Mr. Tony Banks asked the Secretary of State for the Environment if he will place in the Library a copy of the report of Her Majesty's Hazardous Waste Inspectorate regarding waste disposal facilities; and if he will make a statement.

Mr. Waldegrave: I shall answer this question shortly.

HOME DEPARTMENT

Immigration Control (Airline Staff)

9. **Mr. Fatchett** asked the Secretary of State for the Home Department if he will take steps to prevent airline staff entering immigration control offices at airports to seek payment for return tickets from persons whose eligibility to enter the United Kingdom is in the process of being examined.

Mr. Waddington: My right hon. and learned Friend has done so. Airline and other carrying companies have been informed that they will not be given access, for the purpose of ticketing, to a passenger held in detention without that person's consent. This will apply before and after any decision to refuse entry.

Prison Population (Report)

12. **Mr. Wareing** asked the Secretary of State for the Home Department whether he has studied the National Association for the Care and Resettlement of Offenders report "The Highest Ever Prison Population", a copy of which has been sent to him; and whether he will make a statement.

Mr. Mellor: Yes. My right hon. and learned Friend has already announced the action he is taking immediately to provide more prison places. Our longer-term strategy remains on course.

Police Federation

14. **Mr. John Fraser** asked the Secretary of State for the Home Department if he will make a statement about his meeting with the Police Federation on 16 May.

16. **Mr. Hirst** asked the Secretary of State for the Home Department what matters were discussed when he last met the Police Federation; and if he will make a statement.

26. **Mr. Latham** asked the Secretary of State for the Home Department whether he will make a statement on his recent official visit to the annual conference of the Police Federation.

Mr. Brittan: I addressed the annual conference of the Police Federation on 15 May and responded to a speech by its chairman. I took note of what he said, particularly about resources, manpower and some aspects of the Police and Criminal Evidence Act, although I did not accept that all the anxieties expressed were well-founded.

Primary Purpose Rule

15. **Mr. Bidwell** asked the Secretary of State for the Home Department what recent representations he has received about the implementation by entry clearance officers of the primary purpose rules.

Mr. Waddington: Representations about the application of the primary purpose rule have been received from several sources, including right hon. and hon. Members.

Prevention of Terrorism Act

17. **Mr. Tony Lloyd** asked the Secretary of State for the Home Department whether he is satisfied with the operation of the Prevention of Terrorism Act.

Mr. Waddington: Yes.

Victims of Crime (Report)

18. **Mr. Corbett** asked the Secretary of State for the Home Department whether he has received representations in response to the Government statement "Compensation and Support for Victims of Crime".

Mr. Mellor: Letters have been received from the National Association of Victims Support Schemes and, through hon. Members, from two local schemes asking for central Government funding for victims support schemes.

Civil Defence (Disasters)

19. **Mr. Kirkwood** asked the Secretary of State for the Home Department whether he is satisfied with the distinction between the establishment of a civil defence capacity to deal with civil disasters as opposed to wartime emergencies.

Mr. Mellor: Without derogating from the priority that must be given to implementing the 1983 Civil Defence Regulations, we believe that our commitment of extending the Civil Defence Act 1948 to allow civil defence

resources to be used for peacetime emergencies is both appropriate and further indication of the humanitarian nature of civil defence.

Criminal Statistics

20. **Mr. Holt** asked the Secretary of State for the Home Department what is the average length of time between a person being charged and brought to justice; and if he will make a statement.

Mr. Mellor: The average waiting time from committal to trial in the Crown court in England and Wales in 1984 was 14·3 weeks overall, and 10·1 weeks for those defendants who spent some or all of this period in custody. We have in hand a programme of measures to curb delays, including the commencement this year of field trials of time limits on the bringing of criminal proceedings.

Data Protection Act

21. **Mr. Patchett** asked the Secretary of State for the Home Department whether he will introduce legislation to amend the Data Protection Act to cover manually held police records.

Mr. Waddington: No. As I made clear during the passage of this legislation, it is the use of computers to process personal information which increases the potential threat to the individual and which justifies special measures. The Act is specifically aimed at automatically processed data and it would not be appropriate to extend its provisions to manual records, whether held by the police or by any other body.

Auld Report

22. **Sir William van Straubenzee** asked the Secretary of State for the Home Department when he intends to introduce legislation to implement the recommendations of the Auld report.

Mr. Mellor: The Government will seek an early opportunity to introduce legislation to deregulate shop opening hours.

Experiments on Animals

23. **Mr. Yeo** asked the Secretary of State for the Home Department what representations he has received regarding the proposals contained in the White Paper on experiments on animals.

Mr. Adley asked the Secretary of State for the Home Department what representations he has received about his proposals to amend the Cruelty to Animals Act.

Mr. Mellor: The response so far to the White Paper published on 15 May has been generally welcoming.

Holloway Prison

24. **Mr. Andrew F. Bennett** asked the Secretary of State for the Home Department if he will make a statement about conditions in Holloway prison C.I. unit.

58. **Ms. Richardson** asked the Secretary of State for the Home Department if he will make a statement about conditions in Holloway prison C.I unit.

Mr. Mellor: My right hon. and learned Friend is well aware of the concern which has been expressed about conditions in Holloway's C.I. unit. The future role of Holloway is under consideration by the project committee which will be reporting in July to advise on how the prison can best be developed. We expect that report to deal with C.I. unit among other matters and we now await the advice of the project committee.

Mr. Peter Bruinvels asked the Secretary of State for the Home Department if he will make an official visit to Holloway prison.

Mr. Mellor: My right hon. and learned Friend has no plans to do so at present. My noble Friend, who has responsibility for prisons, visited Holloway on 29 April.

Immigration Rules

25. **Mr. Sean Hughes** asked the Secretary of State for the Home Department what action he is taking to ensure that immigration officers conform to paragraph 2 of the immigration rules.

Mr. Waddington: Every effort is made to ensure that the staff of the immigration and nationality department are aware of their responsibilities and are professional and impartial in their approach. If any member of staff is found to have acted contrary to paragraph 2 of the immigration rules, or to the preamble to part 2 of those rules, disciplinary action will be taken against him.

Voluntary Services Unit

27. **Mr. Meadowcroft** asked the Secretary of State for the Home Department what level of resources he proposes to make available in the next year to the voluntary services unit.

Mr. Mellor: Provision has been sought in Supply Estimates for 1985-86 (Class IX Vote 7) for expenditure of £9·4 million in grants administered by the voluntary services unit, excluding grants for the support of work with refugees.

Drug Abuse

28. **Mr. Boyes** asked the Secretary of State for the Home Department what steps are being taken to increase the numbers of police officers assigned to combat drug abuse; and if he will make a statement.

Mr. Mellor: My right hon. and learned Friend is expecting to receive shortly a report from the Association of Chief Police Officers containing its recommendations for increased police action to combat the problem of drug misuse. He will give that report urgent and serious consideration.

Mr. Alhaji Umaru Dikko

29. **Mr. Stanbrook** asked the Secretary of State for the Home Department when he expects to announce his decision on the application of Alhaji Umaru Dikko for political asylum.

Mr. Waddington: Mr. Dikko's solicitors have today been informed that my right hon. and learned Friend has refused his application for asylum. My right hon. and learned Friend is still considering the application made by the Nigerian authorities for Mr. Dikko's extradition. This involves consideration of matters additional to those relating to the asylum application.

Civil Defence

30. **Mr. Bill Walker** asked the Secretary of State for the Home Department if he will list the annual spending on civil defence research and the development over the past two years.

49. **Mr. Patrick Thompson** asked the Secretary of State for the Home Department what plans he has for future expenditure on civil defence research.

51. **Mr. Waller** asked the Secretary of State for the Home Department what plans he has for future expenditure on civil defence research and development.

54. **Mr. Terlezki** asked the Secretary of State for the Home Department if he will list the annual civil defence research and development spending over the past two years.

Mr. Brittan: Expenditure on civil defence research and development, including scientific staff costs, for 1983-84 and 1984-85 was £732,000 and £616,000 respectively. The estimate for 1985-86 is £978,000 and includes £185,000 for extra-mural work undertaken in 1984-85. It is intended that the present level of expenditure should be maintained over the next three years.

Police Forces (Strength)

31. **Mr. Brandon-Bravo** asked the Secretary of State for the Home Department what steps he is taking in the light of the increasing level of vacancies in police forces in England and Wales.

Mr. Brittan: I refer my hon. Friend to the answer given earlier today to a question from my hon. Friend the Member for Basingstoke (Mr. Hunter).

Prison Medical Service

32. **Mr. Wainwright** asked the Secretary of State for the Home Department whether he will make a statement on complaints by prisoners against the prison medical service.

Mr. Mellor: A prisoner who wishes to complain about an aspect of medical services in prison may use the normal range of internal complaints machinery. Subject to the provisions of Standing Order 5 (which is published and a copy of which is in the Library), a prisoner may also pursue a complaint through his Member of Parliament and the Parliamentary Commissioner for Administration. A prisoner also has the right to petition the Queen, Parliament and the European Commission of Human Rights. If the hon. Member has a particular point in mind I will do my best to answer it.

Illegal Animal Fights

33. **Mr. Greenway** asked the Secretary of State for the Home Department how many people in the Metropolitan police area were convicted of organising illegal animal fights involving dogs and cats in 1984; and if he will make a statement.

Mr. Mellor: Information collected centrally does not distinguish offences of organising fights with dogs or cats from other offences under the Protection of Animals Act 1911.

Broadcasting Act 1981

34. **Mr. Speller** asked the Secretary of State for the Home Department whether, in conjunction with the Independent Broadcasting Authority, he will review the operation of section 4(1)*(f)* of the Broadcasting Act 1981 relating to impartiality.

Mr. Giles Shaw: My right hon. and learned Friend is not persuaded of the need for a review of this kind.

Television Programmes (Subtitling)

35. **Mr. Ashley** asked the Secretary of State for the Home Department when he intends to meet the Governors of the British Broadcasting Corporation and chairmen of independent television authorities to discuss the subtitling of television programmes.

Mr. Giles Shaw: I refer the right hon. Member to the reply which I gave to questions from him on 21 May at columns *381-83*.

Commissioner of Police of the Metropolis

36. **Mr. Peter Bruinvels** asked the Secretary of State for the Home Department when he last met the Commissioner of Police of the Metropolis; and what subjects were discussed.

Mr. Brittan: Apart from social occasions, I last met the Commissioner on 25 March when I put to him the points raised at the meetings I held in February and March with right hon. and hon. Members for constituencies within the Metropolitan police district to discuss his strategy report. The subjects discussed included drugs, racial attacks, crime prevention, victim support schemes, schools liaison, the force reorganisation and the Commissioner's policy for posting of senior officers.

County Council Elections

37. **Mr. Penhaligon** asked the Secretary of State for the Home Department what representations he has received about the effect of the electoral system on the results of the recent county council elections.

Mr. Mellor: None.

Young Children

38. **Mrs. Jill Knight** asked the Secretary of State for the Home Department if he has completed arrangements to ensure that no person with a criminal record of sexual offences towards children will henceforward be employed at public expense in any job where he or she is placed in charge of young children; and if he will make a statement.

Mr. Giles Shaw: As indicated in the pursuant reply given to a question from my hon. Friend the Member for Surrey, South-West (Mrs. Bottomley) on 27 March at column *247*, the report of the review of these issues is expected by the end of June.

Jersey

39. **Mr. Foulkes** asked the Secretary of State for the Home Department when he next expects to pay an official visit to Jersey.

Mr. Giles Shaw: My right hon. and learned Friend has no present plans to make such a visit.

NATO Civil Defence Committee

40. **Sir Geoffrey Finsberg** asked the Secretary of State for the Home Department what civil defence research and development subjects have been considered by the North Atlantic Treaty Organisation civil defence committee.

Mr. Giles Shaw: I refer my hon. Friend to the reply I gave to a question from my hon. Friend the Member for Ilford, South (Mr. Thorne), on 13 November 1984 at column *201*. The committee does not initiate or sponsor research and development which is a matter for member nations, but in its work takes into account as appropriate the latest information available.

Community Radio

41. **Mr. Favell** asked the Secretary of State for the Home Department what representations he has received about the licensing of community radio.

Mr. Giles Shaw: Since the reply given to a question from my hon. Friend the Member for Kingswood (Mr. Hayward) on 23 January at columns *417-8*, we have received about 400 letters on community radio, together with a broadly similar number of telephone inquiries. Most of the approaches have been from persons wishing to set up community radio stations.

TV Concessionary Licensing

42. **Mr. Phillip Oppenheim** asked the Secretary of State for the Home Department how many representations he has received about the television concessionary licensing system in the last 12 months.

Mr. Giles Shaw: About 275 hon. Members and 450 members of the public have written in the last 12 months about the concessionary licence scheme for retired and disabled people in residential care.

Young Offenders

43. **Mr. Flannery** asked the Secretary of State for the Home Department if he has recently discussed the results of his short, sharp shock policy for young prisoners with prison governors and young offenders.

Mr. Mellor: My right hon. and learned Friend visited Medomsley senior detention centre on 26 April to see for himself the operation of the new consistent detention centre regime. During the visit he naturally discussed it with the governor, and met staff and spoke to a number of inmates. He formed a very favourable view of the way the regime is developing.

Police National Reporting Centre

44. **Mr. Stephen Ross** asked the Secretary of State for the Home Department whether he will initiate a study into the role of the police national reporting centre.

Mr. Giles Shaw: No.

Security Service (Ombudsman)

45. **Mr. Aitken** asked the Secretary of State for the Home Department whether he will bring forward proposals for an ombudsman for the security service.

Mr. Brittan: In her statement on the Security Commission's report on the Bettaney case on 9 May 1985 at columns 897-8, my right hon. Friend the Prime Minister indicated that the new Director-General of the Security Service had been asked to consider what developments he would propose by way of internal outlets for the expression of grievances or anxieties of individual members of the Service. When we have received the Director-General's report on this aspect of the management of the service, my right hon. Friend and I will, in considering his proposals, take into account the views that have been expressed in the House about the merits of an external outlet for such grievances or anxieties.

Football Stadia (Policing)

46. **Mr. Evennett** asked the Secretary of State for the Home Department whether he is satisfied with policing arrangements at football stadia in the Metropolitan police district.

Mr. Giles Shaw: The arrangements for policing football matches in the Metropolitan police district generally work well, but they are kept under constant review.

Licensing Laws

47. **Mr. Andrew MacKay** asked the Secretary of State for the Home Department if he will make a further statement on the future of the licensing laws.

Mr. Mellor: The preliminary results from the Office of Population, Censuses and Survey's study of drinking in Scotland, published on 21 May, show that there has been some increase in consumption of alcohol in Scotland since the licensing law was changed in 1976, but that it is unlikely that the increase is a direct consequence of the change in the law. My right hon. and learned Friend will want to consider carefully all the relevant considerations including both the preliminary findings and the full report on the survey, to be published later in the year, before deciding whether relaxations in the permitted opening hours of licensed premises in England and Wales should be introduced.

Police and Criminal Evidence Act 1984

48. **Mr. Campbell-Savours** asked the Secretary of State for the Home Department if he will make a statement on the operation to date of the Police and Criminal Evidence Act 1984.

Mr. Giles Shaw: The major part of the Act has yet to be brought into force, but we intend that it will be implemented on 1 January 1986.

Part IX, which establishes the Police Complaints Authority and makes other changes to the police complaints and disciplinary system, came into effect on 29 April. It is too early at this stage to comment on how it is working.

Section 106, which provides for arrangements to be made in each police area for consultation between the community and the police came into force on 1 January this year. My right hon. and learned Friend issued guidance on these arrangements on 25 January. Arrangements under this section now exist in most parts of England and Wales.

Sections 66 and 67, which prescribes the mechanism for consulting about the draft codes of practice to be made

under the Act, and for bringing them before Parliament, also came into effect on 1 January. Drafts of the codes of practice were published for consultation on 10 January and my right hon. and learned Friend hopes shortly to lay before Parliament an amended draft, revised to take account of the comments received. The codes themselves will not however become effective until the implementation of the provisions of the Act to which they relate.

Youth Custody

50. **Mr. Alex Carlile** asked the Secretary of State for the Home Department how many persons between the ages of 17 and 21 years are currently held in *(a)* detention centres and *(b)* youth custody centres.

Mr. Mellor: Central records, which are approximate, show for 31 March 1985, the latest date for which information is readily available, about 6,040 persons aged 17 and under 21 in youth custody centres in England and Wales and about 1,150 persons aged 17 and under 21 in detention centres.

Temporary Admissions

52. **Mr. Freeson** asked the Secretary of State for the Home Department how many passengers granted temporary admission to the United Kingdom absconded in 1984; and what percentage this is of those so admitted.

Mr. Waddington: I refer the right hon. Member to the reply given earlier today to a Question from the hon. Member for Cynon Valley (Mrs. Clwyd).

55. **Mr. James Lamond** asked the Secretary of State for the Home Department how many people in the last year allowed entry to the United Kingdom as visitors from the Indian subcontinent following representations by an hon. Member have subsequently failed to leave the United Kingdom in accordance with the terms of the temporary entry granted following the representations.

Mr. Waddington: This information is not available.

Police Foot Patrols

53. **Sir John Farr** asked the Secretary of State for the Home Department what progress has been made in implementing his policy of increasing the number of policemen on foot patrols.

Mr. Giles Shaw: Deployment is the responsibility of chief officers of police. I know that many forces in England and Wales are making significant progress in increasing the number of officers available for foot patrols, for example by employing more civilians to release police officers for operational duties and by reassessing local priorities and re-deploying manpower in accordance with them.

Commercial Television Channels

56. **Mr. Heathcoat-Amory** asked the Secretary of State for the Home Department if he has any plans to allocate additional commercial television channels.

Mr. Giles Shaw: Under international agreement five new channels of television are available for reception by direct broadcasting by satellite in the United Kingdom.

Subject to the satisfactory conclusion of current negotiations between the potential programme makers and the satellite providers, the Government will allocate three channels to the Satellite Broadcasting Board to be set up under Part II of the Cable and Broadcasting Act 1984. The timing of the allocation of other channels, including those to be available for allocation by the Independent Broadcasting Authority under the Act, has not been decided.

Police Authorities (Civilian Staff)

57. **Mr. Spencer** asked the Secretary of State for the Home Department how many civilian staff were employed by police authorities in England and Wales on 31 December in each of the years 1982, 1983 and 1984.

Mr. Giles Shaw: Police civilians are employed by the police authority or county council and the total number in police forces in England and Wales was as follows:

31 December	*Full-time*	*Part-time*
1982	33,898	7,985
1983	34,433	7,673
1984	35,232	7,331

Rape

Ms. Richardson asked the Secretary of State for the Home Department whether the Metropolitan police check the names of victims of rape through the central index of prostitutes; and if he will make a statement.

Mr. Giles Shaw: No, unless there are exceptional circumstances which suggest that such a check would be appropriate to the investigation of the crime.

Animal Procedures

Sir David Price asked the Secretary of State for the Home Department whether he intends to introduce legislation to implement the proposals in the second White Paper on animal procedures in the next Session of Parliament.

Mr. Mellor: It is the Government's intention to legislate as soon as parliamentary time permits.

Murder (Statistics)

Mr. Peter Bruinvels asked the Secretary of State for the Home Department (1) if he will publish in the *Official Report* those persons who have been convicted of murder and upon release have murdered again for each of the last 30 years.

(2) if he will publish in the *Official Report* a list of persons who have been murdered by persons who have been released from prison for murder for each of the last 30 years.

Mr. Mellor: In England and Wales, since 1946, when the present record system was introduced, five persons released on licence from a sentence of life imprisonment for murder were subsequently convicted of further offences of murder while at liberty: in addition one person released on licence from a sentence of imprisonment for murder was subsequently convicted of an offence of murder committed while serving a sentence of imprisonment in Northern Ireland. It is not the practice to publish the names of offenders and victims in the *Official Report*.

Tamils

Mr. Marlow asked the Secretary of State for the Home Department (1) how many Tamils have sought leave to enter the United Kingdom *(a)* in 1983, *(b)* in 1984 and *(c)* in each month to date, including May in 1985;

(2) what proportion of Tamils seeking leave to enter the United Kingdom in each month of 1985 and for each of 1983 and 1984 are *(a)* males and *(b)* females.

Mr. Waddington: I regret that the relevant statistics are not routinely compiled by ethnic origin. The only information readily available is that in May 1985 about 1,330 Sri Lankan Tamils arrived in the United Kingdom and sought asylum on arrival.

Mr. Corbyn asked the Secretary of State for the Home Department (1) how many Tamils have arrived in the United Kingdom seeking asylum since 20 April; how many of these cases have been considered and with what results; and how many of those Tamils originally refused entry have been permitted to remain as a result of further representations;

(2) how many Tamils since 20 May have been removed from the United Kingdom directly to Colombo.

Mr. Waddington: Figures are readily available only for the month of May. During that period some 1,330 Sri Lankan Tamils arrived in the United Kingdom and sought asylum. So far decisions have been taken in respect of about 160, of whom 24 have been granted leave to enter and the remainder have been refused. Representations in respect of some of these are at present under consideration. So far one Tamil has been removed directly to Colombo.

Mr. Corbyn asked the Secretary of State for the Home Department if he will elaborate on the test for severe hardship for Tamil asylum-seekers as laid down in his answer of 20 May, *Official Report*, column *273*.

Mr. Waddington: Each case will be considered in the light of its individual circumstances, but among the considerations to be taken into account are whether the applicant or his immediate family has recently suffered physical injury or serious material loss as a result of the disturbances in Sri Lanka; the area of Sir Lanka from which he comes; and the extent of any political involvement he has had in Sri Lanka.

Immigration Statistics

Mr. Marlow asked the Secretary of State for the Home Department how many stops are outstanding on non-United Kingdom citizens seeking leave to enter the United Kingdom broken down into *(a)* Tamils only and *(b)* non-Tamils.

Mr. Waddington: On 30 May approximately 1,350 cases were outstanding of persons refused leave to enter whose removal was being deferred pending representations from Members of both Houses. This figure included approximately 60 Sri Lankan citizens of Tamil origin.

Metropolitan Police (Arrests)

Mr. Tony Banks asked the Secretary of State for the Home Department if he will list in the *Official Report* the number of arrests made in the last year by the Metropolitan police during *(a)* new year festivities in Trafalgar square, *(b)* the May day rally and *(c)* the rally in support of the miners in Trafalgar square; and of those arrests what was the number of prosecutions and convictions secured.

Mr. Giles Shaw: I understand from the Commissioner of Police of the Metropolis that the information in connection with the arrests made on each of these occasions is as follows:

Event	*Arrests*	*Prosecutions*	*Convictions*
31 December/1 January 1985

Drug Trafficking

Mr. Gregory asked the Secretary of State for the Home Department how many persons arrested and charged with drug trafficking offences have absconded before trial *(a)* in England and Wales and *(b)* in each Yorkshire police force area in the last five years for which figures are available; and if he will make a statement.

Mr. Mellor [*pursuant to his reply*, 24 May 1985, c. *569*]: The following table has been drawn up from records available to me but it is possible that the recording of cases in which the defendant fails to appear is incomplete. Information for earlier years could be obtained only at disproportionate cost.

Persons arrested and charged for drug trafficking offences and granted bail who subsequently failed to appear
England and Wales 1983 *Number of persons*

Police force	*Failed to appear at* Magistrates' Courts*	the Crown Court†
North Yorkshire	1	—
South Yorkshire	2	—
West Yorkshire	3	1
Other police forces	114	26
Total	120	27

* Those granted bail either by the police or by magistrates.
† All persons committed to the Crown Court on bail who failed to appear

whether or not they were originally arrested and charged by the police. No information is available on any granted bail *during* Crown Court proceedings who then fail to appear.

EDUCATION AND SCIENCE

School Spending

Mr. Peter Bruinvels asked the Secretary of State for Education and Science if he will publish a table showing, for each year since 1978-79, spending in cash and real terms per pupil in *(a)* primary and *(b)* secondary schools, based on (i) figures estimated by local authorities and (ii) figures subsequently reported by local authorities.

Mr. Dunn: The average net expenditure per primary and secondary pupil, in cash and real terms, based on local authorities' returns of their original estimates to the Chartered Institute of Public Finance and Accountancy (CIPFA) and on their actual expenditure returns to the Department of the Environment are as follows:

England, financial years

	Primary				*Secondary*			
	Estimates		*Actuals*		*Estimates*		*Actuals*	
	Cash (£)	*Real Terms (£)*	*Cash (£)*	*Real Terms (£)*	*Cash (£)*	*Real Terms (£)*	*Cash (£)*	*Real Terms (£)*
1978-79	365	620	370	630	535	910	535	910
1979-80	435	635	430	625	615	895	610	890
1980-81	565	695	545	670	775	955	770	945
1981-82	620	695	620	695	855	955	870	970
1982-83	685	715	680	710	940	985	945	990
1983-84	735	735	735	735	1,010	1,010	1,025	1,025

The cash figures have been repriced to 1983--84 real terms using the gross domestic product (market prices) deflator; 1983-84 is the latest year for which actual figures are available.

Polytechnics

Mrs. Renée Short asked the Secretary of State for Education and Science on what factors he based his decision to allocate the sum of £2·5 million to polytechnics to enable them to establish bases from which they can build up research contract work and technical partnership and development.

Sir Keith Joseph: My decision, based on advice from the NAB, was that £2·5 million should be allocated from the advanced further education (AFE) pool for 1985-86 for the selective support of science,, engineering and other industrially related research in local authority higher education. The individual institutions were selected by the NAB on the basis of their established strengths in these fields and their potential for the further development of research links with commerce and industry.

Mrs. Renée Short asked the Secretary of State for Education and Science what joint strategies have been formulated between his Department and the National Advisory Body for Public Sector Higher Education for the financing of scientific research undertaken by polytechnics from now until the end of the 1990s.

Sir Keith Joseph: The Government's policy towards research generally in higher education is set out in Cmnd. 9524. In relation to local authority higher education, I have accepted the NAB's proposal that £2·5 million of the AFE pool for 1985-86 should be deployed selectively in support of research, and that this level of support should be at least maintained for two further years. I shall receive NAB's detailed advice on the allocation of funds for 1986-87, including research funds, later this year. In addition, I hope that polytechnics and colleges will make every effort to earn research and consultancy income from private sources. The Government have to this end recently introduced legislation to facilitate such commercial activities.

Mrs. Renée Short asked the Secretary of State for Education and Science on what factors he based his decision to introduce the system of allocating polytechnic funds according to the number of whole-time-equivalent students.

Sir Keith Joseph: For the financial years 1984-85 and 1985-86, I have accepted the advice of the NAB that the AFE pool should be distributed to polytechnics and colleges on the basis of target student numbers, weighted to reflect the relative cost of providing courses in different modes and subject areas.

This method, which is subject to continuing refinement, is intended to provide equitably for the cost of higher education in each institution according to its particular circumstances and in support of the NAB's plans.

Higher Education

Mrs. Renée Short asked the Secretary of State for Education and Science what steps he intends to take to implement the recommendations on the promotion of an entrepreneurial role for institutions of higher education contained in the Muir Wood report entitled "Improving Research Links between Higher Education and Industry".

Sir Keith Joseph: Paragraph 5.11 of the Green Paper on the development of higher education into the 1990s (Cmnd. 9524), presented to the House on 21 May 1985, lists the main actions that the Government are taking to help promote an entrepreneurial role for higher education institutions, drawing upon the recommendations of the Muir Wood report.

AGRICULTURE, FISHERIES AND FOOD

Hedgerows

Mr. Simon Hughes asked the Minister of Agriculture, Fisheries and Food if he will list for each year since 1979 the lengths of hedgerows destroyed, and planted on farms with agricultural development grants.

Mrs. Fenner: I regret that the Ministry does not keep records of the length of hedgerow removed or planted, against which capital grant has been paid. However, with few exceptions, grants for hedge removal were discontinued in 1976 and then terminated completely in 1983, since when no further grants for this purpose have been approved.

Forestry

Mr. Ron Davies asked the Minister of Agriculture, Fisheries and Food how many Forestry Commission felling licences were granted to private individuals or organisations in England in the year to 31 March; and what was the total area of conifers and broadleaved timber so felled.

Mrs. Fenner: I will reply to the hon. Member as soon as possible.

Mr. Ron Davies asked the Minister of Agriculture, Fisheries and Food if he will give the area of land newly afforested in England in the year to 31 March; and if he will *(a)* indicate what proportions were planted by the Forestry Commission and private landowners, respectively and *(b)* distinguish between coniferous plantations and other forestry schemes.

Mrs. Fenner: The information is as follows:—

Type of Planting	*Forestry Commission16 (hectares)*	*Private Landowners (hectares)*	*Totals (hectares)*
Conifers	160	542	702
Broadleaves	7	434	441
Totals	167	976	1,143

These figures are provisional. Planting statistics for 1984-85 will be published by the Forestry Commission in its next annual report.

National Food Survey

Mr. Dobson asked the Minister of Agriculture, Fisheries and Food what consideration has been given since 1979 to developing the national food survey as an instrument of nutritional surveillance in relation to health.

Mrs. Fenner: The national food survey contributes to nutritional surveillance by monitoring trends in the patterns of food consumption of the population as a whole and of particular groups. The national food survey committee, which oversees the methodology and developments of the survey, considers that the results provide valuable information on the diet of groups which may be "at risk". Special investigations have been carried out to supplement the survey results and to monitor more closely the nutritional adequacy of the diet of such groups. This approach is considered to be more appropriate and cost effective than further widening of the scope of the national food survey.

FOREIGN AND COMMONWEALTH AFFAIRS

Namibia

Mr. Cohen asked the Secretary of State for Foreign and Commonwealth Affairs if he will review the policy of not accepting the 1971 International Court of Justice advisory opinion on Namibia.

Mr. Rifkind: I refer the hon. Member to the reply I gave to the hon. Member for Manchester, Central (Mr. Litherland) on 22 May at column 459.

Mr. Cohen asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a further approach to the South African authorities to seek the release of Namibian political prisoners and detainees.

Mr. Rifkind: I refer the hon. Member to the reply I gave to the honourable Member for Worsley (Mr. Lewis) on 15 May at column 136.

South Africa

Mr. Cohen asked the Secretary of State for Foreign and Commonwealth Affairs if he will invite the president of the African National Congress of South Africa to Britain to disuss recent developments in South Africa.

Mr. Rifkind: No. While the African National Congress remains committed to the violent overthrow of a Government with whom we maintain diplomatic relations, such an invitation would not be appropriate.

European Foundation

Mr. Normanton asked the Secretary of State for and Commonwealth Affairs what progess is being made with the establishment of the European Foundation and the recruitment of its staff; and when it will be fully operative.

Mr. Renten: Six of our European Community partners have followed our lead in ratifying the agreement establishing the European Foundation. The foundation will become operative one month after the last ratification is deposited, probably later this year. The executive committee will then be able to recruit staff.

Sri Lanka

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what is the total complement, by grade, of all United Kingdom and locally recruited staff at Her Majesty's high commission in Colombo.

Mr. Renton: The present complement of diplomatic service-funded United Kingdom-based and locally recruited staff at the United Kingdom high commission in Colombo is as follows:

United Kingdom-based
High commissioner
One counsellor
One first secretary
Three second secretaries
Two attachés
In addition there are five administrative and technical support staff.

Locally engaged
There are two senior locally engaged staff. One is a commercial officer of equivalent rank to a higher executive officer and the other, who is employed in the administration section, has a rank equivalent to executive officer. There are eighteen staff

employed on duties similar to that of clerical officers and secretaries. Forty other local staff are employed in an administrative capacity.

As a consequence of the introduction of a visa requirement for Sri Lankan nationals, we have agreed to reinforce the complement in the following manner:

(i) Two attachés, who arrived the weekend of 1 June, on temporary attachment for four months.
(ii) One attaché on temporary attachment for three months arriving on 7 June.
(iii) The addition of two attachés on a full-time basis from mid-July.
(iv) The recruitment of two locally engaged staff at clerical officer level on a permanent basis.
(v) One attaché presently absent from post is returning early from leave on 10 June. The temporary officer sent to Colombo to cover his leave will remain there until 23 June to provide further assistance.

There are in addition staff attached to the high commission in Colombo whose costs are met by other Government Departments.

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs how many cases by month for the past two years the entry clearance officers in Colombo have dealt with.

Mr. Renton: Details are shown in the following table:

	Entry clearances issued United Kingdom	*Entry clearances issued Hong Kong*	*Entry Clearances refused United Kingdom*
1983			
January	171	9	7
February	183	17	7
March	340	16	20
April	173	19	14
May	376	6	13
June	356	18	16
July	216	21	8
August	250	10	6
September	272	23	14
October	212	52	18
November	171	15	33
December	192	15	33
1984

June	453	13	44
July	556	25	34
August	567	30	20
September	345	15	18
October	169	18	16
November	179	20	29
December	175	19	18
1985			
January	189	26	30
February	173	22	13
March	270	43	12

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what journeys have been made by United Kingdom diplomatic staff in Colombo to different parts of Sri Lanka to examine the problem of communal dissent.

Mr. Renton: The British high commissioner at Colombo and his United Kingdom-based staff travel frequently outside Colombo. This year they have visited Mannar in the north-west of the island, Trincomalee in the north-east, Polonnaruwa and the central highlands, and Batticaloa in the south-east. These visits have included contacts with representatives of all communities, including for example the citizens' committees of Mannar and Batticaloa.

Nicaragua

Mr. Teddy Taylor asked the Secretary of State for Foreign and Commonwealth Affairs (1) if he will take steps to clarify what funds will be used by the Common Market Commission to pay for the 300,000 tons of bananas which the Commission agreed to import from Nicaragua and for the provision of £4,200,000 of aid for that republic;

(2) if Her Majesty's Government were consulted by the Common Market Commission prior to the agreement made between the Commission and the Republic of Nicaragua in the current month for the importing of 300,000 metric tonnes of bananas each month from Nicaragua and for the provision of £4,200,000 of Common Market aid for the Republic; and what is the policy of Her Majesty's Government towards the Commission's action.

Mr. Rifkind: The Commission has not entered into any agreement to import bananas from Nicaragua. Any Nicaraguan bananas which enter the European Community market are bought by Community importers on the world market and attract normal customs duties. Nicaragua receives both food aid and project aid from regular European Community programmes. The Community's 1985 food aid programme is expected to provide food aid worth approximately £4,200,000 to Nicaragua under title 9 of the Community budget.

Mr. Teddy Taylor asked the Secretary of State for Foreign and Commonwealth Affairs if Her Majesty's Government were consulted by the President of the Commission, before he advised the Vice-President of Nicaragua that the economic sanctions applied by the United States against Nicaragua on 1 May conflicted with the economic and monetary philosophy of the Common Market and were considered by the Common Market to be unlawful; and what is the policy of Her Majesty's Government towards this statement.

Mr. Rifkind: The talks between the President of the Commission and the Vice-President of Nicaragua were private, and held without consultation. In recent General Agreement on Tariffs and Trade discussion of the United States embargo of Nicaragua, however, the Commission made clear the European Community view, to which the United Kingdom is party, that article XXI of the general agreement on tariffs and trade entitles each contracting party to determine what action is necessary to uphold its national security.

Mr. Teddy Taylor asked the Secretary of State for Foreign and Commonwealth Affairs if there have been any discussions in any meeting of Common Market Ministers about their attitude and policy towards the economic sanctions imposed by the United States against Nicaragua on 1 May; and if any decisions have been made by the Council of Ministers on this subject.

Mr. Rifkind: There have been no ministerial discussions or decisions on this matter.

Central America

Mr. Foulkes asked the Secretary of State for Foreign and Commonwealth Affairs what proposals have been made by the EEC to further relations with central America; and if he will place a copy of the proposals in the Library; and if he will make a statement.

Mr. Rifkind: The Commission has in the last fortnight produced a paper on the European Community's relations with central America which contains a proposal for a European Community/central America co-operation agreement and outlines a possible European Community negotiating position. We are still studying the proposal. In line with normal practice in relation to Commission proposals for negotiating mandates with third countries the document must remain confidential as its publication could prejudice the Community's negotiating position.

SOCIAL SERVICES

Attendance Allowance

Mr. Bruce asked the Secretary of State for Social Services what is the annual cost of constant attendance allowances for the three most recent years for which figures are available.

Mr. Newton: I refer the hon. Member to my reply to the hon. Member for South Shields (Dr. Clark) on 18 March at column *380*.

Mr. Heathcoat-Amory asked the Secretary of State for Social Services whether he has any plans for extending the opportunity of payment by credit transfer to recipients of attendance allowance.

Mr. Whitney: When attendance allowance is paid with retirement pension or widow's benefit payments direct into a bank or building society account by credit transfer are already available. From June, all new claimants for attendance allowance will be able to choose to have their benefit paid by credit transfer. During the 20 weeks from the end of June 1985 we shall write to existing beneficiaries paid by the attendance allowance unit at Blackpool to explain that the credit transfer method of payment is now available to them and to ask whether they wish to change to it. Those who do not wish to switch need do nothing; their present payment arrangements will continue unchanged.

Mobility Allowance

Mr. Bruce asked the Secretary of State for Social Services what is the annual cost of mobility allowance for the three most recent years for which figures are available.

Mr. Newton: The information is contained in the Government's Public Expenditure White Paper, "The Government's Expenditure Plans 1985-86 to 1987-88" Cmnd. 9428, Vol. II, page 166, Table 3.12.

Fraud

Mr. Clay asked the Secretary of State for Social Services (1) if he will produce a table giving a breakdown of reasons for fraud investigation interviews and the percentage of interviews in each category which eventually resulted in the claimant being found to have committed fraud duringin each year since 1978;

(2) how many claimants were interviewed for suspected fraud; and what percentage of these were subsequently found to have committed fraud each year from 1978.

Mr. Whitney: The information requested is not available and could be obtained only at disproportionate cost.

Mr. Clay asked the Secretary of State for Social Services how many fraud officers are employed in his Department; and what this is as a percentage of the total establishment.

Mr. Whitney: Two thousand, six hundred and thirty-one staff were allocated for fraud work in the year ending March 1985 in local and regional offices of the social security organisation of this Department. This represents 4·35 per cent. of the total establishment for these offices.

Clinical Assistants

Dr. Roger Thomas asked the Secretary of State for Social Services if he will set up a departmental investigation into the effects of the employment of multi-sessional clinical assistants upon the prospects and promotion of junior hospital staff.

Mr. Kenneth Clarke: We see no present need for a special inquiry to supplement our regular collection of statistics and contact with the National Health Service.

Dr. Roger Thomas asked the Secretary of State for Social Services how many multi-sessional clinical assistant posts in each of the health regions in England and Wales are at present taken up on a part-time basis by general practitioners; and what percentage of such posts this represents.

Mr. Kenneth Clarke: The figures requested are shown in the table.

Clinical Assistants at 30 September 1984*

	Number also holding GP Appointments†	*GP's as a percentage of all Clinical Assistants*
England and Wales	2,344	54·8
Northern	163	68·5
Yorkshire	205	59·8
Trent	205	69·5
East Anglian	99	66·4
North West Thames	89	35·2
North East Thames	111	38·9
South East Thames	149	49·5
South West Thames	92	37·7
Wessex	173	59·5
Oxford	91	52·0
South Western	199	47·8
West Midlands	278	63·5
Mersey	90	60·0
North Western	216	65·1
London Postgraduate Teaching Hospitals	8	8·2
Wales	176	65·7

* Excluding those working one session or less.
† Provisional

Mrs. Savage

Dr. Roger Thomas asked the Secretary of State for Social Services if he will make a statement on the continuing suspension of Mrs. Savage, a consultant

obstetrician at the London hospital, Mile End road, London; and what representations he has received concerning her suspension.

Mr. Kenneth Clarke: This is a matter for the health authority, which has taken the decision. To date, we have received three letters, two of them copies of letters addressed to others.

Tinnitus

Dr. Roger Thomas asked the Secretary of State for Social Services (1) which health districts in England have stopped providing tinnitus masking devices to National Health Service patients; and how many patients have been affected;

(2) what is the average cost of providing masking devices for the treatment of tinnitus; and whether his Department issues guidelines or criteria to be satisfied before National Health Service provision can be entertained;

(3) how many tinnitus masking devices have been made available to National Health Service patients in each of the health regions of England.

Mr. John Patten: The provision of a masking device as a form of treatment for a particular patient suffering from tinnitus would be a matter for the clinical judgment of the consultant concerned. However this is a relatively new form of treatment, still subject to research. I am advised there is not yet general agreement about the extent of its effectiveness compared to other forms of treatment for particular types of patient. Central guidance at this stage of development would be premature therefore. A multicentre field trial, funded by the Department, is now being evaluated. We have no central information on how many maskers are being provided, their cost or the districts concerned.

Rural Family Practitioners

Dr. Roger Thomas asked the Secretary of State for Social Services if he will consider introducing increased inducement payments for family medical practitioners in rural areas where there is *(a)* great sparsity of population, *(b)* excessive remoteness and isolation from hospital facilities and other practices predominate, *(c)* the setting up of satellite surgeries on a fixed or mobile basis would be beneficial, *(d)* substantial inter-house call distances are the normal practice and *(e)* locums are difficult to attract and acquire.

Mr. Kenneth Clarke: Rural practice payments are available to compensate doctors for the additional time and expense involved in practice in rural areas. Inducement payments are available for a doctor practising in an area where we have accepted that it is essential to maintain a medical practice though the area is sparsely populated and is for some other reason unattractive to a doctor. There is no fixed inducement payment but eligibility for payment and the amount paid are determined on the merits of the individual case. Doctors who wish to invest in new purpose built branch surgeries may already qualify for substantial help under the cost rent scheme which in most cases will cover the interest on the capital borrowed for the project and provide a return on the capital invested.

Departmental Records

Mr. Ashdown asked the Secretary of State for the Social Services what documents and other physical material have been obtained by staff of his Department in the last year through liaison with the police; and if he will make a statement.

Mr. Whitney: I assume that the hon. Member is referring to social security benefit fraud investigations. While there will be occasions when staff liaise with the police, this is not a general feature of the investigation of benefit fraud; the information requested is not, therefore, held centrally and could be obtained only at disproportionate cost.

Mr. Ashdown asked the Secretary of State for Social Services whether instructions issued to staff of his Department provide for written records to be kept of *(a)* contact with the police, *(b)* information sought from the police and *(c)* information supplied through liaison with the police; and if he will identify the official forms used for such purposes.

Mr. Whitney: I assume that the hon. Member is referring to social security benefit fraud investigations. Although there are no specific instructions about the keeping of records of contact with the police, general instructions have been issued to staff that all material information should be recorded, dated and signed. This information is recorded in the form of a brief memorandum.

Limited List Prescribing

Dr. Roger Thomas asked the Secretary of State for Social Services if he will make a statement on the relationship between the availability on prescription of benzodiazepine tranquillisers and the problems of drug addiction; and whether the introduction of limited list prescribing has contributed towards alleviating this situation.

Mr. Kenneth Clarke: Patients can become dependent upon benzodiazepines if they are prescribed over a prolonged period. The guidelines of good clinical practice in the treatment of drug misuse which the Chief Medical Officer issued to all doctors last year contain guidance on the management of withdrawal from dependence on benzodiazepines. It is too early to be certain that the selected list has had a significant lasting effect on prescribing of these drugs.

Infection Control

Mr. Ashley asked the Secretary of State for Social Services when he last reviewed the advice given by his Department to health authorities on infection control; and whether the last review led to any further inquiries or studies being made or any changes in procedure.

Mr. Kenneth Clarke: We issue a wide range of advice on specific areas concerned with infection control. This is generally subject to continuous review and updating. Our advice on the management of infection control in hospitals and the management of specific outbreaks, is somewhat dated and steps are in hand to revise it.

Mr. Ashley asked the Secretary of State for Social Services how many infection control nurses are currently

employed in the National Health Service; how many health districts have none; and how many employ more than one.

Mr. Kenneth Clarke: We do not have this information centrally.

Hospital-Acquired Infection

Mr. Ashley asked the Secretary of State for Social Services in what ways advice is given by his Departmental officers to health authorities about cleansing, disinfection and sterilisation; and on how many occasions his officials have advised private cleaning companies, awarded contracts in National Health Service hospitals, about methods of preventing hospital infection.

Mr. Kenneth Clarke: We issue guidance on these matters in circulars and other publications, contribute to training courses and seminars and reply to specific inquiries.

Private cleaning companies do seek advice from time to time but we do not record the number of occasions. We advise them to consult the health authority's control of infection officers concerning local policies and procedures.

Mr. Ashley asked the Secretary of State for Social Services in what ways his Department monitors outbreaks of hospital-acquired infection; and how many outbreaks have been reported to his Department in each year since 1979.

Mr. Kenneth Clarke: We do not collect centrally regular information on outbreaks of hospital infection. There are, however, statutory requirements for reporting notifiable diseases, whether or not they arise in hospitals.

Mr. Ashley asked the Secretary of State for Social Services what is the estimated cost to the National Health Service of hospital-acquired infection.

Mr. Kenneth Clarke: We have not attempted to estimate the cost of hospital-acquired infection.

Mr. Ashley asked the Secretary of State for Social Services what is his current estimate of the percentage of hospital patients who suffer an infection acquired while they are in hospital; and on what evidence his estimate is based.

Mr. Kenneth Clarke: The 1981 public health laboratory service prevalence study of hospital acquired infection indicated that some 19·1 per cent. of patients surveyed in hospital were infected. About half of these infections had been acquired before entry to hospital. The definition of infection used in this study included minor as well as serious conditions. By no means all of the infections identified would have been preventable.

Mr. Ashley asked the Secretary of State for Social Services if he will request health authorities to submit an annual report on the incidence of hospital-acquired infections in their area and to identify separately cases of Legionnaire's disease.

Mr. Kenneth Clarke: No. We do, however, expect most serious outbreaks of infection, wherever they occur, to be reported to the public health laboratory service.

As I explained in my reply to the hon. Member for Holborn and St. Pancras (Mr. Dobson) on 20 May at columns *317-8* arrangements have been made for the communicable diseases surveillance centre to inform us of all confirmed cases of legionnaire's disease.

Children (Benefits)

Mr. Gordon Brown asked the Secretary of State for Social Services if he can give the latest estimate of the number of children in families in receipt of *(a)* family income supplement, *(b)* supplementary benefit and *(c)* housing benefit.

Mr. Whitney: I shall let the hon. Member have a reply as soon as possible.

Supplementary Benefit

Mr. Gordon Brown asked the Secretary of State for Social Services if he will publish a table showing the numbers claiming supplementary benefit, divided into the normal categories, at the latest date for which information is available and, if so available, the numbers of dependants.

Mr. Whitney: Provisional information for December 1983 is as follows:

	Claimants (thousands)	*Dependants (including partners) (thousands)*
1. All supplementary benefits	4,348	2,888
2. All pensions	1,648	275
(a) Retirement pensioners and NI widows aged 60 and over	1,563	267
(b) Others	85	8
3. All allowances	2,700	2,614
(a) Unemployed, *with* contributory benefit	205	351
(b) Unemployed, *without* contributory benefit	1,621	1,275
(c) Sick and Disabled, *with* contributory benefit	79	73
(d) Sick and Disabled, *without* contributory benefit	163	36
(e) NI widows under 60	15	5
(f) One parent families not included in other groups	449	763
(g) Others	167	110

Supplementary Benefit

Mr. Gordon Brown asked the Secretary of State for Social Services how many pensioners receive (a) the higher rate of heating addition, (b) the higher rate of dietary addition and (c) single payments.

Mr. Whitney: The latest available figures are as follows:

	Year ending April 1985 Number
Pensioners in receipt of higher rate of heating addition	336,000
Pensioners in receipt of higher rate of dietary addition	143,000
Number of single payments made to pensioners	341,000 *

* Provisional; December 1983

Mrs. Beckett asked the Secretary of State for Social Services, pursuant to the answer of 16 April, *Official*

Report, column *160*, when he intends to lay regulations amending the supplementary benefit rules so as to allow payment to strikers for funeral expenses.

Mr. Newton [*pursuant to his reply*, 24 May 1985, c. *587*]: I regret that my earlier reply was incorrect. We expect to make the necessary amendment to the Supplementary Benefit (Trade Disputes and Recovery from Earnings) Regulations 1980 within the next few weeks. At the same time we shall take the opportunity to amend the Supplementary Benefit (Claims and Payments) Regulations 1981 to provide for the backdating of claims to supplementary benefit to be related to entitlement to statutory sick pay, in accordance with the undertaking given at Committee stage of the Social Security Bill. — [*Official Report, Standing Committee E*, 17 January 1985, c. 231.]

Board and Lodging Allowance

Mr. Alfred Morris asked the Secretary of State for Social Services what advice has been given to adjudication officers on how to determine whether someone aged under 26 years claiming a board and lodging allowance is so disabled that it is unreasonable to expect him to be in accommodation other than as a boarder; and if he will make a statement.

Mr. Whitney: I am advised that the Chief Adjudication Officer is considering what specific guidance should be issued on this and on other matters relating to the recent changes in supplementary benefit for boarders.

School Health Statistics

Mr. Dobson asked the Secretary of State for Social Services if any changes have been made in the collection of school health statistics since 1979; and if he will make a statement.

Mr. John Patten: Collection of form 20m "School and Child Guidance Clinics" and part of Form 8m (i) "School Health Service" was discontinued in 1981. These covered the following items of information:—

FORM 20m

School clinics:

Number of premises at end of year.

Number at which various types of treatment or examination were provided.

Child guidance clinics:

Number of premises at end of year.

Number of clinic sessions held during the year.

Number of children newly referred in the year.

FORM 8m (i) (PART)

Hygiene inspections

Number of pupils in respect of whom cleansing notices were issued under Section 54 (2) and 54 (3) of the Education Act 1944.

The steering group on health services' information examined school health statistics as part of its review of infomation about services provided by the National Health Service for and in the community. Its recommendations on the subject were published in 1984 in the group's fifth report. The detailed work necessary for the implementation of these recommendations is now under way. It has been agreed with the National Health Service that national collection of new statistics in the fields covered by the fifth report should start in 1988.

Child Accident Statistics

Mr. Dobson asked the Secretary of State for Social Services (1) if any changes have been made in the collection of child accident statistics since 1979; and if he will make a statement;

(2) how much money the Health Education Council has spent on child accident prevention campaigns each year since 1979 in constant terms.

Mr. John Patten: I shall let the hon. Member have replies as soon as possible.

Health (Social Inequalities)

Mr. Dobson asked the Secretary of State for Social Services (1) what research into the effect of social inequalities in health has been funded by his Department since August 1980;

(2) what studies of the interactions of factors affecting health have been financed by his Department since 1979.

Mr. John Patten: Much of the research funded by the Department will concern itself with any factors of interaction influencing health including the effects of social inequalities. Some representative examples of this are:

Research Body	*Name of subject of research*	*Total Cost (£000)*	*Completion date*
Department of Community Medicine, St. Thomas's Hospital Medical School	National Study of Health and Growth	717·1	31 December 1986
General Practice Research Unit, University of Birmingham	Morbidity Statistics for General Practice—3rd Study	Included in Unit's general funding	31 December 1985
Bristol University	Child Health and Education Study	449·9	31 March 1985
National Children's Bureau	National Child Development Study 4th Sweep	662·6	31 December 1984

For comprehensive details of the health and personal social services research funded by the Department I would refer the hon. Member to the DHSS handbook of research and development which is published annually. Copies are in the Library.

RAWP Formulae

Mr. Dobson asked the Secretary of State for Social Services (1) what indications of health and social need for inclusion in the resource allocation working party formulae have been developed since 1979;

(2) if he will list the criteria used in the resource allocation working party formulae and the changes made since 1979;

(3) if he will make a statement on the effects on resources allocated to each region of those changes made to the resource allocation working party formulae since 1979.

Mr. Kenneth Clarke: The criteria used in the resource allocation working party formula are set out in the report of the resource allocation working party 1976, "Sharing resources for health in England", and the follow up report of the advisory group on resource allocation 1980. Copies of both are available in the Library.

The main change since 1979 in the revenue formula at national level has been our decision, with health service support, to base calculations of regions' target shares of resources on population projections for the year of allocation rather than, as before, on population estimates which relate to the position two years earlier. This change, introduced for the 1985-86 allocations, makes the formula more sensitive to the needs of regions with a rapidly growing or declining population.

For capital RAWP, the main change — again with health service support—has been the phasing out of an element in the formula reflecting inherited inequalities in the capital stock. This element had proved difficult to quantify accurately, and since 1984-85, capital targets have been calculated with reference to weighted population only.

There have been a number of other minor and technical changes.

It is for regions to decide how best to apply the RAWP principles in distributing resources to districts. Regions have developed their own approaches, and some are known to have introduced measures of social deprivation to reflect local circumstances. The hon. Member may like to approach individual regions for further information.

The RAWP formula is used to calculate a region's "target", or fair share of the resources available nationally. Changes in the formula therfore have an impact on a Region's target and hence on its distance from target. The rate of progress towards target has however always been a matter for Ministers' judgment. In addition to the RAWP calculation, we take account of the pace at which "RAWP — gaining" regions can prepare to make good use of additional resources, and the extent to which above target regions can adjust their plans to more modest resource allocations without serious disruption to services. It is not therefore possible to identify separately the impact of changes in the RAWP formula on regions' allocations.

Community Health

Mr. Dobson asked the Secretary of State for Social Services what proportion of spending by health authorities was devoted to community health in 1979 and each succeeding year.

Mr. Kenneth Clarke: The annual financial accounts of health authorities in England show the proportion of spending (excluding expenditure on family practitioner services) devoted to community health services as:

	Per cent
1979-80	8·3
1980-81	8·5
1981-82	8·5
1982-83	8·6
1983-84	8·7

Clinics (Access and Facilities)

Mr. Dobson asked the Secretary of State for Social Services what advice his Department has issued to health authorities since 1979 on improving the accessibility to and facilities of antenatal and health clinics.

Mr. John Patten: Advice on improving access to and provision of health service facilities for antenatal care is contained in the Government's reply (Cmnd. 8084) to the Social Services Committee's Second Report, Session 1979-80, and in the First Report of the Maternity Services Advisory Committee. The former was referred to health authorities under cover of circular HC(80)13, the latter under cover of the "Dear Administrator" letter DA(84)4.

School Health Service

Mr. Dobson asked the Secretary of State for Social Services what was the sum spent on the school health service in 1979 and in each year since at constant prices.

Mr. John Patten: Expenditure on the school health service shown in the costing returns submitted by health authorities to the Department, revalued to 1983-84 prices, was as follows:

	£'000
1979-80	120,674
1980-81	123,047
1981-82	123,823
1982-83	135,197
1983-84	137,170

Schools (Health Education)

Mr. Dobson asked the Secretary of State for Social Services what advice his Department has given to health authorities about their contribution to health education in schools since 1979.

Mr. John Patten: "Care in Action", the Department's handbook on policies and priorities for the personal social services in England published in 1981, advised health authorities, as part of their local strategy of health promotion and preventive medicine, to support health education programmes in schools on key topics including smoking, alcohol use, mental health, the care of elderly people, nutrition, exercise and preparation for parenthood. This continues to be our policy.

Smoking

Mr. Dobson asked the Secretary of State for Social Services what research has been sponsored by his Department since 1979 into devising methods of helping people reduce or end cigarette smoking.

Mr. John Patten: A number of studies have been commissioned. One currently in progress at the Maudsley hospital is testing the effectiveness of different treatment methods with a view to developing a new type of smokers' clinic that could function as a local centre to help reduce smoking. A major study carried out by the Office of Population Censuses and Surveys into smokers' attitudes and behaviour was published in 1983 and the results applied to health education campaigns to persuade smokers to stop. In addition, the Government-funded

Health Education Council last year published research into the role of specialist treatment services in helping people stop smoking.

Drugs and Alcohol (Health Campaigns)

Mr. Dobson asked the Secretary of State for Social Services how much money the Health Education Council has spent on campaigns against hard drugs and alcohol problems, respectively, in each year since 1979; and what is their planned expenditure in the current year in real terms.

Mr. John Patten: I shall let the hon. Member have a reply as soon as possible.

Cancer Screening

Mr. Dobson asked the Secretary of State for Social Services what proportion of the adult female population is currently screened for cervical and breast cancer, respectively.

Mr. Kenneth Clarke: We do not have information on cervical screening in the form requested. We collect only statistics of smear tests and these do not equate with the number of women screened.

We do not collect statistics on breast cancer screening since there is no national programme. We are in the process of establishing an expert group to advise on the policy we should adopt.

Severe Hypertension

Mr. Dobson asked the Secretary of State for Social Services what proportion of the adult population is screened for severe hypertension.

Mr. John Patten: This information is not available centrally. Arrangements for identifying patients with high blood pressure are the responsibility of individual doctors.

Child Benefit

Mr. Dobson asked the Secretary of State for Social Services what percentage of average gross male industrial earnings child benefit has represented in each year since 1978-79.

Mr. Whitney: The information is as follows:

Child benefit as a percentage of average gross male manual earnings

	Column 1	*Column 2*
April 1978	3·6	—
April 1979	4·3	—
November 1980	4·0	—
November 1981	4·1	—
November 1982	4·2	—
November 1983	4·3	4·4
November 1984	—	4·3

Notes:

1. The percentage figure for 1978 uses as its basis the level of child support in which has been included the value of an income tax allowance for a child under age 12.

2. In calculating the percentage figures, earnings have been derived from Department of Employment's "New Earnings Survey".

3. A revised method of presenting average gross male manual workers' earnings was introduced in 1983. Column 1 is based on earnings of male workers in full-time employment aged 21 and over whose earnings were unaffected by absence. Column 2 is based on earnings of all male workers in full-time employment whose earnings were unaffected by absence.

Mr. Gordon Brown asked the Secretary of State for Social Services what is his policy towards the extent of uprating of child benefit in real terms in 1985 and subsequent years.

Mr. Newton: It has been the practice to take decisions about the rate of child benefit having regard to the resources available and other social security priorities. This practice will continue.

Health (Social Inequalities)

Mr. Dobson asked the Secretary of State for Social Services if he will make a statement on the actions taken by his Department since 1979 to reduce social inequalities affecting health.

Mr. Kenneth Clarke: I shall let the hon. Member have a reply as soon as possible.

Primary Health Care (London)

Mr. Dobson asked the Secretary of State for Social Services if he will list those recommendations of the Acheson report on primary health care in London which have been implemented by his Department, giving in each case the initial and annually recurring costs at constant prices.

Mr. Kenneth Clarke: The Acheson report on primary health care in inner London had national implications because many of the problems it identified arose to a greater or lesser extent in other major cities. It was therefore commended to all health authorities, local authorities and family practitioner committees which covered inner city areas as a basis for local action within the resources available. But in addition, as my right hon. Friend announced on 27 October 1983, we responded to the recommendations by making available a sum of £9 million to improve primary health care in inner cities. Expenditure will be spread over the period 1983-84 to 1986-87. Expenditure incurred to date and planned for 1985-86 is as follows:

	£ million (current year prices)		
	1983-84	*1984-85*	*1985-86*
Training of extra Health Visitors and District Nurses	0·703	0·540	0·104
Health authority projects to improve primary health care within their inner city areas	1·201	1·210	0·885
Improvements to GP premises and incentives to group practice	0·025	0·725	0·600
Specially commissioned projects from the King's Fund and other agencies (e.g. to foster collaboration between DHAs and FPCs, support for Academic Departments of General Practice, guidance for GPs in improving practice premises etc.)	0·010	0·077	0·405
Totals	1·939	2·552	2·994

Total spent or committed to 1985-86 = £7·485 million.

Family Practitioner Committees (Computers)

Mr. Dobson asked the Secretary of State for Social Services which Greater London family practitioner committees have computerised their registration functions and which have firm plans to do so within 1985-86.

Mr. Kenneth Clarke: Croydon family practitioner committee has computerised its full registration system. Barking and Havering family practitioner committee has computerised its register of females and will complete the male register within 1985-86. Plans are well advanced and resources are available for the installation of full registration systems in Barnet, Brent and Harrow, Ealing, Hammersmith and Hounslow, Enfield and Haringey and Hillingdon family practitioner committees in this financial year.

We are waiting to hear of further plans for computerisation which should arise out of the recent initiative on cervical cytology.

Pensioners (Cumbernauld)

Mr. Norman Hogg asked the Secretary of State for Social Services how many pensioners in Cumbernauld new town are in receipt of long-term supplementary benefit.

Mr. Whitney: Cumbernauld new town is covered for supplementary benefit purposes by one DHSS office but its boundaries are not conterminous. All pensioners in receipt of supplementary benefit receive the long-term scale rate. On 7 May 1985, 2,731 pensioners were receiving supplementary benefit from that office.

Supplementary Benefit (Requirement Allowances)

Mr. Wareing asked the Secretary of State for Social Services what is the average percentage proportion of *(a)* total incomes and *(b)* his Department's benefits, of additional requirement allowances paid to supplementary benefit recipients.

Mr. Whitney: It is regretted that all the information is not available in the form that it is requested. Provisional estimates for December 1983 suggest that the overall proportion of total income (excluding housing benefit) was 4·7 per cent. and the overall proportion of supplementary benefit was 9·5 per cent.

Source: Annual Statistical Enquiry.

Undernourishment

Mr. Dobson asked the Secretary of State for Social Services how many people are undernourished in England.

Mr. John Patten: I shall let the hon. Member have a reply as soon as possible.

Benefits (Newham)

Mr. Tony Banks asked the Secretary of State for Social Services if he will state the number of recipients, and the total amounts of *(a)* death grant, *(b)* maternity allowance, *(c)* special diet supplement and *(d)* special laundry supplement claimed in the London borough of Newham for each of the past five years.

Mr. Whitney: The London borough of Newham is served by three of the Department's local offices: Canning Town, Plaistow and Woodgrange Park. Figures are not available to show either the number of recipients of death grant, maternity allowance, and additional requirements in supplementary benefit cases for diet and laundry or the total amounts paid.

However, the number of claims for death grant and maternity allowance in the four years ending 9 April 1985 were as follows (figures for 1980-81 are not available):

Death Grant	*1981-82*	*1982-83*	*1983-84*	*1984-85*
Canning Town	260	408	317	271
Plaistow	795	995	874	718
Woodgrange Park	922	1,197	1,162	871
Totals	1,977	2,600	2,353	1,860
Maternity Allowance	*1981-82*	*1982-83*	*1983-84*	*1984-85*
Canning Town	509	527	550	249
Plaistow	1,207	1,233	1,310	770
Woodgrange Park	1,669	1,773	2,014	1,029
Totals	3,385	3,533	3,874	2,048

Mr. Tony Banks asked the Secretary of State for Social Services how much was spent on unemployment benefit and other benefits to unemployed people in Newham for each of the last five years.

Mr. Whitney: This information is not available and could be obtained only at disproportionate cost.

Meals on Wheels (Newham)

Mr. Tony Banks asked the Secretary of State for Social Services how many people over the age of 60 years have been in receipt of meals on wheels in the London borough of Newham for each of the last five years.

Mr. John Patten: Information is not available centrally in the form requested. The total numbers of meals provided at home by the London borough of Newham for each of the last five years are as follows:

Years ended 31 March	*Number*
1980	163,752
1981	153,018
1982	142,145
1983	145,415
1984 (Provisional)	170,650

Pensioners (Newham)

Mr. Tony Banks asked the Secretary of State for Social Services if he will state the current number of men and women residing in the London borough of Newham who are in receipt of state retirement pensions.

Mr. Whitney: I refer the hon. Member to my reply to him on 22 May at column *470*.

Health Authorities (Expenditure)

Mr. Chapman asked the Secretary of State for Social Services what has been the increase in revenue expenditure in real terms between 1978-79 and 1984-85 in each of the regional health authorities in England.

Mr. Kenneth Clarke: The following table shows the percentage increase in regional health authorities' revenue expenditure between 1978-79 and 1984-85, after taking account of general inflation as measured by the gross domestic product deflator.

Region	Percentage* Real Increase in Revenue Expenditure 1978-79 to 1984-85 per cent
Northern	18·6
Yorkshire	17·9
Trent	19·9
East Anglian	20·9
4 Thames Regions and Boards of Governors/SHAs	†10·7
Wessex	21·0
Oxford	15·7
South Western	17·5
West Midlands	18·1
Mersey	13·6
North Western	19·2

Notes

* Percentages are based on actual revenue expenditure from health authorities' summarised accounts for 1978-79; and on provisional outturn figures for 1984-85.

† Figures for the individual Thames regions are distorted by 1982 boundary changes.

Social Security Review

Mr. Gordon Brown asked the Secretary of State for Social Services (1) how many supplementary pensioners with heating additions and other additional requirements he estimates will be worse off if the proposals of his Green Paper take full effect and after transitional arrangements are ended;

(2) what he estimates to be the average and highest loss of income for unemployed persons aged under 25 years if the proposals of his Green Paper are finally implemented and once transitional arrangements are ended;

(3) how many households will lose housing benefit under the proposals of his Green Paper; and if he will estimate how many pensioners will lose;

(4) how many households on housing benefit will receive less help with their rent and rates under the proposals of his Green Paper; and if he will estimate how many pensioners will receive less help;

(5) how many households now on family income supplement will not be entitled to family credit under the proposals of his Green Paper.

Mr. Newton: The Green Paper seeks comments on the proposed new structure of social security. Until that is settled it would be misleading to attempt to provide a detailed analysis of the impact of the changes. That must await decisions about the benefit rates to be adopted in April 1987.

Mr. Gordon Brown asked the Secretary of State for Social Services what he estimates will be the budget for the new social fund if his proposal in the Green Paper is finally implemented.

Mr. Newton: The size of the budget for the new social fund will be for consideration nearer the time.

Mr. Gordon Brown asked the Secretary of State for Social Services (1) what he estimates to be the savings in the first full year of the housing benefit scheme proposed in the Green Paper on reform of social security;

(2) how much he estimates will be saved by his proposal that benefit claimants pay 20 per cent. of their rates bill.

Mr. Newton: Until benefit rates for April 1987 have been settled it is not possible to give precise figures. But expenditure on housing benefit is expected to fall eventually by about £500 million.

Benefit Claimants (Water Rates)

Mr. Gordon Brown asked the Secretary of State for Social Services how many benefit claimants have water rate bills that are higher than the national average; and for how many the additional amount is greater than *(a)* 50p, *(b)* £1 a week and *(c)* £2 a week.

Mr. Whitney: The information is not available in the precise form requested. Information on the number of claimants who receive an allowance for water rates in their supplementary benefit assessment and the average amounts payable is contained in columns 1 and 2 of table 6.14 of the "Annual Statistical Enquiry 1982," a copy of which is in the Library. The table excludes cases where the allowance for water rates is paid through the housing benefit scheme. Comparable information is not available for these cases.

Social Workers

Mr. Meacher asked the Secretary of State for Social Services what has been the number of social workers in each of the last 10 years; and what has been the percentage change in numbers each year.

Mr. John Patten: The table gives information from 1975 to 1983, the latest year for which figures are available. Prior to 1975 figures were collected on a different basis and are not comparable with those shown.

Social Work staff employed by Social Services Departments England 1975-1983*

As at 30 September	Number† of Social Work staff in post	Annual percentage change in numbers
1975	20,400·4	—
1976	21,181·8	+3·8
1977	21,533·3	+1·7
1978	22,163·0	+2·9
1979	22,733·6	+2·6
1980	22,991·4	+1·1
1981	22,950·7	−0·2
1982	22,989·7	+0·2
1983	23,713·6	+3·1

* Includes senior social workers, social workers, community workers, trainee social workers and social work (welfare) assistants.

† Expressed in whole-time equivalents.

Medical Research Council

Dr. Roger Thomas asked the Secretary of State for Social Services what has been the level of financing to the Medical Research Council in each of the last five years for which information is available.

Sir Keith Joseph: I have been asked to reply.

The Medical Research Council's allocation from the science budget in each of the last five years has been as follows:

	£m
1981-82	101·5
1982-83	107·5
1983-84	113·7
1984-85	117·2
1985-86 (estimated)	122·3

Dr. Roger Thomas asked the Secretary of State for the Social Services what Medical Research Council research projects have been either abandoned or severely restricted as the result of financial restraints in each of the past three years; and if he will indicate the locations of such affected projects.

Sir Keith Joseph: I have been asked to reply.

I understand from the Medical Research Council that, over the past three years, the number of high quality university research grant applications approved by the council but not funded as a result of financial restraints was as follows:

Academic year	*Long-term support applications (normally five years or more)*	*Short-term support applications (normally three years)*
1981-82	nil	66
1982-83	2	25
1983-84	22	199

In addition, many grants were awarded only after severe pruning. No details are available concerning the projects and locations involved.

Reductions in capital and consumable equipment budgets of MRC's institutes in 1983-84 and 1984-85 resulted in some restriction on their work. I understand also that the rate of progress of some major initiatives has been less than the council would have wished.

Chorionic Villus Sampling

Dr. Roger Thomas asked the Secretary of State for the Social Services if he will detail the plans by the Medical Research Council to investigate the safety and accuracy of chorionic villus sampling compared with amniocenteses; and what are the criteria recommended by his Department of women carrying a foetus with more than the average risk of being handicapped or of passing on certain inherited diseases.

Sir Keith Joseph: I have been asked to reply.

In the light of the recommendations of a Medical Research Council working party set up to evaluate the safety of chorion villus sampling (CVS), the council announced on 14 May that it proposes to carry out a randomised clinical trial in order to compare CVS with amniocentesis as a method for the pre-natal diagnosis of a range of genetic diseases. The trial will mainly involve mothers who are at risk of major chromosomal abnormalities, such as that which causes Down's syndrome, but will also include patients at risk of having a baby with a single gene disorder. It is hoped that at least 2,000 women will participate; and that a number of European centres may agree to participate in addition to between 10 and 20 centres in the United Kingdom. The decision whether to offer any pre-natal screening is one of clinical judgment by the clinician responsible for the care of the mother. I understand that great care will be taken to ensure that prospective participants understand the nature of the trial before deciding to take part.

Legionnaire's Disease

Dr. Roger Thomas asked the Secretary of State for the Social Services if the Medical Research Council is at present involved in studying the modes of transmission and the development of a vaccine for Legionnaire's disease; and if he will make a statement.

Sir Keith Joseph: I have been asked to reply.

I refer the hon. Member to my answer of 4 June to my hon. Friend the Member for Portsmouth, North (Mr. Griffiths) at columns 128-29 concerning research into the origin, spread and treatment of this disease. I understand that the council has recently awarded a further grant for the continuation of work on disease processes, mechanisms of immunity and approaches to therapy in experimental Legionella pneumophilia infections. These studies will include attempts, to immunise against infections. None of the projects supported by the MRC directly involves the study of transmission; however, I understand that it is a widely held belief that the disease is spread by means of fine water droplets.

I also understand that the public health laboratory service, which is the responsibility of my right hon. Friend the Secretary of State for Social Services, is studying the modes of transmission of Legionnaire's disease. In addition, in 1981 my right hon. Friend commissioned an extensive environmental study on Legionnaire's disease which is being undertaken by the communicable disease surveillance centre at Colindale. The main objective of this research is to determine how frequently the bacterium may be found in water systems and to identify the design features and other factors which permit its growth and establishment.

Mr. Dobson asked the Secretary of State for Social Services if he will list each case or outbreak of suspected or confirmed Legionnaire's disease notified to his Department since 1 April 1985, giving in each case the date the Department was notified, the number of persons affected and the number of deaths.

Mr. Kenneth Clarke [*pursuant to his reply*, 14 May 1985, c. *118*]: I regret that a figure provided for Birmingham was incorrect and the entry should have read:

	Date notified	*Number of cases*	*Deaths*
Birmingham	9 May 1985	1	0

I am glad to say that the patient has recovered in this isolated case in Birmingham and I apologise for the fact that a misunderstanding led to our publishing reports of his death.

Pensions

Mr. Gordon Brown asked the Secretary of State for Social Services what are his estimates of the numbers of people expected to receive additional component under the state earnings-related pension scheme in the tax years 1985-86, 1986-87 and 1987-88; what is the maximum estimated additional component; and what is the estimated average additional component in those years.

Mr. Whitney [*pursuant to his reply*, 7 May 1985, c. *339-40*.]: The information is as follows:

Retirement Pensioners expected to receive an earnings-related pension under SERPS

	Number
1985-86	1,350,000
1986-87	1,550,000
1987-88	1,750,000

Estimated weekly amounts of net additional component*

	Maximum	Average
1985-86	£19·50	£1·85
1986-87	£23·77	£2·50
1987-88	£28·55	£2·65

* After deduction of any guaranteed minimum pension(s) from contracted-out occupational pension scheme(s).

Dr. McDonald asked the Secretary of State for Social Services if he will indicate *(a)* the average amount of earnings-related supplement per week received by eligible pensioners and *(b)* the lowest and highest amount received per week by eligible pensioners in 1985-86.

Mr. Whitney [*pursuant to to his reply*, 7 May 1985, c. *339*.]: The following are the estimated figures for 1985-86:

Weekly net additional component for retirement pensioners receiving a State earnings related pension.*

	£
average amount	1·85
minimum amount	0·01
maximum amount	19·50

* after deductions of any guaranteed minimum pension(s) from contracted-out occupational pension scheme(s).

Dr. McDonald asked the Secretary of State for Social Services if he will provide his latest estimate of the number of retirement pensioners in receipt of the state earnings related pension in 1985-86 and 1986-87.

Mr. Whitney [*pursuant to his reply*, 7 May 1985, c. *339*.]: The figures requested are as follows:

Retirement pensioners receiving a pension under the state earnings related pension scheme

	Number
1985-86	1,350,000
1986-87	1,550,000

NORTHERN IRELAND

Licences

Mr. Ashdown asked the Secretary of State for Northern Ireland if he will list in the *Official Report* all the different types of licences operated or granted by his Department and the year in which they first came into operation.

Mr. Hurd: Information about different types of licences currently operated or granted directly by the Northern Ireland Office and Northern Ireland Departments is as follows:

Types of licences currently operated or granted	*Year of first coming into operation*
Mixed explosives—storage	1875
Gunpowder or mixed explosives—registered premises	1875
Certificate of exemption—overnight storage of explosives	1974
Various controlled substances:	
(i) Ammonium Nitrate and certain mixtures containing Ammonium Nitrate	1972
(ii) Sodium Chlorate and certain mixtures containing Sodium Chlorate	1972
(iii) Nitro Benzene	1972
(iv) Sodium Chlorite and certain mixtures containing Sodium Chlorite	1973
(v) Potassium Nitrate and certain mixtures containing Potassium Nitrate	1974
(vi) Sodium Nitrate and certain mixtures containing Sodium Nitrate	1974
(vii) Sodium Nitrate and certain mixtures containing Sodium Nitrite	1976
Purchase or use of fireworks	1970
Authorisation to act as shot firer	1977
Certificate of Authorisation granted to operate a firearms club	1819
Certificate of Approval in respect of premises for use as Training Schools	1868
Animal Health—Licences to prevent introduction and spread of disease	1981
Plant Health—	
Potato Root Eelworm—control of	1968
Wart Disease—control of	1973
Phytosanitary Certificates for export of plants and plant products	1981
Exemptions from prohibitions of plant health legislation	1981
Permits allowing movement of seed potatoes	1981
Export of potatoes	1984
Milk and Milk products—

Driving Licences	1903
Vehicle excise licences and certificates (issued on behalf of the Secretary of State for Transport)	1921
Licences for petrol pumps pipes, etc., in or under roads	1928
Orange badge permits for parking in contravention of waiting restrictions	1979
Permits for access to special roads	1963
Permits for advertising on or near special roads	1963
Permits for the erection of bus shelters, bus stops, milk platforms etc. on roads	1948
Permits to erect scaffolding, fences, etc. to make drains, to construct accesses, to make road openings, etc.	1948
Permits to erect beams, rails pipes, etc. across roads	1928
Permits to advertise or signpost on the surface of roads, street furniture, etc.	1948
Licences for the use of land owned by the Department of the Environment (NI)	1954
Permits for the placing of skips on roads	1981
permits for vehicles to use roads or bridges in contravention of weight restrictions	1955
Permits for use of special roads in contravention of motorway restrictions	1963
Licences under The Dumping at Sea Act 1974	1974
Consents to discharge trade or sewage effluents to waterways/underground stratum	1973
Licences to excavate or dig for archaeological purposes	1937
Exhumation licences in respect of public cemetries	1888
Licences for the reproduction of Ordnance Survey maps	1956
Licence to shoot or take Hen Pheasants or Red-legged Partridges	1928
Licence for scientific or educational purposes (in relation to wild birds)	1931
Licence for scientific or education purposes (in relation to wild animals, deer or wild plants)	1985
Licence for the purpose of photographing specially protected birds or animals at their nests or places of shelter	1985
Licence for the purpose of preventing the spread of disease (in relation to certain wild birds and animals)	1968
Licence for the purpose of preserving public health or public or air safety (eg control of birds at airfields)	1968
Licence for the purpose of ringing or marking, or examining any ring or mark on, wild birds or their eggs.	1931
Licence for the purpose of ringing or marking, or examining any ring or mark on, wild animals	1985
Licence for the purpose of conserving wild birds	1985
Licence for the purpose of conserving wild animals or wild plants or introducing them into particular areas	1985
Licence for the purpose of protecting any collection of wild birds or any zoological or botanical collection	1985
Licence for the purpose of falconry	1985
Licence for the purpose of aviculture	1968
Licence for the purposes of any public exhibition or competition (in relation to certain species used for aviculture)	1951
Licence for the purpose of taxidermy	1985
Licence for the use of stupefying bait	1968
Licence for the purpose of preventing serious damage to livestock foodstuffs for livestock, crops, vegetables, fruit, growing timber pasture or any other form of property or to fisheries.	1985

Types of licences currently operated or granted	Year of first coming into operation
Licence for the purpose of removing deer from one area to another	1985

Divis Flats

Ms. Clare Short asked the Secretary of State for Northern Ireland what assessment was made, prior to a decision being taken on the future of the Divis flats, as to the number of houses which could be built on the site if all the blocks were demolished.

Mr. Chris Patten: Since demolition was not considered to be appropriate no such assessment was made.

Ms. Clare Short asked the Secretary of State for Northern Ireland whether any survey has been made of possible risks to tenants' health from asbestos in the Divis flats.

Mr. Chris Patten No special survey has been carried out. Most of the materials in communal areas in Divis flats have already been replaced with non-asbestos products as part of a prepaint repair scheme. In the event of existing materials becoming damaged and hence dangerous (for example, through vandalism), the replacement of the material with non-asbestos products is undertaken immediately.

Ms. Clare Short asked the Secretary of State for Northern Ireland what information he has as to the estimated total cost of demolishing all the Divis flats.

Mr. Chris Patten: No such estimate has been made because total demolition was not considered to be appropriate.

Ms. Clare Short asked the Secretary of State for Northern Ireland what is the estimated cost of the planned demolition of two blocks in the Divis flats and the refurbishment of the remaining blocks.

Mr. Chris Patten: The information is £95,000 and £5½ million respectively.

Ms. Clare Short asked the Secretary of State for Northern Ireland what is the estimated cost per flat of the proposed refurbishment of the Divis flats.

Mr. Chris Patten: The estimated unit cost for the Milford block is between £11,000 and £12,000. This is the only block which is at present proposed for refurbishing.

House Building (Cost)

Ms. Clare Short asked the Secretary of State for Northern Ireland what is the current average cost, excluding the cost of land, of new public sector houses being built in Northern Ireland.

Mr. Chris Patten: The overall averge tender cost of new Housing Executive dwellings in 1984-85 was £21,640. The average figure for Belfast was about £23,620.

Ms. Clare Short asked the Secretary of State for Northern Ireland whether he is satisfied with the precaution taken during the recent demolition of two blocks in the Divis flats, to ensure that asbestos was properly disposed of.

Mr. Chris Patten: Before demolition of the Whiehall and Farset blocks the Housing Executive had discussions with the Health and Safety inspectorate, medical authorities and the environmental health department of Belfast city council.

The strict guidelines of the Health and Safety inspectorate were followed in the removal of asbestos prior to demolition and the inspectorate monitored the work. Once the material was properly disposed of, air samples were taken by the industrial science division of the Department of Economic Development during the work and were found to have no asbestos content.

Test Holes (Cost)

Mr. Beggs asked the Secretary of State for Northern Ireland what was the cost to the Northern Ireland Housing Executive of the three test holes at Agnes street, Carrickfergus, County Antrim, excavated by mechanical digger; what was the name of the contractors; if a charge was included for transporting the machine to the site; and why a local contractor was not hired for this project.

Mr. Chris Patten: This is a matter for the chairman of the Northern Ireland Housing Executive who has advised me that four holes were dug at the site at a cost of about £133 including the cost of bringing diggers to the location. The first two holes were dug by McFarlane Bros of Glengormley and the other two by V A Irwin of Drumbo who was working elsewhere in the area and had a digger readily available.

Mater Hospital

Mr. Archer asked the Secretary of State for Northern Ireland (1) whether the Government have assessed the effects of the closure of the gas industry on the development plan for the Mater hospital;

(2) what estimate the Government have made for the additional expenditure that will arise from redesigning the development plan for the Mater hospital to use an alternative fuel; and how much expenditure has already been incurred in laying a new 6in gas main to the Mater hospital development site.

Mr. Chris Patten: While it had been proposed to use gas as the main fuel for the proposed new boiler plant, it has been decided to revert to oil. This has necessitated some redesign of the boilerhouse at an estimated additional cost of £86,700 including professional fees and has caused some delay to the programme. The cost of new gas mains already provided will be approximately £18,700, including professional fees.

Plastic Bullets

Mr. Parry asked the Secretary of State for Northern Ireland if he is satisfied with the guidelines issued concerning the use of rubber and plastic bullets; and if he will make a statement.

Mr. Scott: Rubber baton rounds have not been generally issued to the security forces in Northern Ireland since 1975. I am satisfied that the operational instructions for the use of plastic baton rounds which are kept under constant review, take account of the circumstances in which baton rounds may need to be used in Northern Ireland, the need to minimise as far as possible the risk of injury, and the relevant legal implications.

Mr. Parry asked the Secretary of State for Northern Ireland how much compensation has been paid to victims of injury or death due to the use of plastic bullets in each of the past six years to the latest date.

Mr. Scott: This information is not readily available and could be provided by the Northern Ireland Office and the Ministry of Defence only at disproportionate cost.

Mr. Parry asked the Secretary of State for Northern Ireland how many people have been injured by rubber bullets in each of the past six years to the latest date.

Mr. Scott: Rubber baton rounds were withdrawn from general use by the security forces in 1975, and no one is known to have been injured by such rounds since that time.

Lear Fan

Mr. Michael McNair-Wilson asked the Secretary of State for Northern Ireland (1) what rights to the carbon fibre technology used in the Lear Fan project were, or are, held by Her Majesty's Government;

(2) against which assets belonging to the Lear Fan company the financial investments of Her Majesty's Government were secured; and to what extent these included a share in the technology of the aircraft.

Dr. Boyson: The Department of Economic Development holds a first fixed and floating charge on all assets of Lear Fan Ltd. The details of the agreements on the technology are complex. In summary the Lear Fan technology was acquired in June 1980 by the Lear Fan Research Ltd. Partnership from Lear Fan Corporation in return for an investment of $30 million in the project. The research partnership subsequently granted an exclusive licence to Lear Fan Ltd. to exploit the technology. When the September 1982 financial agreement was put in place the Department of Economic Development was interposed in the licensing arrangement. Under the terms of this arrangement the Department, on foot of a default by Lear Fan Ltd., has a limited period in which to seek a new sub-licensee or exploit the technology itself. Legal advice is being obtained on the current position.

Killeen (Terrorism)

Mr. Maginnis asked the Secretary of State for Northern Ireland whether the Chief Constable of the Royal Ulster Constabulary has provided him with the factual basis for his recent statement in relation to the Killeen atrocity that the perpetrators and the explosives came from the Irish Republic; and if he will make a statement.

Mr. Hurd: I have received a report on this tragic incident from the Chief Constable. It would not be right for me to comment publicly on the information it contains.

Royal Ulster Constabulary

Mr. Maginnis asked the Secretary of State for Northern Ireland if he is satisfied with the performance of the Royal Ulster Constabulary and its senior officers; and if he will make a statement.

Mr. Hurd: I shall reply to the hon. Gentleman as soon as possible.

Commercial Explosives

Mr. Maginnis asked the Secretary of State for Northern Ireland what percentage of commercial explosives recovered in Ulster can be traced back to the Irish Republic; and if he will define this in terms of weight.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. 85]: In 1984, 94·94 per cent. of commercial explosives recovered in Northern Ireland were manufactured for distribution in the Republic of Ireland. This represented 82·4 kilos out of a total of 86·79 kilos recovered.

Terrorism

Mr. Maginnis asked the Secretary of State for Northern Ireland (1) how many incidents in the frontier area of Ulster during the past three years can be directly related to terrorist incursions from the Irish Republic; and if he will list these;

(2) how many incidents in the frontier area of Ulster during the past three years can be directly related to terrorist activity from within the Irish Republic; and if he will list these.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. 85]: It would not be right to disclose information which may be in the possession of the Royal Ulster Constabulary about incidents where charges may yet be brought.

Policing Policy

Mr. Maginnis asked the Secretary of State for Northern Ireland what proposals for future policing within Ulster have been discussed with the Irish Republic's Government; who has taken part in these discussions; if the Chief Constable of the Royal Ulster Constabulary has been consulted; and whether he agrees with these proposals.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. 85]: The details of any discussions between Ministers and officials of Her Majesty's Government and the Government of the Republic of Ireland about security co-operation must remain confidential. It would not be right for me to give the names of individuals who join in any such discussions or the views of those who may be consulted. The responsibility for future policing within Northern Ireland remains with Her Majesty's Government.

NATIONAL FINANCE

Building Societies

Mr. Eggar asked the Chancellor of the Exchequer if he will make a statement about the Government's plans for new building society legislation.

Mr. Ian Stewart: The Government have now considered the representations they have received on the Green Paper. Decisions have now been taken on many of the issues raised in the Green Paper. Early legislation to give effect to them will be introduced, I hope in the next Session of Parliament.

The Government's proposals will in general follow the Green Paper, which has been widely welcomed. The prime function of building societies will continue to be to provide a secure home for people's savings and to finance home ownership, but the present statutory constraints on their powers will be loosened. The legislation will confirm the structure of assets and liabilities set out in the Green Paper. At least 90 per cent. of "commercial assets" will

be in the form of class 1 loans — that is, loans on security of freehold or leasehold estate for the residential use of the borrower. This definition will extend to occupation by the borrower's dependants and to property which is not the borrower's main residence, if he lives in job-related accommodation. Up to 60 per cent. by floor area may be put to other residential or business uses without affecting eligibility for class 1.

All societies will be given new powers to offer financial and housing-related services, including money transmission, full insurance brokerage services, and the ability to act as agents for others in payments services and consumer credit. They will be empowered to provide access to the services of authorised investment businesses, whether or not members of the Stock Exchange; to offer structural survey services; and to set up estate agency subsidiaries.

Those societies with commercial assets in excess of a stated figure (propably £100 million) will in addition be able to hold residential land for sale, rent or development and to lend money other than on security of mortgage. They will also be able to set up, or invest in, subsidiary companies for carrying on business in other member states of the European Community.

The Green Paper proposals on the constitution of building societies will be confirmed, with some detailed modifications in the light of comments received. A minimum shareholding of £100 will be required for the exercise of rights as a member. Directors of building societies will be able to continue in office after the age of 70 only if their appointment is confirmed by special resolution at successive annual general meetings. There will be a procedure under which individual building societies may convert to company status with the approval of their members.

On the prudential supervision of societies, the legislation to be introduced by the Government will generally reflect the Green Paper proposals. Shares and deposits with all authorised societies will be treated as trustee investments under the Trustee Investments Act 1961.

On a number of matters, including those relating to conveyancing, decisions remain to be taken.

Economic Statistics

Mr. Gould asked the Chancellor of the Exchequer whether he will publish in the *Official Report* a table showing for 1973, each year since 1979, and 1985 to date the level of manufacturing output based on 1980=100, the level of industrial production less oil and gas, and the level of gross domestic product less oil and gas.

Mr. Peter Rees: The information requested is as follows:

1980=100	*1973*	*1979*	*1980*	*1981*	*1982*	*1983*	*1984*	**1985*
Manufacturing output	114·3	109·6	100·0	93·9	94·5	96·9	100·3	101·8
Industrial production less oil and gas†	111·5	108·4	100·0	94·6	94·8	96·9	96·7	98·4
Gross domestic product‡ less oil and gas†	98·8	103·2	100·0	97·7	99·1	101·7	103·9	105·5

* 1st Quarter.
† Class 13 of the Standard Industrial Classification 1980—extraction of mineral oil and natural gas.
‡ The output based measure of GDP, which is the appropriate measure for comparison by industry.

Board of Inland Revenue (Chairman's Letter)

Dr. McDonald asked the Chancellor of the Exchequer if he will publish in the *Official Report* the full text of the letter dated 24 May from the chairman of the Board of Inland Revenue to the Association of Her Majesty's Inspectors of Taxes, copies of which have been circulated throughout Inland Revenue staff.

Mr. Moore: No; but I am quite happy to place copies of the letter in the Library of the House, and this has been done.

Customs and Excise (Computer Programmers)

Mr. Teddy Taylor asked the Chancellor of the Exchequer how many persons have resigned from the programming and experts computer sections of the computer services division of Customs and Excise headquarters in Southend in each of the past three years; and if he will make a statement.

Mr. Hayhoe [*pursuant to his reply*, 5 June 1985, c.*173*]: The numbers of resignations amongst the programming and operational staff employed in computer services division in Customs and Excise headquarters at Southend in each of the last three financial years are:

	numbers
1982-83	14
1983-84	8
1984-85	11

Mr. Teddy Taylor asked the Chancellor of the Exchequer (1) what estimate he has made of the gap between the salary levels of computer programmers in the computer services division of the Customs and Excise Headquarters in Southend and comparable positions in private industry in the south-east of England; and what steps he will take to narrow the differential;

(2) if he will introduce a regional variation in additional payments to ensure that the Customs and Excise computer services division is in a position to offer comparable salaries to those in private industry; and if he will make a statement.

Mr. Hayhoe [*pursuant to his reply*, 5 June 1985, c. *173*]: The pay and allowances of computer programmers in Customs and Excise computer services division at Southend, as for all civil servants, are determined centrally following negotiation with the recognised civil service trade unions. The Government have no reason to believe computer programmers in the civil service are not fairly remunerated.

There are no plans to introduce a regional variation in the allowances paid to computer programmers.

Mr. Teddy Taylor asked the Chancellor of the Exchequer why the headquarters of Customs and Excise in Southand has initiated a new programme to engage a private firm to undertake a major computer-based project for the computer services division; and if he will make a statement.

Mr. Hayhoe [*pursuant to his reply*, 5 June 1985, c. *173*]: In developing and operating its computer systems, the Department draws both on its in-house capacity and on external resources. The extent to which it is appropriate to call on external ADP resources is something which is continuously assessed. There has been no recent decision to engage a private firm for a major new computer-based project.

Income Statistics (West Midlands)

Mrs. Renée Short asked the Chancellor of the Exchequer if he will list the number of citizens residing in the West Midlands county who presently earn *(a)* £5,000 to £9,999, *(b)* £10,000 to £14,999, *(c)* £15,000 to £19,999, *(d)* £20,000 to £24,999, *(e)* £25,000 to £29,999 and *(f)* more than £30,000.

Mr. Moore [*pursuant to my reply*, 3 June 1985, c. *67*]: I regret that the information originally given was not confined to the West Midlands county but included the rest of the West Midlands region also. Estimates for the county alone are as follows:

Range of earned income before tax £	*Number of single people and married couples thousands*
5,000 to 9,999	411
10,000 to 14,999	117
15,000 to 19,999	24
20,000 to 24,999	8
25,000 to 29,999	3
30,000 and over	5

SCOTLAND

Tinnitus Masking Devices

Dr. Roger Thomas asked the Secretary of State for Scotland how many tinnitus masking devices have been prescribed for National Health Service patients in each of the health boards in Scotland.

Mr. John MacKay: I regret that the information requested is not available centrally.

Broadleaved Woodland

Mr. Ron Davies asked the Secretary of State for Scotland on how many occasions in the year to 31 March the Forestry Commission issued felling licences which permitted the clear-felling of broadleaved woodland for conversion to agriculture; and how many hectares of woodland this totalled.

Mr. John MacKay: I shall reply to the hon. Member as soon as possible.

Mr. Ron Davies asked the Secretary of State for Scotland (1) on how many occasions, in the year to 31 March, the Forestry Commission issued felling licences for broadleaved woods; of these, how many licences had conditions requiring the replanting purely of broadleaved trees; and how many hectares of woodland this totalled;

(2) on how many occasions in the year to 31 March the Forestry Commission consulted the Agricultural Department over applications for felling licences to clear woodland for agricultural purposes.

Mr. John MacKay: I shall reply to the hon. Member as soon as possible.

Mr. Ron Davies asked the Secretary of State for Scotland how many cases were reported to the Forestry Commission in the year to 31 March of broadleaved woodland felling being carried out without felling licences when a felling licence was required by law; what was the total area so felled; and how many prosecutions resulted from these cases.

Mr. John MacKay: The information is as follows:

Number of cases	*Area (hectares)*	*Number of prosecutions*
21	39·9	4

In addition, prosecutions are pending in six cases covering 22·1 hectares, and nine other cases covering 26·57 hectares are still under investigation.

Rate Rebates

Mr. Craigen asked the Secretary of State for Scotland if he will make a statement on the proposed allocation of the rate rebates provided under the Rating (Revaluation Rebates) (Scotland) Bill.

Mr. Ancram: I am not clear whether the hon. Member has in mind the likely demand for revaluation rate rebates in each of the rating authority areas. The Convention of Scottish Local Authorities has been trying to collect this information, much of which is to hand; the rest should be available shortly and I shall write to the hon. Member when it is.

Mr. Gordon Brown asked the Secretary of State for Scotland if he will make arrangements to inform all those with revaluations above 300 per cent. of their previous valuations of the help now to be made available.

Mr. Ancram: My right hon. Friend will ensure that suitable publicity is given to the provisions of the Rating (Revaluation Rebates) (Scotland) Bill 1985.

Mr. Gordon Brown asked the Secretary of State for Scotland if he studied the revaluations in *(a)* Fife, *(b)* Central, *(c)* Grampian, *(d)* Borders, *(e)* Highland and *(f)* Lothian regions before announcing his package of special assistance to ratepayers.

Mr. Ancram: My right hon. Friend had regard at different stages in the last year to the information provided at successive stages by the assessors as to the overall effects of revaluation. Before making his announcement on 14 May he took account of other relevant information available to him but he did not study the results of revaluation in the sense of inspecting comprehensively the valuation rolls for any areas.

List D Schools

Mr. Corrie asked the Secretary of State for Scotland if he will make a statement about the future financial and administrative arrangements for list D schools.

Mr. Younger: Following my statement on 30 July 1984, discussions were held with the Convention of Scottish Local Authorities and with other interested parties about the future arrangements for these schools.

I have considered the views expressed in these discussions and in response to earlier consultations initiated in August 1983 I have reached the conclusion that the schools should continue to remain under their present voluntary management but that closer association with local authorities would be advantageous. Progress in this direction will be impeded so long as my Department is involved directly in funding and day-to-day operation of the schools. I have decided that regional and islands authorities should assume full responsibility for meeting the costs of maintaining at the schools children for whom they are directly responsible and that the grants representing half those costs currently paid by my Department to the schools should be withdrawn with effect from 31 March 1986. I believe that this adjustment in the arrangements for financial support will encourage authorities to enter into a meaningful partnership with the voluntary managed list D schools used by them in order to plan and co-ordinate the services provided by the schools over time with other child care facilities in their areas. Accordingly, I propose to make a direction under schedule 7(2) of the Social Work (Scotland) Act 1968 bringing to an end my powers in relation to list D schools.

I recognise that such a transfer could, without adequate financial arrangements, place an additional burden on local authorities. I propose therefore to take this into account in the next rate support grant settlement by increasing both aggregate Exchequer grant and relevant expenditure by the full amount of the estimated increase in their expenditure. I also propose to continue direct funding to the managers of Rossie school, Montrose and St. Mary's Kenmure, Bishopbriggs under section 10 of the Social Work (Scotland) Act since these schools are mainly secure establishments and have a specialised function as well as accepting children from the whole of Scotland.

My Department is now arranging to discuss with the schools and the authorities concerned a number of detailed questions arising from my decision.

Written Answers to Questions

Friday 7 June 1985

ATTORNEY-GENERAL

Crown Court

Mr. Peter Bruinvels asked the Attorney-General if he will detail the average waiting time prior to trial for each Crown court; and if he will make a statement.

The Attorney-General: The average waiting times between committal and trial for all defendants dealt with at each Crown court centre during 1984 are set out in the table. Despite the increase of about 50 per cent. in committals for trial to the Crown court between 1979 and 1984, measures including the appointment of additional judges and the provision of additional court rooms helped to reduce the national average wating time for all defendants from 17·6 weeks in 1979 to 14·2 weeks in 1983: in 1984 the figure increased marginally to 14·3 weeks. Average waiting times for defendants remanded in custody have been consistently lower.

Average waiting time (in weeks) between committal for trial and start of trial for defendants dealt with at each Crown court centre during 1984

EDUCATION AND SCIENCE

Adults (Basic Education)

Mrs. Renée Short asked the Secretary of State for Education and Science why he has rejected an appeal submitted to him by the adult literacy and basic skills unit to establish a legal framework for education authorities to provide basic education for adults.

Sir Keith Joseph: I have received no such appeal from the adult literacy and basic skills unit. In response to a question put to me recently at the unit's 10th anniversary conference, I made clear my view that the case for amending the existing provisions of the Education Act 1944 had not been made out. New legislation, which would inevitably be complex, would I believe distract attention and energy from other important initiatives, such as the literacy campaign itself, in the further education field. The duties imposed by section 41 of the 1944 Act apply no less to adult education than to other areas of further education.

Burnham Committee

Mrs. Renée Short asked the Secretary of State for Education and Science if he will invite members of the Burnham management committee to have discussions about the possibilty of amending the composition of the Burnham committee.

Sir Keith Joseph: No. All the associations represented on the teachers' panel of the Burnham primary and secondary committee have now confirmed their ability to provide a statement of their membership in accordance with the review which I announced on 2 May at column 189.

Wandsworth (Reorganisation)

Mr. Dubs asked the Secretary of State for Education and Science when he expects to be able to announce his decision about secondary school reorganisation in Wandsworth.

Mr. Dunn: My right hon. Friend's approval of these proposals was announced on 6 June.

DEFENCE

Cumbria (Land Acquisition)

Mr. Maclean asked the Secretary of State for Defence what is his policy over acquisition of land in the Warcop area of Cumbria for dry training purposes.

Mr. Lee: Policy on the use of the defence estate was set out in paragraphs 620 to 622 of the 1985 Statement on Defence Estimates (Cmnd. 9430-1).

Paragraph 621 noted that current land holding cannot meet all training requirements and that it is the Ministry's intention to acquire additional land whenever possible, usually by extending existing training areas. This policy naturally applies to Warcop, which is one of the six principal training areas in the United Kingdom.

Mr. Maclean asked the Secretary of State for Defence if he has any need of more land in the Warcop area of Cumbria for live firing.

Mr. Lee: We have no plans to acquire land outside the boundaries of the existing training area for live firing.

Mr. Maclean asked the Secretary of State for Defence what is the name of the firm of local agents acting on behalf of his Department to acquire land for training purposes in the area of Cumbria.

Mr. Lee: The Property Services Agency of the DOE acts as agents for all our land acquisitions in the United Kingdom. No firm of local agents has been appointed to acquire land in Cumbria.

Mr. Maclean asked the Secretary of State for Defence with regard to his proposals to acquire land at Stainmore in Cumbria for training purposes, what stage his negotiations with local landowners have reached; and whether he is negotiating for lease or freehold.

Mr. Lee: There have been negotiations with local landowners at Stainmore for purchase of one area of land and lease of another, but no binding commitment can be entered into in advance of hearing the views of the local planning authority on the proposal to use the land for training.

Mr. Maclean asked the Secretary of State for Defence what studies he has carried out into the suitability of the three plots of land at Stainmore in Cumbria which he proposes to acquire for training purposes.

Mr. Lee: The land has been inspected by the appropriate military authorities, who have confirmed that it would be suitable for training not involving live firing.

Mr. Maclean asked the Secretary of State for Defence if he will publish the brief he has given to land agents in Cumbria who have been instructed to acquire land for dry training purposes.

Mr. Lee: No land agents other than those of the Property Services Agency have been instructed to acquire land for dry training purposes. The PSA was informed of the military requirement and asked to consult the military authorities if land which appears to be suitable becomes available.

Mr. Maclean asked the Secretary of State for Defence what factors have led his Department to seek to use land in Cumbria previously considered for inclusion in an area of outstanding natural beauty for purposes of military training.

Mr. Lee: The reason for seeking to acquire extra land in the vicinity of Warcop is that the existing Warcop training area does not have the capacity to meet all current training requirements. The acquisition of an additional area of land such as the one at Stainmore for dry training —that is without live firing—and the carrying out of drills before using the ranges at Warcop would reduce the pressure on the existing training area.

Civil Service Pay

Mr. Gould asked the Secretary of State for Defence why civil servants working in his Department have not yet received their pay increase for the current year.

Mr. Butler: Civil Service pay rates are negotiated centrally by Her Majesty's Treasury and any increases are paid on its authority. Departments were authorised to pay new rates for non-industrials operative from 1 April 1985

as and when the union with negotiating rights for particular grades indicated acceptance or agreement. Also payroll centres need time to reprogramme computers.

Staff represented by the Civil Service Union received their increases in May. The vast majority of staff represented by other unions which accepted later will receive their new rates in June. Negotiations of new rates for industrial grades operative from 1 July are still in progress.

Military Equipment (Sales to Chile)

Mr. Ashdown asked the Secretary of State for Defence what assistance has been given by his Department to Laird (Anglesey) Ltd. about the possible sale of Centaur military vehicles to Chile.

Mr. Lee: Laird (Anglesey) has received the normal assistance available to exporters of defence equipment from the defence sales organisation in connection with the possible sale of Centaur to Chile.

Mr. Ashdown asked the Secretary of State for Defence which United Kingdom companies are receiving assistance from the Defence Sales Organisation about the possible sale of military equipment to Chile.

Mr. Lee: A range of United Kingdom defence companies make use of the services of the defence sales organisation in connection with prospective sales to Chile, as they do for other markets throughout the world. Purchases of armaments by Chile are, of course, governed by Her Majesty's Government's policy on such sales to that country and require an export licence in each case.

PRIME MINISTER

King Hussein of Jordan (Meeting)

Mr. Parry asked the Prime Minister if she will make a statement on her recent meeting with King Hussein of Jordan.

The Prime Minister: I shall reply to the hon. Gentleman shortly.

Chinese Prime Minister (Meeting)

Mr. Parry asked the Prime Minister if she will make a statement on her recent meeting with the Prime Minister of China.

The Prime Minister: I shall reply to the hon. Gentleman shortly.

NORTHERN IRELAND

Police Complaints System

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland how many representations have been received by his Department since the publication of the consultative paper on a police complaints system for Northern Ireland; and if he will place copies of such representations in the Library.

Mr. Scott: The period allowed for comments on the consultative paper ends on 14 June. Two responses have been received so far. It would not be appropriate for copies of such responses to be placed in the Library.

Commercial Explosives

Mr. Maginnis asked the Secretary of State for Northern Ireland what percentage of the component elements for home-made explosives recovered in Ulster can be traced back to the Irish Republic; and if he will define this in terms of weight.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. *85*]: The nature of the components used in improvised explosives makes it impossible to distinguish accurately their source. The agricultural fertiliser on which home-made explosives are based is widely used in both Northern Ireland and the Republic of Ireland.

Terrorism

Mr. Maginnis asked the Secretary of State for Northern Ireland how many formal apologies Her Majesty's Government have received from the Irish Republic Government during the past three years concerning terrorist incursions or activity emanating from their territory.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. *85*]: No apologies have been requested or received. Irish Ministers have often made clear in public statements their abhorrence of terrorism, their sympathy for those killed or injured and their determination to help take action against the terrorist threat.

Killeen (Bomb Incident)

Mr. Maginnis asked the Secretary of State for Northern Ireland whether the official statement from Dublin that the Killeen bomb was not detonated from within the Irish Republic was made in response to any specific allegation that it had been; and whether it has been possible to establish conclusively the detonation point.

Mr. Hurd [*pursuant to his reply*, 3 June 1985, c. *85*]: No official statement was made identifying the point of detonation. It would not be in the public interest for me to disclose details of any information which is available to the police about the point of detonation.

Housing Benefits

Rev. Martin Smyth asked the Secretary of State for Northern Ireland if he will make a statement about the review being carried out by officials of housing benefits in Northern Ireland.

Mr. Chris Patten [*pursuant to his reply*, 4 June 1985, c. *140*]: The review team of officials issued a consultative document requesting written evidence in June 1984. Submissions were received from a wide range of interested local bodies and individuals and representatives of a number of organisations also gave oral evidence. The subsequent report was made available to the Great Britain housing benefit review team so that the Northern Ireland team's views could be taken into account in framing recommendations.

Royal Ulster Constabulary

Mr. Maginnis asked the Secretary of State for Northern Ireland if he is satisfied with the performance of the Royal Ulster Constabulary and its senior officers; and if he will make a statement.

Mr. Hurd [*pursuant to his reply*, 6 June 1985]: Yes. The Chief Constable and the officers of the Royal Ulster Constabulary work courageously and diligently to keep the peace, uphold the law and protect the citizens of Northern Ireland in the face of considerable difficulties. They have my full support.

TRADE AND INDUSTRY

Pesticides

Dr. Roger Thomas asked the Secretary of State for Trade and Industry whether 2,4,5-T or related substances or any substance whose production or decomposition precipitates the production of dioxin is being manufactured in the United Kingdom at present.

Mr. Trippier: No.

Dr. Roger Thomas asked the Secretary of State for Trade and Industry what amounts of 2,4,5-T, during the last three years, were *(a)* imported into the United Kingdom, identifying the country of origin, *(b)* used in the United Kingdom and *(c)* re-exported from the United Kingdom, identifying the importing nations.

Mr. Channon: There were 159 tonnes of 2,4,5-T imported in 1982 and 300 tonnes in 1983. Since then there have been no imports of the substance. Data are compiled on a country of consignment basis so it is not possible to identify the country of origin of these imports.

Information is not available about the amounts of 2,4,5-T used in the United Kingdom. However, I refer the hon. Member to the answer given by my hon. Friend the Minister of State for Agriculture, Fisheries and Food to the hon. Member for Caerphilly (Mr. Davies) on 31 January 1985 at column 279.

No information is available in respect of any exports of 2,4,5-T.

Industry and Parliament Trust (Exhibition)

Mr. Cartwright asked the Secretary of State for Trade and Industry if he will arrange for an exhibition relating to the Industry and Parliament Trust to be displayed in the Upper Waiting Hall.

Mr. Trippier: Yes. Arrangements have been made for such an exhibition in the Upper Waiting Hall to take place from Monday 15 July to Friday 19 July 1985.

Defective Products Directive

Mr. Teddy Taylor asked the Secretary of State for Trade and Industry what is the purpose of the draft EEC directive on liability for defective products which is being considered at the Common Market's Internal Market Council on Monday 10 June; and what is the policy of Her Majesty's Government on the introduction of such a directive.

Mr. Fletcher: The purpose of the draft EC directive is the approximation of the laws, regulations and administrative provisions of the member states concerning liability for defective products. In particular, the draft directive seeks to establish throughout the Community that producers shall be strictly liable for defects in their products, subject only to certain clearly defined defences and limitations. The draft directive is not on the agenda for the forthcoming meeting of the Internal Market Council.

We agree with the aims of this draft directive. In the negotiations with other Member States we have sought to establish that the defences and limitations are such as to achieve a fair balance between the legitimate interests of consumers and manufacturers. On this basis, we are supporting current efforts to reach an early agreement on the main points of the directive.

Mr. Teddy Taylor asked the Secretary of State for Trade and Industry what discussions he has had with the Confederation of British Industry and other industrial organisations about the effect on British industry and its costs of the draft directive on liability for defective products which is being considered at the Internal Market Council on 10 June.

Mr. Fletcher: My officials have had regular discussions with the CBI and other industrial organisations about the effect of the draft directive. The Secretary of State has also recently replied to a letter from the CBI on this subject.

Mr. Teddy Taylor asked the Secretary of State for Trade and Industry if he will take steps to establish whether British insurance companies would be willing to provide cover to industrial firms for obligations and risks under the draft directive on liability for defective products in advance of the consideration of the directive by the Internal Market Council; and if he will make a statement.

Mr. Fletcher: My Department has already established, through contacts with the United Kingdom insurance industry, that the draft directive should not affect the availability of insurance cover for industrial firms, though it may have a marginal effect on the level of premiums. This confirms earlier findings of research undertaken at the European level by the EC Commission.

Mr. Teddy Taylor asked the Secretary of State for Trade and Industry what is the policy of Her Majesty's Government on the proposal in the EEC directive on liability for defective products that the Commission should be empowered, without reference to member states, to remove the development risk defence from the provisions of the directive after the directive has been in force for a period of seven years; and if he will make a statement.

Mr. Fletcher: There is no such proposal in the draft directive. We would not accept a directive which gave the Commission power to repeal the defence without reference to member states.

Tour Operators and Travel Agents

Mr. Trotter asked the Secretary of State for Trade and Industry (1) on what basis the Director General of Fair Trading asked the Monopolies and Mergers Commission to investigate the trading arrangements between the Association of British Travel Agents tour operators specifically and travel agents;

(2) when he expects that the Monopolies and Mergers Commission's investigation into the trading arrangements between the Association of British Travel Agents tour operators and travel agents will be finalised;

(3) what is his estimate of the cost to public funds of the investigation by the Monopolies and Mergers

Commission into the trading arrangements between the Association of British Travel Agents tour operators and travel agents.

Mr. Fletcher: The Director General of Fair Trading asked the Monopolies and Mergers Commission to investigate whether a complex monopoly exists in the relationship of retail travel agents with tour operators and, if so, whether the practice of some tour operators of prohibiting travel agents from selling overseas package holidays at reduced prices and/or with incentives is against the public interest. The commission's report is due by 31 July 1986.

It is not practicable to allocate costs to particular inquiries, but the cost of the commission's programme, often of 10 to 12 active references at any one time, was about £2 million for 1984-85.

NATIONAL FINANCE

Point of Entry Imports (VAT)

Mr. Rowe asked the Chancellor of the Exchequer (1) what proportion of the total revenue collected from charging value added tax on imports at point of entry will be repaid within three months on reclaims to registered traders;

(2) what percentage of the total revenue collected by charging value added tax on imports at point of entry he estimates will be repaid within the same month through reclaims to registered traders.

Mr. Hayhoe: There is no system of repayment specifically for VAT on imports. Registered traders who incur VAT on imports may offset it against the output tax for which they are accountable under the same conditions as for the tax they incur on their purchases within the United Kingdom. The net tax due is payable to Customs and Excise quarterly, but, if the trader is regularly entitled to credits of tax, these may be claimed monthly. While a precise breakdown is not available, it is thought that something of the order of a tenth of the VAT on imports by registered traders is paid by traders who make their returns monthly; the remainder pay quarterly.

Mr. Rowe asked the Chancellor of the Exchequer how much revenue he expects to collect in the first full year of operation of value added tax collection at point of entry imports.

Mr. Hayhoe: About £10 billion.

Forestry

Mr. Simon Hughes asked the Chancellor of the Exchequer whether he intends to review the fiscal support or other subsidies currently given to both public and private upland afforestation projects; and whether the Government will now carry out a cost/benefit study of the planting programme of both the Forestry Commission and publicly supported private afforestation.

Mr. Moore: No. The existing tax arrangements for forestry are of long standing and I have at present no plans to change them. The Forestry Commission is required to meet financial targets laid down by Ministers which are regularly reviewed. A periodic review of grant levels under the commission's grant schemes is currently in progress and a major review of policy in relation to broadleaved woodlands is nearing completion.

Benefits

Mr. Dormand asked the Chancellor of the Exchequer which social security payments, pensions and related payments are not subject to income tax.

Mr. Moore: The following social security benefits are taxable: retirement pension, old person's pension, widow's pension, widowed mother's allowance, widow's allowance, industrial death benefit, invalid care allowance, unemployment benefit, and supplementary benefit paid to the unemployed and to strikers.

The remaining social security benefits — including any child additions to the benefits listed — are not taxable.

Payments made by employers under the statutory sick pay scheme are taxable.

Economic Secretary (Speech)

Mrs. Virginia Bottomley asked the Chancellor of the Exchequer if he will place in the Library a copy of the speech delivered by the Economic Secretary to the Building Societies Association on 6 June.

Mr. Ian Stewart: I have already done so.

WALES

Welsh Water Authority

Mr. Best asked the Secretary of State for Wales if he has concluded his consideration of the Welsh Water Authority's report on arrangements for representing consumer interests.

Mr. Wyn Roberts: My right hon. Friend the Secretary of State for Wales has approved the authority's report with modifications. A copy of the report, as modified, has been placed in the Library, together with a copy of the Secretary of State's letter of approval to the chairman of the Welsh Water Authority.

Departmental Cash Limits

Mr. Best asked the Secretary of State for Wales if he proposes to make any changes to his Department's cash limits in connection with expenditure on rate support grants to local authorities in Wales.

Mr. Nicholas Edwards: Subject to parliamentary approval of the necessary revised estimate for class XVIII, vote 2, the cash limit is being reduced by £5,600,000 from £834,200,000 to £828,600,000. There is no direct public expenditure borne on this vote. In the light of local authorities' budgeted expenditure for 1985-86, this reduction reflects the proposed abatement of block grant for 1985-86, in accordance with the proposals set out in paragraph 38 of the Welsh rate support grant report 1985-86 which was approved by the House on 16 January 1985. The adjustment of block grant will, of course, be subject to the approval of the requisite supplementary rate support grant report by the House.

Community Nursing Services

Mr. Hubbard-Miles asked the Secretary of State for Wales whether he has decided the membership of the Review Group on Community Nursing Services for Wales.

Mr. Wyn Roberts: Yes. As I announced on 2 April 1985, at column *515*, the review of community nursing services for Wales will be chaired by Mrs. N. L. Edwards, chairman of the Gwynedd health authority. Following consultation with a wide range of interested bodies, we decided to invite the people listed as follows to form the review group:

Mrs. A. Fawcett-Henesey, Nurse Adviser, RCN, Society of Primary Health Care Nursing.
Mr. M. D. Scott, Senior Nurse (Community Psychiatric), West Glamorgan.
Dr. D. T. Jones, Chief Administrative Medical Officer, Clwyd.
Mrs. M. Morgan, Chief Administrative Nursing Officer, Powys.
Dr. J. H. Owens, General Practitioner, Porthcawl.
Mrs. B. Roberts, Midwifery Liaison Officer, Wrexham.
Miss J. Sinnott, Director of Nursing Services (Community), West Glamorgan.
Dr. S. Smail, Senior Lecturer in General Practice, University of Wales, College of Medicine.
Miss F. Welch, Senior Lecturer in Health Visiting, University of Wales, College of Medicine.

There will be a further member of the team with expertise in social services.

I am delighted to say that all have accepted the invitation. They will bring to the group a wide range of experience. I am certain their work will make a signal contribution to the future health care of the people of Wales.

TRANSPORT

Long Sutton and Sutton Bridge Bypass

Mr. Body asked the Secretary of State for Transport what was the date when the draft order for the Long Sutton and Sutton Bridge bypass was ready for publication.

Mrs. Chalker: The draft line order for the bypass was ready for publication in November 1984. My hon. Friend is aware of the problems delaying publication.

Motorways (Maintenance)

Mr. Ashdown asked the Secretary of State for Transport if statistical information is available on the maintenance condition of motorways in recent years, in a format such as the defects index mentioned in the national road maintenance condition survey; and if he will make a statement.

Mrs. Chalker: The defects index contained in reports of the national road maintenance condition survey is compiled from the results of visual surveys carried out by highway authorities. Although some visual surveying is done on motorways, the bulk of the information required to access their condition is obtained from regular deflectograph surveys. These surveys showed that in August 1984 20 per cent. of the motorway network in England had a residual life of up to five years, 18 per cent. had 6 to 10 years residual life, 20 per cent. had 11 to 15 years and 42 per cent. had over 16 years residual life. Similar information about the residual life of all-purpose roads in England and Wales in 1983 is contained in table 2 of the report of the 1984 national road maintenance condition survey.

M25 and M42 Motorways

Mr. Peter Bruinvels asked the Secretary of State for Transport when he expects the studies to identify any particular stretches of the M25 and M42 motorways liable to fog to be completed.

Mrs. Chalker: The study is being carried out for my Department by the Meteorological Office. Its draft report is expected to be received by the end of the month. Decisions will then be taken on whether action is necessary in any fog-prone areas identified.

Heathrow Airport

Mr. Dover asked the Secretary of State for Transport which airlines will be making use of the facilities of terminal 4 at Heathrow airport.

Mr. Michael Spicer: This is a matter for the British Airports Authority to determine. It s currently having discussions with British Airways and KLM.

Mr. Dover asked the Secretary of State for Transport when terminal 4 at Heathrow airport will start to be used by airlines; what is its capacity in passengers per year; and by what date this additional capacity will be needed at Heathrow.

Mr. Michael Spicer: This is a matter for the British Airports Authority, but terminal 4 should start to be used by airlines early in 1986. It will be capable of handling 8 million passengers a year. The new terminal will be needed for the 1986 summer season.

Mr. Dover asked the Secretary of State for Transport when the construction of terminal 4 at Heathrow airport will be completed.

Mr. Michael Spicer: I understand that the main construction work will be completed by the end of July, but fitting out the terminal will not be completed until early 1986.

ENVIRONMENT

Domestic Rating

Mr. Tom Cox asked the Secretary of State for the Environment how many letters have been received by his Department expressing concern at the present system of domestic rating.

Mr. Waldegrave: Since the studies into the local government finance system were announced by my right hon. Friend on 10 October last, my Department has received approximately 800 representations expressing concern at the present system of domestic rating.

Local Authority Dwellings

Mr. Chris Smith asked the Secretary of State for the Environment, in the light of the conclusions of paragraph 5.21 of his Department's report. "Local Authority Empty Dwellings", issued in January, about the need for expenditure to halt the pattern of decay, what steps he intends to take to implement this conclusion in relation to the repair and improvement of local authority dwellings.

Sir George Young: The public expenditure plans announced in the Chancellor's Autumn Statement allow

local authorities in England to spend £2·3 billion on housing capital investment, a very considerable sum by any standard. It is for local authorities to decide how best to use the resources available to them.

However, capital expenditure on repair and improvement has often been wasted because it has not been accompanied by improvements in housing management. As a result of the empty dwellings report, my Department will shortly issue a circular to authorities setting out ways in which better management can help to reduce numbers of empty dwellings.

Bed and Breakfast

Ms. Harman asked the Secretary of State for the Environment how many people are currently being housed by local authorities in bed and breakfast establishments.

Sir George Young: It is estimated that at the end of December 1984, the latest date for which information is available, there were some 3,300 homeless households in England being housed by local authorities in bed and breakfast accommodation. My Department does not collect information on the size of homeless households.

Unfit Dwellings

Mr. Skinner asked the Secretary of State for the Environment how many dwellings throughout the United Kingdom have been designated unfit for human habitation at the latest available date.

Sir George Young: The most recent estimate available for England appears in table A of part 1 of the "English House Condition Survey, 1981", a copy of which is in the Library.

For information for other parts of the United Kingdom, I refer the hon. Member to my right hon. Friends the Secretaries of State for Scotland, Wales and Northern Ireland.

Housing Construction/Rehabilitation

Mr. Skinner asked the Secretary of State for the Environment what information he has as to the percentage of gross domestic product invested in housing construction/rehabilitation in the following countries in 1984 *(a)* West Germany, *(b)* France and *(c)* Belgium; and what was the equivalent figure for the United Kingdom.

Sir George Young: The latest available information for all the countries mentioned is for the year 1982 and is given in the following table:

Fixed Investment in Housing as a percentage of GDP in 1982

	Percentage
Germany (Federal Republic)	6·1
France	5·3
Belgium	3·5
United Kingdom	3·4

Note: Includes new building and expenditure on major improvements. In 1983, fixed investment in housing in the United Kingdom increased to 3·6 per cent. of GDP.

Radioactivity Levels

Mr. Adley asked the Secretary of State for the Environment if he will list the 20 areas in England and Wales with the highest levels of naturally occurring radioactivity and the reasons why these levels occur in the areas concerned.

Mr. Waldegrave: According to information supplied by the National Radiological Protection Board the 20 sites in England and Wales which show the highest gamma radiation dose rates due to naturally occurring radioactivity present in the ground are as follows:

National Grid 10km Square	*Location*	*County*	*Microgray per year*
SX66	Dartmoor Forest West of Buckfastleigh	Devon	964
SW33	St. Just	Cornwall	876
SW42	South West of Penzance	Cornwall	833
SW43	North of Penzance	Cornwall	804
SX78	Dartmoor Forest North West of Newton Abbot	Devon	797
SW64	Camborne and Redruth	Cornwall	795
NU01	Branton West of Alnwick	Northumberland	763
SX67	Dartmoor Forest West of Newton Abbot	Devon	754
SW63	South of Camborne	Cornwall	691
SW32	Lands End	Cornwall	687
SX16	East of Bodmin	Cornwall	677
NT91	Cheviot Hills West of Alnwick	Northumberland	670
SW95	West of St. Austell	Cornwall	659
NT92	Cheviot Hills South West of Wooler	Northumberland	641
SW53	South of Hayle	Cornwall	638
NT80	Cheviot Hills East of Carter Bar	Northumberland	637
NT81	Cheviot Hills West of Alnwick	Northumberland	617
SX37	South of Launceston	Cornwall	615
NZ22	North of Darlington	Durham	600
SE28	West of Ripon	North Yorkshire	588

For comparison, the average value for England and Wales is about 340 micrograys per year in air. In all the cases listed, the explanation for the higher levels of radioactivity is the present in the ground of minerals with radioactive content. Radioactivity may also manifest itself in the form of radon gas.

Mr. Adley asked the Secretary of State for the Environment if he will make a statement on the monitoring of the atmosphere in and around nuclear establishments operated by the Central Electricity Generating Board and the United Kingdom Atomic Energy Authority.

Mr. Waldegrave: The nuclear establishments of the United Kingdom Atomic Energy Authority (UKAEA) and the Central Electricity Generating Board (CEGB) are required under the Radioactive Substances Act 1960 to seek authorisation from relevant Ministers for any discharge of radioactive wastes to atmosphere. As a condition of these authorisations the UKAEA and CEGB are required to monitor the discharges and their effects on the environment. These results are checked by the authorising Departments which also undertake independent monitoring. I am satisfied that the discharges continue to pose no threat to the public.

STOLport, Newham

Mr. Spearing asked the Secretary of State for the Environment if he will list his powers to require the costs of sound insulation, up to given standards, of domestic dwellings adjacent to the proposed STOLport in Newham, to be borne by persons or bodies other than their owners or occupiers.

Sir George Young: My right hon. Friend knows of no such statutory powers.

Stonehenge

Mr. Dubs asked the Secretary of State for the Environment if he will arrange to provide a site in the Stonehenge area for people wishing to celebrate the summer solstice.

Mr. Macfarlane: The Historic Buildings and Monuments Commission is responsible for managing the circle area of land occupied by the Stonehenge monument itself. My Department owns no other land in the Stonehenge area suitable for this purpose.

Waste Disposal

Mr. Tony Banks asked the Secretary of State for the Environment if he will place in the Library a copy of the report of Her Majesty's Hazardous Wastes Inspectorate regarding waste disposal facilities; and if he will make a statement.

Mr. Waldegrave: [*pursuant to his reply*, 6 June 1985]: I refer the hon. Member to the answer given by my right hon. Friend the Secretary of State to my hon. Friend the Member for Skipton and Ripon (Mr. Watson) on Wednesday 5 June 1985 at columns *166-67*.

FOREIGN AND COMMONWEALTH AFFAIRS

NATO

Mr. Michie asked the Secretary of State for Foreign and Commonwealth Affairs what is the cost to Britain of contributions to NATO's civil budget in each year since 1979; and whether he will provide the figures in the 1986 defence Estimates.

Mr. Luce: The total contributions by the United Kingdom to the NATO civil budget since 1979 are as follows:

	£ million
1979-80	5·810
1980-81	6·140
1981-82	6·476
1982-83	5·975
1983-84	7·306
1984-85	7·922

The total annual United Kingdom contribution is not published in the Defence Estimates. Contributions to the NATO civil budget by individual Government Departments are published already in the relevant Departments' annual estimates.

Nigeria

Mr. Pawsey asked the Secretary of State for Foreign and Commonwealth Affairs what advice Her Majesty's Government give to intending travellers to Nigeria regarding their personal safety in that country.

Mr. Rifkind: We are ready to give appropriate advice on personal safety to intending travellers to Nigeria depending on the nature of their visit and the areas to be visited. In general, we advise travellers to take all sensible precautions against, for example, armed robbery, muggings and petty theft, including handbag snatching; to leave valuables in a safe place; and, if they wish, to check on arrival with the British high commission in Lagos or the deputy high commission in Kaduna on any specific local problems. Our geographic department in the Foreign and Commonwealth Office is, of course, ready to give advice based on background knowledge of the country and the latest advice from the British high commission, Lagos.

Mr. Pawsey asked the Secretary of State for Foreign and Commonwealth Affairs what instructions are given to officials in his Department concerning the nature of the information they should make available to hon. Members seeking advice on behalf of constituents about current circumstances in Nigeria.

Mr. Rifkind: The instructions given to officials in the Foreign and Commonwealth Office are that they should give hon. Members advice on current circumstances in Nigeria based on the latest information on the subject received from the British high commission in Lagos. Though we endeavour to give hon. Members every assistance, our resources are limited and we cannot give detailed briefing at short notice covering all aspects of current circumstances in Nigeria.

British Subjects Overseas

Mr. Pawsey asked the Secretary of State for Foreign and Commonwealth Affairs what help is made available by Her Majesty's Government to British subjects on lawful business in overseas countries who encounter problems with the civil authorities in the country concerned.

Mr. Renton: The scale of assistance given can range from advice to diplomatic intervention, depending on the circumstances of each individual or joint case.

Decade of Women Conference (Nairobi)

Ms. Richardson asked the Secretary of State for Foreign and Commonwealth Affairs what is the name and

rank of the official who will be accompanying the delegation to Nairobi for the end of the decade of women conference.

Mr. Renton: In addition to Dame Anne Warburton DCVO, CMG, the United Kingdom permanent representative to the office of the United Nations at Geneva, who will be deputy leader of the delegation, the four officials in the delegation will be Mr. R. C. Fursland, first secretary, and Mr. R. W. Barnett and Mr. R. J. Wildash, second secretaries in Her Majesty's Diplomatic Service, and Mr. M. J. Gillespie, principal at the Home Office.

Jeddah (Impounded Equipment)

Mr. Greenway asked the Secretary of State for Foreign and Commonwealth Affairs whether any progress has yet been made on the recovery of the wall of death equipment belonging to Mr. Sergei Chityan of Ealing, currently impounded at the port of Jeddah.

Mr. Luce: I am glad to say that the Saudi port authorities have now agreed that Mr. Chityan's equipment may be released after payment of the necessary demurrage charges.

Discrimination Against Women Convention (Ratification)

Ms. Richardson asked the Secretary of State for Foreign and Commonwealth Affairs when he intends to ratify the United Nations convention on the elimination of all forms of discrimination against women.

Mr. Renton: As I told the hon. Member for Walthamstow (Mr. Deakins) on 10 May, at column *513*, we are still considering this convention in the light of our existing legislation and hope to be in a position to make an announcement about ratification soon.

Mr. Raoul Wallenberg

Mr. Sumberg asked the Secretary of State for Foreign and Commonwealth Affairs if he will list those countries that are known by his Department to have made representations to the Government of the Union of Soviet Socialist Republics about the case of Mr. Raoul Wallenberg; and if he will make a statement.

Mr. Rifkind: Mr. Wallenberg was a Swedish diplomat, and it is therefore the Swedish Government who have taken the lead in seeking clarification of the Soviet authorities as to the precise fate of their former representative in Hungary. We do not have a comprehensive list of other counries which have made representations about Mr. Wallenberg.

SCOTLAND

Fish Stocks (Bird Damage)

Mr. Kilroy-Silk asked the Secretary of State for Scotland what scientific studies have been completed or are in hand to assess the alleged damage done to salmon, trout and migratory trout stocks by *(a)* cormorants, *(b)* red breasted mergansers and *(c)* goosanders in Scottish lochs and rivers; and if he will publish any investigations into this subject that have been carried out by his officials.

Mr. John MacKay: The Department of Agriculture and Fisheries for Scotland published papers in 1962 and 1965 in the freshwater and salmon fisheries research series entitled respectively "The Goosander and Red-Breasted Merganser as Predators of Salmon in Scottish Waters" and "The Distribution and Food of the Cormorant in Scottish Waters." These publications assessed the effects of those species on Atlantic salmon and trout in Scotland. Scientific studies of the damage done to salmon, trout and migratory trout stocks by cormorants, red-breasted mergansers and goosanders in Scotland would be lengthy and expensive and no such research is in progress or planned.

Radioactivity

Mr. Adley asked the Secretary of State for Scotland if he will list the 20 areas in Scotland with the highest levels of naturally occurring radioactivity and the reasons why these levels occur in the areas concerned.

Mr. Ancram: The National Radiological Protection Board has measured in Scotland gamma radiation arising from rocks and soils in about 80 per cent. of the 10 kilometre grid squares of the national grid. Those showing the greatest values are listed as follows. The average value for Scotland is about 320 micrograys per year in air. Naturally occurring radioactivity in rocks arises because of the incorporation in them of radioactive elements when the rocks were formed.

The National Radiological Protection Board is measuring also the concentration in buildings of the radioactive gas, radon, which derives largely from the ground under the building. This work will be reported when it is complete.

Grid square	*Micrograys/ year*	*Location*	*Region*
NH 90	778	Glen More, near Aviemore	Highland
NO 39	739	Ballater	Grampian
NO 28	728	Balmoral Forest, near Braemar	Grampian
NT 82	713	Cheviot Hills, South of Kelso	Borders
NO 49	697	East of Aboyne	Grampian
ND 02	675	North of Helmsdale	Highland

NO 79	532	West of Banchory	Grampian

Aerial Spraying

Mr. Kennedy asked the Secretary of State for Scotland if he will list those areas within Scotland, England and Wales, respectively, for which the Forestry Commission has sought approval from the Department for the use of fenitrothion for the purposes of blanket aerial spraying during 1985; if he will detail the proposed time scale of the respective sprayings; and if he will make a statement.

Mr. John MacKay: The areas for which the commission sought approval and those for which limited clearance was granted under the pesticides safety precautions scheme are all in Scotland and are as follows:

Forest District	*Forest*	*Block*	*Approval sought (hectares)*	*Approval granted (hectares)*
Forestry commission				
Easter Ross	Torrachilty	Strathrannoch	238	238
		Garbat	707	707
Dornoch	Shin	North Daichork	2,080	2,080
		Inveroykel	481	481
	Naver	Truderscaig	*821	784
		Rossal	375	375
		Badenloch II	25	25
		Badenloch III	41	41
		Cnoc dubh	*12	—
	Rumster	Warten	31	31
			4,811	4,762

*One of the conditions of clearance is that a barrier zone of 250 metres is left betwen infested areas and nearby sites of special scientific interest (SSSI). This accounts for the difference betwen the areas for which approval was sought and the areas for which approval was granted.

Forest District	*Estate*	*Block*	*Approval sought (hectares)*	*Approval granted (hectares)*
Private woodlands				
Dornoch	Gordonbush	Pollie Hill	250	250

Forest District	Estate	Block	Approval sought (hectares)	Approval granted (hectares)
		Skinsdale	45	45
Easter Ross	Scatwell	Compartment 103 and part 104	156	156
	Strathbran	Caiseachan	*†145	120
			596	571

* One of the conditions of clearance is that a barrier zone of 250 metres is left between infested areas and nearby sites of special scientific interest (SSSI). This accounts for the difference betwen the areas for which approval was sought and the areas for which approval was granted.
† Approximate.

Spraying commenced on Wednesday 5 June 1985 with the emergence of the caterpillars and, depending on weather conditions, is expected to continue for about 10 to 14 days.

The spraying is being carried out on Lodgepole pine to control Pine beauty moth. Aerial spraying of fenitrothion is the most effective control so far available. Spraying operations will be carried out at ultra low volume under the supervision of the Forestry commission's entomology branch by helicopter using an electronic track guidance system and sophisticated spraying techniques.

ENERGY

Power Stations (Safety Reviews)

Mr. Proctor asked the Secretary of State for Energy if he is satisfied that Her Majesty's nuclear installations inspectorate has completed the assessment of the 20 year long-term safety reviews of Bradwell, Berkeley and Hunterston A power stations; and if he will make a statement.

Mr. Goodlad: I am advised by the Health and Safety Commission that consideration by Her Majesty's nuclear installations inspectorate of the licensees' 20-year safety reviews of Bradwell, Berkeley and Hunterston A is in progress.

Offshore Supply Ships (North Sea)

Mr. Dover asked the Secretary of State for Energy how many offshore supply ships are working in the United Kingdom sector of the North sea; and how many of these are Norwegian.

Mr. Buchanan-Smith: At 15 May 1985, 162 supply ships were working in the United Kingdom sector, of which 30 were Norwegian flag.

Mr. Dover asked the Secretary of State for Energy how many United Kingdom offshore supply ships are working in the Norwegian sector of the North sea; and what information he has as to the total number of supply ships in that area.

Mr. Buchanan-Smith: There were 60 supply ships working in the Norwegian sector at 15 May 1985. Two were British flagged.

Electricity Generation

Mr. Best asked the Secretary of State for Energy if he will state the amount of electricity generated in Wales by *(a)* coal-fired, *(b)* oil-fired, *(c)* nuclear, *(d)* hydro and *(e)* pumped storage power stations for each of the years 1979 to the last available figures, stating whether such figures relate to full calendar or financial years.

Mr. Goodlad: This is a matter for the Central Electricity Generating Board. I shall ask the chairman to write to my hon. Friend.

EMPLOYMENT

Youth Training Scheme

Mr. Andrew F. Bennett asked the Secretary of State for Employment how many trainees are on the youth training scheme; and what percentage this represents of the relevant age group.

Mr. Peter Morrison: At the end of April 1985 there were 259,500 young people on the youth training scheme, most of whom were aged 16 or 17. It is estimated that about 30 per cent. of all 16-year-olds and about 5 per cent. of all 17-year-olds in Great Britain were on the scheme.

Mercury

Mrs. Renée Short asked the Secretary of State for Employment what findings have been produced by Health and Safety Executive inspectors revealing contraventions of guidelines to employers who use mercury, in particular regarding the frequency of urine samples taken from workers.

Mr. Peter Bottomley: Information is not available in the form requested.

Nuclear Installation Inspectorate

Mr. Proctor asked the Secretary of State for Employment what information he has as to the numbers employed in the nuclear regulatory work force per reactor in terms of persons per unit in the United Kingdom, the United States of America, Canada, France, Japan, Sweden and the Federal Republic of Germany for the latest year for which figures are available; and if he will make a statement.

Mr. Peter Bottomley: There are 41 operational reactors in the United Kingdom on sites licensed by the nuclear installations inspectorate. There are at present some 150 staff in the inspectorate; other staff of the Health and Safety Executive also have responsibility for certain matters at nuclear sites. Comparable information on other countries is not available.

Mr. Proctor asked the Secretary of State for Employment if he is satisfied that the current level of staff of Her Majesty's nuclear installations inspectorate is adequate to enable the inspectorate to discharge its functions properly; and if he will make a statement.

Mr. Peter Bottomley: The nuclear installations inspectorate is adequately staffed.

Mr. Proctor asked the Secretary of State for Employment what plans he has to recruit further inspectors to Her Majesty's nuclear installations inspectorate; how many posts are currently vacant; how many applications for those posts have been received; how many offers of employment have been made; and if he will make a statement.

Mr. Peter Bottomley: Three posts out of the planned level of 102 for 1985-86 are currently vacant in the inspectorate. A recruitment campaign which it is hoped will at least fill these posts and replace likely retirements over the next 12 months is now in progress: 152 applications have been considered and 55 candidates interviewed. Offers of employment have not yet been made.

Mr. Proctor asked the Secretary of State for Employment what is the estimated manpower plan for Her Majesty's nuclear installations inspectorate as at 1 July; how many staff he expects to have in post at that date; whether this includes staff transferred from other parts of the Health and Safety Executive into the new policy unit; and if he will make a statement.

Mr. Peter Bottomley: There should be some 160 staff in post in the nucler installation inspectorate on 1 July. This includes staff transferred from other parts of the inspectorate and elsewhere in the Health and Safety Executive to form the London-based policy branch. There are three vacant inspector posts which should be filled later in the year.

Mr. Proctor asked the Secretary of State for Employment how many jobs will be created in Bootle for local employeres as a result of the dispersal of Her Majesty's nuclear installations inspectorate; and what is the estimated demand for labour from amongst the relatives of Her Majesty's nuclear installations inspectorate inspectors on their dispersal.

Mr. Peter Bottomley: It is expected that there will be some 15 clerical and typing vacancies to be filled by local recruitment on Merseyside when the nuclear installations inspectorate disperses to Merseyside. It is not possible to assess the other effects on the local labour market, such as demand for jobs from relatives of inspectors.

Mr. Proctor asked the Secretary of State for Employment, pursuant to his reply of 8 May, *Official Report*, column *434*, what steps he is taking to ensure that there will be no fall in standards consequent upon the move of Her Majesty's nuclear installations inspectorate to Bootle; and if he will make a statement.

Mr. Peter Bottomley: The Health and Safety Commission is determined to ensure that there will be no fall in standards resulting from Her Majesty's nuclear installations inspectorate's move to Bootle.

The Health and Safety Executive is taking steps to minimise disruption when the nuclear installations inspectorate is dispersed. Action already taken or in progress includes:

personnel management initiatives aimed at identifying and solving the problems faced by individuals;
improving communications facilities between HSE's London and Bootle offices;
formation of the inspectorate's policy branch which will remain in London;
deferment for one year of dispersal of the inspectorate's branch dealing with Sizewell;
continuing the drive to recruit more inspectors.

Health and Safety Executive Staff (Dispersal)

Mr. Proctor asked the Secretary of State for Employment pursuant to his answer of 8 May, *Official Report*, column *433*, why it is not possible to estimate the total costs of dispersal of the Health and Safety Executive staff to Merseyside, nor to estimate separately that of Her Majesty's nuclear installations inspectorate; and if he will make a statement.

Mr. Peter Bottomley: Figures for many dispersal-related costs—for example, accommodation, travel and subsistence, recruitment, staff training, post and telecommunications — would involve making assumptions, for which there could be no proper basis, about what these costs would have been if all Health and Safety Executive headquarters staff had stayed in London.

Employment (Accident Statistics)

Mr. Dobson asked the Secretary of State for Employment if he will list the numbers killed or injured in each standard category of employment at their place of work in each year since 1979.

Mr. Peter Bottomley [*pursuant to his reply*, 6 June 1985]: The available information is given in the following three tables.

TABLE 1

Fatal Injuries Arising at Work to Employees Reported to Enforcing Authorities

* 1983 data for over 3 day injuries are not available as a result of changes to the industrial injury benefit scheme.

† 1979-80—restricted to injuries reported to enforcing authorities under the then existing legislation. The total number of spells of certified incapacity for work resulting in industrial injury benefit claims, for 1 June 1978 to 31 May 1979, and for 1 June 1979 to 31 May 1980 were 581,000 and 509,000 respectively (estimated) some road accidents are included in these figures, which are excluded from later years' figures.

‡ 1981-82—claims for industrial injury benefit, notified to HSE by DHSS under the requirements of the Notification of Accidents and Dangerous Occurrences Regulations (NADOR).

‖ Mainly local authorities for which an industrial breakdown is not readily available.

¶ Not available

HOME DEPARTMENT

Stonehenge

Mr. Dubs asked the Secretary of State for the Home Department if he will call for reports from the chief constables of Wiltshire and Hampshire about recent police actions in the Stonehenge area.

Mr. Giles Shaw: My right hon. and learned Friend has been kept fully informed by the police about these matters.

Mr. Dubs asked the Secretary of State for the Home Department if he will establish an inquiry to investigate whether recent police action in the Stonehenge area was taken in accordance with the guidelines of the Association of Chief Police Officers.

Mr. Giles Shaw: No. The operational deployment of his officers in such circumstances is a matter for each individual chief officer of police.

Sri Lankan Tamils

Mr. Corbyn asked the Secretary of State for the Home Department if he will make a statement on the declaration by Amnesty International of 24 May, a copy of which has been sent to him, concerning the return of Tamils to Sri Lanka.

Mr. Waddington: My right hon. and learned Friend has noted the statement of Amnesty International's position on this issue, but has nothing to add to his statements of 20 May, at column 27, and of 29 May.

Mr. Corbyn asked the Secretary of State for the Home Department (1) what evidence was available to him before he made his statement to the House on 3 June about the incidence of the risk of persecution of Tamils in Sri Lanka and about the geographical distribution of that risk; and if he will make a statement;

(2) pursuant to his answer of 20 May, *Official Report*, column *273*, on what factors he based his assessment that there is no reason to believe that Tamils returning to Sri Lanka face persecution.

Mr. Waddington: Our assessment of the risk to Tamils of persecution in Sri Lanka was based primarily on regular reports from our high commission at Colombo.

Mr. Corbyn asked the Secretary of State for the Home Department on what basis he chose 20 May as the reference date for his change of policy towards the entry to the United Kingdom of Sri Lanka Tamils.

Mr. Waddington: My right hon. and learned Friend had been planning for some time to make a statement about his policy towards Sri Lankan Tamils. The sharp increase in the number of Tamils arriving in the first part of May made it desirable to make a statement as soon as possible that month.

Drugs (Benzodiazepine Group)

Mr. Wareing asked the Secretary of State for the Home Department what are the criteria used as a basis for the scheduling of drugs in the benzodiazepine group; and if he will make a statement.

Mr. Mellor: Drugs are added to the list of controlled drugs in schedule 2 to the Misuse of drugs Act 1971:

(a) if they are being or appear to be likely to be misused in such a way as to have or be capable of having harmful effects sufficient to constitute a social problem; or

(b) in pursuance of any treaty, convention, or other agreement or arrangement to which the United Kingdom is a party.

No amendment to the list of controlled drugs can be proposed without prior consultation with the Advisory Council on the Misuse of Drugs.

The council considered in 1980-81 whether control of benzodiazepines under the Misuse of Drugs Act was justified, and declined to make any recommendation. However in February 1984, 33 benzodiazepines were added to schedule 4 of the United Nations convention on psychotropic substances 1971. The Government intend to ratify that convention and we will shortly be considering, following consultation with interested bodies and with the Advisory Council on the Misuse of Drugs, how those drugs should be scheduled under the misuse of drugs legislation to enable us to meet our future convention obligations.

Civil Defence

Mr. Neil Thorne asked the Secretary of State for the Home Department what further guidance is being provided to help local authorities carry out their functions under the 1983 civil defence regulations; and if he will make a statement.

Mr. Brittan: We have now issued the new consolidated "Emergency Planning Guidance to Local Authorities." This updates, expands and replaces emergency services (ES) circulars issued by the Home Office to local authorities before 1985. Similar revised and updated guidance has been issued to the police and fire services. This guidance is supplemented by a technical handbook "Communal Shelters," designed to assist local authorities in identifying buildings and other structures suitable for use as civil defence shelters for the public. The report of the Home Office working party on standardisation of training of civil defence volunteers has also been sent to local authorities for their guidance.

My right hon. Friend the Secretary of State for Scotland has issued equivalent emergency planning guidance to Scottish authorities.

We have also published a revised edition of the information booklet "UKWMO" describing the workings of the United Kingdom warning and monitoring organisation; and the report of the Home Office working party on the scientific basis for the development of guidance and operational procedure for living under fallout conditions.

My right hon. Friend the Minister of Agriculture, Fisheries and Food has today published "Civil Defence and the Farmer" and my right hon. Friends the Secretaries of State for Health and Social Security and for Scotland are seeking comments from health authorities and health boards and other interests on a draft document on civil defence planning in the Health Service.

Copies of all these publications have been placed in the Library.

Coal Industry Dispute

Mr. Cohen asked the Secretary of State for the Home Department whether any information relating to striking miners was passed from the police to the National Coal Board.

Mr. Giles Shaw [*pursuant to his reply*, 3 April 1985, c. *598*]: I understand from the chief constables concerned in England and Wales that no personal information about striking miners was passed to the National Coal Board by the police. However, certain information relating to offences committed in connection with the dispute was given to the board in cases where the board was the complainant. This information was limited to that normally disclosed to complainants, that is, whether the offence had been detected and, if so, the number of persons involved.

SOCIAL SERVICES

Fertility Clinics

Dr. Roger Thomas asked the Secretary of State for Social Services if he will take steps to fund fertility clinics on the National Health Service.

Mr. Kenneth Clarke: Infertility treatment is available in the National Health Service as part of consultant gynaecological services. It is for individual health authorities to decide the level and kind of provision in the light of local needs.

Population Statistics

Mr. Janner asked the Secretary of State for Social Services, pursuant to his reply of 15 May, *Official Report*, column *162*, of his latest estimate of the numbers of single men and women, how many and what percentage of the men and of the women, respectively, are widowers and widows; and how many and what percentage of those who are and who are not widows and widowers, respectively, he estimates are single-parent families or otherwise have the care of children.

Mr. John Patten: My reply on 15 May to the hon. member referred only to those single persons who had never been married and therefore the information requested in his current question is not available. However, the information given in the table may be of interest.

Estimated resident population aged 16 and over in the United Kingdom: 30 June 1983

Marital Status	*Numbers*
Males	21,230,000
Single (Never married)	6,170,000
Married	13,530,000
Divorced	770,000
Widowed	760,000
Females	23,070,000
Single (Never married)	5,090,000
Married	13,630,000
Divorced	1,050,000
Widowed	3,300,000

St. Nicholas Hospital, Plumstead

Mr. Cartwright asked the Secretary of State for Social Services what steps he has taken or plans to take to resolve the disagreement between the Greenwich and Bexley health authorities over the use of any financial savings resulting from the proposed closure of St. Nicholas hospital, Plumstead.

Mr. Kenneth Clarke: This is a matter for the South-East Thames regional health authority.

Leukaemia

Mr. Adley asked the Secretary of State for Social Services, pursuant to his answer to the hon. Member for Isle of Wight (Mr. Ross) on 30 January, *Official Report*, column *224*, if he will indicate the relationship between the age profile of any given locality and the incidence of leukaemia therein.

Mr. Kenneth Clarke: My reply to the hon. Member for Isle of Wight (Mr. Ross) on 30 January set out the age and sex specific registration rates per 100,000 population in England and Wales 1980. These rates show marked variation over the complete age range with very high rates in the elderly, slightly higher rates in children than in young adults, and higher rates for males than females.

The national scheme of cancer registration aims to record each new cancer occurring in the population. If the data from the scheme were completely accurate, the registration statistics would exactly represent the incidence of cancer in the population.

Stillbirths (Research)

Mrs. Renée Short asked the Secretary of State for Social Services if he will make resources available to medical schools which wish to conduct research into the correlation between the numbers of women working in the leather industry and the incidence of stillbirths and births of children with deformities.

Mr. John Patten: Medical schools are allocated funds for teaching and research on the advice of the University Grants Committee which is the responsibility of my right hon. Friend the Secretary of State for Education and Science.

We in this Department have received no approach from any medical school wishing to conduct this kind of research. Applications for financial support from individual researchers will always receive the most careful consideration.

Housing Benefit

Mr. Gordon Brown asked the Secretary of State for Social Services if he will update the table of estimated gains and losses in paragraph 3.32 of the housing benefit review report (Cmnd. 9520), to take account of his proposals for a capital cut-off for housing benefit claims, for claimants to pay 20 per cent. of rates costs, and for £500 million in savings; and if he will similarly update the figures in paragraph 3.31 for the number who will lose rates and rent help altogether.

Mr. Newton: The Green Paper seeks comments on the proposed new structure of social security. Until that is settled it would not be sensible to attempt to provide a detailed analysis of the impact of the changes. That must await decision about the benefit rates to be adopted in April 1987.

Mr. Gordon Brown asked the Secretary of State for Social Services (1) what is the assumed income support level announced in his Green Paper, from which a 70 per cent. taper would achieve his projected savings in housing benefit of £500 million;

(2) what assumptions he made in calculating the projected savings in housing benefit of £500 million of the numbers of people in 1985-86 who will *(a)* receive less in housing benefit and *(b)* lose housing benefit help altogether.

Mr. Newton: The figure of £500 million gives a broad indication of the likely reduction in expenditure on housing benefit following the structural reform proposed in the Green Paper. Until that structure is finalised and the benefit rates and tapers to be adopted in April 1987 are decided, any analysis of the type requested would not be sensible.

Mr. Gordon Brown asked the Secretary of State for Social Services whether his figure of £500 million in savings from housing benefit under his new proposals announced in the Green Paper on the welfare state includes savings from the possible introduction of a requirement for households to pay 20 per cent. of their rates bills.

Mr. Newton: Yes.

Benefits

Mr. Gordon Brown asked the Secretary of State for Social Services (1) which of the new benefits mentioned in his Green Paper on the welfare state will rise in line with inflation;

(2) what is the combined rate of income support and personal allowance under his Green Paper proposals that would be required in 1985-86 to compensate a single pensioner who lost *(a)* heating addition, *(b)* clothing and dietary addition and *(c)* the average single payment, assuming additional resources to cover 20 per cent. of rates bills;

(3) what is the combined rate of income support and personal allowance that would be required in 1985-86 to compensate an unemployed person who loses *(a)* heating

addition, *(b)* clothing and dietary addition and *(c)* the average single payment, assuming additional resources to cover 20 per cent. of rates bills;

(4) what is the combined rate of income support, personal allowance and family premium that would be required in 1985-86 to compensate *(a)* a single parent and *(b)* a married couple who lose (i) heating addition, (ii) clothing and dietary addition and (iii) the average single payment, assuming additional resources to cover 20 per cent. of rates bills.

Mr. Newton: I shall let the hon. Member have replies as soon as possible.

Mr. Gordon Brown asked the Secretary of State for Social Services what is his proposed level of income support and personal allowance at 1986-87 benefit rates for *(a)* pensioners, *(b)*sick and disabled, *(c)* families and *(d)* unemployed persons (i) under 25 years and (ii) over 25 years.

Mr. Newton: Decisions have not yet been taken about the rates of benefit to be adopted when the structural reforms to social security proposed in the Green Paper are implemented.

Mr. Gordon Brown asked the Secretary of State for Social Services if his proposals in the Green Paper on the welfare state assume any savings in the budget presently allocated to supplementary benefits; and if he will list the figures involved if the changes were implemented in *(a)* 1985-86 and *(b)* 1987-88.

Mr. Newton: The proposed changes in the main structure of supplementary benefit are not intended to reduce the overall level of help provided.

NHS (Expenditure)

Mr. Meacher asked the Secretary of State for Social Services what has been the level of expenditure on the National Health Service each year since 1955; what has been the real increase each year in terms of *(a)* the retail price index and *(b)* National Health Service pay and prices; and what was the level of National Health Service expenditure each year as a percentage of gross national product.

Mr. Kenneth Clarke [*pursuant to his reply*, 3 June 1985, c. *108*]: The table sets out total gross expenditure (current and capital) on the National Health Service in England for each year since 1971-72. Comparable expenditure figures are not available for earlier years. Percentage changes in real terms are measured by the gross domestic product deflator. As the hon. Member has specifically requested figures deflated by the retail price index, and by National Health Service pay and prices, these are also given, but we do not accept that either of these sets of figures is a sensible measure of real increases in expenditure.

	England gross expenditure (£ million cash)	*Percentage increase in real terms (GDP deflator)*	*Percentage increase deflated by the Retail Price Index*	*Percentage increase deflated by movements in NHS pay and prices*
1971-72	2,000	+3·6	+3·6	+3·6
1972-73	2,281	+5·6	+6·5	+5·1
1973-74	2,592	+5·9	+2·8	+3·5
1974-75	3,426	+10·6	+12·2	+1·2
1975-76	4,511	+5·0	+5·7	+2·6
1976-77	5,149	+0·7	−1·0	+1·1
1977-78	5,689	−2·8	−3·0	+0·9
1978-79	6,455	+2·5	+4·7	+2·3
1979-80	7,712	+2·3	+3·2	−0·1
1980-81	9,917	+8·4	+10·6	+1·2
1981-82	11,158	+2·3	+0·9	+3·3
1982-83	12,134	+1·9	+1·6	+1·2
1983-84	12,917	+2·0	+1·7	+1·4
1984-85	13,847	+2·6	+2·1	+1·1

The amount of a country's resources spent on health is conventionally measured in terms of its gross domestic product. Gross United Kingdom expenditure on the National Health Service as a proportion of United Kingdom GDP in the equivalent calendar year for which figures are available is as follows

	Per cent.
1971	4·1
1972	4·3
1973	4·2
1974	4·8
1975	5·1
1976	5·1
1977	4·9
1978	4·8
1979	4·8
1980	5·3
1981	5·5
1982	5·4
1983	5·6

None of these figures measures the level of service delivered to patients. Recent increases in efficiency have added considerably to the resources available for health care. For example, health authorities put forward cost improvement programmes totalling £100 million in 1984-85 and further programmes amounting to about £150 million are planned for 1985-86.

Undernourishment

Mr. Dobson asked the Secretary of State for Social Services how many people are undernourished in England.

Mr. John Patten [*pursuant to his reply*, 6 June 1985]: Undernutrition is uncommon in England. It has been identified among the elderly, where is occurs almost exclusively in association with medical problems or conditions such as depression following bereavement, and among some immigrant groups.

AGRICULTURE, FISHERIES AND FOOD

Atlantic Salmon

Mr. Onslow asked the Minister of Agriculture, Fisheries and Food what discussions he has had with the Canadian authorities following the announcement of a ban on commercial fishing for Atlantic salmon in Canadian waters; and what consideration he is now giving to applying similar conservation measures to United Kingdom coastal fisheries.

Mr. MacGregor: The Canadian Minister of Fisheries an Oceans had discussions with senior officials on 13 May, in the absence of my right hon. Friend and myself in Brussels at an Agriculture Council meeting. These touched on salmon conservatin matters of mutual interest. I am not aware of any announcement of a ban on commercial fishing for Atlantic salmon in Canadian waters. I understand that the Canadian Government introduced greater restrictions on commerical fishing for salmon (including shorter seasons) in 1984 and the Canadian Minister recently announced that he is extending these to all the Maritime Provinces in 1985.

Fishing for Atlantic salmon in United Kingdom coastal waters is already subject to close restrictions and these are kept under review in the light of developments.

EC (Financial Guideline)

Mr. Deakins asked the Minister of Agriculture, Fisheries and Food how the European Economic Community financial guideline which applies to calendar years takes account of agricultural expenditure in agricultural marketing years; what mechanisms exist to apportion planned agricultural expenditure into calendar years; and if he will make a statement.

Mr. MacGregor: The financial guideline relates to expenditure under the Community budget, which operates on a calendar year basis. In drawing up its estimates of agricultural expenditure on this basis, the Commission takes account of many factors including the anticipated rate of payments, seasonal factors and the date on which the marketing year begins fo each commodity.

Dioxin

Dr. Roger Thomas asked the Minister of Agriculture, Fisheries and Food what is the concentration of dioxin in 2,4,5-T and related compounds which is accepted as safe for general use in the United Kingdom.

Mrs. Fenner: The current maximum permitted level of dioxin in 2,4,5-T is 0·01 mg/Kg. This is one part per 100 million, and is the minimum level determinable by current analytical techniques.

Dr. Roger Thomas asked the Minister of Agriculture, Fisheries and Food if he will list the proprietary preparations of 2,4,5-T and allied compounds in the United Kingdom which have *(a)* restricted use, and *(b)* unrestricted use.

Mrs. Fenner: Under the pesticides safety precautions scheme, all pesticides cleared for use in the United Kingdom have some restrictions placed on their use. The degree of restriction varies according to the toxicity of the formulated product. For example, dilute, less toxic products formulated for domestic use do not require the same safety precautions to be observed when handling the material as do the more concentrated products formulated for professional use.

The proprietary products listed are those containing 2,4,5-T which are cleared for use in the United Kingdom.

Ban-Dock
BH 2,4,5-T 500
Brushwood Emulsion
Econal
Farmon Brushwood Killer
Kilnet
Marks Brushwood Killer
Nettleban
Silvapron-T
Spontox
Synchemical New SBK Brushwood Killer
Synchemical Weed & Brush Killer
Trioxone 50
Unicrop Brushwood Killer
Unicrop Super Brushwood Killer
Vigon 5T

Aerial Spraying

Mr. Kennedy asked the Minister of Agriculture, Fisheries and Food (1) to what extent, in granting any recent approvals for use by the Forestry Commission of fenitrothion for blanket aerial spraying, his Department took account of the evidence available to the joint meeting on pesticides residues of the World Health Organisation concerning the veracity of tests conducted into the matter by Industrial Biotests of Chicago;

(2) if he will list the categories under which approval has been granted by his Department to the Forestry Commission for the use of fenitrothion for the purposes of blanket aerial spraying; if he will indicate the reasoning for the specific choice of category in each case; and if he will make a statement;

(3) what evidence is available to his Department concerning international research, particularly Canadian, into the suitability of fenitrothion for use in blanket aerial spraying; and if he will make a statement;

(4) what information he has as to which countries have banned the use of fenitrothion for the purposes of blanket aerial spraying and as to the reasons for such laws;

(5) on what basis his Department granted approval for use by the Forestry Commission of fenitrothion for the purposes of blanket aerial spraying.

Mrs. Fenner: I shall reply to the hon. Member as soon as possible.

Written Answers to Questions

Monday 10 June 1985

AGRICULTURE, FISHERIES AND FOOD

Local Government (Consultation)

Dr. Cunningham asked the Minister of Agriculture, Fisheries and Food if he is planning to make any changes to the way in which he consults local government following the judgment in R. *v.* Secretary of State for Social Services: ex parte AMA.

Mr. Jopling: The written judgment is not available and we would need to consider it thoroughly before commenting.

Agricultural Development and Advisory Service

Mr. Onslow asked the Minister of Agriculture, Fisheries and Food what proportion of the work of the Agricultural Development Advisory Service is currently devoted to *(a)* veterinary services, *(b)* agricultural advice and *(c)* scientific research; and what are the respective annual costs of each of these activities.

Mr. MacGregor: In 1984 the state veterinary service accounted for 31 per cent. of total ADAS manpower at an estimated cost of some £40 millions. Total resources provided by ADAS (including inputs from the state veterinary service) for agricultural advice were 30 per cent. of total manpower at an estimated cost of £39 millions and for research and development were 34 per cent. of total manpower at an estimated cost of £41 millions.

Food Labelling

Mr. Shersby asked the Minister of Agriculture, Fisheries and Food what consultations have taken place between him and the European Community Commission on the proposal for mandatory fat labelling; what consideration has been given by him and by the Commission to the labeiling of imported food when such labelling comes into force; and if he will make a statement.

Mrs. Fenner: A copy of the statement of my right hon. Friend of 12 March—at column *29*—was sent to the European Community Commission. Subsequently there have been informal discussions between my officials and Commission officials in Brussels. Since the present proposals would cover food imported from other Member States, this issue has been discussed but no final decisions have yet been made.

Mr. Wareing asked the Minister of Agriculture, Fisheries and Food what plans he has to introduce a system of food labelling for the purpose of providing a guide for diabetics; and if he will make a statement.

Mrs. Fenner: The Food Labelling Regulations 1984 already provide special conditions for the labelling of foods that are claimed as suitable for or specially made for diabetics. I have no plans to introduce a system of food labelling designed to provide a guide for diabetics on foods intended for the general population. But developments on the voluntary nutrition labelling of food are likely to be helpful.

Surplus Foodstuffs

Mr. Teddy Taylor asked the Minister of Agriculture, Fisheries and Food what is the total square footage of warehouse or other storage facilities which has been commissioned by the intervention board for the storage of food surpluses; and what was the comparable amount of storage space commissioned or financed in each of the previous three years.

Mr. MacGregor: I regret that this information is not available since storage is measured by the quantities of stocks as given in my answer earlier today, and not by the square foot.

Mr. Teddy Taylor asked the Minister of Agriculture, Fisheries and Food what is the total sum which has been expended by the intervention board for the provision of storage accommodation and related facilities for the housing of food surpluses in the most recent annual period for which figures are available; and what were the comparable totals in each of the previous three years.

Mr. MacGregor: Storage, handling and related costs were as follows:

	£ million
1980-81	14·1
1981-82	15·5
1982-83	25·9
1983-84	48·6

Mr. Teddy Taylor asked the Minister of Agriculture, Fisheries and Food what is the total amount of cereals and other surplus foodstuffs, respectively, which are stored in public and private stores, respectively, on the most recent date for which figures are available; and what were the comparable totals in each of the previous three years.

Mr. MacGregor: Cereal and other intervention stocks on 31 May of each year were as follows:

million tonnes

Year	*Cereals*	*Other*
1982	0·2	0·1
1983	0·9	0·2
1984	0·2	0·3
1985	4·2	0·3

On 31 May of this year 0·4 million tonnes of cereals were held in Government-owned stores. Corresponding figures for previous years are not available and would be disproportionately costly to obtain. Other commodities are stored exclusively on commercial premises.

Mr. Teddy Taylor asked the Minister of Agriculture, Fisheries and Food what is the total sum which has been expended by the intervention board in providing subsidies for the export of surplus foodstuffs to non-European Economic Community countries in the most recent annual period for which figures are available; and what amount of this total is recoverable from Common Market funds.

Mr. MacGregor: Net expenditure on refunds on exports of foodstuffs to third countries, including monetary compensatory amounts, in 1983-84 was £360 million, all of which was prefunded by the EAGGF.

Milk Quotas

Mrs. Kellett-Bowman asked the Minister of Agriculture, Fisheries and Food how much quota has now been surrendered under the milk outgoers' scheme; and if he will make a statement.

Mr. MacGregor [*pursuant to his reply*, 16 May 1985, c. *202*]: At 7 June, some 265 million litres of quota had been bought in under the outgoers scheme. Although we have now achieved the two principal objectives of the scheme — to help small producers (those with under 200,000 litres) and to make exceptional hardship awards in full for 1985-86 — we have not yet achieved our overall target of 289 million litres of outgoers' quota for England and Wales. We have decided therefore that the scheme should be re-opened to enable our target to be reached.

The scheme will also now be open to producers who were not themselves in milk production on 2 April 1984 but who have subsequently purchased land with quota and who do not wish to produce milk.

NATIONAL FINANCE

Member's Correspondence

Mr. Ashdown asked the Chancellor of the Exchequer if he will publish in the *Official Report* the text of the letter dated 20 May from the Financial Secretary to the Treasury to the hon. Member for Yeovil.

Mr. Moore: No; but I am quite happy to place copies of the letter in the Library of the House, and this has been done.

PAYE

Mr. Lester asked the Chancellor of the Exchequer if he has any plans to put the pay-as-you-earn system on to a non-cumulative basis and subsequently to put national insurance contributions and pay-as-you-earn calculations into the same joint deduction tables.

Mr. Moore: The Green Paper on reform of personal taxation, to be published later this year, will discuss a range of possible developments including non-cumulation for PAYE and closer integration between the tax and social security systems.

EC (Grants)

Mr. Teddy Taylor asked the Chancellor of the Exchequer what was the total sum received from the European Economic Community in grants or other payments in the most recent year for which figures are available; and how much of this total was in respect of payments made to compensate for subsidies expended by the intervention board for the export of food to non-European Economic Community countries.

Mr. Ian Stewart: The most recent outturn for United Kingdom receipts from the European Economic Community in the calendar year 1984 was £2570 million. This figure includes £528 million for the United Kingdom's agreed refunds. The latest available information is that payments to the Intervention Board for export refunds on agricultural products exported to non-EEC countries during 1984 totalled 666 mecu, or about £390 million when converted at the average ecu/sterling exchange rate for 1984.

Financial Management Unit

Mrs. Virginia Bottomley asked the Chancellor of the Exchequer if he will make available the final reports of the financial management unit.

Mr. Peter Rees: Yes. Copies of three reports, Policy Work and the Financial Managment Initiative, Resource allocation in Departments — Role of the Principal Finance Officer, and Top Management Systems Second Report, are being placed in the Libraries of both Houses. They are useful background documents for Members and others who have an interest in Civil Service management matters, and a number of copies can be made available on request.

The Government share the approach to policy management which is described in the report on policy work and the financial management initiative and will be considering further how best to take advantage of the useful ideas which are discussed in that report.

Value Added Tax

Mr. Heddle asked the Chancellor of the Exchequer what are the administrative costs in percentage terms of collecting value added tax on business of an annual turnover of *(a)* £25,000 and *(b)* £27,500.

Mr. Hayhoe: I refer my hon. Friend to my answer to his previous question on 24 May at column *561*.

ENERGY

Acid Deposition

Mr. Ron Davies asked the Secretary of State for Energy what plans his Department has to consult non-governmental organisations with expertise in nature conservation and environmental protection about the effects of acid deposition and the environmental responsibilities of the Central Electricity Generating Board.

Mr. Goodlad: Policy responsibility for nature conservation and environmental protection rests with my right hon. Friend the Secretary of State for the Environment.

Kleinwort, Benson (Sale of British Gas)

Mr. Gould asked the Secretary of State for Energy if Kleinwort Benson, in its rôle as merchant bankers advising the Government on the sale of British Gas, will be permitted to allow its employees to deal in the shares.

Mr. Buchanan-Smith: N M Rothschilds & Sons Limited, which has been appointed as the Government's merchant bank adviser on the sale of British Gas, has already decided not to allow its employees to apply for British Gas shares.

North Sea (Supply Ships)

Dr. David Clark asked the Secretary of State for Energy how many Norwegian supply ships are operating in the United Kingdom sector of the North sea oil and gas fields; and how many United Kingdom vessels are operating in the Norwegian sector.

Mr. Buchanan-Smith: At the 15 May 1985, there were 30 Norwegian flag vessels on charter in the United Kingdom sector. Two British-flagged supply vessels were operating in the Norwegian sector.

Plutonium

Mr. D. E. Thomas asked the Secretary of State for Energy why it would not be in the national interest to disclose the total amount of plutonium, by isotopic composition, produced in all British magnox reactors owned by the Central Electricity Generating Board and the South of Scotland Electricity Board since they were commissioned; and what advantage could be gained by other countries if this information were published.

Mr. Goodlad: I refer the hon. Member to the answer at columns *545-46* I gave on 25 January 1985, table 1, footnote (g).

Mr. D. E. Thomas asked the Secretary of State for Energy if he will reconcile the answers given on 2 December 1982, *Official Report*, columns *244-45*, and 1 April 1985, *Official Report*, column *465*, on the provision of plutonium production figures from civil reactors to the relevant safeguards authorities.

Mr. Goodlad: The amount of plutonium produced by a nuclear reactor in a particular period is not represented by the amount transferred from the reactor in that period. Some of the plutonium which is produced is retained within the reactor and in storage facilities at the power station. The figures which are reported to Euratom concern transfers and holdings.

As I said in my reply of 1 April, the tripartite (United Kingdom /Euratom/IAEA) safeguards agreement does not require CEGB plutonium production figures to be reported.

Civil Nuclear Materials (Safeguards)

Mr. D. E. Thomas asked the Secretary of State for Energy if he will list the occasions when international nuclear safeguards inspectors have been denied access to British nuclear facilities when attempting to apply physical inspection safeguards to civil nuclear materials.

Mr. Goodlad: International nuclear safeguards inspectors have never been denied access to British nuclear facilities in the course of their visits to carry out safeguards inspections. They have been informed that access to certain areas within some facilities cannot be permitted on a regular basis for national security reasons.

ATTORNEY-GENERAL

HMS Conqueror (Officer's Diary)

Mr. Bowen Wells asked the Attorney-General if the investigation of possible offences in respect of a diary kept by an officer of HMS Conqueror has been completed; and if he will make a statement.

The Attorney-General: I refer to the answer which my right hon. Friend the Secretary of State for Defence gave the hon. Member for Carrick, Cumnock and Doon Valley (Mr. Foulkes) on 30 November. The Metropolitan police have submitted their report on this matter to the Director of Public Prosecutions, who has concluded that it is not possible for him to institute proceedings against any person on the evidence now available. It is also his view that there is insufficient prospect that further investigations would enable him to come to a different conclusion for it to be in the public interest for him to ask the police to pursue their inquiries any further. I agree with him in all respects.

Mr. John Tate

Mr. Dickens asked the Attorney-General if he will now prosecute Mr. John Tate for sexual offences with his step-daughter Tania, then aged under 12 years, between 1976 and 1978.

The Attorney-General: In November 1978 a report concerning such allegations but relating to incidents alleged to have occurred in about 1974 was submitted by the Devon and Cornwall constabulary to the Director of Public Prosecutions, who advised that proceedings should not be instituted. I am satisfied that that decision was correct.

International Find a Child Organisation

Mr. Dickens asked the Attorney-General if he will request the Charity Commissioners to institute an inquiry under section 6 of the Charities Act 1960 into the affairs of the International Find a Child Organisation registered in January; and if he will make a statement.

The Attorney-General: I understand that the Charity Commissioners are already conducting their own inquiries into this matter. I have asked them to inform me of their conclusions and I will write to my hon. Friend when I have received their report.

Criminal Prosecutions

Mr. John Morris asked the Attorney-General how many criminal prosecutions have been initiated by the Director of Public Prosecutions in each of the last five years for which figures are available.

The Attorney-General: The Director of Public Prosecutions rarely exercises his power to institute criminal proceedings, and separate statistics are not collated for such cases. Where the DPP decides to assume responsibility for a prosecution, this is normally done after proceedings have been instituted by the police—whether on their own initiative or acting on advice from the director.

The following table sets out for each of the last five years the number of cases concluded in which the DPP assumed responsibility for the prosecution, together with the number of defendants and counts/charges preferred.

Year	Cases	Persons Prosecuted	Counts/ Charges
1980	1,340	3,944	6,909
1981	1,224	4,130	7,102
1982	1,307	3,631	6,398
1983	1,064	3,157	5,001
1984	999	2,676	3,740

OVERSEAS DEVELOPMENT

Gibraltar

42. **Mr. Harvey** asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the recent visit to Gibraltar by the Minister for Overseas Development.

Mr. Raison: During my visit from 14-16 May 1985, I had discussions with the Governor, Gibraltar Ministers and members of the Opposition, the chamber of commerce and other Gibraltarians. I saw development projects which we are supporting. I was given an account of the Government of Gibraltar's future development plans and a preliminary assessment of the effect on the economy of restoring direct communications with Spain.

Mr. McQuarrie asked the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to provide further financial aid to the dependent territory of Gibraltar for the development of tourism; and if he will make a statement.

Mr. Raison: The bulk of our present development aid grant of £13 million is being spent on infrastructural projects which assist the tourist industry. Within the remaining uncommitted balance of £521,000, further requests for assistance for the development of tourism will be sympathetically considered.

Ethiopia

45. **Mr. Parry** asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement on the distribution of aid in Ethiopia.

Mr. Raison: A serious shortage of road transport continues to hamper the distribution of relief supplies in Ethiopia. The United Nations Co-ordinator recently estimated that only about 36 per cent. of the monthly food requirement was being distributed. In the northern provinces the continuing hostilities and the difficult terrain add to the problems. I have announced in reply to earlier questions an extension of the RAF airlift in Ethiopia to 30 September, £750,000 for land transportation, and a readiness to provide an additional 10,000 tonnes bilateral food aid.

Nicaragua

47. **Dame Judith Hart** asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on British aid to Nicaragua.

Mr. Raison: British aid to Nicaragua consists of a small number of scholarships in the United Kingdom; support for small development projects co-financed with British voluntary agencies; and assistance to Nicaraguan refugees and displaced persons through appeals by the United Nations High Commissioner for Refugees and the International Committee of the Red Cross.

UN International Fund for Agricultural Development

49. **Mr. Stuart Holland** asked the Secretary of State for Foreign and Commonwealth Affairs what measures he is now taking to extend the work of the United Nations International Fund for Agricultural Development.

Mr. Raison: We have made clear that we are prepared to contribute the same share of the second replenishment as we contributed to the first. The agreement of the United States is now needed before the replenishment can take place.

Overseas Aid

Mr. Tom Clarke asked the Secretary of State for Foreign and Commonwealth Affairs when Her Majesty's Government expect to achieve the 0·7 per cent. gross national product target set by the United Nations for overseas aid.

Mr. Raison: The Government accept the 0·7 per cent. target in principle, but, like previous Administrations, have set no timetable for achieving it. Progress must depend upon developments in the economy and other claims on resources.

UNESCO

Mr. Bowen Wells asked the Secretary of State for Foreign and Commonwealth Affairs what subjects were discussed and agreed at the temporary committee of the executive board of the United Nations Educational, Scientific and Cultural Organisation meeting between 16 and 22 April.

Mr. Raison: The committee discussed reforms in
- Publications and documentation
- Programme evaluation
- Personnel
- Public information
- Organisation of the work of the 23rd session of the general conference
- Decentralisation

and agreed a timetable for their implementation. It prepared a report inviting the executive board to take note of the plan and timetable. Copies of the report have been placed in the Libraries of both Houses.

Mr. Bowen Wells asked the Secretary of State for Foreign and Commonwealth Affairs whether he is satisfied with progress towards clarifying the status of Britain's continued membership of the United Nations Educational, Scientific and Cultural Organisation.

Mr. Raison: Our membership is valid until 31 December 1985. We shall then withdraw if we are not satisfied with the progress of the reforms for which we are working with other member states. We shall make a final review of membership after the UNESCO general conference in November.

West Bank and Gaza (Aid)

Mr. Home Robertson asked the Secretary of State for Foreign and Commonwealth Affairs what amount of British aid will be provided, directly or indirectly, in the current financial year to assist the Palestinian residents of the occupied territories of the West Bank and Gaza; through which agencies this aid is being channelled; and what was the total sum for the last financial year.

Mr. Raison: The aid provision for the current financial year is expected to be as follows:

Agency	*£*
St. John of Jerusalem ophthalmic hospital	100,000
Co-operation for development	57,000
United Nations Association International Service	39,000
British Council	75,000
Not yet allocated	93,000
TOTAL	364,000

The equivalent figure for 1984-85 was £240,000.

In addition we provided £5 million in 1984-85, and are providing £5 million in 1985-86, to the core budget of the United Nations Relief and Works Agency (UNWRA). In 1984, 27 per cent. of UNWRA's budget was devoted to the provision of amenities for Palestinian refugees in the West Bank and Gaza.

The European Community also provides humanitarian aid to Palestinians through UNWRA in the form of food aid and assistance to educational projects. (The community contribution to UNWRA was £16·5 million (United Kingdom share £3·6 million) in 1984 and will be £21·3 million (United Kingdom share £4·9 million) in 1985.) Some of this is used in the West Bank and Gaza. In addition the community assists the Arab populations of the West Bank and Gaza through its programme for non-governmental organisations, through small-scale rural development projects and by providing scholarships to Palestinian students. These programmes are the responsibility of the Commission and no figures are yet available for 1984 or 1985.

Organisation of East Caribbean States

Mr. Bowen Wells asked the Secretary of State for Foreign and Commonwealth Affairs what arrangements have been made for him to meet the Ministers of the Organisation of East Caribbean States to review the United Kingdom aid programme; and whether he will seek the views of the Foreign Affairs Committee prior to the meeting.

Mr. Raison: No such arrangements have been made, although I understand that a request for such a meeting is being prepared by the secretariat of the Organisation of Eastern Caribbean States. I will keep the Foreign Affairs Committee informed of developments.

I expect to meet some OECS Ministers in Washington on 17 June, where I shall be leading the United Kingdom delegation on the first day of the seventh meeting of the Caribbean Group for co-operation in economic development.

PRIME MINISTER

EC Budget

Mr. Austin Mitchell asked the Prime Minister if she is satisfied that the European Economic Community budget for 1985 meets the criteria which Her Majesty's Government set in securing agreements to financial discipline at the Fontainebleau summit meeting in 1984; and if she will make a statement.

The Prime Minister: The decisions taken by the Council in respect of the 1985 budget have been fully consistent with the agreements reached at Fontainebleau.

Midwives (Pay and Conditions)

Rev. Martin Smyth asked the Prime Minister if she will meet representatives of the Royal College of Midwives to discuss their pay and conditions.

The Prime Minister: I have at present no plans to do so.

Rev. Martin Smyth asked the Prime Minister if she will make it her policy to increase the pay of the midwifery profession in line with the recommendation of the review body and without reductions in expenditure elsewhere in the National Health Service.

The Prime Minister: I refer the hon. Gentleman to the answer I gave to my hon. Friend the Member for Mid Worcestershire (Mr. Forth) on 6 June at columns *194-96*.

Crime Prevention

Dr. Twinn asked the Prime Minister if she will make a statement on co-ordination between the Home Office and other Departments on crime prevention.

The Prime Minister: Co-ordination between the Home Office and other Government Departments on crime prevention was given a fresh impetus through an interdepartmental group established in 1982 at permanent secretary level. Since 1982, the Home Office Standing Committee on Crime Prevention (now the Standing Conference on Crime Prevention) has included representatives of other Government Departments. The Home Office Crime Prevention Unit, established in November 1983, has regard to the interests of other Government Departments as well as the police and local authorities in developing specific crime prevention initiatives.

In January 1984 a joint departmental circular to chief executives of local authorities and chief constables encouraged co-ordinated inter-agency crime prevention initiatives at local level.

Portsmouth Health Authority

Mr. Dobson asked the Prime Minister, pursuant to her answer of 20 May, *Official Report*, columns 273-74, if she will make a statement about the approach made to Portsmouth health authority some two years ago by an official of the Department of Health and Social Security in regard to the contracting out of the managment of a National Health Service hospital to a private company; and if she will list any other centrally promoted schemes of this type instigated since May 1979.

The Prime Minister: There were some discussions between officials of the Department of Health and Social Security and the administrator of Portsmouth and South East Hampshire health authority in 1983 about the possibility of a private company managing one of the authority's hospitals. It was decided not to proceed.

There was nothing unusual about these discussions, which arose as a result of the close interest of Ministers in examining possible options and alternative ways in which the management of NHS hospitals might be improved.

Mr. John Smith (Meeting)

Mr. Parry asked the Prime Minister if she will make a statement on her recent meeting with Mr. John Smith, chairman of Liverpool Football Club.

The Prime Minister: I refer the hon. Gentleman to the statement that I made to the House on 3 June at columns 21-33.

Average Earnings

Lord James Douglas-Hamilton asked the Prime Minister what were the net average earnings for each of Scotland, England, Northern Ireland and Wales for each of the last five years, and in each quarter since January 1984.

The Prime Minister: The information in the following table is based on estimates of weekly earnings for men aged 21 and over in full time work with pay unaffected by absence. Estimates are based on information from the new earnings surveys in April each year.

Income tax rates and allowances are those for the financial year immediately following. The figures are for a married man who is assumed to have no reliefs or allowances other than the married man's allowance. National Insurance contributions are at the contracted in rate.

Comparable information is not available on a quarterly basis and earnings data for April 1985 will not be available until October 1985.

Weekly earnings after national insurance and income tax

	Scotland	*England*	*Northern Ireland*	*Wales*
	£	£	£	£
April 1980	90·24	91·25	84·35	87·71
April 1981	99·53	100·15	93·11	94·98
April 1982	108·74	108·92	100·96	104·08
April 1983	118·30	118·67	108·17	111·47
April 1984	128·92	129·40	119·71	120·86

Mr. Raoul Wallenberg

Mr. Sumberg asked the Prime Minister if, when she next meets the President of the Union of Soviet Socialist Republics, she will raise the case of Raoul Wallenberg; and if she will make a statement.

The Prime Minister: I have no present plans to meet a senior member of the Soviet leadership. The office of President has not in fact been filled since Mr. Chernenko's death. It is not our practice to indicate in advance particular cases we may wish to raise with the Russians. However, representations by my hon. Friend and by many other hon. Members on a wide variety of cases are always borne in mind in the preparation of high-level contacts with the Soviet Union.

Air Services (Malaysia)

Mr. Teddy Taylor asked the Prime Minister (1) if she is satisfied with the progress made in implementing the agreement which she concluded with the Prime Minister of the Federated States of Malaya on 4 April on the provision of an additional flight per week between Kuala Lumpur and London; and if she will make a statement;

(2) if she has received any indication from the Malaysian Government of their satisfaction with the implementation of the agreement which she concluded with their Prime Minister during her visit to that country in April; and if she will make a statement.

The Prime Minister: Yes. Dr. Mahathir and I agreed in principle to the additional frequency and that details would be discussed between the two sides. As a first step, British Airways put some detailed proposals to Malaysian Airline System during a meeting in Kuala Lumpur on 20-21 May. I understand that the Malaysian Government are now proposing talks between Governments.

International Find a Child Organisation

Mr. Dickens asked the Prime Minister if she will make it her policy that no Government assistance will be given to the publicity work of the International Find a Child Organisation while Mr. John Tate is paid as its leader.

The Prime Minister: The Government are not contemplating any grant of assistance to the International Find a Child Organisation for its publicity work.

Lobby Briefing

Mr. Dalyell asked the Prime Minister whether she consulted representatives of the Lobby before inviting the British Broadcasting Corporation cameras into the 10 Downing street briefing for editorial correspondents on Tuesday 21 May.

The Prime Minister: Yes, through my chief press secretary.

HOME DEPARTMENT

Young Offenders

51. **Mr. John Morris** asked the Secretary of State for the Home Department whether he will introduce legislation to consolidate the powers of the courts to sentence young offenders aged under 21 years.

Mr. Mellor: We have no present plans to do so.

ARWEN 37 Weapon

Mr. Chris Smith asked the Secretary of State for the Home Department whether the Metropolitan police have any plans for the development or introduction of a fully automatic version of the ARWEN 37 weapon.

Mr. Giles Shaw: I understand from the Commissioner of Police of the Metropolis that he has no such plans.

Laboratories (Inspections)

Mr. McCrindle asked the Secretary of State for the Home Department how many inspectors regularly visit laboratories to ensure compliance with cruelty to animals legislation; and whether this is ever done on a spot check basis.

Mr. Mellor: There are 15 inspectors in post who all visit laboratories regularly and usually without prior notice.

Tamils

Mr. Greenway asked the Secretary of State for the Home Department how many representations he has received asking him to consider extending the periods of time for the receipt of representations on behalf of Tamils seeking refuge in the United Kingdom; and if he will make a statement.

Mr. Waddington: We have received representations from four organisations asking for an extension of the period allowed to Members to make representations on Tamil cases. In addition a number of hon. Members have requested additional time to make representations in individual cases and we have been able to agree in each case.

A303 (Public Disturbance)

Mr. Key asked the Secretary of State for the Home Department if he will ask the chief constable of Wiltshire for a report on the course of events leading up to the arrest of itinerants near Park House roundabout on the A303 and on the disorder which occurred on the evening of Saturday 1 June; and if he will make a statement.

Mr. Giles Shaw: My right hon. and learned Friend has been kept fully informed by the chief constable of Wiltshire constabulary about these matters. Police officers under the chief constable's command, drawn from a number of surrounding forces, were seeking to prevent a breach of the peace in connection with injunctions obtained by the National Trust and others to prevent the use of land at Stonehenge by members of the peace convoy.

I understand from the chief constable that on 1 June a convey of vehicles, prevented by the police from approaching Stonehenge, entered a field and refused to withdraw from it. The police encountered resistance from certain members of the convoy who were circling the field in their vehicles and ignoring police instructions to stop. Some 550 arrests were made for public order and criminal offences as a result of the day's incident; while it would be inappropriate to comment further on individual cases which are sub judice, we recognise that the police have a difficult task in such circumstances.

I further understand that the police have since been taking steps to establish liaison with the peace convoy and to return to their owners vehicles which had earlier been seized in connection with criminal offences. Steps have also been taken to ensure that appropriate assistance is provided by Wiltshire social services department.

Political Refugees

Dr. Glyn asked the Secretary of State for the Home Department what consultations he intends to have with other Governments to ensure that every assistance is given to the United Kingdom in dealing with political refugees seeking entry to the United Kingdom in large numbers.

Mr. Waddington: We are in regular contact on these matters with other Western European countries and other countries with similar concerns and with the office of the United Nations High Commissioner for Refugees. We do not believe that a separate initiative is called for in present circumstances.

Petty Officer John Anthony Black

Mr. Latham asked the Secretary of State for the Home Department whether he will call for a report from the chief constable concerning the progress of police inquiries in the United Kingdom into the unlawful killing of Petty Officer John Anthony Black in Sabinillas, Spain, on 26 December 1983.

Mr. Giles Shaw: I understand from the chief constable of Hampshire constabulary that inquiries carried out at the request of Her Majesty's Coroner, to whom the police submitted their evidence at the inquest into Mr. Black's death held on 22 and 23 May 1985, are now complete. In the absence of information requested from Spain, no further police action is anticipated for the present.

Travel Documents (Withdrawal)

Mr. Peter Bruinvels asked the Secretary of State for the Home Department if he will take steps to withdraw travel documents from persons convicted of committing specified categories of offencess abroad or, in addition, at home for a specified period; and if he will introduce legislation to make it an offence for a person to apply for such documents in these circumstances.

Mr. Waddington: My right hon. and learned Friend has no plans to do so.

Illegal Animal Fights

Mr. Greenway asked the Secretary of State for the Home Department how many prosecutions are currently pending concerning alleged offences relating to organised fights between dogs and between dogs and cats; how many people are involved in each; and if he will make a statement.

Mr. Mellor: No information is collected centrally on the number of pending prosecutions, neither do records available to me distinguish offences of organising fights with dogs or cats from other offences under the Protection of Animals Act 1911.

DEFENCE

World War One (Cowardice Convictions)

Mr. Dalyell asked the Secretary of State for Defence (1) what response he is making to the request to him by the conference of the Royal British Legion to reopen cases in which soldiers of world war one have been found guilty of cowardice;

(2) if he will assess modern medical evidence which could have a bearing on cases of soldiers convicted of cowardice in world war one.

Mr. Lee: A reply will be made to the Royal British Legion when the matter has been fully considered in the light of all factors, including modern medical evidence.

Tucano Aircraft

Mr. McNamara asked the Secretary of State for Defence when he compared the Tucano and PC9 prices for the new RAF basic trainer, and what allowance was made in relation to the price of the Tucano to cover the costs associated with having the Jet Provost in service for longer than was originally planned.

Mr. Butler: The prices were compared and continuously reviewed throughout the period leading up to the announcement of our decision on 21 March 1985. As the Jet Provost is not required to remain in service for longer than originally planned as a result of the choice of the Tucano, no allowance was made in the price comparison.

Mr. McNamara asked the Secretary of State for Defence whether Short's contract for the Tucano aircraft requires completion and delivery to full RAF specification standard of two aircraft in the autumn of 1986, 12 by mid-1987 and 24 by the end of 1987.

Mr. Butler: Yes.

Classified Documents (Disposal)

Mr. Dalyell asked the Secretary of State for Defence if investigations have now been completed into circumstances surrounding the discovery of classified defence documents relating to Aldermaston and the Tornado aircraft on a rubbish dump in London; and if he will make a statement.

Mr. Butler: Investigations into this incident have now been completed and a report is in preparation.

The restricted documents in question were all either printed on plastic paper or were microfiche. They were found by two boys at the premises of J. J. Maybanks Limited, which is contractor to HMSO for the disposal of restricted, "in confidence" and unclassified paper waste. The company does not handle more highly classified material.

The investigation has indicated that the documents in question should not have been included in the material for disposal by Maybanks, since they were non-pulpable.

All Ministry of Defence staff are being reminded about the correct method of disposing of non-paper classified waste and of the need to take all possible steps to avoid a recurrence.

Exercise Brave Defender

Mr. D. E. Thomas asked the Secretary of State for Defence whether Greenham Common and Molesworth will be key points in the Brave Defender exercise.

Mr. Stanley: I will answer shortly.

Trident

Mr. Ashdown asked the Secretary of State for Defence whether the full costs of *(a)* building the new plutonium factory at Aldermaston and *(b)* building the new prototype pressurised water reactor propulsion reactor at Dounreay are included in the previously announced cost of Trident; and if he will make a statement.

Mr. Butler: No. Both of these facilities are required irrespective of the particular decision on Trident.

Chemical Weapons

Mr. Cohen asked the Secretary of State for Defence whether he has sought, or received, any indication from the Union of Soviet Socialist Republics' authorities about United States proposals to move toward modernisation of chemical weapons; and if he will make a statement.

Mr. Luce: I have been asked to reply.

Although the Soviet Union has a formidable chemical weapons offensive capability, its representatives at the conference on disarmament in Geneva have made clear their opposition to the United States' proposed chemical weapons modernisation programme.

HOUSE OF COMMONS

Division Bells

Mr. Harrison asked the Lord Privy Seal who is responsible for the activation of the Division bells of the House.

Mr. Biffen: Division bells within the precincts of the House are activated by the Principal Doorkeeper on duty at the Door of the House, once a Division has been called in the Chamber.

Mr. Harrison asked the Lord Privy Seal who is responsible for the servicing of the Division bells of the House.

Mr. Biffen: Division bells within the precincts of the House are serviced by the communications manager and his staff. Tests on Division bells are carried out daily before the House sits.

Mr. Harrison asked the Lord Privy Seal who is responsible for reporting failures in the operation of the Division bells of the House.

Mr. Biffen: It is the responsibility of every individual to report a fault to any Division bell if this comes to his or her notice. The procedure for reporting such faults is clearly set out on every alternate page of the Palace of Westminster telephone directory. The Division bells are tested daily before the House sits.

Toilets

Mr. Corbett asked the Lord Privy Seal whether he will designate one of the toilets along the corridor leading to room G01 in the Norman Shaw South building for the use of ladies.

Mr. Biffen: I will ask the Accommodation and Administration Sub-Committee to examine this proposal.

FOREIGN AND COMMONWEALTH AFFAIRS

Gibraltar

Mr. McQuarrie asked the Secretary of State for Foreign and Commonwealth Affairs if he has any plans to provide the Gibraltar Government with financial aid to pay the Spanish workers who were employed in Gibraltar before the Spanish blockade the amounts they were due from Gibraltar's social insurance scheme; and if he will make a statement.

Mr. Renton: This is currently the subject of discussion with the Gibraltar Government.

Mr. McQuarrie asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the outcome of his visit to Gibraltar on 7 and 8 June.

Sir Geoffrey Howe: This was my first visit to Gibraltar since becoming Foreign Secretary. I was glad to have the opportunity to see Gibraltar for myself and to discuss a wide range of issues with the people whom I met there.

I reiterated Her Majesty's Government's commitment to respect the freely and democratically expressed wishes of the people of Gibraltar. I was also heartened to hear about the Gibraltar Government's plans to diversify and

strengthen their economy and to develop practical co-operation with neighbouring Spain in a way which would be of benefit to both.

Chemical Weapons

Mr. Cohen asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the current state of negotiations at Geneva to try to obtain a comprehensive chemical weapons ban.

Mr. Luce: Progress during the spring session of the conference on disarmament has been slow. On 12 March, I tabled further proposals on monitoring arrangements for non-diversion of certain civil chemicals. Subsequently the United Kingdom delegation submitted proposals for an organisation to implement a chemical weapons convention. But key problems of verification remain unresolved. The conference on disarmament reconvenes on 11 June.

Palestine Liberation Organisation

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs what specific details he has received from King Hussein about the reported willingness of the section of the Palestine Liberation Organisation headed by Yasser Arafat to accept United Nations Security Council resolutions 242 and 338; and which Palestine Liberation Organisation leaders have been reported to him by United Kingdom ambassadors as having endorsed publicly the King's statement in Washington of 29 May.

Mr. Luce: King Hussein has confirmed that, as he stated in Washington he and the Palestine Liberation Organisation are ready to negotiate a peaceful settlement on the basis of pertinent United Nations resolutions, including Security Council Resolutions 242 and 338. A PLO spokesman has announced to the press that Mr. Arafat supports the King's stand.

Petty Officer John Anthony Black

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs whether he will instruct Her Majesty's ambassador in Madrid to convey to the Spanish Government the findings of the coroner's court in Portsmouth on 23 May that Petty Officer John Anthony Black was unlawfully killed in Spain on 26 December 1983, and to request the Spanish authorities to pursue the case further, with a view to identifying and charging any person or persons responsible for his death.

Mr. Renton: We are at present waiting for a transcript of the inquest from the solicitors of the family of Petty Officer Black. Her Majesty's embassy in Madrid will be asked to draw to the attention of the Spanish authorities the verdict of the inquest, to ask for their co-operation in reviewing the investigations so far made and to consider what scope there may be for further inquiries into Petty Officer Black's death.

El Salvador

Mr. Foulkes asked the Secretary of State for Foreign and Commonwealth Affairs if he has now received the report of the official observers to the recent elections in El Salvador; and if he will make a statement.

Mr. Renton: A copy of the report on the elections prepared by Her Majesty's ambassador to El Salvador during the course of his normal functions was placed in the Libraries of both Houses on 23 May.

El Salvador, Honduras and Guatemala

Mr. Foulkes asked the Secretary of State for Foreign and Commonwealth Affairs what visits the United Kingdom military attaché to Mexico has paid to *(a)* El Salvador, *(b)* Honduras and *(c)* Guatemala since 1983; what was the purpose of each visit; and what was discussed.

Mr. Renton: The military attaché in Mexico City, who is also accredited to El Salvador and Honduras, has made the following visits since 1 January 1983.

El Salvador
14-19 March 1983
26 May-2 June 1983
24-29 October 1983
4-10 December 1983
20-28 January 1984
15-27 March 1984
5-10 April 1984
3-6 June 1984
8-19 October 1984
2-9 December 1984
18-23 February 1985
1-8 May 1985

Honduras
21-23 April 1983
2-8 June 1983
10-18 July 1983
22-23 July 1983
16-24 October 1983
15-19 November 1983
10-13 December 1983
28-31 January 1984
27 March-5 April 1984
15-26 June 1984
15-22 October 1984
9-12 December 1984
10-18 February 1985
11-18 April 1985

The visits are part of his normal functions.

We have no diplomatic or consular relations with Guatemala.

Non-proliferation Treaty

Mr. D. E. Thomas asked the Secretary of State for Foreign and Commonwealth Affairs if he will publish in the *Official Report* a list of documents that have been prepared by his Department for the preparatory committee meetings of the non-proliferation treaty review conference.

Mr. Luce: The preparatory committee, which has now completed its work, was concerned chiefly with procedural matters. The committee did not request the states parties to prepare documents for its meetings, and the Foreign and Commonwealth Office did not therefore prepare any.

Mr. D. E. Thomas asked the Secretary of State for Foreign and Commonwealth Affairs what specific actions have been taken by Britain in pursuit of its multilateral obligations under article VI of the non-proliferation treaty.

Mr. Luce: We actively participate in all major multilateral disarmament fora, including the Geneva conference on disarmament, the Stockholm conference on

disarmament in Europe, and the Vienna mutual and balanced force reductions talks. We also support the current arms control negotiations between the United States and the Soviet Union whose objectives are wholly consistent with the obligations of article VI of the non-proliferation treaty, and have contributed fully to the NATO discussions which led to the withdrawal from Europe in 1980 of 1000 nuclear warheads and will result in the withdrawal of a further 1972 between 1983 and 1988.

Mr. Raoul Wallenberg

Mr. Sumburg asked the Secretary of State for Foreign and Commonwealth Affairs what has been the response from the Government of the Union of Soviet Socialist Republics to representations made by his Department during the last five years about Mr. Raoul Wallenberg; and if he will make a statement.

Mr. Rifkind: I raised the case of Mr. Wallenberg with First Deputy Foreign Minister Kornienko in 1983 and in 1984. On the latter occasion he repeated the Soviet position as stated by Mr. Gromyko in 1957: that Mr. Wallenberg died of a heart attack in Lubianka prison in 1947. The case was also raised directly with the Russians by the United Kingdom delegation to the conference on security and co-operation in Europe follow-up meeting in Madrid in 1983, and most recently last month by our delegation to the Ottawa human rights' meeting.

SOLICITOR-GENERAL FOR SCOTLAND

Mr. William Macrae

Mr. McTaggart asked the Solicitor-General for Scotland if the procurator fiscal at Inverness is conducting a full investigation into the circumstances of the death of the constituent of the hon. Member for Glasgow, Central, William Macrae, of Balvicar Drive, Glasgow, fatally injured in an incident near Loch Loyne on 6 April; and if the results of his investigation will be made available to the next of kin.

The Solicitor-General for Scotland: The procurator fiscal at Inverness has been conducting an investigation into the circumstances of this death. I will write to the hon. Member.

ENVIRONMENT

Water Supplies (Disconnection)

Dr. Cunningham asked the Secretary of State for the Environment if he will set out in the *Official Report*, for each year since 1979, the numbers of households where water supplies have been disconnected, showing where possible the reasons for disconnection.

Mr. Patrick Jenkin: The information the hon. Member seeks in relation to disconnections due to non-payment of water charges is shown in the table. Information is not available in respect of disconnections for other reasons.

Water authority	*1979-80*	*1980-81*	*1981-82*	*1982-83*	*1983-84*	*1984-85*
Northumbrian	131	80	43	65	186	164
North West	1,500	393	239	71	210	253
Severn Trent	1,500	730	2,342	55	739	940
Yorkshire	1	2	5	11	12	25
Anglian	313	950	966	290	161	266
Thames	3,400	4,109	3,195	1,102	1,794	992
Southern	—	—	—	—	—	250
Wessex	—	—	—	—	3	22
South West	20	12	20	81	65	169
Welsh	10	18	3	25	172	148
	6,883	6,294	6,813	1,700	3,342	3,229

Figures for 1979-80 to 1982-83 refer to unmeasured consumers. Those for 1983-84 to1984-85 also include some measured supplies. Comparable figures for the water companies are not available.

Consultative Council on Local Government Finance

Dr. Cunningham asked the Secretary of State for the Environment if he will set out in the *Official Report* the present constitution of the Consultative Council on Local Government Finance.

Mr. Patrick Jenkin: The Consultative Council on Local Government Finance has no fixed membership nor are there formal terms of reference. I chair the meetings, which are normally held on four occasions each year. Ministerial colleagues from other Government Departments and representatives from the local authority associations attend to discuss all financial matters of concern to central and local government. The usual representation of local authority elected members is as follows:

	Numbers
Association of County Councils	7
Association of Metropolitan Authorities	3
Association of District Councils	7
London Boroughs Association	2
Greater London council	1
Association of London Authorities	1

Local Authority Associations

Dr. Cunningham asked the Secretary of State for the Environment how he currently fulfils his statutory obligations to consult the local authority associations.

Mr. Patrick Jenkin: In accordance with the statutory requirements and by whatever method seems most appropriate.

Ordnance Survey

Mr. Arnold asked the Secretary of State for the Environment whether he is satisfied that the additional income received by the Ordnance Survey from the recent commercial exploration of its copyright material properly takes into account the capital value of the archive.

Mr. Waldegrave: I am satisfied that the income from the Ordnance Survey's recent commercial ventures adequately reflects the value of archival material used in them, whilst at the same time reducing the Ordnance Survey's call on Exchequer support.

Rates (Waltham Forest)

Mr. Deakins asked the Secretary of State for the Environment how many people pay the domestic rate in the London borough of Waltham Forest.

Mr. Waldegrave: Information on the number of ratepayers in each authority is not collected centrally. However, at the beginning of 1984-85, there were 84,500 domestic hereditaments in the London borough of Waltham Forest, and about 30,400 rate rebate recipients, only some of whom were in receipt of full rebates.

Commercial Premises (Change of Use)

Mr. Skeet asked the Secretary of State for the Environment how he proposes to make it easier for firms to change the use of commercial premises.

Mr. MacFarlane: Any change of use which is not material in planning terms, a use ancillary to the main use of a building, or any change of use falling within one of the classes of the Town and Country Planning (Use Classes) Order 1972, does not require a planning application.

Amendments to the General Development Order in 1981 permitted a number of further changes to use of commercial buildings without specific planning consent. I have also announced proposals, which would require legislation, to enable planning authorities to grant permissions which would allow for subsequent changes between different uses on a site.

Local Government (Consultation)

Dr. Cunningham asked the Secretary of State for the Environment if he is planning to make any changes to the way in which he consults local government following the judgement in R. v Secretary of State for Social Services: ex parte AMA.

Mr. Patrick Jenkin: The written judgment is not yet available and we would need to consider it thoroughly before deciding whether any changes are needed in the existing procedures.

Radioactive Waste

Mr. Best asked the Secretary of State for the Environment if he will make it his policy not to place before Parliament a special development order for any site for radioactive waste storage until the conclusions are received from the Royal Commission on environmental pollution and the environment committee on radioactive waste storage and disposal.

Mr. Waldegrave: No. It is important that NIREX proceeds without delay with investigating possible sites for a less deep disposal facility for radioactive wastes and a special development order is required to enable it to do so. The reports of the Environment Committee and the Royal Commission will be available long before any decision is made by NIREX to submit a planning application for actual development of a facility.

Urban Aid Programme (London)

Mr. Peter Bruinvels asked the Secretary of State for the Environment what were the cash allocations made under the urban aid programme for the London boroughs for the period 1983-84; to what extent these were taken up; and if he will make a statement.

Sir George Young: The allocations to local authorities in London, and the latest estimated outturns are as follows (all £m):

Partnerships	*Allocation*	*Estimated outturn**
Hackney	11·00	12·40
Islington	10·35	10·50
Lambeth	13·50	12·55
Docklands	8·00	6·40

Programmes	*Allocation*	*Estimated outturn**
Brent	1·58	1·58
Hammersmith and Fulham	5·63	5·43
Tower Hamlets	1·78	1·78
Wandsworth	1·60	1·74

Other Designated Districts†	*Allocation*
Ealing	1·22
Greenwich	0·80
Haringey	1·38
Lewisham	1·00
Newham	0·82
Southwark	0·82
Barking and Dagenham	0·04
Barnet	0·17
Bexley	0·04
Bromley	0·004
Camden	0·15
Croydon	0·08
Enfield	0·04
Harrow	0·02
Hounslow	0·34
Kensington & Chelsea	0·53
Merton	0·19
Redbridge	0·06
Sutton	0·02
Waltham Forest	0·31
Westminster	0·08
City of London	0·01
GLC	0·29
ILEA	0·24

* Includes additional allocatons made during the year.

† Individual outturns for other designated districts (ODDs) and the traditional urban programme (TUP) are not available; ODD figures include approvals made under TUP.

Water Rates

Mr. O'Brien asked the Secretary of State for the Environment what alterations he is considering to the system of water rates for charging for services provided by water authorities to domestic consumers.

Mr. Macfarlane: No changes in section 30 of the Water Act are under consideration. This section gives to water authorities the power to fix such charges as they see fit subject to its provisions. All authorities make available the option of a meter to domestic consumers as an alternative to charges based wholly or partly on rateable value. A joint study of the possible extension of domestic metering is in progress. In responding to the study's findings the Government will also take account of any relevant proposals emerging from the review of local government finance.

Nitrogen Oxide Emissions

Mr. Ron Davies asked the Secretary of State for the Environment what percentages of nitrogen oxide emissions in the United Kingdom are calculated by his Department to have originated in oil refineries in each of the last 20 years for which figures are available; and what forecasts his Department has made of such emissions.

Mr. Waldegrave: The percentage of United Kingdom nitrogen oxide emissions originating from oil refineries were as follows:

Year	*Percentage*
1974	3
1975	2
1976	3
1977	2
1978	2
1979	2
1980	2
1981	2
1982	2
1983	2

These figures are available from my Department's Digest of Environment Protection and Water Statistics No. 7, 1984. Figures for earlier years are not available.

Specific forecasts of emission levels are not available, but I am not aware of any reason to expect that nitrogen oxide emissions from oil refineries will increase.

Hydrocarbon Emissions

Mr. Ron Davies asked the Secretary of State for the Environment what distinction his Department makes between total hydrocarbon emissions including gas leakage, and that fraction of emissions considered to be reactive in giving rise to ozone in photochemical reactions; and if he will give figures for the emission of reactive hydrocarbons in each of the last 20 years for which figures are available.

Mr. Waldgegrave: Hydrocarbons emitted because of gas leakage are all essentially non-reactive. In 1983 (the latest year for which figures are available) these accounted for 64 per cent. of total emissions. Scientific knowledge about the types of hydrocarbons emitted from other sources, and their degree of reactivity in each case, is not sufficiently advanced to provide realistic estimates of the percentage of the remainder which give rise to ozone in photochemical reactions. Figures for total estimated hydrocarbon emissions, however, are published in my Department's Digest of Environmental Protection and Water Statistics, No. 7, 1984.

Tenants Exchange Scheme

Mr. Freud asked the Secretary of State for the Environment whether he will list in the *Official Report* on a monthly basis the number of new registrations and the number of renewals of registration under the tenants exchange scheme during the year ended 31 March.

Sir George Young: Numbers of registrations and renewals under the tenants exchange scheme, in each month in the twelve months to 31 March 1985, are as follows:

	New Registrations	*Renewals*
1984		
April	1,819	*
May	2,416	*
June	3,660	1,210
July	3,733	1,671
August	3,653	1,715
September	4,501	1,852
October	3,097	1,460
November	2,911	608
December	2,408	1,395
1985		
January	2,067	138
February	3,042	2,509
March	4,313	1,945

*Records of renewals have only been kept since June 1984.

Mr. Freud asked the Secretary of State for the Environment what was the cost of the tenants exchange scheme to the Exchequer for the year ended 31 March.

Sir George Young: The cost to the Exchequer of running the tenants exchange scheme for the financial year 1984-85 was £150,102·93 inclusive of VAT.

Sulphur Emissions

Mr. Ron Davies asked the Secretary of State for the Environment, pursuant to his reply of 23 May, *Official Report*, column *503*, when he expects the review of the method of calculation of sulphur emissions from oil refineries to be completed; and what plans there are to publish it.

Mr. Waldegrave: I expect the method of calculation to be reviewed in time for any revised factor to be used in calculation of sulphur dioxide emissions from oil refineries during 1984. This figure will be published in the 1986 edition of my Department's Digest of Environmental Protection and Water Statistics. That publication will, as usual, carry an explanation of the method of calculation used.

Nitrogen Oxide and Hydrocarbon Emissions

Mr. Ron Davies asked the Secretary of State for the Environment if he will estimate what percentage of ozone formed by reaction between nitrogen oxides and hydrocarbons in the United Kingdom is *(a)* due to vehicle emissions, *(b)* due to oil refinery emissions and *(c)* due to other emissions or natural sources.

Mr. Waldegrave: No. The information on which to base such estimates is not available.

Water (Aluminium Levels)

Mr. Ron Davies asked the Secretary of State for the Environment, pursuant to his reply of 23 May, *Official*

Report, column *503*, if he will list those water supply zones in which aluminium levels in water supplies exceed the limit of 0·2 mg per litre on the basis of a three-monthly average, and give the maximum recorded values in each case.

Mr. Macfarlane: I do not have the detailed information about Scotland, Wales or Northern Ireland, or maximum recorded values. The water supply zones in England where aluminium levels currently exceed 0·2 mg per litre on a three-monthly average are as follows:

Newcastle and Gateshead Water Company
- Rochester, Northumberland
- West Woodburn, Ridsdale
- Otterburn
- Wark on Tyne and surrounding area
- Bellingham, Kielder area

Northumbrian water authority
- Tunstall

Severn-Trent water authority
- Parts of North Warwickshire, Coventry and Nuneaton
- Parts of Charnwood, Hinckley and Bosworth areas
- Part of Oswestry
- Part of Stroud district council area
- Areas supplied direct from Elan reservoirs aqueduct
- Parts of Birmingham and Solihull
- Smethwick industrial consumer

South West water authority
- Parishes of Seaton and Beer
- Areas supplied from Tottiford treatment works
- Areas supplied from Prewley treatment works
- Bideford
- College supply zone—Falmouth and Penrhyn
- Watercombe supply zone
- Higher parts of Penzance
- Launceston and Callington areas
- St. Keverne area
- Bodmin and Wadebridge areas
- Princetown
- Halsetown and part of St. Ives
- Chagford Crediton hamlets

North West water authority
- Southport
- Stockport
- Bolton
- Tameside metropolitan borough
- Oldham
- Parts of Carlisle
- Eden district
- Lancaster
- Parts of Ribble Valley district

Yorkshire water authority
- South East Sheffield
- Part of West Barnsley (2)
- Central Sheffield
- South West Sheffield
- Thornton pressure treatment works supply area
- North Sheffield
- South Barnsley
- Part of Wakefield
- Area east of Thirsk
- Area west of Harrogate
- Addingham
- Parts of Dewsbury and Huddersfield
- Rombalds area
- Part of North Bradford
- Parts of Dewsbury, Huddersfield and Wakefield
- Huddersfield/Holnbridge/Holmstyes area
- Parts of Huddersfield
- Rural area of Keighley
- Panorama treatment works supply area
- Reva treatment works supply area
- Parts of Huddersfield and surrounding area (3)
- Rural areas west and south of Halifax (2)
- Hebden Bridge
- Northern area of Halifax
- Halifax
- Skipton area
- Otley

Action is being taken to improve treatment in many of these areas.

Areas of Special Scientific Interest

Dr. David Clark asked the Secretary of State for the Environment how many sites of special scientific interest have been renotified since 1981; and how many remain to be renotified.

Mr. Waldegrave: Of the 4,085 sites previously notified under the National Parks and Access to the Countryside Act 1949, the Nature Conservancy Council had renotified 1,476 under section 28 of the Wildlife and Countryside Act 1981 as at 30 April 1985. A further 46 sites which have lost their special interest have been denotified. Approximately 2,500 sites remain to be renotified. By 30 April 1985 the Nature Conservancy Council had also notified 518 of 1,797 new sites identified as meriting SSSI status, thus leaving some 3,800 sites outstanding. For these, the NCC currently estimates that the renotification programme will have been substantially completed by the end of 1986.

London Borough of Hillingdon (Planning Appeal)

Mr. Shersby asked the Secretary of State for the Environment if he is yet in a position to determine the appeal by Milton Hutchings Ltd. and Costain Homes against the refusal of the London borough of Hillingdon to grant planning permission for development on Pield Heath nurseries; and if he will make a statement.

Mr. Macfarlane: I am still in the process of clarifying the issues raised in this complex matter. I cannot comment on those issues at this stage in the appeal process.

Local Government Reform (Residuary Bodies)

Mr. Tony Banks asked the Secretary of State for the Environment what steps are being taken to identify suitable members of each residuary body; whether the posts will be advertised; and what salaries or fees will be paid.

Mr. Kenneth Baker: I refer the hon. Member to the answer I gave to my hon. Friend the Member for Enfield, Southgate (Mr. Portillo) on 5 June, at columns *163-65*. The posts will be filled in accordance with the normal procedures for making appointments to statutory bodies. Remuneration will be on a similar basis to that for other broadly-analogous public body appointments.

Mr. Tony Banks asked the Secretary of State for the Environment what charges will be made upon the Contingencies Fund in connection with the setting up of the residuary bodies.

Mr. Kenneth Baker: A sum not exceeding the provision contained in Supply Estimates for 1985-86, class VIII, vote 5, subhead A2(8).

Mr. Tony Banks asked the Secretary of State for the Environment what level of expenditure he envisages by the residuary bodies prior to their finally being established.

Mr. Kenneth Baker: The residuary bodies cannot incur expenditure before they are formally established.

London Residuary Body

Mr. Tony Banks asked the Secretary of State for the Environment if he will state the identified office location of the London residuary body.

Mr. Kenneth Baker: From 1 April 1986 I expect this to be County hall, London SE1 7PB.

Mr. Tony Banks asked the Secretary of State for the Environment what salary or fee will be paid to Sir Arthur Godfrey Taylor as formal chairman of the London residuary body; and what expenses will be paid whilst he acts in an advisory capacity.

Mr. Kenneth Baker: These matters have yet to be decided. The fees or salaries paid to chairmen and members of residuary bodies will be made public in due course in accordance with usual practice.

Mr. Tony Banks asked the Secretary of State for the Environment what staff are being made available to the London residuary body; and what is the envisaged cost.

Mr. Kenneth Baker: The London residuary body will be responsible for employing such staff as it needs in accordance with section 112 of the Local Government Act 1972.

Mr. Tony Banks asked the Secretary of State for the Environment if he will estimate the total costs involved in changeovers in computer systems following abolition of the Greater London council.

Mr. Waldegrave: The question of costs is for successors and in particular the residuary body which we expect will take over much of the GLC's central computer facilities on abolition.

Greater London Council

Mr. Tony Banks asked the Secretary of State for the Environment how many of the Greater London council and Inner London education authority employees are not related to functions to be devolved to the London boroughs.

Mr. William Waldegrave: The proposed destination of GLC functions is given in the Local Government Bill. The present allocation of staff between these functions, including education is a matter for the GLC.

Asbestos

Mr. Heffer asked the Secretary of State for the Environment what percentage of asbestos cement products used in the United Kingdom is imported; and what are the equivalent figures for each year since 1975.

Sir George Young: The percentage of imported asbestos cement products used in the United Kingdom for each year since 1975 is as follows.

	Percentages
1975	10
1976	12
1977	9
1978	10
1979	13
1980	18
1981	20
1982	21
1983	32
1984	34

Although the percentage imported has increased over threefold since 1975, the total usage has fallen by some 25 per cent.

Acid Rain

Mr. Ron Davies asked the Secretary of State for the Environment what moneys he has received from members of the public wishing to donate a pound to stop acid rain by desulphurising electricity power stations.

Mr. Waldegrave: To date, a total of £514 has been received.

Drainage (Householders' Liability)

Mr. Butterfill asked the Secretary of State for the Environment if he is satisfied with the operation of section 39(1)(*b*) of the Public Health Act 1936, whereby householders are liable for structural damage to their drainage connections under the public highways.

Mr. Macfarlane: I am aware that householders' responsibility for the maintenance of their drains sometimes causes difficulty. The problems are being examined in a review of water and sewerage law which the Department is carrying out and which we expect to be completed by the end of the year.

Mr. Butterfill asked the Secretary of State for the Environment what assumptions he makes in setting the level of rate support grant about the extent to which local authorities are unable to recover the cost of drainage repairs works from householders who are not insured against or who are otherwise unable to meet the liability imposed upon them by section 39 (1)(*b*) of the Public Health Act 1936.

Mr. Waldegrave: Rate support grant is paid in support of local authority expenditure generally and cannot be attributed to individual services. The considerations taken into account in settling the level of this year's rate support grant are set out in The Rate Suppport Grant Report (England) 1985-86.

Small Businesses (Building Regulations)

Mr. Grylls asked the Secretary of State for the Environment which representatives of small business interests were consulted before the proposed new building regulations were issued.

Sir George Young: Drafts of the regulations were circulated on three occasions in 1983 and 1984 to over 300 organisations representing a wide range of interests. These included the National Federation of Self-Employed and Small Businesses, the Council of Small Industries in Rural Areas and the CBI Small Firms Council. Following is a full list.

Building regulations consultation list

Aggregate Concrete Block Association
Aluminium Federation
Aluminium Window Association
Amalgamated Union of Engineering Workers
Anglian Standing Conference
Architects Registration Council of the United Kingdom
Architectural Aluminium Association

Rate Demands

Mr. Galley asked the Secretary of State for the Environment when he intends to use his new powers under section 14 of the Rates Act 1984 to prescribe the additional information to accompany rate demands.

Mr. Waldegrave: My Department has today written to the local authority associations and other interested bodies about the proposed new rules governing rate demands and background information to accompany them.

The rules will require that local authorities break down rate demands to show how much is paid to the rating authority and how much to each major precepting authority. They also require information on local authorities' income and expenditure to be provided with the rate demand, or, in the case of ILEA, in notices to be served directly on the ratepayers.

The rules will apply to rates set for 1986-87 onwards.

London Docklands

Mr. Tony Banks asked the Secretary of State for the Environment if he will ensure that once the figure for owner occupation within the London Docklands Development Corporation area reaches the average for Inner London, as noted in the London Docklands Development Corporation 1984 corporate plan, the remaining new housing in docklands will be predominately constructed for rent.

Sir George Young [*pursuant to his reply*, 3 June 1985, c. *53*]: It is LDDC policy, as stated in its corporate plan, to bring the proportion of local housing that is owner occupied up to at least the average for Inner London. This is, however, a standard for comparison, not an upper limit. The proportion of owner occupation has risen from 5 per cent. when the corporation was established to 15 per cent. and it would be wrong to set an arbitrary limit on this rapid expansion.

TRADE AND INDUSTRY

British Shipbuilders (Pension Scheme)

Mr. Frank Field asked the Secretary of State for Trade and Industry what is his policy on the proposal put forward by the British Shipbuilders' pension scheme at the end of 1984 for an industrywide pension scheme following privatisation; and if he will make a statement.

Mr. Butcher: British Shipbuilders made a proposal on this subject to my Department earlier this year. The matter is still under consideration.

Consumer Protection Legislation

Mr. Lightbown asked the Secretary of State for Trade and Industry if he has any plans to introduce a system of impact analysis reviews of all consumer protection legislation for which he is responsible.

Mr. Fletcher: Impact analysis is among the topics discussed in the recent report "Burdens on Business", which we are currently considering.

Consumer Safety (Compliance Costs)

Mr. Skeet asked the Secretary of State for Trade and Industry what assessment has been made of the compliance costs to business of consumer safety legislation.

Mr. Fletcher: We assess the broad costs and benefits of consumer safety legislation whenever consideration is given to amending the legislation, introducing new regulations or reviewing the need for existing ones. In addition, the balance of compliance costs and benefits of consumer safety legislation in general was examined in the context of the recent "Burdens on Business" scrutiny. Following this scrutiny, we are now pressing ahead with greater use of cost benefit analysis in making and reviewing regulations.

British Telecom (Overseas Orders)

Mr. Pawsey asked the Secretary of State for Trade and Industry when the report from the director general of OFTEL on his inquiry into the placing of orders with an overseas company by British Telecom will become available.

Mr. Butcher: This is a matter for the director general but I understand that he expects to publish the result of the investigation shortly.

Tropical Timber

Mr. Knox asked the Secretary of State for Trade and Industry what information he has as to the anticipated annual budget of the headquarters of the organisation that will administer the agreement on tropical timber; and how this compares with the budgets of the inter-governmental commodity organisations located in London.

Mr. Trippier: The budget for the administrative expenses of the International Tropical Timber Organisation has yet to be determined by its council.

The budgets for the costs in 1985 of administrating the international commodity organisations already located in London are as follows:

Organisation	*Budget*
International Coffee Organisation	*3,465,000
International Cocoa Organisation	852,000
International Sugar Organisation	1,000,000
International Tin Council	1,000,000
International Wheat Council	880,000

* This budget has been converted from US dollars, to pounds sterling using an exchange rate of £1 = US$1·27.

The Department has no separate figures of headquarters' costs.

Mr. Knox asked the Secretary of State for Trade and Industry (1) what inducements are being offered by Her

Majesty's Government to locate the headquarters of the organisation that will administer the agreement on tropical timber in London;

(2) if he will list the information he has as to the countries that have offered to locate the headquarters of the organisation that will administer the agreement on tropical timber in their capital cities and as to the financial inducements they have offered and for how many years.

Mr. Trippier: Her Majesty's Government have pointed out the considerable advantages of London as a location for the headquarters of the International Tropical Timber Organisation. We have indicated that we would expect to be able to offer the organisation similar arrangements to those made for the other international commodity organisations which already have their headquarters in London, including relief from 80 per cent. of the rates.

I understand that the Governments of Belgium, France, Greece and Indonesia have also offered to accommodate the headquarters in their capital cities, with the following financial inducements:

- the French Government have offered to provide accommodation free of rent and rates for the duration of the agreement (5 years);
- the Greek Government have offered to provide accommodation for a nominal rent of one dollar per year for as long as the headquarters is in Athens;
- the Indonesian Government have offered free accommodation on a temporary and partial basis.

In addition:

- the Japanese Government have offered free accommodation in Yokohama city for as long as the headquarters is located there and to pay for its electricity, gas and water;
- the Government of the Netherlands have offered free accommodation in Amsterdam for a period to be agreed and to pay for certain operational expenses such as fixed telecommunication costs and the cost of office maintenance. The Netherlands Government are also considering a voluntary contribution to the organisation.

Novice Amateur Radio Licence

Mr. Barron asked the Secretary of State for Trade and Industry if his Department has received proposals from the Radio Society of Great Britain for a new novice amateur licence.

Mr. Butcher: I refer the hon. Member to my reply on 15 February at column *305*. Since then the only discussions between my Department and the Radio Society of Great Britain on licensing categories have been in respect of proposals very recently put forward by the society for an intermediate licence. These draft proposals envisage class B licensees operating Morse on certain HF frequencies after passing a 5 wpm Morse test. My Department is considering these proposals.

Mr. Barron asked the Secretary of State for Trade and Industry if he has any plans to introduce a new novice amateur radio licence; and if he will make a statement.

Mr. Butcher: I refer the hon. Member to my reply on 30 January at column *217*.

Asbestos

Mr. Heffer asked the Secretary of State for Trade and Industry what information he has as to the asbestos content, type and volume, of imported asbestos products.

Mr. Trippier: Information on the type and volume of imported asbestos products is broken down into HM Customs classifications is as shown, imports in each category for 1984 are given alongside.

	Customs classification	*Value (£ Sterling)*	*Weight (Kilos)*
Fabricated asbestos (for example, carded fibres, dyed fibres)	6813 1000	69,662	114,555
Articles of asbestos:			
Thread—steel-cored thread	6813 3300	—	—
other	6813 3500	212,067	115,500
Fabric	6813 3600	500,233	202,248
Other—for use in civil aircraft	6813 3800	49,435	901
Other—cords & string, whether or not plaited	6813 4200	27,267	12,363
paper, paperboard & felt of asbestos—with added rubber	6813 4400	1,217,016	1,178,709
without added rubber—mill board & paper in rolls, sheets or plates	6813 4610	844,398	1,696,244
other	6813 4699	180,361	161,832
Machinery & engine packings	6813 4910	222,692	45,351
Non-woven jointing sheets and rolls	6813 4920	217,025	120,19?
Other	6813 4999	819,572	595,45?
Mixtures with a basis of asbestos & mixtures with a basis of asbestos and magnesium carbonate, & articles of such mixtures:			
Mixtures	6813 5100	117,025	69,441
Articles	6813 5500	278,476	149,748

Mr. Heffer asked the Secretary of State for Trade and Industry what information he has as to the countries of origin of imported asbestos cement products.

Mr. Channon: In 1984,* 95·8 per cent. by volume and 95·1 per cent by value of United Kingdom imports of articles of asbestos cement etc. originated from: Belgium-Luxembourg (58·2 per cent. and 56·0 per cent. respectively), France (13·2 per cent. and 13·6 per cent.), Irish Republic (12·8 per cent. and 15·9 per cent.) and Denmark (11·6 per cent. and 9·6 per cent.).

Source: data corresponding to SITC/R2 Item 661·83 — articles of asbestos cement, cellulose fibre cement and the like (the great bulk of which is believed to be of asbestos cement).

* 1984 figures are provisional

Information on the number of imported asbestos products, and the asbestos content is not available.

Mr. Heffer asked the Secretary of State for Trade and Industry what controls are imposed to ensure that imported asbestos products comply with safety regulations in the United Kingdom.

Mr. Trippier: The only regulations at present in force are the Asbestos Regulations 1969 which are designed to safeguard those who work with asbestos. It is this group of people which faces the most serious risk. The Asbestos Regulations are enforced by the Factory Inspectorate. In addition, we shall be putting to Parliament shortly regulations prohibiting altogether the supply of blue and brown asbestos and prescribing warning labelling for white asbestos and products containing it. The new regulations will be enforced by local authority trading standards officers.

The Secretary of State for Employment will be putting to Parliament regulations prohibiting the import of blue and brown asbestos, the supply of blue and brown asbestos to the work place, and the use of blue and brown asbestos in manufacturing. These latter new regulations will be enforced by Her Majesty's Customs and Excise and the Factory Inspectorate. More generally, if we find that a product on sale to the public is unsafe, we can ban it under the Consumer Safety Act.

Pharmaceuticals (Patent Life)

Mr. Shersby asked the Secretary of State for Trade and Industry if he will introduce legislation to give effect to the proposals in early-day motion No. 514 concerning the extension of the patent life of pharmaceutical products; and if he will make a statement.

Mr. Butcher: There are no plans at present to give effect to the proposals in early-day motion No. 514. However the two matters raised in the motion are under review. On the question of licences of right, my Department and the Department of Health and Social Security are now considering representations from the pharmaceutical industry. On the question of patent life, I intend to seek the opinion of the Government's Standing Advisory Committee on Patents. To this end I have asked the pharmaceutical and agrochemical industries to submit discussion papers.

Domestic Insurance Policies

Mr. Butterfill asked the Secretary of State for Trade and Industry (1) what representations he has received about the public policy implications of the exclusion by many domestic insurance policies of cover in respect of the repair of damaged drainage runs between the curtilage of domestic premises and the main sewer, imposed upon householders by section 39(1)*(b)* of the Public Health Act 1936; and if he will make a statement;

(2) if he has any plans to introduce legislation to require all insurers of domestic property to provide appropriate cover for the liability for drainage repair imposed upon householders by the Public Health Act 1936.

Mr. Fletcher: I have received no representations, nor have I any plans for legislation as this is a matter for my right hon. Friend the Secretary of State for the Environment.

Small Workshop Scheme

Mr. Bellingham asked the Secretary of State for Trade and Industry whether he will make a statement on the review of the small workshop scheme.

Mr. Trippier: The review of the small workshop scheme has now been published. A copy has been placed in the House of Commons Library.

EDUCATION AND SCIENCE

16 to 19-year-olds

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science what is the age participation rate or index for 16 to 19-year-olds in full-time education whether in schools, sixth form colleges, tertiary colleges and non-advanced further education; and what information he has about comparable rates for each member state of the European Community, the United States of America and Japan.

Sir Keith Joseph: The information in all post-compulsory education is shown in the following table for 16 to 18-year-olds. Rates for part-time students are also shown where they are available as they form an important element of United Kingdom further education (including apprenticeships, YTS/YOPS and similar schemes).

*Participation in Education and Training of 16 to 18-year-olds**

	Full-time	*†Part-time*	*All education and training*
France (1981)	58	8	66
Germany (1981)	44	‡40	84
Italy (1981)	48	18	65
Japan‖¶ (1981)	69	3	73
Netherlands (1981)	70	‡8	79
United States of America¶ (1981)	79	—	79
Belgium (1982)	na	na	•73
Denmark (1980)	na	na	•72
Spain (1980)	na	na	•47
United Kingdom■ (1981)	32	32	63
(1983)	31	32	64

na = Not available.

* This age group, i.e. students between their 16th and 19th birthdays, has been used to enable United Kingdom figures to be compared with those for other countries.

† Including apprenticeships, YTS and similar schemes.

‡ Including compulsory part-time education for the youngest leavers.

‖ Estimated; excluding some 18 year olds in certain vocational training colleges.

¶ Including private sector higher education.

• Estimated; using OECD and SOEC data for individual ages.

■ Excluding private sector full-time further education estimated at 2 per cent. for 16 to 18's. Includes some evening students, allowing for overlap with other types of study. Includes in 1981, YOP, (7 per cent.) and in 1983, YTS, (10 per cent.)

Note: Figures for Ireland, Luxembourg and Greece are not available.

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science (1) how many 16 to 19-year-olds are in non-advanced further education; and what is the age participation rate or index;

(2) how many 16 to 19-year-olds are in full-time education in schools and sixth form colleges; and what is the age participation index or rate.

Sir Keith Joseph: The number and percentages of young people aged 16 and over but under 19 years in non-advanced further education or full-time education in schools (including independent) and sixth form colleges are as follows:

	1983-84		1984-85 (provisional)	
	Number (000s)	Age participation Rate (per cent.)	Number (000s)	Age participation Rate (per cent.)
Non-advanced Further Education*				
Full-time	279·1	12·0	266·0	11·6
Part-time†	272·0	11·7	286·0	12·5
Maintained schools and sixth form colleges‡	327·4	14·0	312·0	13·6
Independent schools	66·7	2·9	Not yet available	

* Includes tertiary colleges.
† Part-time day courses only.
‡ Includes a small number of 19-year-olds.

Teachers' Superannuation Working Party

Mr. Cartwright asked the Secretary of State for Education and Science if he will set out the present membership of the teachers' superannuation working party, indicating the bodies nominating each member, the chairman, and the organisation or individual responsible for convening meetings.

Mr. Dunn: The present membership is:

J. I. Langtry *(Chairman)*, Department of Education and Science
P. Ramsden, Department of Education and Science
F. M. Scott, Department of Education and Science
J. Barron, Scottish Office
T. W. Hewitson, Government Actuary's Department
S. A. Mercer, Association of County Councils
B. S. Russell, Association of County Councils
J. Stevenson, Association of County Councils
I. Ward, Association of County Councils
R. Allen, Association of Metropolitan Authorities
W. F. O'Bryan, Association of Metropolitan Authorities
R. J. Clelland, Convention of Scottish Local Authorities
D. J. Brazier, Association of Agricultural Education Staffs
E. G. Beynon, Assistant Masters and Mistresses Association
Miss C. M. Jenkins, Assistant Masters and Mistresses Association
A. B. Cox, Association of Principals of Colleges
Dr. G. Talbot, Association of University Teachers
C. F. Hayes, National Association of Head Teachers
P. L. Scudamore, National Association of Head Teachers
D. Gilling-Smith, National Association of Schoolmasters/Union of Women Teachers
F. J. Howard, National Association of Schoolmasters/Union of Women Teachers
F. A. Smithers, National Association of Schoolmasters/Union of Women Teachers
G. Bryon, National Association of Teachers in Further and Higher Education
J. P. Dawson, National Association of Teachers in Further and Higher Education
P. Harrigan, National Association of Teachers in Further and Higher Education
W. J. Richardson, National Association of Teachers in Further and Higher Education
J. Steers, National Society for Art Education
G. B. Fawcett, National Union of Teachers
W. G. Green, National Union of Teachers
F. F. Jarvis, National Union of Teachers
N. M. Horne, National Union of Teachers
C. Morris, National Union of Teachers
K. Jones, National Union of Teachers
Miss F. M. Kirkby, Secondary Heads Association
R. Hodge, Educational Institute of Scotland
D. L. Fulton, Educational Institute of Scotland
J. D. Pollock, Educational Institute of Scotland
J. O'Neill, National Association of Schoolmasters/Union of Women Teachers (Scotland)
D. Mckay, Federation of Associations of College Lecturers in Scotland
A. M. Lamont, Scottish Secondary Teachers' Association

The secretariat, provided by the Department of Education and Science, convene meetings at the request of members.

Mr. Cartwright asked the Secretary of State for Education and Science what are the responsibilities of the teachers' superannuation working party; and how frequently it meets.

Mr. Dunn: The teachers' superannuation working party has no formal terms of reference. The original purpose of the TSWP when set up in 1970 was to consider the relationship of the teachers superannuation scheme to the then proposed new state pension scheme. That purpose having been fulfilled, it has remained in being as a general consultative body on teachers superannuation. There have been 40 meetings since 1970 including two since 1983.

Mr. Cartwright asked the Secretary of State for Education and Science whether he will review the membership of the teachers' superannuation working party to reflect changes in the membership of the teachers' associations.

Mr. Dunn: No. The teachers' superannuation working party was set up in 1970 by an initiative of the local authority associations as a body broadly representative of employer, employee and central Government interests. the teachers associations were asked by the local authority associations to nominate members. The balance of teacher representation has remained a matter for the teachers panel of the TSWP and my right hon. Friend does not propose to seek to change that position.

Education Act 1981

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science how many local education authorities have yet to develop policies specifically to meet the new demands of the Education Act 1981.

Mr. Dunn: All local education authorities in England are now operating the procedures introduced by the Education Act 1981.

Religious Education

Mr. Peter Bruinvels asked the Secretary of State for Education and Science if he is satisfied that sufficient religious education specialists are employed in secondary schools.

Mr. Dunn: Responsibility for the recruitment and deployment of teaching staff rests with the local education authorities. My right hon. Friend has sought to ensure through the planning of intakes to initial training that there is an adequate supply of suitably-trained religious education specialists to meet the demands of schools; and he has no evidence to indicate that demand is not being

met. He has also given every encouragement to the employers to keep under review the match between the qualifications and deployment of teachers already in the schools so that provision may be made at an appropriate standard.

Mr. Peter Bruinvels asked the Secretary of State for Education and Science what is deemed to be the minimum appropriate time to devote to religious education in fourth and fifth years of secondary schools.

Mr. Dunn: The content and duration of religious education are matters for local decision, in the light of the relevant statutory provisions and, where appropriate, the terms of the relevant agreed syllabus; the Department has not sought to issue guidance on the allocation of time to religious education.

Mr. Peter Bruinvels asked the Secretary of State for Education and Science if he is satisfied that enough time is allocated to religious education in composite courses.

Mr. Dunn: The organisation of religious education within the curriculum is a matter for individual schools to decide, in the light where appropriate of the terms of the relevant agreed syllabus. If religious education is provided as part of an interdisciplinary course it is important that the religious education component should be given an identifiable and explicit treatment.

Mr. Peter Bruinvels asked the Secretary of State for Education and Science, in view of Her Majesty's Inspectorate's recent report on religious education, what action he intends to take to ensure that all schools will now offer religious education in the fifth and fourth years to all pupils, in line with the requirements of the Education Act 1944.

Mr. Dunn: The Education Act 1944 requires religious instruction to be provided in every county school and every voluntary school, and specifies that religious instruction in county schools and, subject to the provisions of the Act, in controlled schools shall be given in accordance with an agreed syllabus which has been locally determined. The 1944 Act does not lay down a minimum scale of provision of religious education for pupils in particular school years.

We have made clear that we look to local education authorities to ensure that the statutory provisions are met; and we hope that parents who are concerned about religious education provided in a particular school will take the matter up with the school's head-teacher, and if necessary with the local education authority and ultimately with my right hon. Friend.

Polytechnic (Research Funds)

Mrs. Renée Short asked the Secretary of State for Education and Science if he will list the 21 polytechnics to which he has allotted financial support for research purposes, the degree of this support to each polytechnic individually and the period of time over which it will last.

Sir Keith Joseph: The institutions (not all of them polytechnics) to which allocations specifically for research proposals have been made from the advanced further education pool for 1985-86, together with the allocation made to each, are as listed.

	£'000s
Central London polytechnic	150
Coventry polytechnic	150
Hatfield polytechnic	150
Kingston polytechnic	150
Leicester polytechnic	150
Liverpool polytechnic	150
Newcastle polytechnic	150
Plymouth polytechnic	150
Portsmouth polytechnic	150
South Bank polytechnic	150
Trent polytechnic	150
Brighton polytechnic	100
Camborne school of mines	100
Manchester polytechnic	100
Sheffield city polytechnic	100
Bristol polytechnic	75
City of London polytechnic	75
Lancashire polytechnic	75
Teesside polytechnic	75
Thames polytechnic	75
Wolverhampton polytechnic	75
TOTAL	2,500

The NAB has advised that allocations should be maintained at least at existing levels for three years in the first instance.

Science Education

Mr. Hancock asked the Secretary of State for Education and Science what plans he is making to implement his policy regarding science education in terms of increasing the provision of bench space, scientific equipment and laboratory technicians in schools.

Mr. Dunn: It is for local education authorities and schools to consider the implications of the Government's policy statement on science education and to develop and implement their own policies accordingly, within the resources available to them. As the policy statement says, the first essential is to use those resources to the best possible effect, taking account of the impact of falling rolls in secondary schools.

Higher Education

Mr. Freud asked the Secretary of State for Education and Science (1) whether he will explain the assumptions and methodology behind the table in annexe B of the Green Paper "The Development of Higher Education" in respect of the social rate of return on investment in higher education;

(2) whether the figures given in annexe B of the Green Paper "The Development of Higher Education" in respect of the social rate of return for investment in higher education represent the nominal or real rate of return.

Sir Keith Joseph: Calculations of the social rate of return assume that education can be viewed as a social investment, yielding benefits in terms of the increased productivity of an educated work-force from the outlay of resources devoted to tuition and any output lost because of the students' absence from the work-force. The rate of return is the implied yield (or internal rate of return) from this outlay. Since all the costs and benefits for the estimates published in the Green Paper are expressed in terms of the prices prevailing at a common date, the figures quoted represent real rates of return, and do not require adjustment for inflation.

Social rate of return estimates in relation to education usually assume that gross earnings are a suitable measure of productivity, and the DES analysis uses data from the general household survey to calculate the earnings differentials of graduates over non-graduates. This assumption has some weaknesses. Firstly, labour market distortions will cause earnings to diverge from productivity to some extent. Secondly, part of the increased productivity of a graduate may reflect factors other than the return to education, most notably innate ability. An attempt is made to meet this objection by using alternative assumptions as to the proportion of the earnings differential that is attributable to education rather than to other influences. Finally the present earnings differentials of past graduates may be a poor guide to the future earnings differentials of present graduates.

Despite limitations of this kind, which are acknowledged in the Green Paper, rate of return analysis does provide a framework within which data on the costs and benefits of higher education can be brought together and usefully summarized; and it can be used to highlight features and trends worthy of more detailed investigation.

Mr. Freud asked the Secretary of State for Education and Science what information is available to his Department as to the number of graduations per member of staff in higher education in England and in competitor countries.

Sir Keith Joseph: Some figures have been put together in the following table, but they are not comparable between countries and I would advise against drawing any conclusions from them. Teaching staff for the United Kingdom are on a full-time equivalent basis but for other countries only total numbers are available (full-time and part-time). Furthermore, teaching staff in higher education divide their time between teaching and research, the extent of which varies considerably between countries.

Teachers/lecturers and graduations # gained in higher education, including postgraduates and sub-degrees*

Country	*Year*	*Teaching staff*	*Graduations*	*Graduations per teaching staff*
		000s	*000s*	
France†	1982	43	203	4·7
Germany	1981	177	204	1·2
Italy	1981	49	88	1·8
Japan‡‖	1981	221	580	2·6
United States‖	1979	⁽822	1,748	2·1
United Kingdom● basic■	1982	66	170	2·6
enhanced⋆	1982	66	218	3·3

* Teachers/lecturers—total numbers except for the United Kingdom which covers full-time university staff plus full-time equivalent staff in the public sector.
† Represents teaching staff in "L'enseignement Supérieur". Excludes establishments not run by the Ministry of Education.
‡ Includes correspondence courses.
‖ Includes private sector.
⁽ In 1980 there were 396 thousand full-time teaching staff.
● Excludes Open university.
■ Excludes students successfully completing courses leading to professional qualifications.
⋆ Includes a first estimate of successful completions of courses leading to professional sub-degree HE qualifications in public sector institutions.
The term 'graduations' refers to all those qualifying in Higher Education as is standard practice with international comparisons.
Sources: Department of Education and Science. UNESCO Statistical Yearbook, 1984. Répères et Références Statistiques, 1984.

Mr. Freud asked the Secretary of State for Education and Science what information is available to his Department in respect of *(a)* the costs of producing a graduate and *(b)* the comparative advantage of higher education in the United Kingdom and the United Kingdom's competitors; and whether he will explain the assumptions behind any such comparisons as are available.

Sir Keith Joseph: The Department's estimates of the costs of producing a university graduate are published in table 3 of annex B of the Green Paper on the Development of Higher Education into the 1990s (Cmnd. 9524).

Comparable estimates for CNAA graduates cannot yet be provided, although table 4 of the Green Paper annex does provide some information on costs per student in the polytechnics. Further information on average course length and on wastage rates in the polytechnics would be required to derive measures of the cost per graduate. The Green Paper estimates are based on cost information provided by universities to the UGC and by polytechnics in the polytechnic finance officers group annual report. Information on average course length and wastage is derived from data provided by the University Statistical Record.

Comparsions between the United Kingdom and its competitors are problematical for various reasons including differences between the countries in the scope of their higher education systems, the entry requirements, the resources devoted to teaching as opposed to research, and the standard of qualification achieved.

Mr. Freud asked the Secretary of State for Education and Science if he will estimate the reduction in *(a)* the number and *(b)* the percentage of arts and humanities student places in higher education required to achieve a net increase in the output of science and engineering graduates of (i) 1 per cent. (ii) 100 and (iii) 1,000 assuming that student numbers and expenditure on higher education remain constant overall for *(x)* higher education as a whole, *(y)* polytechnics and *(z)* universities.

Sir Keith Joseph: The information requested is as follows:

Hypothetical estimated reduction in total number of arts and humanities places (1983-84 baseline)

		Universities (GB)	*Public sector higher education (GB)*	*All higher education (GB)*
To achieve a 1 per cent. rise in the output of science (excluding medicine) and engineering graduates	Nos. (000s)	1·38	0·670	2·05
	percentage	1·2	0·6	0·9
To achieve a 100 per cent. rise	Nos. (000s)	138	67	205
	percentage	118	56	86
To achieve a 1,000 per cent. rise	Nos. (000s)	1,382	667	2,049
	percentage	1,176	558	865

Notes:

Figures assume that the average recurrent cost of teaching provision in science (excluding medicine) and engineering is 40 per cent. greater than the cost of arts and humanities (ie all other subjects) provision in each sector. No allowance is made for any differences in completion or pass rates or in average course lengths between subject areas, nor for the transitional costs of switching provision between subject areas. The calculations take no account of future movements in graduate output already projected under present plans. The totals (third) column assumes equal proportional change in each sector.

Lower Attaining Pupils Programme

Mr. Freud asked the Secretary of State for Education and Science how many children are currently involved in the lower attaining pupils programme; and what is the total cost of the programme broken down into a research component and expenditure in the schools.

Mr. Dunn: About 5,600 pupils are currently involved. The total cost of the programme is approximately £2·5 million per annum of which 75 per cent. is borne by the central Government and 25 per cent. by the local education authorities involved. Two of the projects are funded up to 50 per cent. by the European Community under its transition-to-work programme. An additional sum of £436,000 has been allocated within the Department's research budget for the evaluation of the programme by the National Foundation for Educational Research.

Student Grants

Mr. Freud asked the Secretary of State for Education and Science what has been the real value of the student grant in each year since 1979.

Sir Keith Joseph: The information requested is as follows:

	Ordinary maintenance grant (£) (outside London)	*Percentage value in real terms (September 1978 = 100)*
1978-79	1,100	100
1979-80	1,245	97
1980-81	1,430	96
1981-82	1,535	93
1982-83	1,595	90
1983-84	1,660	89
1984-85	1,775	91

Mr. Freud asked the Secretary of State for Education and Science what was the real value of the student grant in 1966-67 compared to 1984-85.

Sir Keith Joseph: In terms of increases in retail prices, the real value of the student grant in 1966-67 was 11 per cent. above that for 1984-85. The rate of grant in 1984-85 includes the additional travel allowance of £50. If this were excluded, then the real value of the grant in 1966-67 would be 15 per cent. above that for 1984-85.

Departmental Cash Limits

Mr. Hanley asked the Secretary of State for Education and Science whether any changes will be made to the 1985-86 cash limits for his Department's votes.

Sir Keith Joseph: Subject to the approval of the necessary Supplementary Estimate, the 1985-86 cash limit for class X, vote 9 (Research Councils etc: Economic and Social Research Council) will be increased by £74,000 from £23,593,000 to £23,667,000. This is to enable the Economic and Social Research Council to adminster from July 1985, the postgraduate studentships in housing management the introduction of which was announced by my hon. Friend the Minister of State for Housing and Construction on 30 January 1985 at columns *178-79*. Offsetting this additional expenditure, the cash limit on class VIII, vote 5 has been reduced by £13,000 as announced on 5 June. I understand that the remaining £61,000 will be found from within my right hon. Friend the Secretary of State for the Environment's housing, England programme and there is therefore no overall change to public expenditure.

Youth Training Scheme

Mr. Radice asked the Secretary of State for Education and Science how many youth training scheme trainees in each of the modes were attending further education colleges in Great Britain, divided by *(a)* local education authority and *(b)* individual college establishment at the most recent date for which figures are available.

Sir Keith Joseph [*pursuant to his reply*, 21 May 1985, c. *384*]: The following tables show *(a)* the numbers of students recorded as on YTS courses within FE establishments by LEA on 1 November 1983 and *(b)* the numbers of students recorded on YTS courses for those further education establishments with 50 or more such students. In each table the numbers are split into those on YTS mode A courses and those on YTS mode B courses.

(a) Students on YTS Courses by LEA November 1983

LEA	YTS Mode A	YTS Mode B	Total
England			
Greater London			
Barking	146	94	240
Barnet	78	21	99
Bexley	289	24	313

SCOTLAND

Dental Technicians

Mr. Gregory asked the Secretary of State for Scotland how many dental technicians expressed as whole-time equivalents were employed by health boards in Scotland at 30 September 1984; and what contribution those who undertake private work make towards the overheads that they use.

Mr. John MacKay: The number of dental technicians (expressed as whole-time equivalents) employed by health boards in Scotland at 30 September 1984 was 147. Information is not held centrally on the contribution made by those who undertake private work towards the overheads that they use.

Airports Policy

Mr. Fairbairn asked the Secretary of State for Scotland when he next expects to meet the chairman of the British Airports Authority to discuss airports policy in Scotland.

Mr. Ancram: My right hon. Friend meets the chairman of the British Airports Authority from time to time and last did so on 4 February 1985. There are no present plans for a further meeting. My right hon. Friend the Secretary of State for Transport announced on 4 April 1985 at column 740 our decision following a review of the Scottish lowland airports policy. Other aspects of airports policy are dealt with in the White Paper on Airports Policy, Cmnd 9542, published on 5 June 1985.

Broadleaved Woodland

Mr. Donald Stewart asked the Secretary of State for Scotland what was the area within Scotland covered by broadleaved deciduous woodland in *(a)* 1955, *(b)* 1960, *(c)* 1970, *(d)* 1975, *(e)* 1980 and *(f)* the latest available year; and if he will make a statement on planting and conservation policy.

Mr. Younger: Figures are available only for the years in which a census of woodland was carried out. These are as follows for woodland over 0·25 hectares:

Estimated Area of Broadleaved Woodland

Mean survey date	*(hectares)*
1950	162,000
1965	142,000
1980	136,000

The Forestry Commission is completing its review of broadleaves policy, and I expect to make a statement before the summer recess.

Edinburgh Dental Hospital

Lord James Douglas-Hamilton asked the Secretary of State for Scotland if he will make a statement on the present position relating to the Edinburgh dental hospital.

Mr. John MacKay: In my answer of 24 May 1985 to the hon. Member for Edinburgh, East (Mr. Strang) at column *583* I referred to further discussions which are being arranged between Edinburgh university, Lothian health board, the University Grants Committee and the Scottish Home and Health Department. Until that meeting has taken place, there is nothing I can add to that answer.

Housing Defects Act

Lord James Douglas-Hamilton asked the Secretary of State for Scotland when the booklet giving advice and guidance on the operation of the Housing Defects Act will be made available to local authorities in Scotland.

Mr. Ancram: The booklet of guidance was issued to local authorities in Scotand on 7 June.

Teachers (Dispute)

Lord James Douglas-Hamilton asked the Secretary of State for Scotland how many teaching days were lost in Scotland through industrial action from August 1984 until the end of April 1985.

Mr. Allan Stewart: Approximately 112,000 teaching days out of a possible total of 8,000,000 were lost as a direct result of industrial action connected with the current pay dispute.

Friarton Detention Centre

Lord James Douglas-Hamilton asked the Secretary of State for Scotland how many inmates in Friarton detention centre have been placed on strict suicide observation during each quarter of 1984 and the first quarter of 1985.

Mr. Ancram: The information is as follows:

	Numbers
1984	
First quarter	4
Second quarter	6
Third quarter	2
Fourth quarter	0
1985	
First quarter	4

Lord James Douglas-Hamilton asked the Secretary of State for Scotland for what periods the offenders concerned at Friarton detention centre, who were under strict suicide observation during 1984 and the first quarter of 1985, have been kept under observation.

Mr. Ancram: The periods for which inmates were kept under strict suicide observation during 1984 and the first quarter of 1985, were as follows:

	Number of days
1984	
First quarter	Periods from 1 day to 5 days
Second quarter	Periods from 1 day to 3 days
Third quarter	Periods from 2 days to 3 days
Fourth quarter	Nil
1985	
First quarter	Periods from 1 day to 3 days

Lord James Douglas-Hamilton asked the Secretary of State for Scotland how many self-inflicted injuries had been recorded as being inflicted during detention at Friarton detention centre, during 1984 and the first quarter of 1985.

Mr. Ancram: The number of self-inflicted injuries recorded was as follows:

	Number
1984	12
1985 (first quarter)	6

Conifers (Survey)

Mr. Ron Davies asked the Secretary of State for Scotland whether the Forestry Commission survey of conifers in 1984 revealed any damage similar to that seen in other countries than West Germany.

Mr. John MacKay: The Forestry Commission's systematic survey of conifers in Great Britain carried out in 1984 revealed no damage of a kind attributed to air pollution either in West Germany or elsewhere. The Commission has no evidence that tree damage associated with air pollution in other countries—apart from that in the near vicinity or particular sources of emission creating unique damage symptoms—shows different symptoms from those ascribed to air pollution in West Germany. The Commission maintains close contact with scientists in other countries in order to ensure that it is aware of any new forms of damage linked with air pollution.

Veterinary Services

Mr. Archy Kirkwood asked the Secretary of State for Scotland if he will consider setting up an inquiry into the efficiency of veterinary services in Scotland, on similar lines to that recently carried out in England and Wales.

Mr. John MacKay: A study of the veterinary investigation service in England and Wales was commissioned last year by my right hon. Friend the Minister of Agriculture, Fisheries and Food as part of the Government's programme of efficiency studies.

In Scotland, the veterinary investigation service forms part of the Advisory Services provided by the three Scottish agricultural colleges. The financing and management of these services, including the veterinary investigation service, are currently being reviewed in the light of the Government's decision announced in the Public Expenditure White Paper published in January 1985, to reduce the level of public funding of the advisory services in 1987-88, and any further review would not be appropriate at this stage.

Rates Relief (Edinburgh)

Lord James Douglas-Hamilton asked the Secretary of State for Scotland whether he can give any estimate as to how many *(a)* domestic ratepayers and *(b)* commercial ratepayers qualify for relief in Edinburgh, on the basis of

the assessor's initial revaluation before considering any appeals under the terms of the Rating (Revaluation Rebates) (Scotland) Bill.

Mr. Ancram: The Scottish Office does not hold the detailed information on the valuation of all properties in a local area on which such estimates of numbers qualifying in Edinburgh would have to be based. I have asked Lothian region to provide my hon. Friend with what estimates it may have available for the Edinburgh area.

Peel Hospital (Pay Bed)

Mr. Dobson asked the Secretary of State for Scotland on what grounds he authorised a pay bed at Peel hospital.

Mr. John MacKay: Following consideration of a proposal for four in-patient beds at Peel hospital, my right hon. Friend decided that one private bed would provide a sufficient element of choice for private patients in the area.

Health Boards (Resources)

Mr. Kennedy asked the Secretary of State for Scotland if he will list in the *Official Report* the net financial effect in terms of budgetary savings which will have to be found from existing resources for each of the health boards in Scotland as a result of Her Majesty's Government's decision on the recommendations of the Review Body on Nurses and Midwives Pay.

Mr. John MacKay: The pay awards to NHS staff in Scotland covered by the recommendations of the Review Body for Nurses and Midwives will cost about £28·8 million in 1985-86. The cost to health boards will be some £6 million more than the amount allowed for inflation in their recurrent expenditure allocations for the year, equivalent to nearly 0·5 per cent. of their revenue budgets in total. Information about the precise costs of the award to each Board is not readily available.

ENVIRONMENT

Inner Cities (Expenditure)

Mr. John Fraser asked the Secretary of State for the Environment if he will list in the *Official Report* the outturn amount of expenditure for 1983-84 and 1984-85 in each of the inner city and urban programme areas of inner city programme expenditure and distinguishing in each case between capital and revenue and voluntary and statutory sectors.

Mr. Kenneth Baker: I shall answer his question shortly.

Greater London Council

Mr. Tony Banks asked the Secretary of State for the Environment (1) if he will estimate the total costs arising from staff redundancies following abolition of the Greater London council;

(2) what level of savings he has now positively identified arising out of the abolition of the Greater London council;

(3) what transitional costs will arise out of abolition of the Greater London council.

Mr. Waldegrave: I shall answer these questions shortly.

EMPLOYMENT

Parental and Family Leave

Ms. Richardson asked the Secretary of State for Employment what policy he will adopt at the meeting of Ministers in Brussels on 14 June towards the EEC directive on parental leave and leave for family reasons.

Mr. Peter Bottomley: The Government have consistently made it clear, both in this country and during discussions in Brussels, that they are opposed to proposals of this kind which we firmly believe are best dealt with between employers and employees according to their own needs, priorities and circumstances rather than by Government or Community intervention. We will bear in mind the views of those organisations which responded to the Department's consultation exercise when this matter is raised at the Council meeting, but we do think we should all concentrate our minds and efforts on the problems faced by the unemployed, rather than further improving the position of people who already have jobs.

16 to 19-year-olds

Mr. Andrew F. Bennett asked the Secretary of State for Employment how many 16 to 19-year-olds are *(a)* on the unemployment register and *(b)* in employment; and what percentage of the relevant age group these represent.

Mr. Alan Clark: The latest available estimates are shown in the following table:

Great Britain, January 1985

	Numbers	*Per cent.*
Age 16-19 years*		
Total population	3,620,000	100
Claimant unemployed	600,000	17
Age 16-18 years*		
Total population	2,680,000	100
Claimant unemployed	440,000	16
In full-time education or YTS	1,130,000	42
Other: mainly employed outside YTS†	1,110,000	41

* Ages as at 31 August 1984.

† Mainly those in employment but excluding those employed under the youth training scheme and including some who were seeking work but not claiming benefit and others who were neither employed nor seeking work—for example, because of domestic responsibilities. This group is obtained by subtracting from the total population of the age group those estimated to be in full-time education or in the youth training scheme and the claimant unemployed. No estimate is shown for 16 to 19-year-olds as the education data do not readily distinguish 19-year-olds.

The estimates are provisional and have been rounded to the nearest 10,000 or 1 per cent.

Fairground Accidents

Mr. Merchant asked the Secretary of State for Employment if he will give the number of fairground accidents in the last five years in which there has been *(a)* injury and *(b)* death and the total number of resultant deaths.

Mr. Peter Bottomley: The numbers of fairground accidents reported to the Health and Safety Executive involving death or major injury over the last five years are as follows:

Year	Total number of Incidents	Total number of fairground accidents involving: Major Injuries	Fatal Injuries	Total number of resultant deaths
1980	13	13	2	2
1981	n.a.	20	2	2
1982	23	23	4	4
1983	23	28	3	3
1984	37	38	2	2
1985*	7	10	1	1

Wages Councils

Mr. Evans asked the Secretary of State for Employment if he will list the organisations and indicate the number of individuals who have responded to the consultative paper on wages councils, and those organisations and the overall number of respondents who have shown that they would not favour the outright abolition of wages councils.

Mr. Peter Bottomley: Representations are still being received which we are taking into account. It would be premature to publish an analysis at this stage. I shall disclose the results of the consultation when we have completed our study of all the responses.

Labour Statistics

Mr. Pendry asked the Secretary of State for Employment how many registered males and registered females are currently employed in Hattersley within the metropolitan district of Tameside; and how much greater is the proportion of unemployed people in this area than it was in May 1979.

Mr. Alan Clark: The information is not available, but unemployment figures for individual wards will be available in the Library shortly.

Mr. Skinner asked the Secretary of State for Employment how many people have been unemployed in the county of Derbyshire for *(a)* more than five years, *(b)* between four and five years, *(c)* between three and four years, *(d)* between two and three years and *(e)* between one and two years.

Mr. Alan Clark: The following information is available in the Library. The figures relate to 11 April 1985, the latest date for which an analysis of unemployment by duration is available. Figures given are for Derbyshire defined in terms of jobcentre areas. The full range of analyses by age and duration will shortly be available for areas defined in terms of wards.

Unemployed claimants—Derbyshire
11 April 1985

Duration of unemployment	
More than five years	1,704
Between four and five years	2,222
Between three and four years	3,069
Between two and three years	4,500
Between one and two years	9,252

Mr. Skinner asked the Secretary of State for Employment how many *(a)* part-time and *(b)* full-time jobs were created in 1982, 1983 and 1984.

Mr. Alan Clark: Information about job gains and job losses is not available from the Department's statistics, but an indication of the net changes can be seen by comparing levels of employees in employment at different dates.

The following table gives the available information from the employees in employment series. Data are collected quarterly and the figures in the table reflect the changes between December each year. Analyses of full-time and part-time jobs are available from the series only for female employees in employment.

Employees in employment, Great Britain: annual changes at December each year

	All males	Females full-time	Females part-time
1981-82	−276,000	−201,000	15,000
1982-83	−129,000	−53,000	219,000
1983-84	−60,000	−14,000	187,000

Note:
In this table an employee is classified as full-time if she normally works more than 30 hours a week.

The labour force survey provides information on a different basis. The following table shows the available survey estimates of the change in the number of persons in full-time and part-time employment.

Persons in employment, Great Britain: Labour Force Survey estimates

	Change between spring 1981 and spring 1983	Change between spring 1983 and spring 1984
Persons in full-time employment	−753,000	+10,000
Persons in part-time employment	−99,000	+474,000

Note:
In this table a person is shown as full-time if he regards his job as a full-time job. Figures include both employees and the self-employed. Estimates of the change between 1981 and 1983 are subject to greater error because of changes in the survey questions.

Mr. Skinner asked the Secretary of State for Employment what percentage of people unemployed in 1955, 1965 and 1975 were out of work for more than one year; and what is the comparable figure at the latest available date.

Mr. Alan Clark: The following information is in the Library. The table shows the percentage of the unemployed in Great Britain who had been unemployed for over one year. Figures are given for unemployed registrants in March 1955, April 1965 and April 1975, and for unemployed claimants at April 1985. Figures are also shown on both bases for October 1982, when the basis of the unemployment count has changed. The figures are also affected by the provisions of the 1983 Budget which mean that since April 1983 certain men aged over 60 need no longer sign on at an unemployment benefit office.

Unemployed over one year as a percentage of total unemployed—Great Britain

Date	Per Cent
Registered unemployed	
March 1955	10·4
April 1965	17·4
April 1975	14·7
October 1982	35·3

Date	Per Cent
Unemployed claimants	
October 1982	32·1
April 1985	40·4

Dieldrin

Mr. Ron Davies asked the Secretary of State for Employment if he will list those products containing the pesticide dieldrin, which may be used or sold in the United Kingdom for whatever purpose.

Mr. Peter Bottomley: The following list gives products containing dieldrin notified to the Health and Safety Executive or the Ministry of Agriculture, Fisheries and Food under the pesticides safety precautions scheme. The scheme is a formally negotiated agreement between industry and the Government under which pesticides are evaluated and cleared for safety. It also provides for notifications when cleared products are withdrawn, but the list may nevertheless include a few products which are now out of production. There are separate entries covering small product variations because individual clearances are required for each of these.

Products Containing Dieldrin

Products Cleared for Professional use only

Cuprinol Difusol
Killgerm Dethlac Insecticidal Lacquer
Larrols Timber Paste
Remtox Paste Preservative
Solignum Fl Paste
Woodtreat
Wykamol Mayonnaise

Products Cleared for Industrial Pre-Treatment Use Only

Dipsar Brown
Dipsar Clear
Dipsar Green
Imersol
Protim 80
Protim 80 C
Protim 80 SDT
Protim 80 WR
Protim Brown
Solignum Antifungus Fluid 'O'
Solignum Fluid NF
Solignum Fluid S
Strathbond Brown
Strathbond Clear
Timbercare WR QD
Vacsele
Vacsol
Vacsol Concentrate
Vacsol WR
Vacsol WR Concentrate

Crop Spraying Pollution

Mr. Ron Davies asked the Secretary of State for Employment what plans he has to amend the Health and Safety at Work etc. Act to enable those affected by agricultural crop spraying pollution to discover from the Health and Safety Executive or the user which chemical is involved.

Mr. Peter Bottomley: We have asked the Health and Safety Commission to advise whether the provisions of the Health and Safety at Work etc. Act 1974 present any obstacles to the disclosures of information the public may reasonably need. The commission published in March of this year a discussion document, "Access to health and safety information by members of the public," and will be giving its advice when it has studied the responses to the document. On the basis of that advice we will consider the need for the Act to be amended.

Employee Involvement

Mr. Kenneth Carlisle asked the Secretary of State for Employment whether he will make available the results of his monitoring of the operation of section 1 of the Employment Act 1982; and if he will make a statement.

Mr. Peter Bottomley: My right hon. Friend has today deposited the results of the monitoring exercise in the Library of the House. The results show that companies have made an encouraging start in reporting their employee involvement arrangements. We have seen some excellent reports and a wealth of voluntary employee involvement practices has been revealed. Others, however, are not fulfilling their obligations as required, and we intend to discuss this with employers' organisations. We need to build on the stimulus section 1 has given to the success of the voluntary approach and ensure that employee involvement becomes the practice throughout those companies covered by the Act.

Community Programmes (Leicester)

Mr. Peter Bruinvels asked the Secretary of State for Employment (1) if he is yet in a position to report on the renewal by Leicester city council of its various community programme projects; and if he will list the organisations involved and numbers of people liable to be on the various programmes;

(2) how many places have been allocated under various community programme projects within Leicester city council for the period 1985-86; how this compares with the previous 12 months; and if he will make a statement.

Mr. Peter Morrison [*pursuant to his reply*, 6 June 1985, c. *204*]: Leicester city council's agency agreement provided for 400 places in the years ending 31 July 1984 and 31 July 1985. I understand that because of decisions taken by the local branch of NALGO, the council has not yet applied for the renewal of its community programme agency agreement. I hope that, in the interests of the long-term unemployed people in Leicester, it will do so. I will write to my hon. Friend as soon as possible about organisations currently involved in community programme projects with Leicester city council's agency, and will place a copy of my letter in the Library.

Mr. Peter Bruinvels asked the Secretary of State for Employment how many places have been allocated under community programme projects within the city of Leicester; and how this compares with the previous 12 months.

Mr. Peter Morrison [*pursuant to his reply*, 6 June 1985, c. *204*]: 990 places on the community programme have been available for the city of Leicester during the last 12 months. The expansion of the programme by 100,000 places nationally over the next 12 months enables significant increases to be made in all areas.

THE ARTS

Local Government Reform

Mr. Tony Banks asked the Parliamentary Under-Secretary of State answering in respect of the Arts what

submission has been made to the Minister for the Arts by the Arts Council regarding the sum it considers necessary to maintain standards of provision of the arts should the Greater London council and the metropolitan county councils be abolished; how much has been offered by the Government; and if he will make a statement.

Mr. Waldegrave: My right hon. and noble Friend has seen the press release issued by the Arts Council about the total amount needed to support the arts after abolition. He understands that the Arts Council will be making a formal request for increased funding in due course. The Government have announced that they will provide £34 million in 1986-87, of which £16 million is for the Arts Council.

It remains the Government's view that part of the necessary provision should be met by the boroughs and districts, whose ratepayers will carry a smaller burden after abolition. My noble Friend will give careful consideration to the Arts Council's calculations and to any formal proposal which it may put to him.

Mr. Tony Banks asked the Parliamentary Under-Secretary of State answering in respect of the Arts if he intends to offer additional money to the Arts Council beyond the present level offered to fund arts organisations affected by abolition of the Greater London council and the metropolitan county councils.

Mr. Waldegrave: My right hon. and noble Friend will consider the matter along with other proposals for increases in the present level of funding for the arts.

Mr. Tony Banks asked the Parliamentary Under-Secretary of State answering in respect of the Arts what representations he has received from the Arts Council about the level of funding to be made available to meet the needs of arts organisations affected by abolition of the Greater London council and the metropolitan county councils.

Mr. Waldegrave: My right hon. and noble Friend has discussed the matter with the chairman of the Arts Council, and received a copy of the council's press release.

SOCIAL SERVICES

Publications (Languages)

Mr. Andrew Bowden asked the Secretary of State for Social Services which of his Department's publications are also produced in languages other than English; and which are the additional languages used.

Mr. Whitney: The Department's general guide to the benefits available, leaflet FB2 entitled "Which Benefit", is also produced in Chinese, Bengali, Gujerati, Hindi, Punjabi and Urdu. These versions known as leaflet FB22 were first introduced in March of this year.

There are also Welsh language versions of leaflets D11 (NHS Dental Treatment), G11 (NHS Glasses), FB2, FIS1 (Family Income Supplement), RR1 (Rent and Rates), SB1 (Cash Help), FB20 (Leaving School) and SA20 (Medical Costs Abroad), and a translation of leaflet SB1 into Gaelic.

Northern Gas

Mr. Merchant asked the Secretary of State for Social Services if he will give details of any special arrangements between his Department and Northern Gas for the supply of cookers at discount rates to recipients of supplementary benefit, indicating when such arrangements were made and why.

Mr. Whitney: In determining the level of payment to be awarded when a new cooker is to be provided, local offices of the Department normally contact suppliers in their area to obtain the range of prices at which suitable cookers are available locally. In seeking this information it is made clear that claimants will not be referred to one sole trader, and that within the price range determined by the local office, claimants will be free to locate the item for themselves.

It is for the commercial judgement of suppliers, including Northern Gas, to determine the price at which they are prepared to sell cookers: if any supplier chooses to sell cookers to supplementary benefit claimants at a discount that is for them to decide, and I understand that this is the case with Northern Gas.

Pharmaceutical Services Negotiating Committee

Mr. Pavitt asked the Secretary of State for Social Services if he will announce the names of chairmen and members of the study groups to examine the possible changes in the negotiation arrangements between the Government and the Pharmaceutical Services Negotiating Committee.

Mr. Kenneth Clarke: In the past few weeks we have concluded negotiations with the Pharmaceutical Services Negotiating Committee (PSNC) into a new contract for NHS community pharmacists. I understand that the PSNC will be recommending acceptance of the Government's final offer to the conference of local pharmaceutical committees to be held on 23 June. The details of the implementation of the new contract proposals, including the composition of the proposed study group, will be considered by the Government and PSNC if, as we hope, the conference of LPCs votes to accept the offer.

Speech Therapists

Mr. Andrew F. Bennett asked the Secretary of State for Social Services if he will list the number of clinical placements for speech therapists in England and Wales for each of the last five years.

Mr. Kenneth Clarke: We do not keep this information. It is the responsibility of the College of Speech Therapists to recognise courses in speech therapy and to oversee clinical placements for training.

Family Income Supplement

Mr. Austin Mitchell asked the Secretary of State for Social Services what is his latest estimate of the number of children in families receiving family income supplement.

Mr. Whitney: At the end of March 1985, the latest date for which figures are available, about 417,000 children were included in families receiving family income supplement.

Medicines (Prices)

Mr. Speller asked the Secretary of State for Social Services whether he is monitoring changes in the price of

medicines formerly available on National Health Service prescription and not now available since the introduction of the limited list; and if he will make a statement.

Mr. Meadowcroft asked the Secretary of State for Social Services whether he intends to monitor the market price of drugs which are no longer prescribable on National Health Service prescriptions.

Mr. Kenneth Clarke: No. There is no reason for us to monitor the price of drugs which are not available under the National Health Service.

Ruthenium

Mr. Sedgemore asked the Secretary of State for Social Services how much ruthenium was supplied to British hospitals for cancer research for the latest three-monthly, six-monthly and yearly periods for which figures are available.

Mr. Kenneth Clarke: We do not routinely collect information on this subject. However, no cancer research commissioned by us involves the use of ruthenium and we are not aware of any being supplied for this purpose to other researchers.

"Unemployment, Health and Social Policy"

Mr. Meacher asked the Secretary of State for Social Services what action he intends to take in response to the report on "Unemployment, Health and Social Policy" by the Nuffield centre for health service studies, a copy of which has been sent to him; and if he intends to implement its proposed policy changes, at nil extra cost, to improve the health of the unemployed.

Mr. John Patten: We are aware of the report. We do not accept that the measures it proposes involve nil extra cost. Our priority is to continue to pursue policies to bring down unemployment and to continue to meet the health needs of the population, whatever their cause.

NHS (Darkroom Technicians)

Mr. Meacher asked the Secretary of State for Social Services how much it would cost to increase National Health Service darkroom technicians' running repairs allowance in line with inflation to 1985 since its last increase in 1971; and what proportion of the professional and technical branch E committee budget such an improvement would take.

Mr. John Patten: The cost of increasing this and another similar allowance in line with the movement in the retail price index since 1971 is estimated to be £127,000 or 0·17 per cent. of the committee's paybill. Our information does not allow us to distinguish the two allowances.

Housing Benefit

Mr. Meacher asked the Secretary of State for Social Services (1) how many housing benefit recipients receive less than £11 per week for *(a)* rent and rates and *(b)* rent only; and what proportion these people are of the total number of housing benefit recipients;

(2) what number and proportion of housing benefit recipients receive below £1, £1-2, £2-3, £3-4, £4-5, £5-6, £6-7, £7-8, £8-9 and £10-11 per week, respectively; and what are their average earnings.

Mr. Whitney: I shall let the hon. Member have replies as soon as possible.

Population Study

Mr. Meacher asked the Secretary of State for Social Services if he intends to take any action following publication of the Office of Population Censuses and Surveys' longitudinal study, showing 20 per cent. higher risks of death amongst unemployed men and their wives.

Mr. John Patten: I have nothing to add to my reply on 18 February to the hon. Member at column *397*.

NHS (Consultants)

Mr. Stan Thorne asked the Secretary of State for Social Services what was the total number of domiciliary visits by all National Health Service consultants in the years ended 30 September 1982, 1983 and 1984, respectively.

Mr. Kenneth Clarke: The number of domiciliary visits by all National Health Service consultants in England and Wales in the years ended 30 September 1982, 1983 and 1984 are 426,000, 437,000 and 386,000 respectively.

Private Hospital Development

Mr. Dobson asked the Secretary of State for Social Services if he will list such information as is available to him as to the companies and the sites of the proposed or actual private hospital developments where notification has not been given under section 14 of the Health Services Act 1976, as amended by the Health Services Act 1980; and if he will make a statement.

Mr. Kenneth Clarke: During 1984 it became clear that the requirement to notify us of proposed private hospital developments in advance of seeking planning permission was not sufficiently well known. We have, therefore, taken action to remind potential developers of this requirement. We have asked the Association of Independent Hospitals, the Independent Hospital Group, the Royal Institute of Chartered Surveyors, the Royal Town Planning Institute and the Law Society to draw this to the attention of their members.

Whenever we become aware of any proposed development which appears to require notification we get in touch with the company responsible and ask that they complete the form of notification. All notifications are passed for information to the relevant district health authority. The late notifications received since January 1984 are in the table. We do not name companies who notify us of their intention because of the commercial nature of the information.

Late notifications received since January 1984

	Number of beds
St. Vincents Road, Torquay*	40
Birchin Cross Road, Kemsing, Nr. Sevenoaks*	30
Bourn Hall Clinic, Cambridge† (replacing 30 beds in temporary accommodation)	42
The Sloane Hospital, London SE3†	‡64
The Garden Hospital, London NW4 (additional beds)	2
Beverley road, Anlaby, Hull (re-notification)	25
New Road, Impington, Cambridgeshire	‖25

	Number of beds
New Hall Hospital, Bodenham, Salisbury (additional beds)	13
Ipswich Surgical Home, Suffolk (additional beds)	12
The Grosvenor Nuffield Hospital, Chester (additional beds)	10
The Wessex Nuffield Hospital, Chandlers Ford (additional beds)	12

*Included in list of notifications in *Official Report*, 28 March 1984, columns 219-220.

†Included in list of notifications in *Official Report*, 21 January 1985, column 330.

‡New company purchased site with planning permission—no trace of earlier notification.

New company purchased site with planning permission—but re-notification required because of changes to proposal.

Cremations (Form C)

Mr. Meacher asked the Secretary of State for Social Services if he will take steps to remove the present charge made by doctors for signing form C for cremations.

Mr. Kenneth Clarke: No, for the same reason I gave in my reply to the hon. Member about form B on 13 May at column *34*. However we have recently dispensed with certificate C where the death has occurred in hospital and a post-mortem has been held by a registered medical practitioner of at least five years' standing.

Drug Addicts

Mr. Higgins asked the Secretary of State for Social Services what National Health Service facilities are available in Sussex for the treatment of drug addicts.

Mr. John Patten: I shall let my hon. Friend have a reply as soon as possible.

Prison Hospital Service

Mr. Meadowcroft asked the Secretary of State for Social Services what representations he has had on the relationship between the National Health Service and the prison hospital service.

Mr. John Patten: None recently, though this question is the subject of public discussion from time to time. Various branches of the National Health Service make a significant contribution to prison medical services.

Social Security Review

Mr. Alton asked the Secretary of State for Social Services if he will produce detailed costings of all the proposals in the social security Green Paper.

Mr. Wallace asked the Secretary of State for Social Services what estimate he has made of the expected loss to claimants under the social security Green Paper proposals of contributing towards the cost of rates.

Mr. Whitney: I refer the hon. Members to my hon. Friend's reply to the hon. Member for Dunfermline, East (Mr. Brown) on 6 June at column *241*.

Mr. Freud asked the Secretary of State for Social Services whether any of the new income related benefits contained in the social security Green Paper will be subject to any cash limits.

Mr. Newton: The new social fund will have a fixed annual budget, as stated in the social security Green Paper (volume 2, paragraph 2.112). Cash limits will not apply to income-related maintenance benefits described in the Green Paper.

Mr. Spearing asked the Secretary of State for Social Services what estimate he has made of the effect of his proposal to remove the power of local education authorities to provide reduced cost school meals; and if he will define this term as used in paragraph 4.51 of volume 2 of the "Reform of Social Security".

Mr. Newton: The reference to "reduced cost" relates to the provision in section 22(3)(b) of the Education Act 1980 and the corresponding provision in section 53(3)(b) in respect of Scotland, that a local education authority (LEA) shall remit the whole or any part of any charge that would otherwise be made if, having regard to the particular circumstances of any pupil or class or description of pupils, they consider it appropriate to do so.

Some LEAs are understood to remit part of the charge under this provision, but no separate estimate has been made of the effect of this part of the proposals.

Mr. Nellist asked the Secretary of State for Social Services (1) if he will make it his policy that, if the proposals in the Green Paper, "Reform of Social Security", Cmnd. 9517 are implemented 16 and 17-year-olds will continue to be entitled to supplementary benefit if they are unable to find work;

(2) if he has any plans to review the levels of supplementary benefit payable to 16 and 17-year-olds in the light of the inception of the new extended youth training scheme in 1986.

Mr. Whitney: I refer the hon. Member to my right hon. Friend's reply to the hon. Member for Workington (Mr. Campbell-Savours) on 4 April at column *766* and to paragraph 9.27 of volume 1 of the Green Paper "Reform of Social Security" (Cmnd. 9517).

Limited List Prescribing

Mr. Meadowcroft asked the Secretary of State for Social Services how he intends to distinguish, in monitoring National Health Service drug costs and savings under limited list prescribing between cost reductions due to reduced return on capital for pharmaceutical companies and those due to the introduction of the limited list.

Mr. Kenneth Clarke: Monitoring of the volume and cost of prescriptions in the categories affected by the selected list and information from drug manufacturers will enable us to draw a distinction between savings in the drugs bill resulting from the introduction of selected list prescribing and those resulting from other measures.

Mr. Wilson asked the Secretary of State for Social Services what is the estimated saving in National Health Service drug costs which will ensue in a full year from the introduction of the limited list.

Mr. Kenneth Clarke: £75 million.

Drug Prices

Mr. Meadowcroft asked the Secretary of State for Social Services how many items on the drug tariff have fallen in price during 1985.

Mr. Kenneth Clarke: In the period 1 January to 31 May 1985, a total of 32 items listed in the drug tariff have reduced in price.

Drugs (Hospital Pharmacies)

Mr. Meadowcroft asked the Secretary of State for Social Services (1) whether he will assess the potential savings to the National Health Service by means of hospital doctors prescribing longer courses of drugs through hospital pharmacies for appropriate outpatients and inpatients who are being discharged, rather than arranging for an early prescription from the patient's general practitioner;

(2) whether he has any evidence of a fall in the period for which hospital doctors are prescribing drugs to be dispensed by hospital pharmacies, both for inpatients on discharge and for outpatients, thus requiring general practitioners to prescribe earlier as part of family practitioner services; and what is the additional cost to the National Health Service of this change in policy in the current year.

Mr. Kenneth Clarke: We do not collect information on the length of time for which doctors prescribe. In any case, comparisons between the costs of hospital and general practice pharmacy cannot easily be made. However, our policy on out-patient prescribing—which is clearly understood by health authorities and must be followed by them — is that prescribing responsibility rests with the clinician who is responsible for the patient's clinical care. There should be no attempt to circumvent this policy for any financial reason.

Board and Lodging Payment

Mr. Gale asked the Secretary of State for Social Services if he will list the options that are open to board and lodging claimants aged between 19 and 26 years upon completion of the period for which payment as a boarder is permitted under the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985; if he will detail the full amounts payable to such a claimant under such circumstances either through unemployment or supplementary benefit, personal allowance and non-householder allowance and through housing benefit where appropriate; and if he will make a statement.

Mr. Whitney: A fit unemployed person aged between 19 and 26 without dependants is entitled to supplementary benefit as a boarder for periods which, unless he falls in to one of the excepted categories, are limited. At the end of such periods, supplementary benefit will change to the rate applicable to a non-householder (£22.45 a week for a single person with an addition of £3·30 for those aged 21 or over). This rate also applies where the person goes to live with family or friends. If he takes up rented accommodation the householder rate of £28.05 applies and he is eligible for housing benefit which depends on the level of his rent and rates. If he moves to another area as a boarder he will again become eligible for a further restricted period to the personal expenses allowance of £9.25 plus an allowance for his board and lodgings according to the limit appropriate to that area.

Benefits

Mr. Freud asked the Secretary of State for Social Services what was the average amount of *(a)* housing benefit and *(b)* supplementary benefit received by a student in higher education; and if he will estimate what proportion of student income each figure represented in the last year for which figures are available.

Mr. Whitney: I regret that the information requested is not available.

Mr. Freud asked the Secretary of State for Social Services whether he will list in the *Official Report (a)* the number and percentage of students in higher education who received housing benefit, *(b)* the number and percentage of students in higher education who received supplementary benefit and *(c)* the cost of administering each type of benefit for students in each case in the last year for which figures are available.

Mr. Whitney: Precise information about the number of students receiving benefits is not available. It is estimated that in the last academic year about 200,000 full-time students (roughly 50 per cent. of those living away from home) received housing benefit in term-time and a lesser number in vacations. The cost of administering housing benefit claims from students is not known.

It is estimated that some 100,000 claims to supplementary benefit were made by students in the Christmas and Easter vacations and about 300,000 in the long vacation. These figures include repeat claims and it is not possible to say how many individual students received supplementary benefit during the year. It is estimated that student claims for supplementary benefit cost about £2·5 million to administer.

Doctors (Pay)

Mr. John Mark Taylor asked the Secretary of State for Social Services if he is considering modifying general practitioner remuneration by eliminating item of service payments in favour of increased capitation fees.

Mr. Kenneth Clarke: We are looking at the way in which general medical practitioners are remunerated as part of our current review of the family doctor service.

Diabetics

Mr. Wareing asked the Secretary of State for Social Services what is his Department's policy on the use of disposable plastic syringes by diabetics requiring insulin injections.

Mr. John Patten: If a consultant considers it clinically necessary for a particular patient to use these syringes, which are designed for single use, they may be supplied on the National Health Service through the hospital service. They are not available on GP's prescriptions.

Mr. Wareing asked the Secretary of State for Social Services if he will list the number of *(a)* specialist diabetic physicians and *(b)* specialist diabetic nurses currently engaged with each of the area health authorities in England and Wales.

Mr. Kenneth Clarke: We do not have this information centrally.

National Insurance

Mr. Evans asked the Secretary of State for Social Services how many companies or individuals were prosecuted during 1984 by his Department for non-payment of national insurance contributions on behalf of their employees; and what were the comparable figures for each of the previous five years.

Mr. Whitney: The table shows the number of companies and individuals who were prosecuted for non-payment of national insurance contributions on behalf of their employees.

	Criminal prosecutions for non-payment of Class 1 NI contributions	*Civil actions to recover unpaid Class 1 NI contributions*
1979	260	527
1980	307	836
1981	461	945
1982	808	1,137
1983	1,625	1,038
1984	2,278	976

Mrs. Sylvia Jones

Mr. Jessel asked the Secretary of State for Social Services if he will investigate how Mrs. Sylvia Jones came to be employed for 11½ years in Epsom's mental hospitals as a nurse, although she was unqualified; whether there are other unqualified people being similarly employed; and whether patients are known to have suffered as a result of Mrs. Jones' lack of qualifications.

Mr. Kenneth Clarke: I understand that the Mid-Surrey health authority is taking active steps to establish the full facts of this case and to review its appointment procedures for nursing staff within the District. We have asked for a full report on this as soon as the facts have been established and will consider in the light of this what further action may need to be taken.

Youth Training Scheme (Benefit)

Mr. Nellist asked the Secretary of State for Social Services if he will list the number of 16 and 17-year-olds who have had their supplementary benefit payment cut as a result of not accepting a place on the youth training scheme since September 1984.

Mr. Whitney: The number of 16 and 17-year-olds who had their supplementary benefit reduced because they had, without good cause, refused a place on the youth training scheme during the period 26 September 1984 to 7 May 1985 (the latest date available) was 309.

Mr. Terry Fields asked the Secretary of State for Social Services whether 16 and 17-year-olds will continue to be eligible to receive supplementary benefit if they are unable to find work but have refused a place on the youth training scheme; and if he will make a statement.

(2) whether, in the case of a claimant of supplementary benefit refusing to take part in a Government training scheme, he or she is deemed to be unavailable for work and therefore not entitled to claim benefit; and if he will make a statement.

Mr. Whitney: Under section 20(1) *(e)* of the Social Security Act 1975 a person is disqualified for receiving unemployment benefit for a period not exceeding 6 weeks if he has, without good cause, refused a reasonable opportunity of receiving training approved by the Secretary of State in his case for the purposes of becoming or keeping fit for entry, or return to, regular employment. Supplementary benefit is reduced, normally by 40 per cent, of the personal scale rate, for the same period in accordance with regulation 8 of the Supplementary Benefit (Requirements) Regulations 1983. These provisions apply equally to the youth training scheme and to other forms of approved training. A person is not deemed to be unavailable for work solely on the basis of his refusing an offer of training.

Pensioners

Ms. Harman asked the Secretary of State for Social Services how many pensioners from ethnic minority groups he estimates there will be in *(a)* 1987, *(b)*1991 and *(c)*2001; and how many of these will be of (i) Asian, (ii) Cypriot, (iii) Chinese and (iv) Afro-Caribbean origin.

Mr. John Patten: The only available projections of the population in ethnic minority groups are those based on mid-1976 population estimates and published in Population Trends 16 in 1979. These projections cover the whole population of New Commonwealth and Pakistan ethnic origin and show that by 1986 the number aged 65 and over in Great Britain would probably be within the range 53-55,000, while in 1991 the number would probably be within the range 73-78,000—depending on what was assumed about the future level of immigration and emigration. These figures are consistent with the latest information from the labour force survey on the present size of ethnic minority groups and published in OPCS Monitor PP1 84/5 in December 1984.

Nurses and Midwives (Pay)

Mr. Kennedy asked the Secretary of State for Social Services if he will list in the *Official Report* the net financial effect in terms of budgetary savings which will have to be found from existing resources for each of the health authorities in England and Wales as a result of Her Majesty's Government's decision on the recommendations of the Review Body on Nurses and Midwives Pay.

Mr. Kenneth Clarke: The Government's decision on nurses' and midwives pay will cost health authorities in England £173 million in 1985-86 — a 5·6 per cent. increase on the paybill for these groups. Health authority cash limits for 1985-86 included a cash increase of 5½ per cent. or over £500 million. Health authorities n England will also have available to them resources released by the growing programme of cost improvements which are planned to amount to about £150 million in 1985-86.

It will be for individual health authorities to calculate the cost of the pay awards to themselves and settle their funding arrangements in the light of local circumstances.

Health (Social Inequalities)

Mr. Dobson asked the Secretary of State for Social Service if he will make a statement on the actions taken by his Department since 1979 to reduce social inequalities affecting health.

Mr. Kenneth Clarke [*pursuant to his reply*, 6 June 1985, c. *238*]: The inequalities and deficiencies in health

care with which we seek to deal include not only inequalities between social groups but also inequalities between localities and between different services and types of care. The Government's policy is aimed at directing services towards areas of greatest need and towards the most vulnerable groups of people, and will benefit those whose health needs may arise from social inequalities.

NORTHERN IRELAND

State Pensions

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is the number of men and women residing in Northern Ireland who are in receipt of state retirement pensions.

Mr. Chris Patten: The estimated number in receipt of contributory retirement pensions is 203,000.

Driving Tests

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland what is the current length of time which elapses between applying for and sitting a test for a full driving licence in Northern Ireland.

Mr. Chris Patten: Seven weeks on average.

Roads (Construction and Maintenance)

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland how the present level of expenditure on the construction and maintenance of roads in Northern Ireland compares with the level in 1978-79.

Mr. Chris Patten: The information is as follows:

	1978-79 £ million	*1984-85 £ million*
Construction	27·8	20·9
Maintenance	31·7	46·5
TOTALS	59·5	67·4

Cycle Paths

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland whether any provision is made for cycle paths in the programme of roads expenditure by his Department for 1985-86.

Mr. Chris Patten: Yes. Provision is made for the upkeep of cycle paths.

Transport Bill

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland if he has yet reached a conclusion as to whether the provisions of the Transport Bill will at some future time be applied in Northern Ireland.

Mr. Chris Patten: I refer the hon. Gentleman to the answer I gave him on 20 February 1985 at column *505*. I continue to monitor the progress of the Transport Bill and will in due course consider the application of similar provisions to Northern Ireland, where relevant.

Labour Statistics

Mr. John David Taylor asked the Secretary of State for Northern Ireland what has been the total number of people in employment in Northern Ireland at the end of March in each of the past five years.

Dr. Boyson: The information requested is only available for the first Monday in March of each year and is as follows:

Northern Ireland employees in employment

	Numbers
March 1981	491,160
March 1982	478,690
March 1983	465,180
March 1984	462,570
March 1985	463,870

Conservation

Mr. Archer asked the Secretary of State for Northern Ireland what are the sums spent on the following activities in 1984-85, and projected to be spent on them in 1985-86: *(a)* the identification and notification of areas of special scientific interest by the conservation branch, *(b)* management agreements with the owners/occupiers of areas of special scientific interest land by the conservation branch, *(c)* grants to voluntary bodies for scientific survey work to identify potential areas of special scientific interest and *(d)* grants to voluntary bodies to purchase areas of special scientific interest as nature reserves.

Mr. Chris Patten: The information is as follows:

	1984-85 expenditure	*1985-86 projected expenditure*
(a)	£13,100	£100,000
(b)	nil	nil
(c)	nil	nil
(d)	nil	nil

Strip Searches

Mr. McNamara asked the Secretary of State for Northern Ireland how many strip searches were made of female prisoners in Her Majesty's prison, Armagh, in May; if he will give the number of persons involved and the number of times each person was searched; whether any prison contraband, smuggled item or illegal correspondence was discovered in any search, indicating which items; in how many cases prisoners refused to be searched and had to be restrained while the search was being conducted; and if he will indicate the reasons for the search, namely, making an appearance at Armagh courthouse on remand, attending trial, inter-prison visit or other reasons.

Mr. Scott: During May 1985 a total of 64 searches were carried out on 27 prisoners in Her Majesty's prison, Armagh. Fifteen prisoners were searched once, 10 were searched twice, one prisoner was searched four times, and a life sentence prisoner taking part in a pre-release programme was searched on 25 occasions. This prisoner was offered accommodation in a separate self-contained unit of the prison, which would have eliminated the need for the full reception search procedure, but she preferred to remain located with other prisoners.

No prohibited article was found during these searches, and no prisoner refused to be searched. Searches were carried out in the following circumstances:

	Number
First admission on remand and awaiting trial	10
First admission on sentence and final discharge	11
Attending remand courts (other than Armagh)	6
Bail court appearances	3
Visits to outside hospitals	1
Pre-release programme	21
Home leave scheme	12
Total	64

Nurses and Midwives

Rev. Martin Smyth asked the Secretary of State for Northern Ireland how many vacancies exist in each of the health and social services boards in Northern Ireland for midwives; and what percentage of funded establishment this represents.

Mr. Chris Patten: The information is as follows:

Health and Social Services Board	*Midwife Vacancies*	*Percentage*
Eastern	8	1·43
Northern	5	2·47
Southern	1	0·40
Western	6	2·68

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is the current total cost of the wages, salaries and allowances of nurses and midwives in Northern Ireland.

Mr. Chris Patten: Final accounts for the year ended March 1985 are not yet completed. The total cost of employees' gross taxable pay plus employers' national insurance and superannuation contributions in respect of nurses and midwives for 1984-85 is estimated to be £145·9 million.

TRANSPORT

Bus Services

11. **Mr. Straw** asked the Secretary of State for Transport how many representations he has received concerning the cost of providing bus services following deregulation of buses.

Mr. Ridley: A precise figure is not available but many of the representations I have received about the deregulation of local bus services have made assumptions about the effect of the policy on the cost of providing services.

13. **Mr. Heffer** asked the Secretary of State for Transport what recent representations he has received about the effect on safety standards of the implementation of the Transport Bill.

Mr. David Mitchell: Some people suggested that safety standards might decline. In fact, provisions in the Bill will strengthen safety standards.

15. **Mr. Pike** asked the Secretary of State for Transport what is his assessment of the reduction in revenue support to bus transport expected to arise from the Transport Bill.

17. **Mr. Allen McKay** asked the Secretary of State for Transport what evidence he has that local authority spending on bus services will fall, without a reduction in service, following deregulation of bus services.

24. **Mr. Torney** asked the Secretary of State for Transport what estimate he has made of the effect on local authority expenditure on transport of bus deregulation.

Mr. David Mitchell: The Transport Bill is not concerned with reducing local authority spending on revenue support.

21. **Mr. Frank Cook** asked the Secretary of State for Transport what improvements to safety standards he expects to result from the enactment of the Transport Bill.

Mr. David Mitchell: My right hon. Friend is determined to maintain and tighten safety standards. The Bill contains various provisions to achieve this, in particular,

(a) Traffic commissioners will be able to disqualify unsatisfactory operators for an indefinite period.
(b) Traffic commissioners will be able to require operators to run only specified vehicles.
(c) *Only two vehicles will be permitted on a restricted "O" licence.*
(d) *All buses—not just public service vehicles—will be subject to spot checks and can be prohibited from further use until defects are put right.*

In addition, the number of vehicle examiners will be increased.

23. **Mr. Jim Callaghan** asked the Secretary of State for Transport what recent discussions he has had with local authorities concerning the cost of providing bus services following deregulation of the buses.

Mr. David Mitchell: I have had a number of meetings with local authorities at which the implications of the policy have been discussed. I made clear the Government's view that overall the loss of cross-subsidy should be offset by the gains from more effective use of direct subsidy and by reduced operating costs.

30. **Mr. Roy Hughes** asked the Secretary of State for Transport what evidence he has from the trial areas about the effect on safety standards of the deregulation of bus services.

Mr. David Mitchell: Safety standards have been maintained in the trial areas in Norfolk, Hereford and Worcester and Devon by the vigilance of the traffic commissioners and the vehicle examiners. The Transport Bill is designed to strengthen their powers.

Mr. Andrew F. Bennett asked the Secretary of State for Transport whether he has any evidence concerning the relationship between the size of bus operations and safety standards.

Mr. David Mitchell: I have no evidence that suggests there is any relationship between the size of bus operations and safety standards. Failure rates at annual test, although not a conclusive measure of safety standards, are not significantly different between private companies and the larger public sector operators.

A1 (Cross-over Barriers)

14. **Mr. Leigh** asked the Secretary of State for Transport if he will make a statement on safety on the A1 between London and Newark in the absence of cross-over barriers.

Mrs. Chalker: Overall this part of A1 does not have a higher than average proportion of accidents involving vehicles crossing the central reservation. The need for additional safety fencing on sections of this road is already being examined.

St. Pancras-Sheffield Railway Line

16. **Mr. Flannery** asked the Secretary of State for Transport if, when he next meets the chairman of British Rail, he will discuss the operation of the St. Pancras-Sheffield railway line; and if he will make a statement.

Mr. David Mitchell: The operation of individual lines is for British Rail. But I shall be happy to discuss them if the chairman wishes to raise the matter at one of our regular meetings.

Motorways (Drainage)

18. **Mr. Peter Bruinvels** asked the Secretary of State for Transport whether he has any plans to improve drainage on motorways.

Mrs. Chalker: Yes, improvements are being considered and evaluated as part of the continuing process of developing better designs and construction methods.

Railway Workshop Closures

19. **Mr. Robert Hughes** asked the Secretary of State for Transport whether he had any discussions with British Rail Engineering Ltd. management concerning its plans for workshop closures.

Mr. David Mitchell: The board informed me, and my right hon. Friend the Secretary of State, in advance of its proposals for reducing workshop capacity.

25. **Mr. Park** asked the Secretary of State for Transport whether he has had any discussions with trade unions concerning the proposed redundancies in British Rail Engineering Ltd.

Mr. David Mitchell: No. The proposed reductions in manpower are matters for British Rail and BREL, which are consulting their unions in the normal way.

National Bus Company

20. **Sir William van Straubenzee** asked the Secretary of State for Transport what representations he has received from the National Bus Company as to the effect of the Transport Bill on the pension entitlements of its employees.

Mr. Ridley: The National Bus Company has made clear to me its concern on this matter. I have repeated the Government's commitment to ensuring that the pension funds' assets are adequate at the time of privatisation to discharge their responsibilities. I shall be discussing the matter further with the NBC.

Road Maintenance

22. **Mrs. Virginia Bottomley** asked the Secretary of State for Transport how the present level of expenditure on the construction and maintenance on motorways and trunk roads compares with the levels in 1978-79.

Mrs. Chalker: Expenditure on motorway and trunk road construction and maintenance has risen from £366 million in 1978-79 to a provisional outturn in 1984-85 of £806 million. This represents an increase in cash terms of nearly 120 per cent.

Woolwich Ferry and River Thames Maintenance

26. **Mr. Spearing** asked the Secretary of State for Transport what plans he has for the future operation of the Woolwich free ferry and the maintenance of piers, tunnels and bridges on the River Thames.

Mrs. Chalker: As the hon. Member knows, it is intended that the London boroughs of Greenwich and Newham become responsible for the operation of the ferry and that responsibility for bridges and tunnels passes to the successor authority for the roads concerned.

It is now proposed that, as announced on 6 June, the piers will transfer to the Thames water authority.

Road Safety

27. **Mr. Waller** asked the Secretary of State for Transport when he expects to produce his reply to the report by the Transport Committee on road safety.

Mr. Peter Bruinvels asked the Secretary of State for Transport when he expects to announce his Department's response to the Transport Committee report on road safety published on 16 January.

Mrs. Chalker: My right hon. Friend will be responding shortly.

Basildon (Direction Signs)

28. **Mr. Amess** asked the Secretary of State for Transport what criteria have been used in the location of road signs in Essex and elsewhere incorporating direction to Basildon; and if he will make a statement.

Mrs. Chalker: The criteria are that a primary route destination should be signposted from the previous such destination. So far, following agreement last year that Basildon should be a primary destination, only some place-name signs have been provided, but I have given instructions that the remaining work should be carried out as soon as possible.

Disabled Persons

29. **Mr. Gregory** asked the Secretary of State for Transport what steps are being taken to improve mobility for disabled people.

Mrs. Chalker: We have a continuing programme of measures to improve mobility for disabled people. This includes drawing up standards and guidelines, research and development, publicity and a wide range of other activities. All our work is done in close consultation with disabled people.

One major event, to which I should like to draw the attention of the House, is the "Mobility Roadshow", a motor show for disabled people which my department will

be running for the second time on June 13, 14 and 15 at the transport and road research laboratory at Crowthorne in Berkshire. I hope many hon. Members will be able to find the time to visit the show and see the wide range of developments in this field.

The Minch

31. **Mr. Kennedy** asked the Secretary of State for Transport if, following publication later in the current year of principal charts for the areas including the Minch and west of the Hebrides, he intends to issue further instructions for the purposes of excluding large crude oil carrying tankers from the Minch; and if he will make a statement.

Mr. David Mitchell: I have no powers to make instructions of this sort following the publication of charts carrying information about the area of deep water to the west of the Outer Hebrides which has now been surveyed to modern standards, but I think it would be desirable if large crude oil tankers would take that route.

Motorways (Speed Control)

32. **Mr. Roger King** asked the Secretary of State for Transport whether he is satisfied with the current voluntary speed control of motorway public service vehicle operators.

Mrs. Chalker: The 1984 coach speed survey published last February, referred to in my reply to my hon. Friend for Edmonton (Dr. Twinn) on 23 January at column *416*, showed that the 85th percentile speed for coaches travelling on motorways was 73 mph, though their average speed was under 64 mph. We do not have more recent survey results, but there is certainly still a number of coaches exceeding the speed limit by a substantial margin. I shall not be satisfied until all operators and drivers live up to their responsibilities for compliance with bus and coach speed limits and observe the Bus and Coach Council's voluntary code of practice.

One-person Operated Trains

33. **Mr. Tony Banks** asked the Secretary of State for Transport if his Department had discussions with London Regional Transport before it was decided to extend the practice of one-person operated trains.

Mrs. Chalker: The former London Transport Executive, and the trade unions concerned, reached agreement in principle in 1983 to the extension of one person operation to the whole underground network in due course. The method and timing of its introduction on particular lines are matters for LRT in consultation with the trade unions as appropriate, and subject to the Railway Inspectorate's approval of any physical works and modifications to the rolling stock which may be necessary. The Department were kept informed of LRT's intention to extend one person operation to the east London line where it was introduced successfully on 20 May 1985.

Train Drivers

34. **Dr. Mawhinney** asked the Secretary of State for Transport if he will discuss with the chairman of British Rail the latest information available on the effect of flexible rostering on the number of hours worked per shift by train drivers.

Mr. David Mitchell: My right hon. Friend and I are always willing to discuss with the chairman any subject he wishes to raise.

Driving Test

35. **Mr. Holt** asked the Secretary of State for Transport what plans he has for altering the current driving test arrangements.

Mrs. Chalker: I would refer my hon. Friend to the answers given to my hon. Friend the Member for Leicester, East (Mr. Bruinvels) on 16 April 1985 at column *152* and to the hon. Member for the Isle of Wight on 23 May 1985 at column *533*.

Channel Fixed Link

36. **Mr. Adley** asked the Secretary of State for Transport what factors will most influence his decision on competing bids received by him for the Channel fixed link.

Mr. David Mitchell: The "invitation to promoters" of a Channel fixed link published on 2 April sets out the information required by the two Governments. We shall take into account all the areas covered in that document and any other wider implications that are relevant. The decision will be based on a balance of all these factors.

Road Construction

37. **Mr. Chapman** asked the Secretary of State for Transport what is his latest estimate of the funds allocated to the construction of new roads in 1985-86; and what was the outturn figure for each of the last three years.

Mrs. Chalker: The information requested is as follows:

Expenditure on the construction of new roads in England

£ million

	1982-83	*1983-84*	**1984-85*	*†1985-86*
National (trunk) roads	529	514	569	598
Local roads	407	456	491	502
Total	936	970	1,060	1,100

* Provisional
† Planned.

M3 Motorway

38. **Mr. David Atkinson** asked the Secretary of State for Transport when he expects the southern extension of the M3 motorway to be completed.

Mrs. Chalker: I opened the 10-mile extension of the M3 from Popham to Easton lane, Winchester on 22 May. Subject to the outcome of a public inquiry for the Bar End to Bassett section due to start on 19 June, we hope to be able to complete the motorway by 1989.

Accident Black Spots

39. **Mr. Colvin** asked the Secretary of State for Transport whether he will introduce legislation to enable parish councils to erect cautionary road signs at accident black spots where highway authorities refuse to act.

Mrs. Chalker: No. It is appropriate that the highway authority should have control over any signs erected on roads for which it is responsible.

Private Hire Cars (London)

Mr. Cartwright asked the Secretary of State for Transport what consultations he has undertaken during the past year about the licensing of private hire cars in Greater London; and when he now plans to introduce such a system.

Mr. Michael Spicer: We have received a number of representations both for and against the licensing of private hire cars in London. Having consulted the Metropolitan police and the Motor Insurance Bureau, we have concluded that this question should be investigated as part of the review of taxi and hire car legislation which we proposed to start once the provisions concerning taxis in the Transport Bill are in operation.

Service Stations (Telecommunications)

Mr. Harrison asked the Secretary of State for Transport (1) what checks his officials have made on the telecommunications system at Toddington service station since the last annual inspection held on 28 June 1983;

(2) what checks his officials have made on the telecommunications system at Trowell service station since the last annual inspection held on 11 July 1983;

(3) what checks his officials have made on the telecommunications system at Leicester Forest East service station since the last annual inspection held on 10 February 1983.

Mr. Ridley: None. The three service areas are to be inspected this month.

Local Government (Consultation)

Dr. Cunningham asked the Secretary of State for Transport if he is planning to make any changes to the way in which he consults local government following the judgment in R. *v.* Secretary of State for Social Services: ex parte AMA.

Mr. Ridley: The written judgment is not yet available and I need to consider it thoroughly before commenting.

Cabotage (Italy)

Sir David Price asked the Secretary of State for Transport what representations he intends to make to the Italian Government about their continued denial of cabotage rights to British registered ships in spite of the recommendations of the European Commission; and if he will make a statement.

Mr. Ridley: As the Parliamentary Under-Secretary of State told my hon. Friend in the answer he gave him on 3 June, the European Commission has put to the Council a proposal for a regulation which would, among other things, require all member states to open up their cabotage trades to carriers from other member states. Both when the Council discusses this proposal, and in my bilateral contacts with Italian colleagues, I shall be stressing the importance which this Government attach to the adoption of such a policy.

Ruthenium (Transport)

Mr. Sedgemore asked the Secretary of State for Transport if he is satisfied with the arrangements for transporting ruthenium from Harwell to hospitals in Britain; and if he is further satisfied that all the international atomic energy regulations have been observed over the past five years and that they are currently being observed, in respect of the transport of such material.

Mrs. Chalker: Movements of ruthenium, as of all radioactive materials in this country, are legally required to conform to national regulations based on the standards of the International Atomic Energy Agency. I understand that there have been no consignments of ruthenium from Harwell to hospitals in this country during the past five years.

Midlands Motorway Link

Mr. Corbett asked the Secretary of State for Transport whether he will make a statement on the results of using urea as an alternative to salt as a de-icing agent on midlands links motorways during the winter of 1984-85, detailing the amounts used and the cost compared with salt.

Mrs. Chalker: Urea was successfully used as a de-icing agent on the Midland links viaducts during the 1984-85 winter. The quantity used was 1500 tonnes at a cost of £250,000. A more detailed statement about urea as a de-icing agent will be included in the interim report on the Midland links.

Mr. Corbett asked the Secretary of State for Transport whether he will place a copy of the latest midlands motorway link report in the Library.

Mrs. Chalker: I plan to do so as soon as possible.

M6 (Gravelly Hill Interchange)

Mr. Corbett asked the Secretary of State for Transport whether he will specify the nature of the latest report by Messrs. Maunsell and Partners on maintenance below deck level at the Gravelly Hill interchange (junction 6) of the M6; when it was completed; what was the cost of the contract under which it was done; and whether he will place a copy in the Library.

Mrs. Chalker: My Interim report on the Midland links viaducts will refer to reports produced by our consultants, including those for Gravelly Hill interchange, and copies of those will be placed in the Library of the House.

The commission placed with Messrs. Maunsells and Partners is to act as the Department's consulting engineers on all the structures between Junctions 5 and 7 of the M6. Costs are not identifiable to the Gravelly Hill Interchange in isolation. The total cost of this commission during 1984-85 was £625,000.

Mr. Corbett asked the Secretary of State for Transport whether he will make a statement on the present plans for maintenance and repair of the Gravelly Hill interchange (junction 6) of the M6, listing any complete or partial lane closures due before the end of the year and estimate the likely cost of repairs and maintenance.

Mrs. Chalker: As well as routine maintenance we are planning further installation of gutters beneath deck joints on the carriageways and some work to the joints themselves. All these activities may involve partial lane closures; estimates of cost are not yet available.

Her Majesty's Coastguard

Mr. Corbett asked the Secretary of State for Transport what was by grade *(a)* the authorised establishment and *(b)* numbers in post of Her Majesty's Coastguard by region in 1979, 1982 and 1984; and what for the same years was the authorised budget and spending of Her Majesty's Coastguard.

Mr. David Mitchell: The numbers of approved posts and staff in post for the dates indicated for Her Majesty's Coastguard in total are given by grade in table A. In the past approved posts have not been allocated by grade to Coastguard regions and table B therefore shows only regional totals of staff in post. Both tables include administrative support staff and part-time staff count as half.

The financial provision and expenditure for Her Majesty's Coastguard in the years requested is:

£ million

	Provision	*Expenditure*
1979-80	7·9	8·5
1982-83	15·7	15·6
1984-85	20·3	17·3

Notes:

(i) These figures include the administrative costs of Her Majesty's Coastguard, capital and current programme expenditure on Coastguard services and the Channel Navigation Information Service, and expenditure on civil search and rescue.

(ii) The expenditure for 1984-85 is an estimated outturn.

(iii) Apart from administrative costs, the major expenditure is on civil search and rescue. This is a demand led service and is the major cause of the variance between expenditure and provision.

Table A

Her Majesty's Coastguard—total non-industrial staff by grade

	1 April 1979		*1 April 1982*		*1 April 1984*	
	Approved post	*Staff in post*	*Approved posts*	*Staff in post*	*Approved posts*	*Staff in post*

Unallocated	—	—	—	—	2·5	—
Total	613·5	612·5	593	579	586	578·5

There are also 8,500 Auxiliary Coastguards enrolled as at 31 March 1985.

Table B

Her Majesty's Coastguard—total non-industrial staff by region

	1 April 1979 Staff in post	*1 April 1982 Staff in post*	*1 April 1984 Staff in post*
Headquarters in Training	38·0	38·0	34·5
Aberdeen	80·0	88·5	96·5
Yarmouth	89·0	78·5	74·5
Dover	76·0	86·5	83·5
Falmouth	154·5	107·5	100·5
Swansea	113·5	97·5	99·5
Clyde	61·5	82·5	91·5
Total	612·5	579·0	578·0

Mr. Corbett asked the Secretary of State for Transport whether he will detail the specific responsibilities of Her Majesty's Coastguard for the detection and prevention of drug smuggling; how many officers have specific drug detection training, and how many intercepts *(a)* at sea and *(b)* on or inshore were made for suspected drug-smuggling in each of the past three years.

Mr. David Mitchell: Her Majesty's Coastguard is essentially a live-saving service maintained to undertake the co-ordination of maritime search and rescue. It has no responsibilities specifically for the detection and prevention of drug smuggling. Accordingly, no officers are trained for such duties nor have any intercepts for suspected drug smuggling been made during the past three years.

Her Majesty's Coastguard affords full co-operation to the Board of Customs and Excise and to other law enforcement authorities.

London Docklands Light Railway

Mr. Spearing asked the Secretary of State for Transport what criteria he will adopt in assessing whether the operation or ownership of the London docklands light railway should be transferred to a non-public body.

Mrs. Chalker: My right hon. Friend will reach a decision, in agreement with my right hon. Friend the Secretary of State for the Environment, on what course is most in the public interest.

Mr. Spearing asked the Secretary of State for Transport what total estimated public investment there will have been on the completion in working order of those sections of the London docklands light railway currently authorised by Parliament.

Mrs. Chalker: I expect the cost of the docklands light railway authorised by the London Docklands Railways Acts 1984 and 1985 (Tower Hill to Island Gardens and Poplar to Stratford) to be close to the cash limit of £77 million.

Mr. Spearing asked the Secretary of State for Transport what requests or instructions he has made to London Regional Transport concerning the level and structure of fares and availability of the current system of travel cards on the London docklands light railway.

Mrs. Chalker: My right hon. Friend gave the chairman of LRT general guidance on fares policy in his statement of objectives dated 20 July 1984, on 23 July 1984 at columns *373-74*. We have made no requests and given no instructions specifically related to the docklands light railway.

Mr. Spearing asked the Secretary of State for Transport what plans have been presented to him and what requests he has made to London Regional Transport concerning the extension of the London docklands light railway to the area of the royal docks.

Mrs. Chalker: My right hon. Friend has neither requested nor received any proposals for such an extension. I understand that London Regional Transport and the London Docklands Development Corporation are preparing plans for submission to the Government in due course.

Motorways (Lighting)

Mr. Peter Bruinvels asked the Secretary of State for Transport what assessment he has made in the course of his review of the lighting requirements of motorways and, in particular, the M25 of studies in Belgium of the correlation between low lighting levels and enhanced incidence of accidents; and if he will make a statement.

Mrs. Chalker: The results of the Belgian study are subject to some reservations but their trend is similar to that identified in a transport road research laboratory study for 30 mph roads. Due account is being given to this conclusion in the Department's review of motorway lighfing.

Aerial Spraying

Mr. Ron Davies asked the Secretary of State for Transport within how many feet of *(a)* a dwelling house, *(b)* a garden, *(c)* a nature reserve, *(d)* a school or its grounds and *(e)* a hospital, any crop spraying operation may be carried on from the air; and which occupiers or users of buildings are notified in advance.

Mr. Michael Spicer: The Civil Aviation Authority imposes the following requirements on aerial crop spraying operators:

(a) they must not fly within 200 ft of dwelling houses and gardens, and all occupiers of adjacent land must be notified in advance, in writing.

(b) the Nature Conservancy Council must be consulted before spraying within ¾ nautical mile of a national nature reserve or site of special scientific interest.

(c) advance warning must be given to any school, hospital or similar institution within 500 ft of a potential flight path.

Roads and Motorways (Study)

Mrs. Dunwoody asked the Secretary of State for Transport if he will place copies of the joint department and local authority study on responsibilities for national roads and motorways in the Library.

Mr. Ridley: I have done so today.

Oxford Circus (Fire)

Mrs. Dunwoody asked the Secretary of State for Transport what is the latest estimate of the cost to London Regional Transport of the fire at Oxford Circus on 23 November 1984.

Mr. Ridley: The cost of bringing the station into operation after the fire is now estimated at £2·4 million. The cost of additional work to refurbish the station to current standards is estimated to be £2·75 million. The net cost to LRT is not yet known as it is the subject of insurance claims.

Mrs. Dunwoody asked the Secretary of State for Transport if he will publish the inspector's report into the fire at Oxford Circus underground station last autumn.

Mr. Ridley: I have received reports from LRT and the London Fire Brigade on their investigation of the fire at Oxford Circus underground station. I understand that LRT propose to issue a statement about its findings as soon as it is ready to do so. The Railway Inspectorate will be reporting to me on the measures being taken to prevent a recurrence when it has completed its current discussions with LRT and LFB on the implementation of the latter's recommendations. Since no formal inquiry under the railway legislation was ordered into the incident there will be no published report by the inspectorate.

Okehampton Bypass

Mr. Andrew F. Bennett asked the Secretary of State for Transport whether it is his intention to proceed with the northern route of the Okehampton bypass.

Mrs. Chalker: It is too early to make a firm announcement.

Written Answers to Questions

Tuesday 11 June 1985

HOME DEPARTMENT

Video Works (Classification Authority)

Mr. Lawrence asked the Secretary of State for the Home Department when he will lay before Parliament his proposals for the designation of persons to act as the authority responsible for making arrangements for the classification of video works under the Video Recordings Act 1984; and if he will make a statement.

Mr. Brittan: I have today laid before both Houses my proposals for the designation under section 4(1) of the Video Recordings Act 1984 of those persons who on designation will be the authority responsible for the matters set out in that section of the Act. I propose to designate the Earl of Harewood, the Lord Birkett, Miss Monica Sims and Mr. James Ferman, respectively the president, vice-presidents and director of the British Board of Film Classification (formerly the British Board of Film Censors). The board will be responsible for determining whether or not video works are suitable to be classified, having special regard to the likelihood of classified video works being viewed in the home, and for carrying out the other arrangements specified in section 4(1) of the Video Recordings Act.

I have placed in the Library the text of a letter I intend to send at the time of designation to each member of the authority. Attached to the letter are the Video Appeals Committee provisions containing the arrangements for appeals, in accordance with section 4(3) of the Act, against determinations by the board, with which I am satisfied, and the tariff of fees which I have approved for the purposes of section 4(5) and (6) of the Act.

My right hon. Friend the Secretary of State for Scotland and I propose to bring the criminal provisions of the Act into force on 1 September 1985 in respect of all video works where a video recording containing the video work has not been sold, let on hire or offered for sale or hire in the United Kingdom to the public before that date.

We intend next to bring those provisions of the Act into force for remaining classes of works in a series of stages. This is to allow sufficient time for the classification of existing video works to be undertaken before dealings in them become liable to the criminal sanctions for which the Act provides. Under this scheme, those video works which have caused most concern will be liable to be classified in the first stage. The stages referred to above are as follows:

1 September 1986: all existing works which are predominantly in English except those which are substantially the same as a moving picture produced on showing a film registered on or after 1 January 1940 under section 9 of the Films Act 1960 or previous comparable enactments.

1 March 1987: all works predominantly in English except those which are substantially the same as a moving picture produced on showing a film registered between 1 January 1940 and 31 December 1979.

1 September 1987: all works predominantly in English except those which are substantially the same as a moving picture produced on showing a film registered between 1 January 1940 and 31 December 1974.

1 March 1988: all works predominantly in English except those which are substantially the same as a moving picture produced on showing a film registered between 1 January 1940 and 31 December 1969.

1 September 1988: all remaining works, including foreign language works.

I propose to lay before Parliament very shortly labelling regulations, under section 8 of the Act, to come into effect on 1 September 1985.

Prisons

Mr. Dicks asked the Secretary of State for the Home Department if he will give details of the recreational facilities provided in each new prison opened since 1979 and the cost of such provision.

Mr. Mellor: The cost of providing recreational activities such as television, reading and games within general house association areas cannot be separately identified. At Her Majesty's prison Frankland a sports hall of about 1,249 sq m and a sports field of about 46,000 sq m have been provided at a cost, at February 1981 prices, of about £0·86 million. Security perimeter and lighting to the sports field cost an additional £0·53 million. At Her Majesty's prison Wayland a sports hall of about 1,162 sq m and a sports field of about 58,200 sq m have been provided at a cost, at December 1984 prices, of about £0·69 million. Security perimeter and lighting to the sports field cost an additional £0·42 million.

Mr. Parvaiz Khan

Mr. Leighton asked the Secretary of State for the Home Department (1) if he will make a statement on the circumstances in which Mr. Parvaiz Khan received injuries whilst in custody at the Old Bailey on 22 May;

(2) if he will make a statement on the circumstances in which Mr. Parvaiz Khan was injured on Wednesday 22 May during the lunchtime adjournment at his trial at the Old Bailey.

Mr. Mellor: The incident is being investigated by the City of London police and it would not be appropriate for me to comment at this stage.

Local Government (Consultation)

Dr. Cunningham asked the Secretary of State for the Home Department if he is planning to make any changes to the way in which he consults local government following the judgment in R. v. Secretary of State for Social Services; ex parte AMA.

Mr. Mellor: This was a case concerning housing benefit. We shall need to study the written judgment, which is not yet available, before we can decide what the implications for the Department might be.

Police National Computer

Mr. Cohen asked the Secretary of State for the Home Department if he will list the number of entries in each of the indexes of the police national computer and the number of accesses to those indexes over the last convenient period of time.

Mr. Giles Shaw: The number of entries in each of the police national computer indexes at 18 May 1985 and the number of accesses by terminals to those indexes in the week ending 18 May 1985 were as follows:

Index	*Number of entries*	*Number of accesses*
Stolen and suspect vehicles	349,620	*380,373
Chassis, engine and plant numbers	542,713	19,066
Vehicle owners	35,610,660	*380,373
Criminal names	4,974,479	†‖172,648
Fingerprint	3,512,434	†20,549
Convictions	467,377	‡0
Wanted and missing persons	109,659	‖170,234
Disqualified drivers	298,436	‖29,015
Crime pattern analysis	¶11,500	¶1,000
Major investigations	58,148	17,480

* No separate figures are kept. Most on-line transactions involve access to both files.

† Includes some 5,000 criminal names transactions which display fingerprint data.

‡ Not yet live.

‖ Includes multiple index inquiries (140,000).

¶ Approximate.

Mr. Cohen asked the Secretary of State for the Home Department if he will list the number of entries in each of the sub-categories of the stolen and suspect vehicle index of the police national computer and the maximum and minimum number of entries in each of those sub categories over the last year.

Mr. Giles Shaw: The number of entries in each of the sub-categories of the stolen and suspect vehicle index of the police national computer, together with the maximum and minimum number of entries for the previous 12 months, are as follows:

Category	*1 June 1985*	*Maximum in previous 12 months*	*Minimum in previous 12 months*
Lost or Stolen	256,943	256,943	220,277
Obtained by Deception	553	557	508
Found or Apparently Abandoned	23,095	24,651	19,693
Removed into Police Custody	10,322	10,596	9,542
Removed by the Police from One Street to Another Street	294	401	100
Repossessed by Finance Company	93	125	76
Suspected of being Involved in Particular Incident for example Crime	3,140	3,150	2,285
Owned or Used by Police	6,296	6,815	6,296
Of Interest to the Police for example Owned by Known Criminals or Missing Persons	35,094	35,800	33,724
Seen or Checked by the Police in Noteworthy Circumstances (for example at Night in an Area where a Series of Crimes is under Investigation)	11,647	12,285	7,506
Details Not to be Passed Over Open Radio (for example, Police Vehicles Used in Observation Duties)	3,855	3,937	3,799

Mr. Cohen asked the Secretary of State for the Home Department if he will list the number of entries in each of the sub-categories of the wanted and missing person's index of the police national computer and the maximum and minimum number of entries in each of those sub-categories over the last year.

Mr. Giles Shaw: The number of entries in each of the sub-categories of the wanted and missing person's index on the police national computer, together with maximum and minimum figures for the 12-month period ending may 1985, are as follows:

Category	*May 1985*	*Maximum in previous 12 months*	*Minimum in previous 12 months*
Wanted Persons	29,188	29,218	28,872
Failed to Appear in Court	19,327	20,505	19,327
Suspected of Offence	3,676	3,707	3,560
Impending Proceedings	137	137	30
Deserter from Armed Forces	10,339	10,411	10,339
Location desired for example for service of summons	39,314	40,829	35,666
Missing	2,089	2,152	1,816
Found	17	42	12
Absentee from Local Authority Care	639	807	571
Absconded from Hospital	55	55	39
Absconded from Youth Custody	90	90	79
Absconded from Prison	365	376	339
Absconded from Remand	35	36	27
Absconded from School	117	130	110
Absconded from Detention	2	7	1
Recalled to Youth Custody	2	12	2
Recalled to Prison	226	238	186
Recalled to Detention	0	0	0
Notify if in Custody	162	441	162

Police Complaints Commissioner

Mr. Austin Mitchell asked the Secretary of State for the Home Department what was the cost of decorating the premises being prepared for the Police Complaints Commissioner.

Mr. Giles Shaw: Final accounts for fitting out and decorating the Police Complaints Authority's premises have yet to be received. I shall write to the hon. Member in due course.

Prison Statistics

Mr. Skinner asked the Secretary of State for the Home Department how many *(a)* male and *(b)* female prisoners are living (i) two to a cell and (ii) three to a cell at the latest available date.

Mr. Mellor: On 12 May there were 12,492 males and 208 females held two to a cell, and 4,968 males and no females held three to a cell.

Mr. Skinner asked the Secretary of State for the Home Department (1) what is the total number of inmates in youth custody centres at the latest available date;

(2) what is the total prison population at the latest available date.

Mr. Mellor: On 31 May there were 46,352 persons in prison department establishments in England and Wales, of whom 7,014 were in youth custody centres.

Syrian Embassy (Bomb Incident)

Mr. Latham asked the Secretary of State for the Home Department whether he will make a statement on the incident involving a bomb outside the Syrian embassy on 4 June; and whether any Arab terrorist group has claimed responsibility for it.

Mr. Brittan: During the evening of 3 June staff from the Syrian embassy noticed a bag on the steps of the embassy in Belgrave square, London. They thought it suspicious and sought assistance from the police. It was found to be an explosive device and an explosives officer carried out a controlled explosion to disrupt its initiating mechanism. On examination it was found that its detonator had previously exploded, but failed to set off the explosive to which it was attached. There has been no verifiable claim of responsibility and police inquiries are continuing.

Prison Hospitals (Complaints Procedure)

Mr. Meadowcroft asked the Secretary of State for the Home Department whether he plans to introduce a complaints system for prison hospitals similar to that proposed for National Health Service hospitals in the Hospital Complaints Procedure Bill.

Mr. Mellor: No.

Leeds Prison

Mr. Meadowcroft asked the Secretary of State for the Home Department whether he will make a further statement on the extension of Leeds prison in the light of the redesignation of Hull and Thorp Arch institutions.

Mr. Mellor: It is intended to go ahead with an extension of Leeds prison subject to the outcome of an inquiry on road closure proposals to be held on 19 June at the Civic Hall, Leeds, under section 209 of the Town and Country Planning Act 1971.

Prisoners (Diet)

Mr. Wheeler asked the Secretary of State for the Home Department when the dietary scale for feeding prison inmates was last reviewed; and whether the scale is in accordance with current nutritional standards.

Mr. Brittan: The dietary scale for the inmates of penal establishments in England and Wales was reviewed by a prison department working party last year. The review showed that the diet was on the whole satisfactory but that some minor changes could usefully be made to the scale to make the food more palatable and to bring the scale into line with the recommendations of the "Report of the National Advisory Committee on Nutrition Education 1983" and the "Report on Diet and Cardiovascular Disease" issued by the Committee on Medical Aspects of Food Policy. Copies of the working party's report have been placed in the Library. Arrangemens are in hand to bring the new scale into use later this year.

Drug Addicts

Mr. Wheeler asked the Secretary of State for the Home Department whether he will elaborate on the information provided to the Home Affairs Committee on the number of narcotic drug addicts notified to his Deprtment during 1984.

Mr. Brittan: Information for 1984 on notified drug addicts seizures of controlled drugs and drug offenders will be published in a Home Office statistical bulletin during the summer. Some provisional information on new addicts is, however, available now. This confirms the indications of the likely level of increase given in the recent Home Office publication "Tackling Drug Misuse: A Summary of the Government's Strategy", and in my hon. Friend the Parliamentary Under-Secretary of State's evidence to the Select Committee on Home Affairs. The provisional figure for new addicts notified during 1984 is 5,370 a 28 per cent. increase on 1983 (4,186). This was the fourth successive year in which there has been a substantial increase, although the increase was less than the 50 per cent. rise between 1982 and 1983. The table gives the provisional numbers of new addicts notified in each police force area in 1984. Corresponding figures for the years 1978 to 1983 are given in table 3.11 of "Statistics of the Misuse of Drugs, United Kingdom, Supplementary Tables 1983", a copy of which is in the Library. The proportion of new addicts who were reported as addicted to heroin, alone or with other drugs, was about 90 per cent. in 1984, continuing the steady increase in this proportion during the last six years—it was about 60 per cent. in 1978. Indications are that notifications of former addicts also increased by about a quarter between 1983 and 1984.

ATTORNEY-GENERAL

Overseas Development Administration (Document Leaks)

Mr. Foulkes asked the Attorney-General if the investigation of possible offences in respect of documents alleged to have been leaked from the Overseas Development Administration has been completed; and if he will make a statement.

The Attorney-General: Investigations which have been carried out by the Overseas Development Administration have resulted in an admission by a junior official of that Department, Mr. Geoffrey Dennis, that he had communicated a number of the Department's documents to an hon. Member of this House to whom he was not authorised to communicate them. The papers on the case were referred to the Director of Public Prosecutions, who in turn consulted me, for consideration of the possible prosecution of Mr. Dennis for an offence under the Official Secrets Acts. In the circumstances of this case it was decided that it was not necessary to have recourse to criminal proceedings.

PRIME MINISTER

EC (Budgetary Control)

Q37. **Mr. Teddy Taylor** asked the Prime Minister if she remains satisfied with the progress made in providing machinery to enforce strict budgetary control in the spending of the Common Market in accordance with the decisions made at the Fontainebleau Council of Ministers meeting; and if she will make a statement.

The Prime Minister: The first stage in respect of 1986, the reference framework, is due to be discussed at the ECOFIN council on 11 June.

Soviet Jewry

Q40. **Mr. Latham** asked the Prime Minister whether she will make a statement on her meeting arranged for 12 June with the delegates to the conference of parliamentary spouses for Soviet Jewry; and what action she hopes will ensue to assist Soviet Jews who wish to emigrate to Israel.

The Prime Minister: My meeting with the delegates to this conference will provide an opportunity to reiterate the Government's commitment to the cause of human rights and individual freedoms and to express our concern about the many Soviet Jews who have applied to emigrate and who are not allowed to do so. These and other matters touching on human rights in the Soviet Union are regularly raised by British Ministers with Soviet representatives. We shall ensure that the subject continues to figure on the East-West agenda until the Soviet Union lives up to its international commitments in this important area.

Falkland Islands (Fishing)

Q76. **Mr. Dalyell** asked the Prime Minister what representations Her Majesty's Government have received from Lord Shackleton about the future of fishing in the area of the Falklands.

The Prime Minister: The noble Lord, Lord Shackleton, has from time to time made public statements giving his views on Falkland's fisheries.

Engagements

Mr. Holt asked the Prime Minister if she will list her official engagements for Tuesday 11 June.

Mr. Pike asked the Prime Minister if she will list her official engagements for Tuesday 11 June.

Mr. Parry asked the Prime Minister if she will list her official engagements for Tuesday 11 June.

The Prime Minister: This morning I had meetings with ministerial colleagues and others. I was present at Victoria station to meet President de la Madrid of Mexico at the beginning of his state visit to this country. In addition to my duties in this House I shall be having further meetings later today. This evening I shall be attending a state banquet given by Her Majesty the Queen in honour of President de la Madrid.

King Hussein of Jordan (Meeting)

Mr. Parry asked the Prime Minister if she will make a statement on her recent meeting with King Hussein of Jordan.

The Prime Minister [*pursuant to her reply*, 7 June 1985, c. *263*]: I had a useful exchange of views with King Hussein on 7 June on bilateral and regional topics. We noted with satisfaction the warm and close ties between our two countries and reviewed latest developments in the search for peace in the middle east. I reiterated our full support for King Hussein's initiatives to bring about negotiations for a peaceful solution on the basis of UN Security Council resolutions 242 and 338.

WALES

Dental Technicians

Mr. Gregory asked the Secretary of State for Wales how many dental technicians *(a)* in number and *(b)* whole time equivalents were employed by health authorities in Wales to 30 September 1984; and what conditions apply for private contract work.

Mr. Wyn Roberts: As at 30 September 1984, 48 dental technicians (whole-time equivalent 47·2) were employed by health authorities in Wales. There is nothing to prevent dental technicians undertaking private contract work but this must not adversely affect the service they give to the NHS.

Stray and Killer Dogs

Mr. Geraint Howells asked the Secretary of State for Wales if he is satisfied with the operation of the present legislation regarding stray and killer dogs; and if he will make a statement.

Mr. Nicholas Edwards: The consultation paper published last November records that the Government favour changes in the law that will promote responsible dog ownership.

TRADE AND INDUSTRY

Textile and Clothing Industry

78. **Mr. James Lamond** asked the Secretary of State for Trade and Industry what estimate he has made of the effect on jobs in the United Kingdom textile and clothing industry of the accession to the EEC of Spain and Portugal.

Mr. Trippier: None. Any such estimate would be highly speculative. The existing restrictions on certain textile and clothing imports from Spain and Portugal to the Community market will, under agreed transitional arrangements, be phased out over a period of up to four years. Much will depend on the ability of United Kingdom firms to anticipate the effects of their accession as well as other developments occurring in the pattern of trade in these goods.

Burdens on Business

79. **Mr. Colvin** asked the Secretary of State for Trade and Industry when the recommendations of the report on burdens on business are likely to be implemented.

Mr. Trippier: My right hon. and noble Friend the Minister without Portfolio is leading our drive to follow the recommendations up with a view to reaching early decisions.

Postage Stamps

Mr. Murphy asked the Secretary of State for Trade and Industry if consideration has been given to the extension of the right to sell postage stamps from retail outlets not incorporating a post office; and if he will make a statement.

Mr. Norman Lamont: The production and sale of postage stamps are the operational responsibility of the Post Office, which I understand places no restrictions on their resale.

Mr. Bill Cockburn

Mr. McWilliam asked the Secretary of State for Trade and Industry if he will make a statement on the circumstances in which Mr. Bill Cockburn, executive Post Office board member for operations, accepted also a post as director of Vat Watkins Ltd.; and if he will make a statement.

Mr. Norman Lamont: Mr. Cockburn accepted appointment to Vat Watkins Ltd. as a non-executive director after seeking my right hon. Friend's prior approval in accordance with schedule 1 to the Post Office Act 1969.

Nationalised Industries (Directors)

Mr. McWilliam asked the Secretary of State for Trade and Industry if there is any restriction on executive directors of nationalised industries for which he is responsible taking up additional board appointments in private industry.

Mr. Norman Lamont: Under the legislation applying respectively to a British Shipbuilders, the British Steel Corporation and the Post Office, my right hon. Friend is required to satisfy himself that, upon appointment, a

member of the board will have no such financial or other interest as is likely to affect prejudicially the exercise and performance of his functions as a board member. Subsequently, board members are required to obtain my right hon. Friend's prior approval before accepting directorships.

Mr. McWilliam asked the Secretary of State for Trade and Industry if he will list the executive directors of nationalised industries for which he is responsible who additionally are directors of private companies together with the nationalised industry which employs them and the private companies of which they are directors.

Mr. Norman Lamont: The following have company directorships in the private sector (excluding those where the board member is a nominee of the corporation or an associate company):

British Shipbuilders

Mr. J Graham Day (Chairman and Chief Executive) is a non-executive director of Misener Holdings Ltd.

British Steel Corporation

Sir Robert Haslam (Chairman) is part-time Chairman of Tate and Lyle plc.

Mr. Sambrook is Chairman of the Iron and Trades Insurance Group.

Post Office

Mr. W. Cockburn (Member for Royal Mail Operations) is a non-executive director of V A T Watkins Ltd.

Mr. McWilliam asked the Secretary of State for Trade and Industry if he has issued guidance to executive board members of nationalised industries for which he is responsible about their rights to accept in addition directorships of private companies.

Mr. Norman Lamont: Board Members of nationalised industries for which my right hon. Friend is responsible are made aware on appointment of their obligations with regard to accepting directorships.

Post Office

Mr. McWilliam asked the Secretary of State for Trade and Industry if he has appointed any part-time executive directors to the Post Office Board.

Mr. Norman Lamont: All members of the Post Office Board are appointed by my right hon. Friend. The present part-time members are:

Miss E Cole
Sir Clifford Cornford KCB
Mr. D O Gladwin CBE JP
Mr. D Hodson
Mr. P E Moody CBE
Mr. S Wainwright CBE

Samanala Wewa (Dam)

Mr. Gould asked the Secretary of State for Trade and Industry if he will ensure that all the necessary credit and aid facilities are made available to ensure that British contractors are able to sign the contract with the Sri Lankan Government for the construction of the hydro-electric dam at Samanala Wewa.

Mr. Norman Lamont: The provision of aid and credit facilities in support of British contractors in pursuit of this contract is currently under consideration. The case involves complex issues and a final decision will only be taken when all aspects of the case have been thoroughly examined.

Manufactures (Exports)

Mr. Teddy Taylor asked the Secretary of State for Trade and Industry what was the increase in the value of Britain's exports of manufactures and all goods and services, respectively, to France, Germany, Holland, Denmark, the Republic of Ireland, Belgium, Japan and the United States of America, respectively, between 1979 and 1984, expressed in percentage terms.

Mr. Norman Lamont: Data relating to exports of manufactures and total goods are in the table. Information on services for individual countries is not available but the overall increase between 1979 and 1984 was 46 per cent. compared with 50 per cent. and 73 per cent. for manufactures and total goods respectively.

Increase in Value of United Kingdom Exports 1979-1984

	Manufactures	*Visible*
France	50	134
F R Germany	78	77
Netherlands	33	100
Denmark	23	18
Irish Republic	13	33
Belgium/Luxembourg	49	61
Japan	53	53
United States	116	154

Fairey Engineering Ltd.

Mr. Dalyell asked the Secretary of State for Trade and Industry what is the current status of the permission given to Fairey Engineering Ltd. to tender to refurbish a research nuclear reactor near Santiago; and if he will make a statement.

Mr. Butcher: I shall reply to the hon. Member as soon as possible.

NATIONAL FINANCE

Government Expenditure

Mr. Merchant asked the Chancellor of the Exchequer what was the total Government expenditure as a percentage of gross domestic product in the Organisation for Economic Co-operation and Development definition in the years 1982, 1983 and 1984.

Mr. Peter Rees: The OECD definition expresses total Government outlays as a percentage of gross domestic product. Government outlays mainly consists of current disbursements and gross capital formation. This definition is narrower than that used for public expenditure.

On the OECD definition, Government outlays were 43·3 per cent. of GDP in 1982 and 43·1 per cent. in 1983. Figures for 1984 are not yet available.

Local Government (Consultation)

Dr. Cunningham asked the Chancellor of the Exchequer if he is planning to make any changes to the way in which he consults local government following the judgment in R. *v.* Secretary of State for Social Services: ex parte AMA.

Mr. Peter Rees: The written judgment is not yet available and I would need to consider it thoroughly before commenting.

Value Added Tax

Mr. Lester asked the Chancellor of the Exchequer if he will list the practical difficulties which he has identified as being involved with the possible raising of the value added tax threshold.

Mr. Hayhoe: The major obstacle to any significant increase in the VAT registration threshold is the EC sixth VAT directive, which restricts increases in the threshold to those which maintain its value in real terms. The increase to £19,500 announced in this year's Budget was the maximum permissible within that restriction.

Drugs Smuggling

Mr. Rowe asked the Chancellor of the Exchequer whether he will increase the Customs and Excise resources dedicated to the prevention of drugs smuggling.

Mr. Hayhoe: I recognise the considerable contribution made by Customs and Excise officers to the prevention of drugs smuggling. I have decided to authorise Customs and Excise to appoint 50 additional key staff to enable it to increase its highly successful force of specialist investigators. I do not underrate the valuable work of the non-specialist Customs preventive officers and I intend to continue to evaluate the results of the additional 160 officers deployed by customs at ports and airports.

Bank of England Printing Works, Loughton

Sir John Biggs-Davison asked the Chancellor of the Exchequer what has been the effect of the introduction of the £1 coin on employment at the Bank of England printing works in Loughton; to what extent any redundancies have been voluntary; and whether there is to be any redeployment of Loughton personnel elsewhere in the bank's service.

Mr. Ian Stewart: I shall let my hon. Friend have a reply as soon as possible.

EMPLOYMENT

Labour Statistics

8. **Mr. Straw** asked the Secretary of State for Employment how many fewer people are currently employed in the United Kingdom than there were in May 1979.

15. **Mr. Home Robertson** asked the Secretary of State for Employment how many more people were in employment in May 1979 than at the present time.

Mr. Tom King: Between June 1979 and March 1983 the number of people in the employed labour force in the United Kingdom fell by an estimated 1·8 million. More recently however, the number of people in work has been rising and between March 1983 and December 1984 the United Kingdom employed labour force increased by 600,000.

16. **Mr. Parry** asked the Secretary of State for Employment if he will make a statement on the latest unemployment figures.

17. **Mr. Sean Hughes** asked the Secretary of State for Employment what is the latest number of people unemployed.

Mr. Alan Clark: On 9 May, the number of unemployed claimants in the United Kingdom was 3,241,000.

20. **Mr. Kilroy-Silk** asked the Secretary of State for Employment what are the numbers of people who have been unemployed for over 12 months; and what was the figure in April 1979.

Mr. Alan Clark: On 11 April 1985 the number of claimants in the United Kingdom who had been unemployed for over 12 months was 1,334,000. The corresponding figure for April 1979, relating to unemployed registrants, was 367,000.

23. **Mr. Hirst** asked the Secretary of State for Employment how many people are in employment at the latest date compared to June 1983; how many people are engaged in training schemes at the latest date compared to June 1983; and if he will make a statement.

Mr. Peter Morrison: The employed labour force in Great Britain was estimated as 23,627,000 in December 1984, the latest date for which figures are available. The corresponding figure for June 1983 was 23,040,000. These figures are seasonally adjusted. There were at least 300,000 people engaged in training schemes administered by the Manpower Services Commission at the end of March 1985, the latest date for which figures are available. This compares with an estimated 208,000 at the end of June 1983. In addition there were a number of people engaged on specialist and experimental training schemes.

28. **Mr. Skinner** asked the Secretary of State for Employment what are the latest unemployment figures; and if he will make a statement.

55. **Mr. Jack Thompson** asked the Secretary of State for Employment what is the latest number of people unemployed; and what that is as a percentage of the workforce.

62. **Mr. Allen McKay** asked the Secretary of State for Employment what are the current numbers unemployed; and what this is as a proportion of the work force.

74. **Mr. Loyden** asked the Secretary of State for Employment if he will give the latest national unemployment figures.

Mr. Alan Clark: On 9 May 1985, the number of unemployed claimants in the United Kingdom was 3,240,947, representing an unemployment rate of 13·4 per cent.

38. **Mr. David Marshall** asked the Secretary of State for Employment how many fewer people are currently employed in the United Kingdom than there were in May 1979.

Mr. Alan Clark: Between June 1979 (figures are not available for May) and December 1984, the employed labour force in the United Kingdom, that is employees in employment plus the self-employed plus Her Majesty's Forces, fell by an estimated 1,202,000.

49. **Mr. Fallon** asked the Secretary of State for Employment how many people have been placed in work in the northern region by the professional and executive register in the most recent year for which figures are available.

Mr. Peter Morrison: In the financial year ending 31 March 1985, Professional and Executive Recruitment placed 616 people in work in Cleveland, Tyne and Wear, Northumberland and Durham.

50. **Mr. Boyes** asked the Secretary of State for Employment what is the latest number of people unemployed; and how many of them are aged 50 to 60 years.

Mr. Alan Clark: On 11 April 1985, the latest date for which an analysis of unemployment by age is available, the number of unemployed claimants in the United Kingdom was 3,272,565, of whom 508,703 were aged between 50 and 59 years.

57. **Mr. John Fraser** asked the Secretary of State for Employment how many people are now unemployed in Lambeth; and how many have been unemployed for more than 12 months.

Mr. Alan Clark: On 11 April 1985, the number of unemployed claimants in the London borough of Lambeth was 25,989. Of these it is provisionally estimated that about 11,000 had been unemployed for more than 12 months. This figure includes an estimate for those whose claims are not dealt with by computer.

60. **Mr. Evans** asked the Secretary of State for Employment what is the current total number of people employed; and how many of those are in full-time employment.

Mr. Alan Clark: In December 1984, the latest date for which information is available, there were an estimated 20,832,000 employees in employment in Great Britain, 11,593,000 of whom were males and 9,239,000 were females. It is estimated that of the total females, 4,957,000 worked full time. A corresponding figure for full-time males is not available.

63. **Mr. Roy Hughes** asked the Secretary of State for Employment what is the current rate of unemployment; and how this compares with the figure for June 1979.

Mr. Alan Clark: On 9 May 1985, the unemployment rate in the United Kingdom was 13·4 per cent. compared with 5·1 per cent. in June 1979.

66. **Mr. Fisher** asked the Secretary of State for Employment what are the numbers of people who have been unemployed for over one year, two years, and three years, respectively; and what plans the Government have for re-training or re-employing those who do not find places in the community programme.

Mr. Peter Morrison: In April 1985 there were 1,334,161 claimants who had been unemployed for over one year, including 790,086 unemployed for more than two years and 484,314 for over three years. Our White Paper, "Employment: The Challenge for the Nation" (Cmnd. 9474) describes the current range of employment and training measures and explains our strategy to achieve sustained economic growth. It is only through such growth that more permanent jobs for unemployed people will be created.

68. **Mr. Strang** asked the Secretary of State for Employment how many people are currently in work in the United Kingdom; and what were the figures for May 1979.

Mr. Alan Clark: In December 1984, the latest date for which information is available, there were an estimated 24,154,000 people in the United Kingdom in the employed labour force (that is, employees in employment plus the self-employed plus Her Majesty's Forces). The corresponding figure for June 1979 (May is not available) was 25,356,000. The figures are adjusted to take account of seasonal variations.

70. **Mr. Garrett** asked the Secretary of State for Employment how many people were in full-time employment in May 1979; and what is the present figure.

Mr. Alan Clark: in December 1984, the latest date for which information is available, out of a total of 9,239,000 female employees in employment in Great Britain, 4,957,000 worked full-time. The total male figure of 11,593,000 is not broken down to full-time and part-time. In June 1979, the corresponding figures were 9,455,000 total females of which 5,585,000 worked full-time, together with a total of 13,183,000 male employees in employment.

76. **Mr. Hardy** asked the Secretary of State for Employment by what number the working age population and the number of unemployed pensions increased between 1975 and 1979 and between 1980 and 1984.

Mr. Alan Clark: It is estimated that between 1975 and 1979 the working age population of Great Britain increased by 785,000, while unemployment rose by 332,200 over the same period. The corresponding estimated increases between 1980 and 1984 in Great Britain were 1,151,000 and 1,447,900 respectively.

The comparisons of unemployment are affected by the 1983 Budget provisions which mean that some men, mainly aged 60 years and over, no longer need to sign on in order to receive supplementary benefits or national insurance credits. It is estimated that some 160,000 men were affected in Great Britain between April and August 1983.

Sir David Price asked the Secretary of State for Employment whether he is satisfied that the methods of calculating the employed labour force measure correctly the self-employed and part-timers; and if he will make a statement.

Mr. Alan Clark: Estimates of the self-employed are obtained from the census of population updated by the labour force survey.

Estimates of employees in employment, with full and part-time employees separately identified for each sex, are obtained from the triennial census of employment. These are updated, with part-time female employees separately identified, using quarterly sample surveys of employers and the labour force survey.

The methods used are described in detail in the article "Revised Employment Estimates for 1981 to 1984" published in the March 85 edition of *Employment Gazette*, a copy of which is in the Library. The estimates are, of course, reviewed as further data become available.

I am satisfied that the estimates provide a good guide to the number of the self-employed and part-time employees. Because sampling techniques are used the estimates are subject to some imprecision. The Department's statisticians continually review the methods to try to improve the estimates in terms of accuracy and cost-effectiveness.

Industrial Democracy

10. **Mr. Martin** asked the Secretary of State for Employment if he has any proposals to put to his European Economic Community counterparts to improve democracy in the work place.

Mr. Peter Bottomley: We believe that Community-wide action would be inappropriate. Within the United Kingdom we are firmly committed to an effective voluntary approach to employee involvement and participation.

30. **Dr. Godman** asked the Secretary of State for Employment what steps he has taken to encourage progress in worker participation under section 1 of the Employment Act 1982.

Mr. Peter Bottomley: I refer the hon. Member to my reply to my hon. Friend the Member for Lincoln (Mr. Carlisle) on 10 June 1985.

Employment Prospects

14. **Mr. Proctor** asked the Secretary of State for Employment if he will make a statement concerning the current levels of employment and prospects for its increase.

Mr. Tom King: The employed labour force in Great Britain is estimated at 23,627,000 in December 1984 some 613,000 higher than in March 1983. We expect the growth in employment to continue.

Skillcentres

18. **Mr. Maxton** asked the Secretary of State for Employment if he is satisfied with the performance and numbers of skillcentres.

Mr. Peter Morrison: Yes. I welcome the reorganisation of the network which plans to increase the efficiency, effectiveness and value for money offered by skillcentres. These objectives are in line with our adult training strategy which aims to substantially increase the number of adults helped to train.

Young Persons (Wages)

19. **Mr. Nellist** asked the Secretary of State for Employment what has been the percentage change in young people's wages as a proportion of adult wages since 1979 for boys and for girls.

Mr. Peter Bottomley: The earnings of boys relative to men fell by 12 per cent. and those of girls relative to women fell by 13 per cent. between April 1979 and April 1984.

Community Programme

21. **Mr. Greenway** asked the Secretary of State for Employment if he will make money and places available under the community programme for domestic assistance for elderly and disabled people, along the lines of the home help system; and if he will make a statement.

Mr. Peter Morrison: Some 20 per cent. of community programme projects already provide assistance for elderly and disabled people. This assistance can be increased because we are expanding the programme by 100,000 places to 230,000 filled places by June 1986.

31. **Mr. Chapman** asked the Secretary of State for Employment what provision will be made for the expansion of the community programme in Greater London.

33. **Mr. Hannam** asked the Secretary of State for Employment what provision will be made for the expansion of the community programme in the south-west.

43. **Mr. Leigh** asked the Secretary of State for Employment if he will make a statement on the development of the community programme in the east midlands.

69. **Mr. Brandon-Bravo** asked the Secretary of State for Employment what provision will be made for the expansion of the community programme in the east midlands.

71. **Mr. Gerald Howarth** asked the Secretary of State for Employment if he will make a statement on the expansion of the community programme in the west midlands.

Mr. Peter Morrison: The community programme is being expanded by 100,000 places to 230,000 places by the end of May 1986. Some 50,000 of these additional places should be available by the end of the year, and I set out current regional targets in my reply to my hon. Friend the member for Kettering (Mr. Freeman) on 30 April 1985 at column *105*.

75. **Mr. Spencer** asked the Secretary of State for Employment if he will make a statement on the community programme in Leicester.

Mr. Peter Morrison: 990 places on the community programme have been available for the city of Leicester during the last 12 months. The expansion of the programme by 100,000 places nationally over the next 12 months enables significant increases to be made in all areas.

Hosiery and Knitwear Industry

22. **Sir John Farr** asked the Secretary of State for Employment if he will expand facilities for the retraining of adults to take up skilled employment in the hosiery and knitwear industry.

Mr. Peter Morrison: I am aware of the recruitment difficulties reported by the hosiery and knitwear industry. These must be primarily for the industry to resolve but, following a question from my hon. Friend, the member for Rutland and Melton (Mr. Latham), I asked the Manpower Services Commission to report on the problems in the Leicester area. I will write to my hon. Friend as soon as this report is available.

Political Levy

24. **Mr. Kirkwood** asked the Secretary of State for Employment if he will now introduce legislation to provide for contracting in to the political levy as opposed to contracting out.

Mr. Peter Bottomley The current series of political fund ballots provides an important opportunity for union members to decide for themselves whether their unions should continue to spend money on party political matters. Where ballots produce a majority in favour of a political

fund, unions are under a statutory duty to notify members of their right to contract out of the political levy and to inform them that a standard exemption notice may be obtained from their union or the certification officer. Union members will also wish to ensure that subsequent decisions on the use to which political funds are put conform to the policies on which campaigns have been conducted for their maintenance. Only on this basis can members freely and effectively decide for themselves whether or not to pay the political levy, which was the object of my right hon. Friend's discussions with the TUC. As we made clear to the TUC, the Government reserve the right to legislate if the voluntary approach does not prove effective.

Community Industry Scheme

25. **Mr. Lawler** asked the Secretary of State for Employment whether he is satisfied with the occupancy rate on the community industry scheme.

Mr. Peter Morrison: Yes. Community Industry Ltd. has contracted to provide 7,000 job opportunities for personally and socially disadvantaged young people. The latest figures show a national occupancy rate of 96 per cent.

Wages Councils

26. **Mr. Evenett** asked the Secretary of State for Employment what responses his Department has received to the consultative document on wages councils.

41. **Mr. Prescott** asked the Secretary of State for Employment how many representations he has received on the future of wages councils; and if he will make a statement.

Mr. Peter Bottomley: I refer my hon. Friend and the hon. Member to my reply to the hon. Member for Pontefract and Castleford (Mr. Lofthouse) earlier today.

27. **Sir William van Straubenzee** asked the Secretary of State for Employment whether he will now estimate the effect on the employment of young people of the abolition of wages councils.

Mr. Peter Bottomley: There is general agreement that the abolition of wages councils would slow down pay increases resulting in an increase in employment for both young people and adults. Employment opportunities for young people are initially limited to the balance between the value of their contribution and the costs of their employment, including pay levels.

32. **Mr. Dixon** asked the Secretary of State for Employment if he has received any further representations from Trades Union Congress affiliated unions regarding the future of wages councils.

Mr. Peter Bottomley: I have received 693 responses to our consultative paper on wages councils from a number of trade unions affiliated to the Trades Union Congress.

54. **Ms. Clare Short** asked the Secretary of State for Employment if he has received any representations from employees covered by wages councils, or their representatives, in favour of abolishing wages councils.

Mr. Peter Bottomley: Yes.

67. **Mr. Campbell-Savours** asked the Secretary of State for Employment what representations he has received about the maintenance of retail trades wages councils.

Mr. Peter Bottomley: My right hon. Friend and I have received a number of representations from employers' bodies, trade unions and others about the maintenance of retail trades wages councils. These are being studied.

Youth Training Scheme

29. **Mr. Latham** asked the Secretary of State for Employment what progress is being made in his discussions relating to the expansion of the youth training scheme into a two-year course for school leavers.

Mr. Peter Morrison: The Manpower Services Commission is continuing discussions with employers, trade unions and others about the extension of the youth training scheme, and hopes to make detailed recommendations by the end of June.

36. **Mr. Randall** asked the Secretary of State for Employment when he will next meet the director general of the Confederation of British Industry to discuss the second year of the youth training scheme.

Mr. Peter Morrison: My right hon. Friend and I have no plans to do so at this stage. The Confederation of British Industry is closely involved in the preparation by the Manpower Services Commission of proposals for a two-year youth training scheme; and I have recently attended three regional conferences organised by the confederation at which the development of the scheme was discussed.

72. **Mr. Baldry** asked the Secretary of State for Employment what representations he has received on the expansion of the youth training scheme to two years.

Mr. Peter Morrison: Over 200 organisations and individuals have commented on the proposed extension of the youth training scheme. Virtually all support the proposal.

59. **Mr. Squire** asked the Secretary of State for Employment if he will make a statement on the progress of discussions with employers' organisations regarding the extension of the youth training scheme.

Mr. Peter Morrison: The Confederation of British Industry is closely involved with the Manpower Services Commission in planning the new scheme. In addition, many employers and employers' organisations have commented on the proposal to extend the youth training scheme. Virtually all support the proposal.

Wages Statistics

34. **Mr. Clay** asked the Secretary of State for Employment what numbers of workers in full-time employment earn less than £100 per week.

Mr. Peter Bottomley: Estimates of the numbers of full-time adult employees with gross weekly earnings of less than £100 for a full week in April 1984 are published in table 29 of "New Earnings Survey", part A. A copy is in the Library.

Trade Unions (Ballots)

35. **Mr. Hanley** asked the Secretary of State for Employment how many unions have rule books which now comply with the provisions of the Trade Union Act 1984 relating to elections to the union executive.

Mr. Peter Bottomley: A number of trade unions have made, or are considering making changes to their rule books to comply with this aspect of trade union legislation. Some specific examples are listed in my hon. Friend's reply to my hon. Friend the Member for Gainsborough and Horncastle (Mr. Leigh) on Tuesday 12 February 1985 at columns *135-6*. In some instances changes will not be required as existing rules already comply with the legislation.

The duties imposed on trade unions by part I of the Trade Union Act 1984 will apply in all cases, irrespective of rule books, from 1 October 1985.

61. **Mr. Beith** asked the Secretary of State for Employment if he is satisfied that the provisions of the Trade Union Act 1984 relating to ballots on political funds will ensure adequate opportunities for all trade union members to cast their votes.

Mr. Peter Bottomley: The certification officer will not approve rules for political fund ballots unless they provide that so far as is reasonably practicable every member is given an opportunity to vote and unless they contain other stringent conditions designed to ensure a fair and secret ballot.

65. **Mr. Wainwright** asked the Secretary of State for Employment if he is satisfied with the powers of the certification officer in relation to the conduct of trade union ballots.

Mr. Peter Bottomley: I am satisfied with the powers of the certification officer in relation to the conduct of trade union ballots, as extended by the Trade Union Act 1984.

He is now empowered to make inquiries into complaints by individual trade union members of non-compliance with the Act's requirements on the election of trade union leaders and, where appropriate, to make a declaration specifying the provisions which have been breached.

In addition the Act extends the authority given to the certification officer by the Trade Union Act 1913 for approving the rules of political fund ballots. His approval may only be given where trade unions arrange for such ballots to meet new standards of secrecy and fairness.

73. **Mr. Bruce** asked the Secretary of State for Employment if he will introduce legislation to ensure that trades union ballots are independently organised and counted.

Mr. Peter Bottomley: We have no immediate plans to introduce further legislation on the conduct of trade union ballots.

The Employment Acts 1980 and 1982 and the Trade Union Act 1984 have taken significant steps to encourage the use of the ballot box as a means of reaching trade union decisions. These should lead to an increase in the number of ballots taking place and an improvement in the overall level of trade union democracy.

The legislation lays down stringent standards as to the conduct of ballots covering secrecy, freedom from intimidation and malpractice.

Wages (Underpayment)

37. **Mr. Ron Brown** asked the Secretary of State for Employment what is the policy of Her Majesty's Government with regard to prosecuting employers when details are known of underpayment of wages council rates.

Mr. Peter Bottomley: The wages inspectorate's policy, endorsed by successive Governments over many years, is to seek compliance with the wages council legislation by advice, persuasion and prosecution which is considered only where the offence is deliberate or repeated and the evidence adequate.

Labour Statistics

39. **Mr. Teddy Taylor** asked the Secretary of State for Employment how many persons were employed in work or training schemes in May 1979; and what was the comparable figure in May 1985.

Mr. Alan Clark: The table below gives estimates of
(a) persons in employment and
(b) persons engaged on Government employment or training schemes in Great Britain. The majority of those participating in government schemes are also included in the employed labour force statistics; column *(c)* indicates the numbers estimated to be included in both series.

Employment estimates for all industries are not available for the dates requested. The table therefore gives figures for the closest dates possible.

	(a) Employed Labour Force (seasonally adjusted)*	*(b) Persons on Government Schemes*	*(c) Persons thought to be covered in both (a) and (b)*
December 1984	23,627,000	690,000	400,000
June 1979	24,776,000	272,000	180,000

* This comprises employees in employment, the self-employed and persons in the armed services.

17-year-olds (Wages)

40. **Dr. Marek** asked the Secretary of State for Employment how much greater than the current youth training scheme allowance is the wages council figure for 17-year-olds.

Mr. Peter Bottomley: Each wages council fixes its own minimum rates for adults and young workers and some also set rates for more than one category of worker. Rates for 17-year-olds range from £34·11 to £66·60. The current youth training scheme allowance is £26·25 per week.

Trade Unions (Executive Members)

42. **Mr. Penhaligon** asked the Secretary of State for Employment if he will seek to modify those parts of the Trade Union Act 1984 which allows leading members of trade unions who are members of the union executive to avoid regular re-election merely by giving up their casting vote.

Mr. Peter Bottomley: Part I of the Trade Union Act, which provides for the election of all voting members of

a union's principal executive committee by secret ballot every five years, comes into force on 1 October 1985. It would be premature to seek modifications before the provisions take effect.

Professional and Executive Recruitment

44. **Mr. Peter Bruinvels** asked the Secretary of State for Employment how many jobs have been placed with the professional and executive register nationally and in Leicester to date; in each case how many jobs were filled; and at what cost.

Mr. Peter Morrison: During the 1984-85 financial year Professional and Executive Recruitment nationally handled 19,653 orders and placed 10,763 people in work. Overall expenditure was just below £8·3 million and was more than covered by income of a little under £8·5 million. The Leicester PER office received 668 orders and made 321 placings.

Since 1 April 1983, PER has operated on a self-financing basis and its operating costs are recovered in full from fees paid by employers for the recruitment services provided.

Young Persons

45. **Mr. Foulkes** asked the Secretary of State for Employment how fast youth unemployment has increased since 1979 compared with adult unemployment.

Mr. Alan Clark: Direct comparisons of unemployment by age since 1979 are not possible.

Between April 1979 and October 1982 the number of unemployed registrants aged under 25 increased by 189 per cent., compared with 124 per cent. for those aged 25 or over. Then between October 1982 and April 1985 the increase in unemployed claimants in the two categories was 1 per cent. and 11* per cent. respectively.

* This figure is affected by the effects of the 1983 Budget which mean that certain men aged over 60 need no longer sign on at an unemployment benefit office.

Merseyside

46. **Mr. Wareing** asked the Secretary of State for Employment if he will make a statement on the current unemployment level on Merseyside; and what has been the percentage increase since May 1979.

Mr. Alan Clark: On 9 May 1985, the number of unemployed claimants on Merseyside was 138,847. This is not fully comparable with the figure of 79,644 registered unemployed in jobcentre areas approximating to Merseyside in May 1979.

We are very concerned about the level of unemployment on Merseyside. That is why the area receives the highest levels of Government assistance. A substantial number of people in the area are benefiting from our special employment and training measures, two of which the youth training scheme and the community programme —are to be considerably expanded. We are committed to maintaining our economic policies which are directed at holding down inflation and public borrowing, while encouraging enterprise, flexibility and competitiveness in industry and the labour market. This is the only way to generate lasting jobs on Merseyside and elsewhere.

Skillcentre Network

47. **Mr. Park** asked the Secretary of State for Employment when he will next meet the chairman of the Manpower Services Commission to discuss the review of the skillcentre network.

Mr. Peter Morrison: I refer the hon. Member to my right hon. Friend's reply to my hon. Friend the Member for Dudley, West (Dr. Blackburn) on 4 June 1985 at columns *125-6*.

Wages Inspectorate

48. **Mr. Caborn** asked the Secretary of State for Employment if he will make a statement on his proposals for the future establishment of the wages inspectorate.

Mr. Peter Bottomley: There are no proposals at present for changes in the wages inspectorate. The functions and staffing of the inspectorate will, however, be reviewed when the Government have taken decisions on the future of the wages council system.

51. **Mr. Bermingham** asked the Secretary of State for Employment what is the current rate of inspection of workplaces by the wages inspectors.

Mr. Peter Bottomley: In 1984 the pay of workers was checked at 10·8 per cent. of establishments on the wages inspectorate's register.

Youth Wages

52. **Mr. Terry Lewis** asked the Secretary of State for Employment how the levels of youth wages have changed compared with adult wages since 1979.

Mr. Peter Bottomley: The relationship between the average weekly earnings of young people and adult employees in 1979 and 1984 is shown in the following table.

Average gross weekly earnings of full-time employees working a full week

	*Males aged under 18 as a percentage of adult males**	*Females aged under 18 as a percentage of adult females†*
April 1979	39·7	58·1
April 1984	43·9	50·3

* Aged 21 and over.
† Aged 18 and over.
Source: New Earnings Survey.

Part-time Workers

53. **Miss Boothroyd** asked the Secretary of State for Employment how many part-time workers earn less than £2·50 per hour.

Mr. Peter Bottomley: Comprehensive estimates of the number of part-time employees earning less than £2·50 an hour are not available. The most recent available information relates to part-time female employees on adult rates covered by pay-as-you-earn schemes. The relative numbers of those earning less than £2·50 per hour and less than £2·60 per hour in April 1984 are shown in table 172 of "New Earnings Survey", part F. A copy is in the Library.

Landor Cartons (Dismissals)

56. **Mr. Terry Davis** asked the Secretary of State for Employment when he expects the adjudication officer to take a decision on the entitlement to unemployment benefit of those people who were dismissed by Landor Cartons in Birmingham in January.

Mr. Alan Clark: The independent adjudicating authorities have now given decisions on the unemployment benefit entitlement of employees of Landor Cartons in Birmingham; these decisions were favourable to the employees.

Job Release Scheme

58. **Mr. Golding** asked the Secretary of State for Employment if he has any plans to increase the allowances for those participating in the job release scheme.

Mr. Alan Clark: The rates of job release allowances are reviewed each year and any increases become effective in April. I refer my hon. Friend to my reply to my hon. Friend the Member for High Peak (Mr. Hawkins) on 15 March 1985 at columns *316-17*, giving details of the allowances to be paid from 8 April 1985.

Health and Safety Commission

64. **Mr. Eastham** asked the Secretary of State for Employment if he has any plans to increase the funding of the Health and Safety Commission.

Mr. Peter Bottomley: The estimate for 1985-86 is £93,283,000. We have no plans to increase this.

Part-time Employment

Mr. Adley asked the Secretary of State for Employment what steps he is taking to encourage part-time employment.

Mr. Alan Clark: We explained our strategy for employment in the White Paper "Employment — the Challenge for the Nation" (Cmnd. 9474). I announced on 15 March, in my reply to my hon. Friend the Member for High Peak (Mr. Hawkins) at columns *316-17*, changes to help ensure that the job splitting scheme and the part-time job release scheme operate more flexibly. These experimental measures are designed to encourage changes in working patterns and to help in reducing unemployment.

Shipbuilding and Ship Repair Industry

Mr. Nicholas Brown asked the Secretary of State for Employment how many people were employed in the shipbuilding and ship repair industry by year from 1974 onwards; what was the average wage in the industry, by year for the same period; and what was the average wage in the industry expressed as a percentage of the national average industrial earnings for the same year for the same period.

Mr. Peter Bottomley: The following table sets out the available information:

*Shipbuilding and ship-repairing**

	Number of employees in March	*Average gross weekly earnings of adult manual men in April†*	*Col. (2) as a percentage of corresponding average earnings in index of production industries†*
	(thousands)	*(£)*	
	(1)	(2)	
1974	—	47·5	105
1975	—	64·7	113
1976	—	76·0	113
1977	—	78·3	106
1978	—	91·8	109
1979	141·1	106·4	109
1980	128·6	123·8	107
1981	122·4	135·3	107
1982	120·6	160·1	112
1983	114·7	154·2	101
1984	102·6	175·2	107

* Minimum list heading 370·1 of 1968 Standard Industrial Classification to 1981; group 361 of 1980 Standard Industrial Classification from 1982.

† Males aged 21 and over working a full week. The figures include bonus and overtime earnings which may fluctuate from year to year.

Government Communications Headquarters

Mr. Dalyell asked the Secretary of State for Employment what are the latest representations he has had from the International Labour Organisation about the industrial position at Government communications headquarters.

Mr. Peter Bottomley: The report of the committee of experts on the application of conventions and recommendations has now been published and will be considered at the meeting of the international labour conference in June in which the United Kingdom Government are participating. The committee observed that the Government had raised a number of complex legal issues. Its report did not find the Government in breach of convention 87.

Employment Rehabilitation Centres

Mr. Hancock asked the Secretary of State for Employment if he will consider maintaining the number of staff posts at employment rehabilitation centres to ensure that disabled people do not face any loss in choice of trades available to them.

Mr. Alan Clark: It is the function of employment rehabilitation centres not to train their clients in specific trades but to provide them with opportunities in which they can test and improve their physical and mental capacity for a return to work.

Current developments in the rehabilitiation programme, some of which involve staffing changes, are designed to make the overall service more relevant to the employment opportunities that are available and to the needs of disabled people.

Mr. Hancock asked the Secretary of State for Employment what measures have been taken to ensure that the facilities employment rehabilitation centres share with skillcentres will not be affected following the closure of some skillcentres.

Mr. Alan Clark: Five employment rehabilitation centres share sites with skillcentres which are due to close

by March 1986. The Manpower Services Commission is now exploring with the Property Services Agency the feasibility, in each case of maintaining an independent employment rehabilitation centre on the existing site or whether it would be necessary to relocate the centre elsewhere in the same area.

HOUSE OF COMMONS

Terrace Pavilion

Mr. Proctor asked the Lord Privy Seal if he will bring before the Catering Sub-Committee of the Services Committee a proposal that the Terrace Pavilion be permanently erected; and if he will make a statement.

Mr. John Biffen: I will ask the Catering Sub-Committee, in conjunction with the Accommodation and Administration Sub-Committee, to consider my hon. Friend's proposal.

OVERSEAS DEVELOPMENT

Samanala Wewa Dam

Mr. Gould asked the Secretary of State for Foreign and Commonwealth Affairs if he will institute an inquiry into the reasons for the delay in agreeing an aid and credit package in respect of the Samanala Wewa hydroelectric project in Sri Lanka; and if he will, in more general terms, introduce a more streamlined procedure for reaching decisions in such cases.

Mr. Raison: There has been no undue delay in the handling of this case by the Departments concerned: the complex issues involved have required careful consideration.

FOREIGN AND COMMONWEALTH AFFAIRS

Chilean War and Air Colleges

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what arrangements have been made for visits to the United Kingdom since 1 July 1982 by staff of the Chilean war college and Chilean air college.

Mr. Renton: A group from the Chilean Air Force staff college visited Britain in January 1985. A similar group from the War College will visit later this year. Such visits are part of the normal pattern of our relations with Chile.

Chile (Military Exports)

Mr. Corbyn asked the Secretary of State for Foreign and Commonwealth Affairs what is his policy towards the export of the Centaur military vehicle to Chile.

Mr. Renton: A temporary export licence for demonstration purposes was granted for a single Centaur in January 1984. Any other application would be considered carefully, taking into account all prevailing circumstances.

United States Legislation (Extraterritoriality)

Mr. Ashdown asked the Secretary of State for Foreign and Commonwealth Affairs what correspondence he has had with the State Department of the United States of America since 1982, relating to the extraterritorial effect in the United Kingdom of United States laws, and if he will place that correspondence in the Library.

Mr. Rifkind: My right hon. and learned Friend has addressed one message to Mr. Shultz and I have exchanged letters with Mr. Dam concerning the extraterritoriality discussions which were held with the United States at official level last year. In this context I refer the hon. Member to the answer I gave my hon. Friend the Member for Hertford and Stortford (Mr. Wells) on 26 July 1984 at column 794. It is not our practice to publish confidential correspondence between states.

Hong Kong

Mr. Stanbrook asked the Secretary of State for Foreign and Commonwealth Affairs if he is now able to make a statement on the arrangements to be made to enable expatriate members of the Overseas Civil Service in Hong Kong to retire from the service now with compensation for loss of career prospects and accrued pension following the conclusion of the agreement with the Republic of China as to the future of Hong Kong and of its public service.

Mr. Rifkind: We accept that we should aim to achieve suitable compensation arrangements for members of Her Majesty's Overseas Civil Service and for other pensionable overseas civil servants who are affected by the Sino-British Agreement on the future of Hong Kong. We will consider this matter in more detail in due course in consultation with the Hong Kong Government.

"Victims Against Terrorism" (South Africa)

Mr. Anderson asked the Secretary of State for Foreign and Commonwealth Affairs on what basis his officials met representatives of Victims against Terrorism from South Africa; and what is his policy on further meetings with this group.

Mr. Rifkind: The group called at its initiative. Officials met it in keeping with our policy of meeting a wide range of opinion on South Africa, other than those groups advocating violence. There are no plans for further meetings.

United States Goods (Economic Boycott)

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs what report he has received from Her Majesty's ambassador in Tunis about the speech delivered in Tunis on 14 May by Yasser Arafat to the General Federation of Palestinian Writers and Journalists concerning an economic boycott of United States goods.

Mr. Rifkind: We have noted reports of a speech delivered by Mr. Yasser Arafat in Tunis on 14 May covering a wide range of issues. The text we have seen did not make reference to an economic boycott of United States goods.

Non-proliferation Treaty (Libya)

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs whether he has received any

evidence that Libya has breached the non-proliferation treaty by exporting weapon-grade uranium to a non-signatory nation.

Mr. Rifkind: No.

Chile

Mr. Dalyell asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the matters discussed at a meeting between officials of his Department and Mrs. Maria Malvenda of Chile; and what statements officials made on *(a)* the human rights situation in Chile and *(b)* the future policy of the United Kingdom towards Chile in the light of this situation.

Mr. Renton: Mrs. Maluenda called on a senior Foreign and Commonwealth Office official on 2 May to explain the circumstances of her son's death. The official expressed his personal sympathy at her loss and made clear our concern about the human rights situation in Chile.

Mr. Dalyell asked the Secretary of State for Foreign and Commonwealth Affairs what assessment he makes of the current implications for United Kingdom operations in the south Atlantic, and concerning the Falklands in particular, of the effect of the treaty between Chile and Argentina over the ownership of islands in the Beagle straits; and what effect the ratification of this treaty in April is assessed to have on the future policy options of Her Majesty's Government regarding human rights in Chile.

Mr. Renton: We welcome any measure contributing to the stability of the region, but the question of the Beagle Channel, and our commitment to defend the Falkland Islands, are entirely separate matters. We shall continue to stand by that commitment, using the minimum forces necessary. Our policy on human rights violations in Chile remains as stated in my reply to the hon. Member for Islington, North (Mr. Corbyn) on 3 June at column *75*.

Mr. Dalyell asked the Secretary of State for Foreign and Commonwealth Affairs what is the policy of Her Majesty's Government towards instituting a complete embargo on arms sales to Chile; and if he will make a statement.

Mr. Renton: As I told the hon. Member for Islington, North (Mr. Corbyn) on 9 May at column *493*, we do not believe an arms embargo would be effective. We shall, however, continue to refuse approval for the export of items which, in our judgment, are likely to be used for internal repression.

ENERGY

Coal Mining (Subsidence)

Mr. Heddle asked the Secretary of State for Energy if he is satisfied with the operation of the provisions of the Coal Industry Act 1975 relating to coal mining subsidence compensation claims; and if he will make a statement.

Mr. David Hunt: The relevant provisions of the Act are operating satisfactorily.

ENVIRONMENT

Docklands (Job Creation)

80. **Mr. Spearing** asked the Secretary of State for the Environment if he will estimate the number of new jobs that have been created within the area of the London Docklands Development Corporation since its creation.

Sir George Young: I refer the hon. Gentleman to the written answer I gave him on 28 November 1984, at column 515, which contains the latest available figures.

The LDDC is, however, currently analysing the results of an employment survey commissioned earlier this year. It expects to have more up-to-date information in a few weeks' time and I shall write to the hon. Member as soon as this becomes available.

Rates (Unemployment)

81. **Mr. Favell** asked the Secretary of State for the Environment what representations he has received about the effect of rates on unemployment.

Mr. Waldegrave: I have received a number of representations about the effect of business rates on jobs and on the location of employment opportunities.

Cumbria (Rights of Way)

Mr. Maclean asked the Secretary of State for the Environment when he expects to announce his decision on the draft review of public rights of way in Cumbria; and if he will explain the reason for the delay.

Mr. Waldegrave: The issue of the remaining 11 decision letters in respect of the draft review has been delayed because of the large number of objections and the complex issues they raised. However, the first of these decision letters is about to be issued; the rest will follow shortly.

Springfields Nuclear Fuel Factory (Leakage)

Mr. Frank Cook asked the Secretary of State for the Environment (1) how and where material containing uranium hexafluoride leaked from the Springfields nuclear fuel factory has been made safe;

(2) if he will make a statement of the circumstances surrounding the discharge on 23 April of uranium hexafluoride from the Springfields nuclear fuel factory into open waterway at Salwick hall farm, Lancashire.

Mr. Waldegrave: No uranium hexafluoride was discharged from the Springfields nuclear fuel factory on 23 April. A quantity of uranium-bearing wash water was spilt which contaminated silt in a nearby stream. The stream bed was dredged as a precautionary measure and the contaminated material was removed to the Springfields site for disposal. Action has been taken to prevent a recurrence of the incident.

Consultative Council on Local Government Finance

Dr. John Cunningham asked the Secretary of State for the Environment what representations have been made to him of the present operation of the Consultative Council on Local Government Finance.

Mr. Patrick Jenkin: My Department has received three written representations about the operation of the

Consultative Council on Local Government Finance; from the London Boroughs Association, the Greater London council and the Association of London Authorities. There was also discussion with all of the local authority associations at the CCLGF meeting held on 17 April. The associations requested that there should be no change to the existing structure of local authority representation for a year. The associations seemed generally content with the other aspects of CCLGF arrangements.

Norman Shaw South (Contaminated Water)

Mr. Proctor asked the Secretary of State for the Environment if he will make a statement on the contamination of water in the Norman Shaw South offices; when the contamination was first discovered; and what action is to be taken to remedy the contamination.

Sir George Young: I would refer my hon. Friend to the statement I made to the House on 6 June, at column 453.

An investigation is under way and I shall publish the report as soon as it is available.

Building Regulations

Mr. Grylls asked the Secretary of State for the Environment when his Department first consulted interested parties about the content of the revised building regulations.

Sir George Young: Following a White Paper in February 1981 on the "Future of Building Control in England and Wales" (Cmnd. 8179), two consultative papers were issued on the form and content of the building regulations on 27 May 1982. The first of three consultation letters on draft regulations was issued on 30 March 1983.

Berwick Rangers Football Club

Mr. Home Robertson asked the Secretary of State for the Environment if he will make representations to FIFA concerning the impact of the ban on English football clubs playing matches in other countries on Berwick Rangers football club, which is a member of the Scottish League, although the club is based in England.

Mr. Macfarlane: It is for the English or Scottish football authorities to make such representations.

Local Government Reform

Mr. Tony Banks asked the Secretary of State for the Environment whether his estimate of savings in operating costs to be achieved by the abolition of the Greater London council includes any allowance for changes in the cost of debt servicing.

Mr. Waldegrave: No.

Mr. Tony Banks asked the Secretary of State for the Environment (1) what are the annual operating costs and savings which he expects will recur from the proposed abolition of the Greater London council arising from cost-effective integration of transferred services;

(2) what are the annual operting costs and savings that he expects to recur from the proposed abolition of the Greater London council arising from elimination of the Greater London council/London boroughs liaison;

(3) what are the annual operating costs and savings which he expects will recur from the proposed abolition of the Greater London council arising from economies of scale;

(4) if he will provide detailed estimates of the transitional costs of abolition other than redundancy costs in *(a)* the first year, *(b)* the first five years and *(c)* the first 10 years after the proposed abolition of the Greater London council.

Mr. Waldegrave [*pursuant to his reply*, 10 June 1985]: I have nothing to add to the estimates in the answer my right hon. Friend gave to my hon. Friend the Member for Surbiton (Mr. Tracey) on 30 November 1984, at column 611.

Grant-related Expenditure Assessments

Mr. Sayeed asked the Secretary of State for the Environment when he proposes to publish details of the service components of local authorities' grant-related expenditure assessments for 1985-86.

Mr. Waldegrave: My right hon. Friend has today placed in the Library of the House copies of "The Technical Handbook of Grant Related Expenditure 1985-86", which provides this information. A copy is being sent to each local authority in England, and to each of the local authority associations.

Household Survey

Mr. Charles Wardle asked the Secretary of State for the Environment whether he has reached a decision on a large-scale household survey for England.

Mr. Kenneth Baker: The need for a large-scale household survey is being considered in the context of our local government finance studies. We expect to announce a decision on the survey later this year.

Geese (Quarry List)

Mr. Hargreaves asked the Secretary of State for the Environment whether he has any intention to reinstate the Curlew, Redshank, Brent and Barnacle geese to the quarry list; and whether he will make a statement.

Mr. Waldegrave: I requested a report on the situation from my scientific adviser, the Nature Conservancy Council. It advises strongly against any change in the protected status of these species. I have also, of course, considered the views put forward by all other interested parties, including the case put to me by the British Association for Shooting and Conservation in respect of the curlew and redshank. However, after weighing all the evidence and views submitted I am not convinced that there is sufficient justification to reduce the current protection which these species now enjoy. Consequently, the Secretary of State does not intend to make any order to place these species on the quarry list.

TRANSPORT

Motor Insurance

Mr. Evennett asked the Secretary of State for Transport (1) whether he has held any consultations with representatives of *(a)* the motor insurance industry and

(b) the Motor Insurers Bureau concerning the European Commission directive on motor insurance; and if he will make a statement;

(2) whether he intends to introduce legislation to compel drivers of motor vehicles to exchange insurance particulars following damage only road traffic accidents;

(3) whether he now intends to introduce legislation to require drivers of motor vehicles to have compulsory third party property damage insurance.

Mr. Michael Spicer: A consultation document on the issues raised by implementation of the directive in the United Kingdom was published by my Department in October 1984. Copies were sent to some 200 consultees, including Motor Conference, the Motor Insurers Bureau, and representatives of road users. Copies were placed in the Library. I have now considered the replies and I hope, in the light of the response, to introduce measures this Session to implement the directive. They will require motorists to be insured against their liability for damage to property belonging to third parties, and will also cover the disclosure of insurance details following damage-only accidents.

Coaches (London)

Mr. Adley asked the Secretary of State for Transport with whom he or his officials have had meetings, in the last five years, to discuss the problems of coach parking in London; what current proposals are being considered; if he will list the alternative options available; what is his policy on the extent to which costs arising from coach parking are borne by the coach-operators themselves; and if he will make a statement.

Mrs. Chalker: Coach parking in London is primarily the responsibility of the GLC and boroughs, with whom coach operators, the police, my Department and other bodies involved maintain continuous contact over a wide range of traffic and enforcement matters.

British Airports Authority (Privatisation)

Mr. Hayes asked the Secretary of State for Transport what powers he intends to take to prevent the holding company subsidising loss-making airports when he introduces legislation bringing the British Airports Authority into private ownership; and if he will make a statement.

Mr. Michael Spicer: As my right hon. Friend made clear in his statement, and in answer to questions, on 5 June, each of the British Airports Authority's airports under the legislation I propose will be established as a separate, subsidiary company. I will also take steps to ensure that any borrowings from the parent holding company to the subsidiaries are transparent, and that a commercial rate of interest is paid on them. I am considering which of the several ways of achieving these objectives would best ensure that they will continue to be met after privatisation.

SCOTLAND

Broadleaved Woodlands

Mr. Chris Smith asked the Secretary of State for Scotland what is the estimated cost per annum of fulfilling the measures proposed for broadleaved woodlands which are outlined in "Broadleaves in Britain: Review of Policy" in terms of *(a)* grant aid, *(b)* staff training and *(c)* forestry authority and advisory work.

Mr. John MacKay: The proposals outlined in the discussion paper are still being developed and have yet to be presented to the Government. It is not possible, therefore, to give an estimate of costs at this stage.

Mr. Chris Smith asked the Secretary of State for Scotland what proportion of the working time of the Forestry Commission's conservancy private woodland and environment officers will be allocated for the implementation of the advisory functions on broadleaves outlined in paragraph 23 of the "Broadleaves in Britain: Review of Policy".

Mr. John MacKay: The role envisaged in this area for the commission's conservancy private woodland and environemnt officers is primarily one of co-ordinating sources of advice. It is anticipated that most of the Forestry Commission's advice to private owners on broadleaves questions will be provided by the forestry district managers and their staffs.

Mr. Alton asked the Secretary of State for Scotland what proportion of the broadleaved woodland plantings approved for grant aid under the forestry grant scheme since April 1983 were subject to field inspection by Forestry Commission staff before approval was given.

Mr. John MacKay: It is the Forestry Commission's practice to inspect the area concerned before approving any application for entry to the forestry grant scheme.

Mr. Alton asked the Secretary of State for Scotland what is the number of grants approved and the area of woodland concerned, under *(a)* the basis III dedication scheme and *(b)* the forestry grant scheme in each year since 1981-82 for planting (i) pure broadleaved woodland and (ii) mainly broadleaved woodland with some conifer element.

Mr. John MacKay: The information is not available in the form requested, but the total area of broadleaved planting since 1981-82 under the Forestry Commission's grant schemes was as follows:

hectares

Year to 31 March	*Dedication schemes*	*Forestry grant scheme*	*Other grant-scheme*	*Total*
1982	740	27	494	1,261
1983	604	816	91	1,511
1984	505	1,173	33	1,711
*1985	488	1,142	17	1,647

*Provisional.

Rates

Mr. Michael Forsyth asked the Secretary of State for Scotland what is his assessment of the effect of the Valuation (Deduction from Gross Annual Value) (Scotland) Order 1984 on the average level of domestic rates paid by the occupiers of houses with rateable values of £400, £500, £600, £700, £800, £900, £1,000, £1,100, £1,200, £1,300, £1,400, £1,500, £1,600, £1,700, £1,800, £1,900 and £2,000 in the coming year.

Mr. Ancram: The order prescribes revised deductions from the gross annual value of dwelling houses and other domestic property in respect of certain expenditure on repairs and maintenance. The resulting net annual value is then taken as the rateable value. Previously deductions were made as originally specified in the Rating and Valuation (Scotland) Act 1956. The following table shows for houses of given rateable value the corresponding gross annual value and what rateable value would have resulted from application of the earlier deductions.

Rateable Value 1985-86	*Equivalent Gross Annual Value*	*Rateable Value calculated on 1956 deductions*
£	£	£
400	549	454
500	659	546
600	769	637
700	879	729
800	989	821
900	1,099	913
1,000	1,208	1,003
1,100	1,325	1,101
1,200	1,446	1,202
1,300	1,556	1,302
1,400	1,687	1,403
1,500	1,807	1,502
1,600	1,928	1,603
1,700	2,048	1,703
1,800	2,169	1,804
1,900	2,289	1,904
2,000	2,410	2,005

At all levels the effect of the 1984 order is therefore to reduce the rateable value of the property concerned; the saving in rates paid by the householder will depend on the circumstances of each property.

Community Programme (Dundee)

Mr. Wilson asked the Secretary of State for Scotland how many jobs under the community programme have been advertised in the Dundee jobcentre since 1 October 1984; and how many of those had a waiver on them.

Mr. Allan Stewart: The number of community programme vacancies advertised in Dundee jobcentre since 1 October 1984 is 826; of these 84 had a waiver.

Youth Training Scheme

Mr. Gordon Brown asked the Secretary of State for Scotland if he will list for Fife and each region of Scotland and Britain the number of youth training scheme places authorised for 1984-85, the numbers available and the proportion of available places of those authorised.

Mr. Allan Stewart: I shall reply to the hon. Member as soon as possible.

EDUCATION AND SCIENCE

Student Awards

Mr. Speller asked the Secretary of State for Education and Science what estimates he has made of the potential savings to the Exchequer of funding discretionary student grants by loans rather than grants.

Sir Keith Joseph: In 1983-84, the latest year for which figures are available, expenditure on discretionary awards by local education authorities was some £125 million (of which £90 million was for maintenance and £35 million for fees). The extent to which Exchequer savings would accrue from the substitution of loans for grants would depend upon the terms of any loan scheme, as well as on the arrangements for assisting local authority expenditure through central Government grant.

United States of America (Conference Restrictions)

Mr. Ashdown asked the Secretary of State for Education and Science how many learned institutions, professional bodies, or other organisations, have made representations to him concerning restrictions placed by the United States Government on attendance at scientific and academic conferences and meetings in the United States of America, since 1982; and if he will make a statement.

Sir Keith Joseph: None.

Mathematics and Science

Mr. Peter Bruinvels asked the Secretary of State for Education and Science if he will seek to make provision within future core curriculum proposals for quantitative standards of timetable provision for mathematics and for science subjects; and if he will make a statement.

Mr. Dunn: The Cockroft committee stated in its report that the average amount of time allocated specifically to mathematics in junior classes and the time allowance for mathematics usually found in secondary schools were adequate, although it recommended that consideration should be given to the way in which this time was distributed within the timetable.

The average figure for science activities by the end of the primary phase is about 5 per cent. of lesson time. The Department's recent statement of policy on science five-16 suggests that a broad science curriculum for all pupils should occupy about 10 per cent. of total curriculum time in the first two secondary years, rising to a maximum of 20 per cent. in years four and five.

The effectiveness with which the limited total teaching time is used in schools is of course central to the Government's policies for improving standards.

National School System

Mr. Peter Bruinvels asked the Secretary of State for Education and Science what alterations he plans to the national school system to seek to improve the productive quality of the labour force; and if he will make a statement.

Mr. Dunn: Improving the effectiveness of schools' contribution to preparation for working life is an important aspect of the Government's policies for raising standards. These are set out in the White Paper "Better Schools" (Cmnd. 9469).

Pre-vocational Instruction

Mr. Peter Bruinvels asked the Secretary of State for Education and Science whether he has any plans to include pre-vocational instruction in school curricula.

Mr. Dunn: The White Paper "Better Schools" (Cmnd. 9469) sets out the Government's view of the contribution that pre-vocational courses can make within the school curriculum. The technical and vocational education

initiative is promoting a variety of pre-vocational programmes which for 14 to 16-year-olds form part of broad and balanced school curriculum. The Government have set up a working party, under the chairmanship of Mr. R. S. Johnson and serviced by the Secondary Examinations Council, to draft national criteria for pre-vocational and vocationally oriented examinations taken by pupils of statutory school age.

Studies (Co-ordination)

Mr. Peter Bruinvels asked the Secretary of State for Education and Science what co-ordination there is of studies between successive classes and successive schools.

Mr. Dunn: Arrangements to ensure proper continuity and progression throughout the compulsory period of education should form an important part of LEAs' and schools' policies for the curriculum. One aspect of the Government's policy for improving standards in schools is to encourage the further development of such arrangements.

School Curriculum

Mr. Peter Bruinvels asked the Secretary of State for Education and Science what guidance is given on the school curriculum as a whole for different ability strata.

Mr. Dunn: The White Paper "Better Schools" (Cmnd. 9469) sets out the Government's proposals for reaching broad national agreement about the objectives of the curriculum for all pupils, including a more precise definition than exists at present of the desired levels of attainment for pupils of differing abilities at the ages of 11 and 16. Publications such as those in Her Majesty's inspectorate's "Curriculum Matters" series have an important part to play in this process.

Education Committees

Mr. Adley asked the Secretary of State for Education and Science if he will list for each local educational authority in England the composition of the education committee indicating the number of elected members and the number of co-opted members and in each local authority whether the co-opted members have full, partial or no voting rights.

Mr. Dunn: The list is as follows. The education committees of all authorities in England except one have co-opted members; the voting and other rights of the latter are the same as those possessed by elected members.

Education Authority	*Size of Education Committee*	*Elected Members*	*Co-opted Members*
Barking	41	30	11
Barnet	35	25	10
Bexley	38-46	27-35	11

School Meals

Mr. Dobson asked the Secretary of State for Education and Science how many school meals were served in each year since 1979; how many such meals were provided free; and what are his estimates of the likely totals in the current year and 1986-87 if the proposals in the social security review are implemented.

Mr. Dunn: The information requested on school meals provision in England in past years is available in the Library, where it can be obtained from the published reports on the annual school meals census. The social security review proposals are not planned to take effect before 1987. They would therefore have no effect on 1985-86 and 1986-87.

Mr. Dobson asked the Secretary of State for Education and Science what was the average price, highest price and lowest price, respectively, charged by any education authority for a school meal in 1979-80 and each subsequent year.

Mr. Dunn: Prices of fixed meals in primary, secondary and special schools in each authority are shown in the Department's annual published school meals census, which is available in the Library. Cash cafeteria meal costs depend on individual choices of meal components, and since these are variable, they are not reflected in the figures and average prices are not calculated for each authority.

Mr. Dobson asked the Secretary of State for Education and Science what is his estimate of the number of children who will be entitled to receive free school meals if the proposals in the social security review are implemented.

Mr. Dunn: In October 1984 the number of pupils in England who qualified for free school meals because their parents were in receipt of supplementary benefit is estimated to have been approximately 680,000. If the proposals in the Social Security Green Paper are implemented, the number of pupils entitled to a free school meal will vary according to the number with parents entitled to the proposed income support, which will replace supplementary benefit.

Mr. Dobson asked the Secretary of State for Education and Science what categories of children will still be entitled to a free school meal if the proposals in the social security review are implemented; and what categories currently so entitled will not.

Mr. Dunn: If the proposals in the Social Security Green Paper are implemented, pupils whose parents are in receipt of income support, the successor to supplementary benefit, would continue to be entitled to free school meals. The rates of the proposed family credit, which is to replace family income supplement, will be enhanced to provide extra cash help instead of free school meals.

A third category of pupils for whom the whole or part of the charge may be remitted at local authority discretion would lose that benefit.

AGRICULTURE, FISHERIES AND FOOD

Sugar Beet (Rhizomania)

Mr. Forth asked the Minister of Agriculture, Fisheries and Food if he has made any proposals to prevent the entry to the United Kingdom of sugar beet affected by rhizomania.

Mrs. Fenner: An order was introduced last year to control imports into the United Kingdom of sugar beet plants and unprocessed seed. A further order has now been laid before Parliament extending controls to other seed and plants of Beta vulgaris.

The United Kingdom has also pressed in Brussels for Community measures to contain the disease and the Commission has recently circulated to the EC plant health standing committee draft proposals for Community measures to control imports and exports of Beta vulgaris and any other material intended for planting on agricultural land.

Mr. Forth asked the Minister of Agriculture, Fisheries and Food if he will make a statement on the incidence of rhizomania affecting sugar beet in continental Europe; and what measures are being taken by the European Economic Community Commission to control and eradicate this disease.

Mrs. Fenner: Rhizomania occurs widely in sugar beet areas of Italy, Greece and the southern half of the Federal Republic of Germany. There are also affected areas in France, Austria and Yugoslavia. It is present in most East European countries. It has recently been reported in the Netherlands, Belgium and Switzerland. Eradication is not a feasible proposition in a country where it is firmly established. However, the United Kingdom has been pressing in Brussels for Community measurs to contain the disease through controls on imports and exports of Beta vulgaris and other material for planting on agricultural land. The Commission has recently circulated to the EC plant health standing committee draft proposals for Community measures which would have this effect.

Land Drainage Committees

Mr. Kenneth Carlisle asked the Minister of Agriculture, Fisheries and Food if he will list for each regional and local land drainage committee in England and Wales the present members, the names of those bodies who appointed them and whom they represent, and their occupation or profession.

Mrs. Fenner: I am unable to reply at present. Most of the information on appointments to regional and local land drainage committees is held by the 10 water authorities in England and Wales. I shall ask them for the details requested and write to my hon. Friend in due course.

Poultrymeat Imports

Mr. Speller asked the Minister of Agriculture, Fisheries and Food what volume of poultrymeat has been

recorded by Her Majesty's Customs and Excise at the port of Plymouth as having been imported from France in each month since January 1984.

Mr. MacGregor: Information available on poultrymeat imported through Plymouth does not separately identify country of origin.

Total imports of fresh/frozen poultrymeat (excluding offals) through Plymouth for the period requested were as follows:—

	Tonnes	
	1984	*1985*
January	343	701
February	464	786
March	457	606
April	432	*
May	385	*
June	555	*
July	593	*
August	363	*
September	677	*
October	892	*
November	1,058	*
December	638	*

* Data not available

Milk Quotas

Mr. Maclean asked the Minister of Agriculture, Fisheries and Food what representations he has received from, and what discussions he is undertaking with, farming organisations on a central planning authority to control and regulate dairy quota allocations and transfers.

Mr. MacGregor: I assume my hon. Friend is referring to the arrangements which might apply if we are successful in Brussels in negotiating a system of leasing and/or sales of quota. Discussions are taking place with the Commission, the MMBs and the farming organisations as to how such schemes might operate. One opinion is that the MMBs might act as a central clearing house for offers and bids for quota but we are still at the formulative stage.

Mr. Maclean asked the Minister of Agriculture, Fisheries and Food (1) how many dairy quota hard cases he has had passed to him by hon. Members for review;

(2) what conclusions he has reached following his study of dairy quota hard cases; and if he will make a statement;

(3) if he will list the number of dairy quota hard cases he has reviewed which fall into the following categories *(a)* cases of farmers not appealing to the tribunals on time, *(b)* cases of farmers who felt that the tribunals did not give them a fair hearing, *(c)* cases of farmers who have changed farms and their quota has been assessed on their former farm of lower output, *(d)* cases of farmers who have changed farms and received no quotas at all, *(e)* cases of farmers who were due to come into milk production in 1985-86 and now have no quota at all, and *(f)* cases of farmers who held back on production because of uncertainty and were cut back from the actual base on 2 April rather than their planned farm and horticultural development scheme base.

Mr. MacGregor: I have received a considerable number of representations from hon. Members and others about individuals who have received no milk quota or a quota which is considered insufficient. In most cases the information provided is insufficiently detailed to enable them to be classified as requested by the hon. Member.

The amount of quota available for re-allocation is very small. I am considering, in consultation with the industry organisations, how best to distribute it. I expect to make an announcement soon.

Mr. Maclean asked the Minister of Agriculture, Fisheries and Food if it is still his view that dairy quotas should last only five years; and in what circumstances he would envisage asking for them to be maintained on a permanent basis.

Mr. MacGregor: There are no plans being envisaged within the Community for continuation of the dairy quota system after the five years originally proposed for it.

Support Costs

Mr. Ralph Howell asked the Minister of Agriculture, Fisheries and Food what was the cost to the Exchequer of support to United Kingdom agriculture, as follows *(a)* gross cost and *(b)* cost net of all refunds; and if he will show *(b)* as a percentage of gross domestic product, for the years 1960-61, 1970-71, 1980-81, 1981-82, 1982-83, 1983-84 and 1984-85.

Mr. MacGregor [*pursuant to his reply*, on 21 May 1985, c. *374*]: Public expenditure under the CAP and on national grants and subsidies for the years 1980-81 to 1984-85 is given in table 28 of the annual review White Paper and similar data for earlier years is given in previous White Papers. These tables also show, where applicable receipts from the Community budget. Data of the gross domestic product for the years up to 1983-86 are contained in the *Economic Trends* annual supplement. The figure for 1984-85 is given in table 2.4 of the Financial Statement and Budget Report 1985-86.

As we contribute to, as well as draw from, the Community budget, these figures can be more meaningfully compared with gross than with net agricultural expenditure.

Pesticides

Mr. Campbell-Savours asked the Minister of Agriculture, Fisheries and Food what information has been received from the West German Government regarding the prohibition of Paraquat in that country; and what steps are being taken to perpetuate the long-term experiment involving Paraquat application to soils at the Yarnton weed research laboratory.

Mrs. Fenner: [*pursuant to her reply*, 3 June 1985 c. *89*]: Information received from the West German Government indicates that the non-renewal of approvals for certain products containing Paraquat in the Federal Republic is linked to uncertainties about the long-term effect of continued application of the active ingredient on a limited range of soil types, where minimum calculation techniques are employed, and where particularly sensitive crops are to follow treatment. I understand an appeal has been lodged against the decision.

The long-term experiment at the weed research organisation has revealed useful information but has now largely run its course. No arrangements are therefore to be made to continue the study after the spring of 1986.

DEFENCE

ARWEN 37

Mr. Chris Smith asked the Secretary of State for Defence whether the armed forces have any plans for the development or introduction of a fully automatic version of the ARWEN 37 weapon.

Mr. Lee: No.

Woolwich Arsenal (Bird Poison)

Mr. Cartwright asked the Secretary of State for Defence (1) what is the estimated cost of using rodent control operators to put down bird poison at Woolwich arsenal over the weekend of 1-2 June 1985;

(2) why his Department has used slow-acting poison against wild birds at Woolwich arsenal; and what representations have been made on this matter from staff or outside bodies;

(3) how many times in recent years bird poison has been used at Woolwich arsenal; and what is the estimated number of *(a)* pigeons and *(b)* other wild birds which have been killed as a result.

Mr. Lee: The culling of feral pigeons is licensed annually by the Ministry of Agriculture, Fisheries and Food, and is carried out from time to time at Woolwich arsenal by an MOD employee who has been specially trained. The task is carried out in accordance with procedures laid down by the licensing Ministry. Other wild birds are revived and set free. Culling is necessary because of the health hazards posed by droppings and the decomposing bodies of pigeons which die after becoming trapped in buildings, particularly in roof spaces. There have been four culls since the first licence was granted in 1983 on 15 October 1983, 12 May 1984, 3 August 1984 and 24 November 1984; 195 pigeons were killed. No other wild birds have been killed. The problem persists and more frequent culling will be needed in the future. About 15 man hours are expended on each occasion, largely at weekend rates and materials cost about £6. No culling took place at the weekend 1-2 June 1985. No representations on the matter have been made by staff, although a recent inquiry from a local RSPCA Inspector on the method of culling was received on 3 June. A reply is being sent.

Chile

Mr. Corbyn asked the Secretary of State for Defence if he will list the occasions since 1 July 1982 when Her Majesty's ships have made visits to ports in Chile.

Mr. Dalyell asked the Secretary of State for Defence if he will list all visits made by United Kingdom warships to Chilean ports in the last 12 months, with the reasons in each case; and if he will make a statement.

Mr. Stanley: Her Majesty's ships have made the following visits to Chilean ports since 1 July 1982:

Ship	*Date*
HMS Hecate	January 1983
HMS Falmouth	August 1983
HMS Herald	October 1983
HMS Endurance	December 1983
HMS Herald	August 1984
HMS Endurance	April 1985

All of these visits were for the purposes of rest and recreation.

Service Hospitals (Complaints Procedure)

Mr. Meadowcroft asked the Secretary of State for Defence whether he plans to introduce a complaints system for service hospitals similar to that proposed for National Health Service hospitals in the Hospital Complaints Procedure Bill.

Mr. Lee: Procedures already exist at the Service hospitals under which Service and Civilian patients may make complaints. We believe the procedures operate satisfactorily but will be reviewed in the light of any procedureal changes introduced into National Health Service hospitals as a consequence of the Hospital Complaints Procedure Bill.

Prime Contractors

Mr. Gordon Brown asked the Secretary of State for Defence if he will list all those companies which have been designated prime contractors by his Department; and what is the total value of the work involved for each contractor.

Mr. Butler: The information sought could not be given without disproportionate time and effort.

Avimo Ltd.

Mr. Gordon Brown asked the Secretary of State for Defence when Avimo Ltd. was appointed a prime contractor by his Department; for how long; and for what work.

Mr. Butler: Avimo has never been appointed as a prime contractor to the Ministry of Defence.

Euryalus and Otter (Refits)

Mr. Gordon Brown asked the Secretary of State for Defence if he will explain the basis on which costings will be made of the work done by the royal dockyards in the refitting of Euryalus and Otter.

Mr. Lee: Work done by the royal dockyards in support of the refits of Her Majesty's ships Euryalus and Otter and stores supplied to the refits will be charged on a full cost basis, in accordance with the usual public accounting procedures. Under these provisions the direct cost of such work, together with an appropriate share of MOD overheads, is attributed to the project in question.

RAF Aircraft (Chilean Airfields)

Mr. Dalyell asked the Secretary of State for Defence on how many occasions in each of the last 12 months Royal Air Force planes have utilised landing facilities at Chilean airfields, with the reasons in each case; and if he will make a statement.

Mr. Stanley: None.

Exercise Brave Defender

Mr. D. E. Thomas asked the Secretary of State for Defence whether Greenham common and Molesworth will be key points in the Brave Defender exercise.

Mr. Stanley [*pursuant to his reply*, 10 June 1985, c. *309*]: No.

NORTHERN IRELAND

Grants and Allowances

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is the number of recipients in Northern Ireland and the total amount paid in *(a)* death grant, *(b)* maternity allowance and *(c)* special diet supplement and special laundry supplement for the last year for which figures are available.

Mr. Chris Patten: It is estimated that in the 1983-84 financial year 14,000 persons in Northern Ireland received death grants at a total cost of £400,000 and that 11,600 women in Northern Ireland received maternity allowances at a total cost of £4,400,000. Information about special dietary and laundry supplements is not held in the precise form requested. However, on 7 December 1983, the latest date for which figures are available, the estimated numbers of supplementary benefit recipients whose additional requirements included special dietary and laundry expenses and the annual amounts involved were as follows:

	Numbers	*Annual requirements £*
Special diets	21,100	2,746,000
Laundry	1,300	130,000

The amount of money actually paid to recipients in some long-term cases is reduced by up to £1 per week.

Supplementary Benefit

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is the number of young people of 16 and 17 years of age in receipt of supplementary benefit; and what is the weekly total amount paid to this age group in Northern Ireland.

Mr. Chris Patten: On 7 December 1983, the latest date for which information is available, some 6,200 claimants aged 16 or 17 were receiving supplementary benefit. To total weekly amount is not readily available but the majority of existing claimants in this age group are likely to be currently receiving the ordinary non-householder rate of £17·30.

Family Income Supplement

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is the amount and the number of people who are in receipt of family income supplement in Northern Ireland.

Mr. Chris Patten: On 3 June 1985 the number of families was 14,567. In the financial year 1984-85 just over £11 million was paid.

State Pensions

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what is his latest estimate for expenditure on state pensions in Northern Ireland and the likely recipients in *(a)* 1991, *(b)* 1996 and *(c)* 2001.

Mr. Chris Patten: The latest estimate of annual expenditure on contributory retirement pensions in Northern Ireland is £351·5 million and the estimated numbers of recipients are as follows:

	Numbers
1991	211,900
1996	211,900
2001	212,800

Bus and Rail Services

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland how the present level of Government support for bus and rail services in Northern Ireland compares with the level in 1978-79.

Mr. Chris Patten: The information is as follows:

	1978-79 £000	*1984-85 £000*
Rail	5,250	10,774
Bus	5,069	9,939
	10,319	20,713

Nurses (Pay)

Rev. Martin Smyth asked the Secretary of State for Northern Ireland what was the average number of hours overtime worked per week by *(a)* a first year student nurse, *(b)* a second year student nurse, *(c)* a third year student nurse, *(d)* an enrolled nurse, *(e)* a staff nurse and *(f)* a sister grade II in Northern Ireland in the last year for which figures are available.

Mr. Chris Patten: The information is as follows:

Average number of hours overtime worked per person per week

Grade	*Hours*
1st year student nurse	0·01
2nd year student nurse	0·07
3rd year student nurse	Nil
Enrolled nurse	0·43
Staff nurse	0·15
Sister Grade 2	0·18

Gas Industry

Mr. Wareing asked the Secretary of State for Northern Ireland what is his estimate of the total number of jobs that will be lost if the Northern Ireland gas industry closes down.

Dr. Boyson: Approximately 1,000 jobs over the closure period, but this would be offset by higher employment in other fuels, particularly coal and liquid petroleum gas, which are heavily labour-intensive in distribution.

Cold Storage

Mr. Nicholson asked the Secretary of State for Northern Ireland (1) what is the cold storage and blast freezing capacity available in Northern Ireland at the current time;

(2) what is the amount of expansion in the facilities available for cold storage and blast freezing in Northern Ireland since October 1984; and if he will list them;

(3) what proposals there are to provide further cold storage and blast freezing facilities in Northern Ireland in the next six months; and if he will list them.

Dr. Boyson: Information on overall storage and freezing capacity is not available. The Northern Ireland

Departments of Agriculture and of Economic Development are at present studying the problems of storage for beef with a view to meeting the requirements of the peak period of intervention buying in the autum, and statistical information on capacity will be available shortly.

SOCIAL SERVICES

Unemployment Benefit

77. **Mr. O'Neill** asked the Secretary of State for Social Services if he will estimate what numbers of unemployed people receive no unemployment benefit.

Mr. Whitney: I refer the hon. Member to the *Quarterly Analysis of Unemployed Claimants*, a copy of which is in the Library.

Dentures

Mr. Lyell asked the Secretary of State for Social Services how many dentures constructed of chrome cobalt were supplied by dental surgeons under the National Health Service in the two years preceding and the two years following the removal of such dentures from the list of items requiring prior approval from the Dental Estimates Board before the work in question could proceed.

Mr. Kenneth Clarke: The prior approval requirements for metal-based dentures were altered on 1 October 1980 and brought into line with the requirements for acrylic-based dentures. The number of metal based dentures supplied in England and Wales in the two preceding and two following years is as follows:

Year ended 30 September	*Number*
1979	60,810
1980	80,260
1981	108,670
1982	142,180

We cannot identify separately the number of chrome cobalt dentures.

Rubella

Ms. Richardson asked the Secretary of State for Social Services what steps he has taken to increase the rate of immunisation among schoolgirls and women of child-bearing age against rubella.

Mr. John Patten: On 29 June 1983 my right hon. and learned Friend announced in his reply to my hon. Friend the Member for Staffordshire, Moorlands (Mr. Knox) at column *99* a major co-operative publicity campaign between voluntary organisations, the Health Education Council and the Government. This three-year campaign, co-ordinated by the National Rubella Council under the patronage of Her Royal Highness the Princess of Wales, was launched in November 1983. The campaign is a sustained effort to increase immunity to rubella in these groups.

Board and Lodging Payments

Mr. Knox asked the Secretary of State for Social Services what assessment he has made of the implications of the new regulations on board and lodging accommodation payments for the rights of supplementary benefit claimants living temporarily in such accommodation to register with general practitioners; and whether he has considered issuing instructions on this point to family practitioners' committees.

Mr. Whitney: No instructions are needed. The new regulations do not affect the existing arrangements under which a person temporarily resident in an area, who requires treatment, may call upon a doctor for emergency services or acceptance as a temporary resident and is entitled to be given any immediately necessary treatment.

Pregnancy (NHS Testing and Counselling)

Mr. Cohen asked the Secretary of State for Social Services (1) whether he has any proposals for the National Health Service to provide free pregnancy testing and an information and counselling service for all ways of contending with the difficulties of an unplanned pregnancy; and if he will make a statement;

(2) what steps he takes to seek to ensure that the result of a National Health Service pregnancy test is made available to the client as soon as possible and where necessary counselling is provided.

Mr. Kenneth Clarke: Where health authorities offer general practitioners direct access to pathology facilities, then the opportunity exists for the provision of pregnancy testing, free of charge, if the practitioner feels this is appropriate. Health authorities may also offer free pregnancy tests to the patients of family planning clinics, and are aware of the importance of facilities being readily available to give prompt confirmation of pregnancy, and an early uptake of care. This was recommended by the first report of the maternity services advisory committee, which also stressed the need for each woman to be able to discuss thoroughly, with those who will be responsible for her care, any medical and social factors which may affect the course of the pregnancy, and agree a suitable pattern of care. We have commended this report to health authorities for their consideration as to the action which could and should be taken locally to improve services.

Abortions

Mr. Cohen asked the Secretary of State for Social Services what information he has as to the numbers and trend of young girls having abortions; whether he has received any recent expert recommendations on the matter; whether he has any proposals; and if he will make a statement.

Mr. Kenneth Clarke: I gave detailed statistics on the number and rate of abortions carried out on girls aged under 16 resident in England and Wales from 1968 to 1983 respectively in my replies to my hon. Friend the Member for Southend, East (Mr. Taylor) on 28 January at column *61* and the hon. Member for Barking on 12 February at columns *155-58*. Statistics for the whole of 1984 are not yet available, but in the first three quarters 3,057 abortions were carried out on girls aged under 16 resident in England and Wales compared with 3,011 in the corresponding period of the previous year.

A research report published by the Royal College of Obstetricians and Gynaecologists on late abortions in England and Wales made recommendations about

counselling and health education for young people and the importance of the early recognition of pregnancy. A similar recommendation was made in the research report on counselling services recently published by the Policy Studies Institute. We are discussing these with the Department of Education and Science and the Health Education Council.

Mr. Cohen asked the Secretary of State for Social Services (1) if he has any proposals to seek to ensure that the availability of National Health Service abortion services are more evenly distributed throughout the country; and if he will make a statement;

(2) what steps he takes to ensure that all health authorities provide sufficient National Health Service abortion facilities, including day care abortion centres; and if he will make a statement.

Mr. Kenneth Clarke: It is for health authorities to decide the level and scope of their provision for abortion, including day care facilities, in the light of local needs and circumstances.

Mr. Cohen asked the Secretary of State for Social Services (1) if he will issue guidelines to all health authorities to seek to ensure that all abortions, as provided for by the Abortion Act 1967, are quickly arranged after the appropriate counselling; and if he will make a statement;

(2) what is his policy towards securing the performance of therapeutic abortions as early in pregnancy as possible; and if he will make a statement;

(3) what is his policy towards the provision of a facility for general practitioners and family planning clinic doctors to make appointments for abortion consultation by telephone after the appropriate counselling and discussion; and if he will make a statement.

Mr. Kenneth Clarke: It is clearly desirable that abortions should be carried out as early in pregnancy as possible. Recently published research by the Royal College of Obstetricians and Gynaecologists and the Royal College of General Practitioners has drawn attention to the factors which cause delay in abortion operations. We are discussing with the National Health Service how these problems, including the points made in the hon. Member's questions, can be tackled.

Speech Therapists

Mr. Andrew F. Bennett asked the Secretary of State for Social Services if he will list the level of remuneration in each health authority for speech therapists supervising students on clinical placement for each of the last five years.

Mr. Kenneth Clarke: We do not hold centrally information in the form requested.

Breast Cancer

Mr. Cohen asked the Secretary of State for Social Services if he will estimate the incidence and trend of breast cancer in women; and if he will make a statement.

Mr. Kenneth Clarke: Breast cancer is an important cause of death in women. There were 13,277 deaths (458·02 per million female population) from breast cancer in England and Wales in 1984, and 21,165 (830·84 per million female population) registrations reported to cancer registries in 1981. These are the latest years for which figures are available. There has been a small increase in breast cancer deaths and registrations over the last 10 years.

We are already funding a large scale programme of research into the early detection of breast cancer. A recent study in Sweden has now suggested that a significant number of deaths might be avoided by the use of mammographic screening. We are establishing as quickly as possible an expert group to consider what our future policy on this subject should be in the light of the latest research findings.

Mr. Cohen asked the Secretary of State for Social Services what is the amount of grant provided by Her Majesty's Government to the Mastectomy Association and any other organisation concerned with coping with the effects of breast cancer in women for each of the past five years.

Mr. Kenneth Clarke: In addition to that made to the Mastectomy Association, we also make grants under section 64 of the Health Services and Public Health Act 1968, to the women's national cancer control campaign, who are concerned with the prevention and early detection of breast cancer, and to Cancer Link who, among other activities, organise self-help groups and counselling for women with breast cancer. Details of the grants made for each of the past five years are as follows:

	1981-82 £	*1982-83* £	*1983-84* £	*1984-85* £	*1985-86* £
Mastectomy Association	6,000	6,000	6,000	6,000	6,000
Women's National Cancer Control Campaign	60,000	65,000	68,000	68,000	68,000
Cancer Link	—	—	—	6,000	6,000

We also make a substantial grant to the Health Education Council which among other activities produces and distributes a leaflet on breast self-examination.

Diabetics

Mr. Cohen asked the Secretary of State for Social Services (1) what arrangements he has to estimate the number of diabetics in the United Kingdom, and, in particular, amongst ethnic minority communities; and whether he proposes any changes in these arrangements;

(2) if he will estimate the number of diabetics in the United Kingdom *(a)* generally and *(b)* amongst ethnic minority communities.

Mr. Kenneth Clarke: Studies have estimated that the prevalence of diabetes is between 1 and 2 per cent. of the population, between 500,000 and 1 million people in the

United Kingdom. An exercise to provide more precise estimates would be expensive and unlikely to be of significant practical benefit. We do not think special studies on the prevalence of diabetes among ethnic minorities are needed.

Occupational Therapists

Mr. Pawsey asked the Secretary of State for Social Services how many vacancies currently exist for occupational therapists; and how this compares with the figure for 1979.

Mr. Kenneth Clarke: We do not hold this information centrally

Infertility and Abortion (Clinics)

Mr. Cohen asked the Secretary of State for Social Services what is his policy towards the provision of separate wards and clinics for women with infertility problems from those women attending for termination of pregnancy; and if he will make a statement.

Mr. Kenneth Clarke: It is widely recognised as good practice that women attending hospital for an abortion should be treated separately from those receiving infertility treatment.

Social Security Review

Mr. Austin Mitchell asked the Secretary of State for Social Services what estimate he made in preparing the Green Paper on Social Security of the cost of the state earnings related pension scheme in 2034 as a percentage of gross domestic product on the assumption that the future rate of growth would be the average of *(a)* the years 1953 to 1973 and *(b)* the years 1979 to 1984, respectively.

Mr. Newton: No forecasts were made of the cost of the state earnings-related pension scheme using assumptions given in the question.

Mr. Wareing asked the Secretary of State for Social Services what consultations with employers operating occupational pensions schemes he had *(a)* before and *(b)* since the publication of his social security reviews; and what was the nature of their advice.

Mr. Newton: A large number of employers and organisations representing them gave evidence to the inquiry into provision for retirement. The evidence contained a wide range of views on pensions issues. Organisations representing employers have also been asked to comment on proposals on pensions in the Green Paper on the "Reform of Social Security" (Cmnd. 9517).

Mr. Gordon Brown asked the Secretary of State for Social Services if he will publish, in accordance with the Croham directive, all background papers prepared for his recent study on the reform of social security.

Mr. Newton: Volume 3 of the Green Paper, "Reform of Social Security", (Cmnd. 9519) contains a number of background papers to the review. A very large amount of material was submitted in evidence to the review. Those who gave evidence are free to publish it and many have done so.

Prescription Charges

Mr. Hannam asked the Secretary of State for Social Services what are the eligibility requirements for gaining exemption from prescription charges; and which disabilities satisfy the requirements.

Mr. Kenneth Clarke: Exemption from prescription charges is available to people in the following categories. The list includes those medical conditions which confer entitlement to exemption.

1. Children under 16.
2. Men aged 65 or over and women aged 60 or over.
3. Pregnant women or women who have had a baby within the preceding 12 months.
4. People who get Supplementary Benefit, Family Income Supplement or Housing Benefit Supplement, their partners and dependants.
5. War or service pensioners (for items for their accepted disablement only).
6. People who qualify on low income grounds, their partners and dependants.
7. People who have—
   (i) a permanent fistula (including caecostomy, colostomy, laryngostomy or ileostomy) requiring continuous surgical dressing or an applicance;
   (ii) one of the following disorders for which specific substitution therapy is essential:
   Addison's disease and other forms of hypoadrenalism,
   diabetes insipidus and other forms of hypopituitarism,
   diabetes mellitus,
   hypoparathyroidism,
   myasthenia gravis,
   myxoedema;
   (iii) epilepsy requiring continuous anti-convulsive therapy;
   (iv) a continuing physical disability which prevents the patient from leaving his residence without the help of another person.

Hospital Waiting Lists

Mr. Mason asked the Secretary of State for Social Services (1) how many persons are awaiting admission to Barnsley district general hospital for hernia operations; and what is the average waiting time;

(2) if he will give the figures of the numbers of persons and the average waiting time of each operable illness and injury for the Barnsley district general hospital.

Mr. John Patten: The information requested is not available centrally. The right hon. Member may wish to write to the chairman of the Barnsley health authority who may be able to provide the information requested.

Mr. Mason asked the Secretary of State for Social Services how many persons are awaiting X-ray examinations; and what is the average waiting time.

Mr. John Patten: The information requested is not collected centrally.

Complaints Procedures

Mr. Meadowcroft asked the Secretary of State for Social Services whether he intends to establish complaints procedures for community health services as well as for hospitals.

Mr. John Patten: The Department's guidance on complaints procedures already covers the handling of complaints about the community health services. There are, however, no centrally promulgated procedures for handling complaints relating to the exercise of clinical judgment by medical and dental staff working within the

community health services. We are considering the possibility of promulgating such procedures, with the interested professional organisations.

Mr. Meadowcroft asked the Secretary of State for Social Services what plans he has to enable community health councils to monitor complaints received by family practitioner committees and for the provision to the public of information about family practitioner service complaints.

Mr. John Patten: Under arrangements introduced this year family practioner committees are required to compile annual programmes which include information concerning the incidence, pursuit and resolution of complaints. Previous conventions on confidentiality will be retained. The information collected will be made available to community health councils. In addition, community health council representatives are entitled to attend meetings of family practitioner committees. We expect family practitioner committees to publish extracts from their annual programmes locally including those relating to the incidence and outcome of complaints.

Mr. Meadowcroft asked the Secretary of State for Social Services what plans he has to establish complaints procedures covering hospitals with an agency arrangement with the National Health Service.

Mr. John Patten: The Department's guidance on complaints procedures in the hospital and community health services already covers the handling of complaints from National Health Service patients being cared for in registered homes under contractual arrangements.

Mr. Meadowcroft asked the Secretary of State for Social Services whether he intends to establish guidelines for the monitoring of complaints by health authorities and community health councils and for the publication of information about hospital complaints.

Mr. John Patten: The Department's guidance on the handling of complaints in the hospital and community health services requires health authorities to have systematic and effective methods of reviewing complaints and to publicise their complaints procedures. The Hospital Complaints Procedure Bill currently before Parliament would lay a duty on my right hon. Friend to direct health authorities to establish and publicise specified procedures. We shall be reviewing the existing procedures in the context of this, in consultation with all interested organisations.

Mr. Meadowcroft asked the Secretary of State for Social Services whether he intends to issue guidance requiring health authorities to deal thoroughly and expeditiously with complaints when either another complaint from the same person or about the same person is the subject of litigation, or a part of the complaint is the subject of litigation.

Mr. John Patten: We have advised health authorities that all complaints should be investigated thoroughly and fairly and as quickly as circumstances permit. We have also advised that legal proceedings or the likelihood of such proceedings should not deter authorities from undertaking any immediate investigation of a complaint that may be necessary.

Mr. Meadowcroft asked the Secretary of State for Social Services (1) what plans he has to establish a complaints procedure for hospitals directly managed by his Department;

(2) if he will introduce legislation to prevent National Health Service doctors entering into contracts which would impede investigations pursuant to the Hospital Complaints Procedure Bill.

Mr. John Patten: I shall let the hon. Member have replies as soon as possible.

NHS (Pay Reviews)

Mr. Wareing asked the Secretary of State for Social Services when the second report of the pay review body for the professions allied to medicine is to be published; if the Government are committed to its implementation; and if he will indicate how any award is to be financed.

Mr. Kenneth Clarke: As the hon. Member will be aware the second report of the Review Body for the Professions Allied to Medicine was published on 6 June. On the other points I refer the hon. Member to the reply of my right hon. Friend the Prime Minister to my hon. Friend the Member for Mid-Worcestershire (Mr. Forth) on 6 June at column *194-6*.

Mr. W. H. Rose (Member's Correspondence)

Mr. Kaufman asked the Secretary of State for Social Services when he intends to reply to the letter to him dated 24 January, with regard to Mr. W. H. Rose of 12 Rusholme Grove, Manchester, from the right hon. Member for Manchester, Gorton.

Mr. Kenneth Clarke: I have written to the right hon. Member today.

Childbirth (Statistics)

Mrs. Ann Winterton asked the Secretary of State for Social Services what information he has concerning the rates of use of general anaesthetic in childbirth in each of the different health regions.

Mr. John Patten [*pursuant to his reply*, 15 May 1985, c. *165*]: The available information is given in the table. It relates to the use of general anaesthesia with instrumental deliveries (caesarean section and forceps deliveries) only.

Estimated number of instrumental deliveries with general anaesthesia as a percentage of total deliveries and of instrumental* deliveries: England*

Regional Health Authority	*Percentage of total deliveries*		*Percentage of instrumental* deliveries*	
	1982	*1983†*	*1982*	*1983†*
Northern	7·0	6·8	43·7	41·4

* Caesarian sections and forceps deliveries only.
† Provisional.

Written Answers to Questions

Wednesday 12 June 1985

PRIME MINISTER

European Court of Human Rights

Mr. Marlow asked the Prime Minister whether she will introduce legislation to restrict the powers of the European Court of Human Rights as regards United Kingdom law such that it has no status with regard to political as distinct from purely legal issues; and if she will make a statement.

The Prime Minister: The United Kingdom has signed and ratified the European Convention for the Protection of Human Rights and Fundamental Freedoms. It would not be practicable or possible, to distinguish between judgments of the European Court which the United Kingdom has, under the convention, an obligation to abide by. Amendments to the convention, including any affecting the role of the European Court, need to be agreed by the contracting parties and could not be imposed by domestic legislation.

Chinese Prime Minister (Meeting)

Mr. Parry asked the Prime Minister if she will make a statement on her recent meeting with the Prime Minister of China.

The Prime Minister [*pursuant to her reply*, 7 June 1985, c. *263*]: At my first round of talks with Premier Zhao Ziyang on 3 June we signed two bilateral agreements, on economic co-operation and on co-operation in the peaceful uses of nuclear energy. We discussed a range of bilateral questions, including the ratification on 27 May of the joint declaration on the future of Hong Kong, and also a number of international issues. At our second round on 6 June we discussed economic co-operation and trade. Our exchanges were valuable and wide-ranging and reflected the new climate of our relations following the agreement on Hong Kong.

ATTORNEY-GENERAL

Judges and Magistrates (Remarks)

Mr. Janner asked the Attorney-General what complaints have been received by the Lord Chancellor during each of the past 10 years alleging racially offensive remarks by judges, magistrates or members of tribunals.

The Attorney-General: The information requested cannot be provided in relation to recent years except at disproportionate cost, and with regard to earlier complaints is not available. My right hon. and noble Friend The Lord Chancellor will be writing further to the hon. and learned Member.

Housing Executive (Payments to Contractors)

Mr. A. Cecil Walker asked the Attorney-General whether any report has been sent to the Director of Public Prosecutions concerning the overpayment of a contractor by the Housing Executive in Northern Ireland.

The Attorney-General: In 1985 the Director of Public Prosecutions for Northern Ireland received one report from the Chief Constable of the Royal Ulster Constabulary of a police investigation into allegations of overpayment of a contractor by the Housing Executive in Northern Ireland. He has directed that there should be no prosecution on the basis of that report.

OVERSEAS DEVELOPMENT

Ethiopia and Sudan (Food Aid)

Mr. Tony Lloyd asked the Secretary of State for Foreign and Commonwealth Affairs if he has anything to add to his answer of 8 May, *Official Report*, column *426*, regarding the amount of food aid promised by the European Community and the United Kingdom to Ethiopia and Sudan for 1985 and the amount so far delivered.

Mr. Raison: The revised and updated figures are:

Tonnes of wheat or wheat equivalent

	Ethiopia	*Sudan*
1. European Community		
Commitments	271,000	123,000
Deliveries*	124,000	57,000
2. United Kingdom		
Commitments	15,000	†50,000
Deliveries	15,000	50,000

* Includes deliveries from commitments made in 1984 and 1985.
† This corrects the figure given to you on 8 May (Col. *426*) and does not indicate any further commitment.

I announced on 10 June, in reply to a question from my hon. Friend the Member for Hertford and Stortford (Mr. Wells) at column *638*, that we stand ready to provide up to 10,000 tonnes more bilateral food aid when we are satisfied about the arrangements to be made for its transportation and distribution in Ethiopia.

Nicaragua

Mr. Dalyell asked the Secretary of State for Foreign and Commonwealth Affairs, pursuant to his answer on 3 June, *Official Report*, column *9*, when he expects to decide on the case of a probationary clerical officer in the Overseas Development Administration, alleged to have released to the press a classified Government paper relating to Nicaragua.

Mr. Raison: As my right hon. and learned Friend the Attorney-General informed the House on 11 June in answer to a question from the hon. Member for Carrick Cumnock and Doon Valley (Mr. Foulkes) at column 395-96, he has decided that no prosecution should be brought against Mr. Dennis. Mr. Dennis has now been dismissed from the public service.

TRANSPORT

Commercial Vehicles (Overloading)

Mr. Forth asked the Secretary of State for Transport if he will give, by region and for the years since 1980, the number of convictions for overloading of commercial vehicles under Regulation 150 of the Motor Vehicles (Construction and Use) Regulations 1978 made under section 40(5) of the Road Traffic Act 1972.

Mrs. Chalker: The number of convictions for overloading by each of the Department's traffic areas are contained in the annual reports of the licensing authorities. They are:

Overloading Convictions: Licensing Authorities (October to September)

Traffic Area	*Report Year*				
	1979-80	*1980-81*	*1981-82*	*1982-83*	*1983-84 1st 6 months*
North Eastern (Newcastle)	152	277	323	587	419
North Eastern (Leeds)	520	644	292	260	132
North Western	139	119	294	823	307
West Midland	799	1,048	914	821	301
Eastern (Nottingham)	330	367	410	628	262
Eastern (Cambridge)	989	889	1,109	1,065	496
South Wales	147	135	453	358	166
Western	264	257	282	362	177
South Eastern	284	201	287	423	367
Metropolitan	1,014	884	1,449	1,322	674
Scottish	113	361	282	258	222
TOTAL	4,751	5,182	6,095	7,007	3,523

M11 (Link Road Proposals)

Mr. Cohen asked the Secretary of State for Transport when he now expects to announce his decision on the M11 link road proposals; and in what way the decision will be announced.

Mrs. Chalker: My right hon. Friends the Secretaries of State for the Environment and for Transport hope to issue their joint decision letter next month.

Motor Cycle Noise

Mr. Murphy asked the Secretary of State for Transport if he will make a statement on the Government's response to the recent European Commission report and recommendations on the reduction of motor cycle noise.

Mrs. Chalker: Explanatory memorandum 9148/84 dated 13 November 1984 set out our comments on the proposals by the European Commission to reduce noise from new motor cycles. Recent amendments by the Commission to its original proposals do not alter the proposed maximum permitted noise levels. In our view these are too high, especially for machines of up to 125 cc.

NATIONAL FINANCE

Civil Service (Lawyers)

Mr. Nicholas Brown asked the Chancellor of the Exchequer how many professionally qualified lawyers are at present employed in the Civil Service in a capacity relevant to their profession; in which Departments; and on what grades or remuneration.

Mr. Hayhoe: No information is held centrally on either the professional qualification of civil servants or the exact nature of their work. There are however, certain posts in the open structure in other grades where a legal qualification is required and whose members are engaged in legal work.

The table shows the distribution of such staff by department and by grade (or equivalent). In addition, there are professionally qualified lawyers elsewhere in the Civil Service who may be engaged on legal work. This information could be obtained only at disproportionate cost and effort.

Professionally qualified lawyers in the civil service 1985

Asset Sales (Fees and Commissions)

Dr. McDonald asked the Chancellor of the Exchequer if he will list in the *Official Report* all the fees and commissions paid to primary underwriters, sub-underwriters, financial advisers, legal advisers and stockbrokers in respect of all the sales of previously publicly-owned enterprises from 3 April 1984 to date; and if he will name each firm concerned.

Mr. Moore: I refer the hon. Member to the reply I gave to the hon. Member for Sedgefield (Mr. Blair) on 24 May 1985, at column 562, which covers all public share sales since 3 April 1984 other than the 1985 sale of shares in British Aerospace. Details for that sale in respect of the headings specified by the hon. Member are given in the table:

	Firm
Company	British Aerospace 1985
Primary Underwriters	Kleinwort, Benson Ltd., Lazard Bros. & Co. Ltd., Hill Samuel & Co. Ltd., Morgan Grenfell & Co. Ltd., J. Henry Schroder Wagg & Co. Ltd.
Sub-Underwriters	Various*
Financial advisers	Lazard Bros. & Co. Ltd.
Legal advisers	Slaughter & May
Auditors	Peat, Marwick Mitchell
Stockbroker	Hoare, Govett Ltd., Cazenove & Co.†
Total fee/Commission (£000 including VAT)	9,982‡

*Too numerous to list.

†Allotment commissions were payable to stockbrokers and other intermediaries in respect of successful applications bearing their stamps. The estimated costs of such commissions are included in the provisional total shown and the names of the firms involved are too numerous to list.

‡Estimated. Expenditure on fees and commissions is provisional pending final settlements.

Demergers

Sir Geoffrey Finsberg asked the Chancellor of the Exchequer on how many occasions demergers under the provisions of schedule 18 to the Finance Act 1980 have been *(a)* applied for and *(b)* approved by the Board of Inland Revenue.

Mr. Moore: At the beginning of June 1985, 749 applications for clearance under schedule 18 to the Finance Act 1980 had been received by the Inland Revenue, of which 117 were subsequently withdrawn on the applicants' own initiative and another 22 are still being considered. Of the 610 applications which have been settled, clearance has been given to 505 (82 per cent).

Capital and Income (Distribution)

Mr. Meacher asked the Chancellor of the Exchequer if, pursuant to the answer of 3 June, *Official Report*, column *70*, concerning the distribution of capital and income, he will publish such information as he has available in a form as near as possible to that requested.

Mr. Moore: The available information is on the distribution of capital holdings and capital transfer tax liability by range of net capital value, and of capital gains tax liability by range of chargeable gain. It is published annually in "Inland Revenue Statistics", copies of which are in the Library. These statistics are derived from assessments of capital transfer tax and capital gains tax which do not contain information about income.

Bank of England Printing Works, Loughton

Sir John Biggs-Davison asked the Chancellor of the Exchequer what has been the effect of the introduction of the £1 coin on employment at the Bank of England printing works in Loughton; to what extent any redundancies have been voluntary; and whether there is to be any redeployment of Loughton personnel elsewhere in the bank's service.

Mr. Ian Stewart [*pursuant to his reply*, 11 June 1985, c. *401*]: Some 200 staff have left the Bank of England's printing works without replacement during the last two years, in the main as a result of the decision to introduce the £1 coin and to cease issuing the £1 note. Over half of this reduction was achieved through the operation of a voluntary selective severance scheme, the remainder through natural wastage. As the staff concerned were

involved with the production of bank notes—printers, guillotine operators, examiners etc.—there was no scope for their redeployment elsewhere in the Bank of England.

HOME DEPARTMENT

Closed Circuit Television Cameras

Mr. Chris Smith asked the Secretary of State for the Home Department how many closed circuit television cameras the Metropolitan police have for the surveillance of people in public places; how many of these are permanently fixed; where each one is located; how many of the overall total are located within the Lambeth police district; how many of the Lambeth cameras are permanently fixed; and where each of them is sited.

Mr. Giles Shaw: I shall reply as soon as possible.

Police Vehicles (Accident Statistics)

Mr. Merchant asked the Secretary of State for the Home Department if he will give the number of accidents involving police vehicles in the Northumbrian police authority area in the last 10 years in which there has been *(a)* injury and *(b)* death, and the total number of resultant deaths.

Mr. Giles Shaw: The information requested is only available for the years from 1979 onwards. This information is set out in the table.

	Accidents involving police vehicles where injuries resulted	*Fatal accidents involving police vehicles*	*Total number of deaths resulting*
1979	45	0	0
1980	32	3	3
1981	39	0	0
1982	42	1	1
1983	20	1	2
1984	10	0	0
1985*	1	0	0

*To 1 June.

Private Acts of Parliament and Byelaws (Reviews)

Mr. Tracey asked the Secretary of State for the Home Department whether his Department reviews proposals for local authority private Acts of Parliament and byelaws with a view to preventing additional burdens being placed on small businesses.

Mr. Mellor: yes, if the proposals relate to matters for which my right hon. and learned Friend is responsible. Additionally, in relation to byelaws for which the Home Secretary is the confirming authority, very careful consideration is given to any representations received from the business community.

Hard Drugs

Mr. Lawler asked the Secretary of State for the Home Department if there are any plans for negotiations to take place for a multilateral extradition treaty to cover offences related to the supply and traffic of hard drugs.

Mr. Mellor: The United Nations is currently consulting member states on the matters which might be included in a proposed new international convention on drug trafficking; extradition is among the topics under consideration.

Data Protection Act

Mr. Ashdown asked the Secretary of State for the Home Department if he will provide his latest estimate of the total cost to *(a)* the borough councils in Greater London, and *(b)* all United Kingdom local authorities of complying with the Data Protection Act.

Mr. Waddington: The estimate given during the passage of the Data Protection Bill indicated that £9 million to £11 million might be incurred by local authorities and public bodies in implementation costs in each of the first two years, with running costs at around £13 million in the first full year of operation, reducing thereafter. Estimates of likely costs to individual local authorities are not available centrally and could not be obtained without disproportionate expense.

Libyan People's Bureau

Mr. Latham asked the Secretary of State for the Home Department whether, pursuant to the Minister of State's reply to the hon. Member for Rutland and Melton, 13 May, *Official Report*, column *11*, regarding Mr. Salah Najem and the Libyan People's Bureau and the subsequent letter dated 4 June, he wishes to make any corrections to the answer of 7 May, *Official Report*, columns *329-31*, regarding persons in the bureau at the time of the murder of WPC Fletcher.

Mr. Giles Shaw: Mr. Salah Najem was in the bureau at the time of the shooting, but left it soon afterwards. He was arrested and interviewed by the police, but after being eliminated from their inquiries was released.

The question asked by my hon. Friend on 7 May related to those Libyans who were required to leave the United Kingdom between 17 and 27 April 1984. Apart from those who were deported, those required to leave were those who were in the bureau at the time of the break in diplomatic relations. Mr. Salah Najem was not in that category, and was not required to leave. I regret that the first sentence of the answer referred to was incorrect in suggesting that all those in the bureau at the time of the shooting were required to leave. The position is explained in more detail in my letter of 4 June to my hon. Friend, a copy of which is in the Library.

Immigration

Mr. Marlow asked the Secretary of State for the Home Department what information he has as to which European Economic Community countries provide for *(a)* citizens and *(b)* settled persons to bring in (1) husbands, (2) wives, (3) fiancés and (4) fiancées as of right.

Mr. Waddington: Apart from meeting their European Community obligations I understand from the information currently available that, of the European Community countries, Denmark, France and Greece make statutory provision for the admission of husbands and wives to join spouses who are either nationals of those countries or permanent residents; in the case of Belgium, any EC national has the right, to be joined by his or her wife or husband. The other countries make varying administrative

arrangements for the admission of husbands and wives. No country appears to make specific statutory provision for the admission of fiancés and fiancées.

Mr. Marlow asked the Secretary of State for the Home Department (1) how many hon. Members have 100 or more stops outstanding on immigration cases;

(2) what is the average length of time over which a stop operates in advance of a decision being made on a particular immigrant.

Mr. Waddington: The relevant information is not recorded centrally and cannot therefore be provided without disproportionate cost.

Tamils

Mr. Marlow asked the Secretary of State for the Home Department what discussions he has had with the Indian authorities with regard to the settlement of Tamils wishing to leave Sri Lanka.

Mr. Waddington: None. This is primarily a matter for the Governments of India and Sri Lanka. I understand that the Indian authorities have admitted some 100,000 Tamils from Sri Lanka.

Mr. Marlow asked the Secretary of State for the Home Department what discussions he has had with the Sri Lankan authorities with regard to the safe return of Tamils who have arrived in the United Kingdom.

Mr. Waddington: My right hon. and learned Friend has had no such discussions, but our high commission is in close touch with the Sri Lankan Government on this matter. On 31 May President Jaywardene gave our high commissioner at Colombo a formal personal assurance that no Tamils returned to Sri Lanka would be harassed or persecuted in any way.

Mr. Marlow asked the Secretary of State for the Home Department how many Tamils who have arrived in the United Kingdom since 1 May have subsequently left the United Kingdom.

Mr. Waddington: Of those Tamils who arrived in the United Kingdom after 21 April, and who on arrival sought political asylum or temporary refuge, and were refused entry, 16 had left the united Kingdom up to and including 4 June.

Diminished Responsibility

Dr. Godman asked the Secretary of State for the Home Department if he has any plans to seek to change the law relating to the special verdict, disability in relation to trial and diminished responsibility recommendations, as recommended in the report of the committee on mentally abnormal offenders (Cmnd. 6244) 1974.

Mr. Mellor: My right hon. and learned Friend has no present plans for legislation on these matters.

Prison Statistics

Mr. Kilroy-Silk asked the Secretary of State for the Home Department how many *(a)* murderers of police and prison officers, *(b)* sexual or sadistic murderers of children and *(c)* people who have committed murder by shooting in the furtherance of theft were in prison on the most recent convenient date.

Mr. Mellor [*pursuant to his reply*, 12 February 1985, c. 96]: On 31 December 1984 there were 31 persons in prison department establishments in England and Wales who had committed murder by shooting in furtherance of theft.

SCOTLAND

Public Inquiry (Edinburgh)

Lord James Douglas-Hamilton asked the Secretary of State for Scotland whether he has received the report of the public local inquiry held in Edinburgh on 20 May; and if he will make a statement.

Mr. Younger: I received the report of the local inquiry on 4 June. Having considered the report carefully, I am satisfied that the City of Edinburgh district council is in default of its statutory duties under sections 23A of the Housing (Financial Provisions) (Scotland) Act 1972 and section 108(2) of the Local Government (Scotland) Act 1973, namely, to limit the amount of contribution out of their general fund to the estimated housing revenue account for the year 1985-86 to an amount not exceeding £2·824 million and to determine such district rate as will provide sufficient moneys to meet such part of the total estimates expenses to be incurred by the authority during the year 1985-86 as falls to be met out of moneys raised by rates.

Accordingly, I have today made an order under section 211 of the Local Government (Scotland) Act 1973 requiring Edinburgh district council to remedy its default within 21 days by revising its estimated housing revenue account so as to budget for a rate fund contribution within the limit set, and also by reducing the district rate by at least 1·8p in the pound, and to take all necessary steps to give full effect to these decisions. Copies of the inquiry report and of the default order have been placed in the Library of the House.

The 1·8p in the pound reduction now required is in addition to a reduction of 5·2p in the pound which I have proposed in terms of section 5 of the Local Government (Scotland) Act 1966 on the grounds that Edinburgh district council's planned non-housing expenditure for 1985-86 is excessive and unreasonable.

Broadleaved Woodlands

Mr. Ron Davies asked the Secretary of State for Scotland (1) on how many occasions in the year to 31 March the Forestry Commission issued felling licences which permitted felling of broadleaved woods, without there being conditions attached for the replanting solely of broadleaved trees; and what area of woodland this involved;

(2) on how many occasions in the year to 31 March officials from his Department confirmed to the Forestry Commission that a proposal to clearfell a broadleaved woodland and convert it to agricultural land would make a significant contribution to the viability and economy of the agricultural holding concerned.

Mr. John MacKay: I shall reply to the hon. Member as soon as possible.

Agricultural Engineering Industry

Mr. Steel asked the Secretary of State for Scotland if, in the light of his Department's recent paper entitled "A Strategy for Agricultural Research and Development," he will make a statement indicating the amount of funds to be allocated to the agricultural engineering industry in Scotland and the source of those funds.

Mr. Younger: My Department's strategy paper has been distributed widely as a consultation document and no decisions will be taken about the allocation of public funds for research and development in agricultural engineering work, or in any other subject area, until I have had the opportunity to consider responses to the paper. A further paper will be produced later this year outlining detailed proposals.

I have no plans to allocate any funds to the agricultural engineering industry.

Veterinary and Agricultural Advisory Services

Mr. Steel asked the Secretary of State for Scotland if he will make a statement concerning the main aspects of the administration of the veterinary services in Scotland.

Mr. Younger: Apart from services provided by private veterinary practitioners, the veterinary services in Scotland have two elements, the veterinary investigation service and the state veterinary service. The veterinary investigation service comprises part of the advisory service provided by the Scottish agricultural colleges. Overall responsibility for the state veterinary service rests on a Great Britain basis with the Minister of Agriculture, Fisheries and Food, but the service also advises me on those animal health matters for which I have statutory responsibility.

Mr. Steel asked the Secretary of State for Scotland if he has any plans to carry out a review of *(a)* the veterinary investigation services in Scotland and *(b)* the agricultural advisory services in Scotland.

Mr. Younger: The financing and management of the advisory services (including the veterinary investigation service) provided by the three Scottish agricultural colleges are currently being reviewed in the light of the Government's decision announced in the public expenditure White Paper published in January 1985 to reduce the level of public funding of the advisory services in 1987-88, and any further review would not be appropriate at this stage.

Metallic Marker Pens

Mr. Gregory asked the Secretary of State for Scotland what information he has over the use in schools in Scotland of metallic marker pens with gold and silver lettering that contain xylene/xylol; and if he will make a statement.

Mr. Allan Stewart: I have no information about the extent of the use of such pens in Scottish schools.

Caravan Sites

Mr. Henderson asked the Secretary of State for Scotland if he will use his powers under the Caravan Sites and Control of Development Act 1960 to ensure that electrical installations on caravan sites conform to satisfactory standards.

Mr. John MacKay: Advice on electrical installations will be included in revised model standards for caravan sites which my right hon. Friend intends, after appropriate consultation, to specify later this year under section 5(6) of the Caravan Sites and Control of Development Act 1960. Such standards are not prescriptive; and it will remain the responsibility of licensing authorities, in the light of any standards specified under the Act, to decide what conditions to attach to site licences, and to ensure that these are enforced.

Legal Aid

Mr. Dalyell asked the Secretary of State for Scotland what response he has sent to Brodie Whyte and Whitten, West Lothian solicitors, on the paper they sent to him on the operation of legal aid procedures.

Mr. Ancram: None. The comments submitted by Messrs. Brodie, Whyte and Whitten on our consultation paper on legal aid in Scotland, along with other such comments, will be taken into account in our review of the present arrangements.

Forestry Commission

Mr. Hardy asked the Secretary of State for Scotland if he will make it his policy that the Forestry Commission should consult local authorities on all occasions when grant aid or felling licences for broadleaved woods are being considered to ensure that those woodlands are correctly identified and appropriately treated.

Mr. John MacKay: No. The extent of consultations is a matter of agreement between the Forestry Commission and the individual local authorities.

Mr. Hardy asked the Secretary of State for Scotland if he will advise the Chairman of the Forestry Commission to review the "Broadleaves in Britain Review of Policy" so that the commission will consult the Nature Conservancy Council over felling licence and grant aid applications for all ancient woodlands as recommended in paragraph 145 of the House of Lords Select Committee on Science and Technology report on Scientific Aspects of Forestry in 1980.

Mr. John MacKay: No. Arrangements for consultation were agreed between the Forestry Commission and the Nature Conservancy Council in 1974 and subsequently confirmed in 1983, under the terms of a ministerial direction issued to the Forestry Commissioners. My right hon. Friend considers these arrangements to be perfectly adequate.

In the context of its review of broadleaves policy, the Forestry Commission is discussing with the Nature Conservancy Council and the countryside commissions the publication of guidelines on the management of various categories of broadleaved woodlands, including ancient woodlands, which the Forestry Commission would take into account both in its own operations and in considering applications for grant-aid or felling permission from private woodland owners. This is in line with the recommendation at paragraph 145 of the Select Committee's report.

Students (Aberdeen)

Mr. Donald Stewart asked the Secretary of State for Scotland what reply he has given to the letter from the

Aberdeen university student representative council on the subject of an additional allowance for students attending the university.

Mr. Younger: The points made by the Aberdeen University Students' Representative Council have been noted, but there is no possibility of any special arrangements being introduced for Aberdeen university students at the present time as the awards settlement for the forthcoming academic session has already been announced. The Government are about to engage in consultations on the future of the system of financial support for students in the United Kingdom and the particular circumstances of students undertaking higher education courses in Scotland will be taken into account. A reply on these lines was sent by the Scottish Education Department to the Aberdeen University Students' Representative Council on 11 June.

Cash Limits

Mr. Henderson asked the Secretary of State for Scotland whether he plans to make any changes in the cash limits for 1985-86 which are within his responsibility.

Mr. Younger: Subject to parliamentary approval of the necessary Supplementary Estimate the cash limit on Class XV, vote 15, Education, Arts, Libraries and Social Work, Scotland, will be increased by £1,463,000 from £146,869,000 to £148,322,000. The increase is required to reflect the enactment of the National Heritage (Scotland) Act 1985, establishing a board of trustees of the national museums of Scotland, who will be responsible from 1 October 1985 for the administration of the Royal Scottish Museum and the National Museum of Antiquities of Scotland. Under the terms of the Act, payment to the new board will be by means of grant-in-aid from class XV, vote 15.

Subject to parliamentary approval of the revised Estimates this increase will be offset by reductions in the cash limits for class XV, vote 19 by £511,000 from £1,155,000 to £644,000 and for class XV, vote 24 by £952,000 from £102,075,000 to £101,123,000 and therefore does not involve any increase in the public expenditure planning total.

Education Expenditure

Mr. McQuarrie asked the Secretary of State for Scotland how Scotland's spending on education, expressed as a percentage of gross domestic product, compares with Western European countries; and if he will make a statement.

Mr. Allan Stewart [*pursuant to his reply*, 20 May 1985, c. 292]: In 1983-84 expenditure on educational services in Scotland, including universities was £1,785 million, representing 8·3 per cent. of the provisional gross domestic product for Scotland. The latest available information in respect of a range of European countries is given in the table:

Expenditure on Education as percentage of gross domestic product

Country	*Per cent.*	*Year*
Austria	5·9	1982
Belgium	5·9	1981
Denmark	7·4	1981
Finland	5·5	1981
France	5·0	1981
Germany, Federal Republic	5·0	1981
Greece	2·2	1979
Ireland	7·3	1981
Italy	5·8	1981
Luxembourg	6·6	1981
Netherlands	6·8	1981
Norway	8·5	1980
Portugal	4·5	1981
Spain	2·6	1979
Sweden	8·8	1982
Switzerland	5·1	1981

EMPLOYMENT

Skillcentre, Middlesbrough

Mr. Bell asked the Secretary of State for Employment what satisfactory alternative training provisions is now available in the Middlesbrough area consequent upon the closing of the Middlesbrough skillcentre.

Mr. Peter Morrison: The skillcentre training agency will transfer all the training currently provided at Middlesbrough to Billingham skillcentre which is only 6 miles away and draws trainees from a similar catchment area.

In 1984-85 the Manpower Services Commission provided 1,896 training opportunities for adults in Cleveland. The programme is planned to expand to 2,325 opportunities in 1985-86; and to between 3,600 and 4,100 in 1986-87. There is a wide range of training providers who can deliver these opportunities.

Mr. Bell asked the Secretary of State for Employment how many members of the staff presently employed at the Middlesbrough skillcentre will be retained within the Manpower Services Commission.

Mr. Peter Morrison: Middlesbrough skillcentre currently employs 24 permanent staff. Their future employment within the Manpower Services Commission depends on the individual effect of the various personnel measures now being taken to reduce staff numbers in the skillcentre training agency. A precise assessment of numbers being retained is not yet available.

Job Release Allowance

Mr. Alfred Morris asked the Secretary of State for Employment, pursuant to his reply to the right hon. Member for Manchester, Wythenshawe on 21 May, *Official Report*, column *390*, if he will state *(a)* the conditions of entitlement to job release allowances payable for more than one year and the percentage by which the allowance for a single person was uprated in April and *(b)* the conditions of entitlement to job release allowances payable for less than one year and the percentage by which the allowance was uprated in April; and if he will make a further statement.

Mr. Alan Clark: The conditions of entitlement to a job release allowance, whether for less than a year or more than a year, are that participants comply with all the rules of the scheme at the time they enter the scheme, that their employer undertakes to replace them with an unemployed

person and that for any week for which they receive the allowance they do not receive any benefit that is incompatible with the allowance nor any earnings or payments in kind in excess of £4, after deducting any necessary expenses connected with work. The taxable allowance is paid to those who at the time of entry could on the basis of their age have an entitlement to receive the allowance for over a year; the tax-free allowance to those whose entitlement to receive the allowance could, on the basis of their age, not be for more than one year.

As I announced in my reply to my hon. Friend the Member for High Peak (Mr. Hawkins) on 15 March 1985, at columns 316-17, all job release allowances would be increased with effect from 8 April 1985. The revised rates announced were such that, net of tax, those entitled to the taxable allowance would receive on average broadly the same amount as those entitled to the tax free allowance.

WALES

Coal Industry

Mr. Rowlands asked the Secretary of State for Wales what estimate his Department has made of *(a)* the number of jobs likely to be lost in the Welsh coalmining industry in 1985 and 1986; and *(b)* of the number of jobs likely to be created in Wales by National Coal Board (Enterprise) Ltd.

Mr. Nicholas Edwards: The National Coal Board and the mining unions met earlier this week to discuss the general situation of the south Wales coalfield. Future manpower levels will depend on decisions yet to be taken.

In the short time since it was set up, NCB (Enterprise) Ltd. has already committed just over £0·6 million in support of local agencies in south Wales concerned with job creation and has also itself made loans totalling more than £0·3 million to specific projects offering the prospect of over 300 jobs Its activities will continue to complement the economic development function of the Welsh Development Agency.

TRADE AND INDUSTRY

Nissan

Mr. Roger King asked the Secretary of State for Trade and Industry whether he has received any representations from the Nissan company concerning the availability and quality of British-manufactured automotive components.

Mr. Butcher: No.

As envisaged in the agreement with Nissan, my Department has maintained close contact with the Company to ensure the successful implementation of the project. Discussions have been held regularly on all aspects of the operation including the developing relationship between Nissan and the United Kingdom components industry.

Mr. Roger King asked the Secretary of State for Trade and Industry whether he is satisfied that the Nissan company will be able to achieve the agreed 80 per cent. local content for vehicles produced at its north-east assembly plant.

Mr. Butcher: I have no reason to doubt the Company's ability or intention to attain the agreed local content levels.

A statement on the agreement with Nissan, including the local content levels to be achieved in the event of the company proceeding to full scale manufacture, was made by my right hon. Friend the Secretary of State on 1 February 1984 at column 265.

Consumer Protection

Mr. Gregory asked the Secretary of State for Trade and Industry (1) how many prohibition orders have been issued under the Consumer Protection Act 1978 since its enactment; on what dates they were issued and for what products; and if he will make a statement;

(2) how many prohibition notices have been issued under the Consumer Protection Act 1978 since its enactment; on what dates they were issued and for what products; and if he will make a statement.

Mr. Fletcher: No prohibition orders or notices have been made under the Consumer Protection Act. Eight ordes and two notices have been made under the Consumer Safety Act, and I will send the hon. Member a list.

Mr. Gregory: asked the Secretary of State for Trade and Industry what information he has as to the number of products which may be used by children which contain chemicals classified as dangerous under the Packaging and Labelling of Dangerous Substances Regulations 1984; and if he will make a statement.

Mr. Fletcher: No comprehensive survey of such products has been made but the following products intended for use by children contain or use chemicals classified as dangerous:

Model Steam engines.
Modelling glues and paints.
Mercury maze puzzles.
Chemistry sets.
Other types of marker pen.

Metallic Marker Pens

Mr. Gregory asked the Secretary of State for Trade and Industry if Her Majesty's Government will introduce regulations under the Consumer Protection Act 1978 to require that metallic marker pens that contain xylene/xylol are prominently marked "Totally Unsuitable for Children"; and if he will make a statement.

Mr. Fletcher: I do not propose to introduce regulations as I do not believe they are necessary. Importers have agreed to add suitable warning labels voluntarily.

Mr. Gregory: asked the Secretary of State for Trade and Industry how many representations he has received in respect of hazards arising from metallic marker pens.

Mr. Fletcher: I have received nine complaints that these pens have caused adverse effects, mostly headaches. In addition I have received some 20 inquiries arising from the warning labels on some brands of metallic marker pens.

Mr. Gregory: asked the Secretary of State for Trade and Industry (1) what discussions have been held with importers of metallic marker pens that contain xylene/xylol over warnings that these pens can be dangerous and that the chemical is classified under the Packaging and Labelling of Dangerous Substances Regulations 1984; and if he will make a statement.

(2) what discussions have been held with importers in Scotland of metallic marker pens that contain xylene/xylol

over warnings that these pens can be dangerous and that the chemical is classified under the Packaging and Labelling of Dangerous Substances Regulations 1984; and if he will make a statement.

(3) what discussions have been held with importers in Wales of metallic marker pens that contain xylene/xylol over warnings that these pens can be dangerous and that the chemical is classified under the Packaging and Labelling of Dangerous Substances Regulations 1984; and if he will make a statement.

(4) what discussions have been held with importers in Northern Ireland of metallic marker pens that contain xylene/xylol over warnings that these pens can be dangerous and that the chemical is classified under the Packaging and Labelling of Dangerous Substances Regulations 1984; and if he will make a statement.

Mr. Fletcher: I have asked seven importers, all who are based in England, to add a warning, "Ensure adequate ventilation in places of use." They have all agreed to do so.

Mr. Gregory asked the Secretary of State for Trade and Industry what is the volume and value of metallic marker pens imported into the United Kingdom in each year since the enactment of the Consumer Protection Act 1978; what were the originating states; and if he will make a statement.

Mr. Fletcher: Complete figures are not available. However since 1980 four firms have imported at least 8 million pens between them, all from Japan, with a value of the order of £3 million.

Strategic Defence Initiative

Mr. Ashdown asked the Secretary of State for Trade and Industry what action he has taken to warn commercial participants in the United States strategic defence initiative programme of the legal problems which may arise from United States contracts under the United States Export Administration Act.

Mr. Channon: The United States strategic defence initiative programme and its implications are still under consideration by the Government. Prospective commercial participants are likely to be aware already of the jurisdictional claims made in US export legislation and the Government's views on such claims. As with commercial contracts in general, however, it will be a matter for the companies concerned to seek their own legal advice before deciding whether or not to enter into agreements.

United States (High Technology)

Mr. Ashdown asked the Secretary of State for Trade and Industry if he will assess the impact in the United Kingdom of the United States COCOM regulations of 29 April on purchasers of United States technology, and vendors of United States technology in the United Kingdom; and if he will make a statement.

Mr. Channon: The position should not be affected. The COCOM controls are not intended to prevent the flow of technology from one member state to another.

Mr. Ashdown asked the Secretary of State for Trade and Industry how many complaints or representations he has received relating to United States extraterritorial activity in the United Kingdom high technology industry since 1983; and if he will make a statement.

Mr. Channon: Since 1983, my Department has received representations concerning some 15 cases arising from United States claims to apply their laws extraterritorially to companies in high technology industry in the UK.

Tobacco Industry (Alternative Employment)

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what policy he has followed to attract alternative employment to areas where tobacco products are manufactured, but where employment is reducing due to a sustained reduction in demand for tobacco products; and if he will make a statement.

Mr. Trippier: Tobacco products are manufactured in many parts of the UK but a major part of the industry is in areas where unemployment is above the average. My Department provides resources on a substantial scale under various schemes of assistance in the regions. Our recent overhaul of regional policy has targeted the main areas of need more accurately in order to get the maximum benefit from these resources.

Brewing and Tobacco Industries

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what efforts he has made to prevent European competitors in the brewing and tobacco industries from taking up marginal surplus capacity in their domestic industries and dumping the resulting products on the British market in a price competitive manner.

Mr. Trippier: If the hon. Member has any evidence of unfair trade practices contrary to the rules of the European Community I will be glad to consider it in collaboration with my right hon. Friend the Minister of Agriculture, Fisheries and Food who has responsibility for the brewing industry. I will be glad to advise the industries on how to take the matter up with the Commission if the evidence justifies it.

IBM (Correspondence)

Mr. Ashdown asked the Secretary of State for Trade and Industry how many copies of the letter from IBM of 22 December 1983 regarding the movement of advanced IBM machines within the United Kingdom his Department has received; and how many complaints relating to the letter, or similar letters, he has received.

Mr. Channon: Several copies of the IBM letter have been received from a number of sources but there have been no complaints of practical difficulties arising from its provisions. I am not aware of any other letter containing similar provisions.

Shipbuilding Industry

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry how many British warship yards he estimates the existing domestic ordering requirements alone can support; and what estimate of domestic warship-building capacity and foreseeable domestic warship-building demand is available to him.

Mr. Butcher: The number of warship yards necessary to meet domestic ordering requirements depends on various factors including present work force, availability of further labour, the availability of physical assets, the types of vessels ordered and, given the specialist capability of the yards, the distribution of orders between the yards. Therefore there can be no firm estimate of domestic warshipbuilding capacity. Domestic warshipbuilding demand depends on the Ministry of Defence's ordering programme, details of which are made available to the House from time to time.

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what estimates he has for the size of the British merchant shipbuilding industry over the next 15 years.

Mr. Butcher: My right hon. Friend has no such estimates. The future of the merchant shipbuilding industry in Britain depends primarily on the state of the international market and the degree to which our shipbuilders are competitive within that market.

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what factors he takes into account when preparing estimates of the future size of the domestic warship building market.

Mr. Butcher: The future size of the domestic warship building market will depend on the Ministry of Defence's ordering programme and the industry's success in winning warship export orders.

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what is his policy towards attracting alternative employment to shipbuilding communities; and what specific examples of the results of that policy he can cite.

Mr. Trippier: In addition to national schemes of advice and assistance operated by the Department of Trade and Industry firms in shipbuilding areas located within the assisted areas are eligible for regional aid, and the EC has designated a number of areas affected by shipbuilding closures in which funds are available to encourage alternative employment.

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what is his policy towards financial subsidies to privatised British warship yards competing for types of work currently carried out in British merchant shipbuilding yards.

Mr. Butcher: The policy towards financial subsidies for shipbuilding will be closely linked to the new regime for the shipbuilding intervention fund which has still to be approved by the European Commission.

Mr. Nicholas Brown asked the Secretary of State for Trade and Industry what information he has regarding, average wage rates in the shipbuilding industry for the United Kingdom and for major shipbuilding countries including Japan, South Korea, China and Brazil, respectively.

Mr. Peter Bottomley: I have been asked to reply.

Information about the wage rates of workers covered by the national shipbuilding and shiprepairers agreements in Great Britain is given in "Time Rates of Wages and Hours of Work", pages 39 to 41, published by the Department of Employment, a copy of which is available in the Library. Information about the 1985 agreements has not yet been included in this publication, but the main details are given in the table.

Shipbuilding and Shiprepairers agreements 1985.

	*Agreement I** £	*Agreement II** £
(a) National Weekly Minimum Time Rates		
Fully skilled classes who have completed their apprenticeship	84·25	96·20
Semi-skilled classes	74·30	84·97
Unskilled classes	66·90	72·16
(b) Minimum Weekly Earnings Level†		
Skilled classes	125·75	
Unskilled classes	97·80	

* I—British Shipbuilders, operative from 1 April 1985.
II — Shiprepairers and Shipbuilders Independent Association, operative from domestic settlement dates on or after 1 January 1985.
† For a normal week of 39 hours.

The corresponding figures for the other countries requested are not readily available. However, some indication of the level of wages in similar types of activity can be drawn from the information covering manufacture of transport equipment, a broader category which includes shipbuilding, which is given for countries including Japan, South Korea and Hong Kong in the International Labour Office's "Year Book of Labour Statistics" (table 17B), a copy of which is also in the Library.

British Overseas Trade Board

Mr. Ashley asked the Secretary of State for Trade and Industry for what reasons the support of the British Overseas Trade Board was withdrawn from British companies exhibiting at the 1985 autumn fair at Frankfurt; how many companies were promised support; what was the anticipated cost of the support; how such notice of withdrawal was given; and how many complaints have been received by his Department or the British Overseas Trade Board.

Mr. Channon: I shall reply to the right hon. Member as soon as possible.

Eastern Imports

Mr. George Robertson asked the Secretary of State for Trade and Industry if there is any evidence to indicate that imports from the near and far east to the United Kingdom are proportionately higher than in other European Community countries.

Mr. Channon: OECD trade statistics indicate that in 1983 7½ per cent. of the imports of the other European Community countries came from the near and far east, compared with 11½ per cent. for the United Kingdom.

Export Credits Guarantee Department

Mr. Fallon asked the Secretary of State for Trade and Industry whether he has yet received the report of the team which has been reviewing the management and organisation of the Export Credits Guarantee Department.

Mr. Channon: I have now received the review team's report. I have made arrangements for this to be published today and copies have been placed in the library of the House. The report is wide-ranging and makes a number of

recommendations on how the Department's operations could be made more businesslike and provide an improved service to exporters. I am now considering the report and will announce the Government's conclusions in due course.

Fairey Engineering Ltd.

Mr. Dalyell asked the Secretary of State for Trade and Industry what is the current status of the permission given to Fairey Engineering Ltd. to tender to refurbish a research nuclear reactor near Santiago; and if he will make a statement.

Mr. Butcher [*pursuant to his reply*, 11 June 1985, c. *400*]: I understand that the refurbishment of the Lo Aguirre research reactor has been postponed indefinitely by the Chilean authorities in the light of the recent earthquake in central Chile.

ENVIRONMENT

Oldham (Infrastructure)

2. **Mr. James Lamond** asked the Secretary of State for the Environment if he has replied to the letter containing a resolution on the subject of spending more on the infrastructure sent to him on 25 April by the Oldham metropolitan borough council.

Mr. Gow: My right hon. Friend the Chief Secretary to the Treasury will be replying to this letter shortly.

Local Government Finance

17. **Mr. Michael Forsyth** asked the Secretary of State for the Environment whether the terms of reference of the Widdicombe inquiry into local government finance include consideration of the employment by local authorities of commercial polling organisations to carry out political canvassing in their areas.

Mr. Patrick Jenkin: The terms of reference of the Widdicombe inquiry include the need to clarify the limits and conditions governing discretionary spending by local authorities. I hope my hon. Friend will submit evidence of any abuses to the committee.

Council House Sales

18. **Mr. Colvin** asked the Secretary of State for the Environment what are the total capital receipts to date from the sale of council houses and other domestic accommodation.

Mr. Gow: During the period April 1979 to December 1984, English Local Authorities and new towns received an estimated £4·7 billion through initial payments and mortgage repayments relating to council house sales.

Water Authorities (Privatisation)

19. **Mr. Eggar** asked the Secretary of State for the Environment what representations he has received from the water authorities following the dispatch of his consultation letter about privatisation.

Mr. Gow: Responses to the discussion paper have been received from the water authorities collectively through the Water Authorities Association, from the Water Companies Association and from seven individual water authorities. I discussed possible privatisation with the chairman and other representatives of the Water Authorities Association on 6 June.

52. **Mr. Tony Lloyd** asked the Secretary of State for the Environment if he will make a statement on his policy for the privatisation of water authorities.

Mr. Gow: I informed the House on 7 February at column 1144 that the Government would be examining the possibility of a measure of privatisation in the water industry. On 1 April, we sent the chairmen of the water authorities a discussion paper and I discussed their response with some of them on 6 June.

We shall be making a further announcement in due course.

Wildlife and Countryside Act

20. **Mr. Andrew F. Bennett** asked the Secretary of State for the Environment if he will make a statement about progress in processing the footpath provisions of the Wildlife and Countryside Act.

Mr. Waldegrave: The Ramblers' Association is monitoring the implementation of the rights of way provisions in Part III of the Act on behalf of the Countryside Commission. Its first report, covering the period to the end of 1984, is expected shortly.

Rate Capping

22. **Mr. Peter Bruinvels** asked the Secretary of State for the Environment what information he has about the amount spent to date by (i) all local rate-capped authorities and (ii) the city of Leicester on anti rate-capping propaganda campaigns; and if he will make a statement.

Mr. Kenneth Baker: I do not have precise information, but Leicester and other rate-capped authorities have clearly been spending considerable amounts of ratepayers' money on anti rate capping propaganda. In Leicester's case I understand that up to £150,000 may be spent this year on such campaigning.

Private Rented Accommodation

23. **Mr. Winnick** asked the Secretary of State for the Environment if it is intended to bring forward legislation to make new tenancies in the private sector free from security of tenure and rent regulations.

37. **Mr. David Atkinson** asked the Secretary of State for the Environment whether he has any plans to introduce legislation to deregulate private rented housing.

Mr. Gow: I refer the hon. Member and my hon. Friend to the answer that my right hon. Friend the Secretary of State gave earlier today to the hon. Member for Holborn and St. Pancras (Mr. Dobson).

47. **Mr. Yeo** asked the Secretary of State for the Environment if he will introduce legislation to exempt new private lettings from the provisions of the Rent Act.

Mr. Gow: I refer my right hon. Friend to the answer which my right hon. Friend the Secretary of State gave earlier today to the hon. Member for Holborn and St. Pancras (Mr. Dobson).

Central Berkshire Structure Plan

24. **Mr. William van Straubenzee** asked the Secretary of State for the Environment when he expects to receive from Berkshire county council its revised proposals for the central Berkshire structure plan.

Mr. Patrick Jenkin: I understand that Berkshire county council is at present considering the response to the public consultation on its revised structure plan proposals. I am sure they are aware of the need to decide as soon as possible what proposals to submit to me so that its structure plan policies can be brought up to date.

Norman Shaw Building (Lift)

25. **Mr. Holt** asked the Secretary of State for the Environment on how many occasions since its installation the new lift in Norman Shaw south building has been out of commission.

Sir George Young: 28, of which half were in the one-year guarantee period. A fault affecting the motor protection relay, which is thought to have been the main cause of these breakdowns, has now been discovered and rectified.

By-elections (London)

26. **Mr. Tony Banks** asked the Secretary of State for the Environment if he was consulted by the Greater London council about its proposals to expend money on the forthcoming by-elections.

Mr. Kenneth Baker: No.

Sulphur Dioxide Emissions

27. **Mr. Kenneth Carlisle** asked the Secretary of State for the Environment what is the latest estimate for the fall in the volume of sulphur dioxide emissions in the United Kingdom over the next decade.

Mr. Waldegrave: Total emissions of sulphur dioxide were 3·7 million tonnes in 1983 (the latest figures available). The Department of Energy estimates that, depending on the assumptions made, total emissions will be in the range of 3·4 million to 4·2 million tonnes in 1990 and 3·1 million to 4·5 million tonnes in 2000.

Anti-fouling Paints

28. **Mr. Hirst** asked the Secretary of State for the Environment what representations he has had about his Department's proposals to ban the use of anti-fouling paints containing tributyltin on vessels under 12 m; and if he will make a statement.

Mr. Waldegrave: Public consultation on the proposals ended on 14 May and the comments received are now being considered.

City of Manchester (Boundary)

29. **Mr. Sumberg** asked the Secretary of State for the Environment whether he has received any proposals recommending the extension of the boundaries of the city of Manchester so as to incorporate parts of the parliamentary constituency of Bury, South.

Mr. Waldegrave: No.

My right hon. Friend does not expect to receive any proposals from the Local Government Boundary Commission until some time after it reviews Manchester city's and Bury's administrative boundaries. That review will not commence before 1 April 1987, as explained in my answer of 19 November 1984, at column *33*.

Shorthold Tenancies

30. **Mr. Heathcoat-Amory** asked the Secretary of State for the Environment if he will estimate the number of shorthold tenancies granted since 1980.

Sir George Young: Over 5,000 shorthold tenancies were created in 1981, the first year after shorthold was introduced. Information about shortholds created since 1 December 1981 is not available because the compulsory rent registration requirement for new shortholds was lifted outside London on that date.

Local Government Expenditure

31. **Mr. Stephen Ross** asked the Secretary of State for the Environment whether he has taken any recent action to implement the recommendations of the Audit Commission's report on capital spending in local government.

Mr. Kenneth Baker: Before the report was published, the Government were already engaged in discussions with the Local Authority Associations about the future of the system for controlling local authority capital expenditure. I have welcomed the report as a very useful input to that work, which is still going on.

Trees (Destruction)

32. **Mr. Flannery** asked the Secretary of State for the Environment if he has any reasonably accurate means of estimating the number of trees destroyed in the last five years.

Mr. Waldegrave: There are no comprehensive statistics available for tree loss over the last five years. My Department's current research study on monitoring landscape change should provide information on trees in hedges and woodland.

Refuse Collection

33. **Mr. John Mark Taylor** asked the Secretary of State for the Environment which local authorities in England have put their refuse collection out to private contract.

Mr. Kenneth Baker: This information is not collected centrally, but a list of bodies using private sector contractors, published in the magazine "Contract Services", includes 18 local authority refuse collection contracts.

North of England County Council Association (Report)

34. **Mr. Jack Thompson** asked the Secretary of State for the Environment if he has now had the opportunity to study the North of England County Council Association sixth state of the region report, published in January; and if he will make a statement.

Mr. Kenneth Baker: I have studied this report. I shall be meeting representatives of the association in the near future to discuss various issues arising from the report.

Council House Sales

35. **Mr. Knox** asked the Secretary of State for the Environment how many council houses have been sold in England since May 1979.

Mr. Gow: From April 1979 to March 1985 about 665,000 dwellings were sold by local authorities and new towns in England. The figure for Great Britain is about 775,000.

"Coal and the Environment"

36. **Mr. Dormand** asked the Secretary of State for the Environment whether he is satisfied with the progress being made on the recommendations in Cmnd. 8877 entitled "Coal and the Environment"; and if he will make a statement.

Mr. Kenneth Baker: Yes. Regular meetings are held with the NCB and local authority associations to review the White Paper commitments and I am satisfied with the progress that is being made.

Islington

38. **Mr. Corbyn** asked the Secretary of State for the Environment if he will review his decision to penalise the borough of Islington in the 1985-86 rate support grant settlement.

Mr. Patrick Jenkin: Proposals for implementing holdback of block grant for 1985-86 will be contained in a rate support grant supplementary report which I hope to lay before the House for approval next month.

Urban Programme

39. **Mr. Pike** asked the Secretary of State for the Environment when he expects to complete his consideration of the future of the traditional urban programme scheme.

Mr. Kenneth Baker: Shortly.

45. **Mr. Simon Hughes** asked the Secretary of State for the Environment whether he has any plans to change the method of treatment of urban programme expenditure in relation to general local government expenditure controls.

Mr. Patrick Jenkin: No.

Derelict Land

40. **Mr. Ashley** asked the Secretary of State for the Environment what is the current annual cost to his Department of grants made to local authorities to reclaim derelict land.

Mr. Kenneth Baker: In 1984-85 grant totalling £64·5 million was paid to local authorities in respect of approved derelict land reclamation schemes in England.

Rate Rebates

41. **Mr. Chapman** asked the Secretary of State for the Environment if he will estimate the total number of domestic hereditaments in England and the number of people receiving rates rebates.

Mr. Kenneth Baker: The total number of domestic hereditaments in England at the beginning of 1984-85 was 18 million. Based on local authority returns, the number of rate rebate recipients in that year is estimated to be 6·15 million.

Mobile Homes (Rents)

42. **Mr. Nicholls** asked the Secretary of State for the Environment what representations he has received about the introduction of rent regulations on the pitch rents of mobile home owners; and if he will make a statement.

Sir George Young: We have received various representations from residents suggesting that pitch rents for mobile homes should be subject to some form of rent regulation.

We do not consider that statutory control of pitch rents is either appropriate or desirable. It would not be in the interests either of residents or site owners. Just as rent control has affected adversely the supply of the private rented housing, so it would lead to a decline in the number of mobile home sites. The Mobile Homes Act 1983 contains important safeguards for residents on pitch rents without imposing unreasonable restrictions on site owners. I believe that it strikes a reasonable balance.

Local Authorities (Housing Policy)

43. **Ms. Clare Short** asked the Secretary of State for the Environment if he will make a statement on the report published by the Association of Metropolitan Authorities on "Housing and Race: Policy and Practice in Local Authorities", a copy of which has been sent to him.

Sir George Young: I welcome the Association's initiative in producing the report. I hope that local authorities will heed its advice and recommendations, and will be discussing it with them at the next meeting of the Housing Consultative Council.

Gleneagles Agreement

44. **Mr. John Carlisle** asked the Secretary of State for the Environment if he will make a statement on the implications for the Gleneagles agreement of the declaration of intent by all sports associations in South Africa, a copy of which has been sent to him.

Mr. Macfarlane: Whilst the Government welcomes the principles behind the declaration of intent, it can have no implications for the Commonwealth statement on apartheid in sport. The statement, which represents the consensus view of the Commonwealth, is a reaction to the South African Government's system of apartheid, which is not affected by the declaration.

Sites of Special Scientific Interest

46. **Mr. Kirkwood** asked the Secretary of State for the Environment, over the past two years, how many sites for which sites of special scientific interest designation was applied for were destroyed before statutory protection was in force.

Mr. Waldegrave: I am advised by the Nature Conservancy Council that since 1 April 1983 some 27 proposed sites of special scientific interest have been damaged following the issue of the NCC's notice of intention to notify the site. In only two of these cases does the NCC consider that the scientific interest of the whole of the site has been completely destroyed.

Improvement Grants

48. **Mr. Fisher** asked the Secretary of State for the Environment what responses he has received to his consultative document on improvement grants.

51. **Mr. Cartwright** asked the Secretary of State for the Environment how many representations he has received so far on the Green paper on home improvements.

Mr. Gow: I refer the hon. Members to the answer that my right hon. Friend the Secretary of State gave earlier today to the hon. Member for Newport, East (Mr. Hughes) and to my hon. Friend the Member for Rutland and Melton (Mr. Latham).

Local Authorities (Expenditure)

49. **Mr. Spencer** asked the Secretary of State for the Environment if he will make a statement on the latest projections for revenue spending of local authorities for the current financial year.

Mr. Patrick Jenkin: We have information on the 1985-86 budgets for most authorities. In aggregate, authorities are overspending their targets by just over £200 million or by 1 per cent. This is the lowest overspend since targets were introduced four years ago. Ratepayers are reaping the benefit, with rate increases in single figures for the third year in succession.

During the 1960's and 1970's local authority current expenditure grew relentlessly in real terms by about 3½ per cent. per annum. Under this Administration, growth has been reduced to under 1 per cent. per annum. This year, budgets show that authorities are planning for no growth at all.

Water Industry

50. **Mr. O'Brien** asked the Secretary of State for the Environment how many water industry consumer consultative committees supported the Government's policy on charges by the water industry for 1985-86.

Mr. Gow: Only some of the water authority consumer consultative committees have made their views known to my right hon. Friend. Of those that did so, some appreciated the need for higher investment but none welcomed higher charges.

Local Government Finance

53. Mr. Leadbitter asked the Secretary of State for the Environment when he is next due to meet representatives of the local authority associations to discuss issues of local government finance.

Mr. Patrick Jenkin: I expect to chair the next meeting of the Consultative Council on Local Government Finance on 23 July.

Local Government Reform

54. **Mr. Patchett** asked the Secretary of State for the Environment what is the proposed timetable for establishing the residuary bodies under the Local Government Bill.

Mr. Kenneth Baker: As soon as practicable after Royal Assent.

London Residuary Body

55. **Mr. Boyes** asked the Secretary of State for the Environment if he has appointed the chairman of the London Residuary Body proposed under the Local Government Bill.

Mr. Patrick Jenkin: I refer the hon. Member to the answer given to my hon. Friend the Member for Enfield, Southgate (Mr. Portillo) on 5 June, at columns *163-65*.

Radioactive Waste

56. **Mr. Allan Roberts** asked the Secretary of State for the Environment if the Government will conduct a public investigation into all methods of radioactive waste management.

Mr. Waldegrave: I refer the hon. Member to the answer given to my hon. Friend the Member for Ynys Môn (Mr. Best) on 6 June 1985 at column *206*.

Mr. Ashdown asked the Secretary of State for the Environment if he will estimate the approximate volume of *(a)* low-level radioactive waste and *(b)* intermediate level radioactive waste arising from each stage of decommissioning and dismantling a typical Magnox nuclear power station in clearance to a green field state.

Mr. Waldegrave: I refer the hon. Member to my reply to the hon. Member for Woolwich (Mr. Cartwright) on 3 June 1985 at column *38*.

Home Improvement and Repair

57. **Mr. Hardy** asked the Secretary of State for the Environment what steps he is taking to increase the proportion made to secure the improvement and repair of the national housing stock.

Sir George Young: Gross housing provision in England in the current year is £3,051 million, of which a substantial part will be spent on improving and repairing the housing stock.

The Government have published a Green Paper (Cmnd. 9513) outlining their proposals for improving the condition of private sector housing in England and Wales. My Department has also asked local authorities to report on the condition of their housing stock, and results are expected in July.

Football Ground Safety

Mr. Parry asked the Secretary of State for the Environment what discussions he has had with the Football League concerning safety at football grounds.

Mr. Canavan asked the Secretary of State for the Environment whether he will make a statement about recent discussions he has had concerning safety of sports grounds.

Mr. Macfarlane: A working group has been set up under my chairmanship to consider the implications of the extension of designation under the Safety of Sports Grounds Act 1975 to divisions 3 and 4 of the Football League. It is composed of representatives of the Football Association, the Football League, the Football Trust, the Football Grounds Improvement Trust, the Pools Promoters' Association, the Sports Council, the Scottish Office and the Welsh Office. The group first met formally on 23 May.

At its next meeting on 19 June the group will be considering a report from FGIT based on surveyors' visits to all English and Scottish League grounds. This subject was also discussed when I met the Football League together with the Football Association on 17 May.

I have also met the chairman and Secretary of the Rugby League and asked them to report on what the implications would be of the extension of designation under the Act to divisions 1 and 2 of the Rugby League.

I understand that Mr. Justice Popplewell, who is chairing the inquiry established by my right hon. Friend the Home Secretary, will be seeking evidence from a number of sports governing bodies.

Planning Regulations (Small Businesses)

Mr. Maclean asked the Secretary of State for the Environment if he will list those planning regulations which prevent individuals from starting small businesses in their homes.

Mr. Macfarlane: Sections 22(1) and 23(1) of the Town and Country Planning Act 1971 provide that planning permission is required for a material change in the use of a building. However, non-material changes of use and uses ancillary to the main use are free from control. Whether any particular change of use is material is a matter of fact and degree. Where planning permission is required, local authorities should always grant permission, having regard to all material considerations, unless there are sound and clear-cut reasons for refusal.

Rag Flock and Other Filling Materials Act 1951

Mr. Waller asked the Secretary of State for the Environment if he has any early plans to introduce amendments to the Rag Flock and Other Filling Materials Act 1951.

Mr. Waldegrave: My right hon. Friend has no immediate plans to do so, but will continue to seek a suitable opportunity for such amendment.

St. Barnabas Community Centre, Bristol

Mr. John Fraser asked the Secretary of State for the Environment whether he has received any applications for funding under the inner city programme to deal with the problems arising from defective features and facilities at St. Barnabas community centre, St. Paul's, Bristol.

Sir George Young: No. However, following recent discussions, in which representatives of Avon county council and the St. Paul's Community Association participated, an application for £45,839 capital grant under the 1985-86 urban programme, to provide equipment and furniture for the St. Barnabas community centre, is being reformulated to cover work to one of the buildings involved.

Mr. John Fraser asked the Secretary of State for the Environment if he will set up an inquiry into the design and consultation about St. Barnabas community centre, St. Paul's, Bristol, funded under the inner city programme by his Department.

Sir George Young: No.

Mr. John Fraser asked the Secretary of State for the Environment what is the current total cost to the inner city programme funds of St. Barnabas community centre, St. Paul's, Bristol.

Sir George Young: £360,000 capital and £8,500 revenue expenditure.

Mr. John Fraser asked the Secretary of State for the Environment what consultation took place between his Department and community interest groups before approving the funding for St. Barnabas community centre, St. Pauls, Bristol.

Sir George Young: The need for a community centre in St. Pauls was identified in one of several reports prepared jointly—following the disturbances in the area in April 1980—by Avon county council, Bristol city council and the Bristol council for racial equality. It was one of the topics discussed when a deputation from these bodies met Ministers, led by the then Secretary of State for the Home Department, in July 1981. Support for the project in principle was agreed at that time. Where a project is funded under the urban programme, it is for the applicant authority, rather than the Department, to consult interested community groups.

Disabled People (Accommodation)

Mr. Alfred Morris asked the Secretary of State for the Environment what was, for each of the last three years for which figures are available, the number and total value of adaptations to the accommodation of disabled people funded by each district and borough council.

Sir George Young: The numbers of dwellings for disabled people which each English local authority reported renovating and the numbers for which grants were paid to private owners and tenants in the years 1981, 1982 and 1983, appear in "Local Housing Statistics" in issues 62, 66 and 70, respectively. Estimates for England as a whole of the cost of the local authority renovations in the financial year 1981-82 and in each quarter from the second quarter of 1983 appear in table 2.16*(a)* of the quarterly "Housing and Construction Statistics" No. 20, as do the amounts of grants paid in the three years 1982 to 1984. Copies of all these publications are in the Library. The corresponding costs and grants paid information for individual local authorities is not in a readily available form.

Mr. Alfred Morris asked the Secretary of State for the Environment what action he is taking to enable complementary information to be gathered concerning expenditure by local authority housing and social services departments on adaptations to the accommodation of disabled people; and if he will make a statement.

Sir George Young: My Department collects information on the conversion and improvement of local authority dwellings which make them suitable for the disabled, as well as information on grants paid for the renovation of dwellings for disabled persons under the Housing Acts. This information is published each quarter in table 2.16 of "Housing and Construction Statistics Part 2", copies of which are available in the Library.

Information on expenditure by local authority social services departments on adaptations to the accommodation of disabled people is collected by the Department of Health and Social Security.

Building Regulations

Mr. Pawsey asked the Secretary of State for the Environment what steps he proposes to take to simplify further the building regulations.

Mr. Grylls asked the Secretary of State for the Environment what further steps he proposes to take to lessen the burden on the construction industry and its customers of the present system of building controls.

Mr. Gow: New simplified building regulations will come into force later this year. Thereafter they will be kept under review. Part of that continuing process will be to insure that the regulations are as simple as possible.

EDUCATION AND SCIENCE

Local Government (Consultation)

Dr. Cunningham asked the Secretary of State for Education and Science if he is planning to make any changes to the way in which he consults local government following the judgment in R. v. Secretary of State for Social Services; ex parte AMA.

Sir Keith Joseph: I have no present plans to make such changes.

Rudolph Steiner Schools

Mr. Alfred Morris asked the Secretary of State for Education and Science under what statutory authority hesets the staff-pupil ratios currently required of Rudolph Steiner special schools.

Mr. Dunn: My right hon. Friend has no statutory powers in relation to pupil-teacher ratios in independent schools. However, independent schools seeking his approval under the Education Act 1981 as suitable for admission of children with statements of special educational needs, including those schools operated on Rudolph Steiner principles, have — as a condition of their approval — to meet standards in respect of premises, qualified staff, education and care, which are similar to those required in maintained and non-maintained special schools. The statutory provisions applying to the approval of maintained and non-maintained special schools are set out in the Education (approval of Special Schools) Regulations 1983. Additionally, guidance on the staffing of special schools is contained in the Department's circular No. 4/73.

Mr. Alfred Morris asked the Secretary of State for Education and Science what is his policy towards the status of the Steiner training scheme in the context of the proposal on initial teacher training contained in the White Paper "Teaching Quality"; if he has any plans to make special provision for the Steiner training scheme; and if he will make a statement.

Mr. Dunn: The White Paper "Teaching Quality" announced the Government's intention to strengthen initial teacher training and to initiate a review of all initial training courses against criteria relating to the academic and professional content of courses, the practical element of training and the selection of students. Criteria were issued in April 1984 and all existing approved courses of initial training, together with proposals for new ones, are being reviewed against them by the Council for the Accreditation of Teacher Education. Steiner training is not currently approved as leading to qualified teacher status and my right hon. Friend has no plans to modify the requirements which courses have to meet for such approval. As announced in the White Paper "Better Schools", it is the Government's intention that existing approved specialist initial training courses in special educational needs should be phased out and replaced by in-service courses for serving, qualified teachers. At my right hon. Friend's request, a meeting is being arranged with representatives of the Steiner schools.

Mr. Alfred Morris asked the Secretary of State for Education and Science what assessment he has made of the implications for pedagogic continuity and for the eight-year teaching commitment to a class of the requirement that Steiner-trained teachers should undertake four-year state training courses in order to acquire recognition; and if he will make a statement.

Mr. Dunn: My right hon. Friend acknowledges the dedication and commitment of Steiner-trained teachers and schools to the care of their pupils. He appreciates the organisational difficulties facing Steiner (and other) schools in releasing teachers to undertake further training to enable them to acquire qualified teacher status; nevertheless, he hopes they will do so. My right hon. Friend does not require all such teachers to hold qualified status, although it is a condition of approval for independent schools which wish to admit children with statements of special educational needs that they have an adequate number of qualified teachers.

ILEA (Pamphlet)

Mr. Marlow asked the Secretary of State for Education and Science what is his policy towards the Inner London education authority anti-sexist pamphlet which five-year-old children are being required to give their parents, a copy of which has been sent to him; and if he will make a statement.

Mr. Dunn: This is a matter for the Inner London education authority. Any parents who wish to express views about the content of the pamphlet or its manner of distribution should raise the matter with the ILEA in the first instance. If they are still dissatisfied, then they should take it up with my right hon. Friend.

Medical Research Council

Mr. J. Enoch Powell asked the Secretary of State for Education and Science what sums from what sources other than his Vote were available in each of the last five years to the Medical Research Council for financing its budget.

Sir Keith Joseph: Details of the Medical Research Council's income from the DES Vote and other sources are contained in the council's successive annual reports, copies of which are held in the Library of the House.

DEFENCE

NATO

Mr. Michie asked the Secretary of State for Defence, what is the cost to Britain of contributing to the NATO infrastructure budget and the NATO military budget in each financial year since 1979; and if he will arrange to provide the figure in the 1986 defence Estimates.

Mr. Stanley: United Kingdom payments to and receipts from the NATO infrastructure budget and the NATO military budget since 1979 were as follows (to the nearest £ million at outturn prices):

£ millions

	1979-80	*1980-81*	*1981-82*	*1982-83*	*1983-84*	*1984-85*
i. United Kingdom Payments to Infrastructure Budget	19	34	38	50	57	57
ii. United Kingdom Receipts from Infrastructure	19	36	61	80	80	85
iii. United Kingdom Payments to Military Budget	22	24	25	31	35	41
iv. United Kingdom Receipts (estimated) from Military Budget	3	3	3	4	4	4

The hon. Member's request that these figures should be provided in the 1986 Statement on the Defence Estimates will be considered.

RAF Chivenor

Dr. Cunningham asked the Secretary of State for Defence if there are any site investigations currently being undertaken at RAF Chivenor with a view to the possible storage of low, intermediate or high-level nuclear waste.

Mr. Butler: No.

Trident

Mr. Ashdown asked the Secretary of State for Defence whether the full costs of the tests planned for the United Kingdom produced Trident warhead have been included in the previously announced budget for the Trident programme.

Mr. Butler: I refer the hon. Member to the answer I gave to his question on 24 May 1985 at column 600.

West Coast of the Uists (Survey)

Mr. Donald Stewart asked the Secretary of State for Defence what consultations were conducted by Gardline Surveys of Great Yarmouth, presently carrying out the hydrographic survey off the west coast of the Uists under charter to the Hydrographer to the Royal Navy, prior to the survey being undertaken.

Mr. Lee: I understand that Gardline Surveys has made arrangements with the Benbecula Fishermen's Association so that the survey in question can be completed without mutual interference.

Chile

Mr. Corbyn asked the Secretary of State for Defence if he will make it his policy to refrain from granting export licences for military equipment to Chile.

Mr. Channon: I have been asked to reply.

Applications for licences to export military equipment to Chile and other countries are considered individually and on their merits, taking into account all relevant factors, including the nature of the regime of the importing country and the use to which the equipment may be put.

NORTHERN IRELAND

Department of Agriculture (Scientists and Advisers)

Mr. Beggs asked the Secretary of State for Northern Ireland (1) if he plans to reduce the number of scientists and advisers employed in Northern Ireland agricultural research institutes and veterinary research institutes controlled by the Department of Agriculture;

(2) if he has any plans to privatise work presently carried out at veterinary research laboratories at Stormont and Omagh;

(3) if he plans to introduce fees for advisory services and diagnostic laboratory testing provided at Stormont and Omagh, Northern Ireland.

Dr. Boyson: In the context of the report of a study of the Agricultural Development and Advisory Service by Professor Bell and of the reductions in public expenditure on research, development and advisory work by Agricultural Departments in Great Britain announced in Cmnd. 9428, all agricultural research, development and advisory work in Northern Ireland is being reviewed. No decisions have yet been reached on staffing levels or the introduction of charging for services. There are not at present any plans to privatise the work of the veterinary research laboratories at Stormont and Omagh; the opportunities for privatisation are kept under review.

Kinsale Gas (Report)

Mr. Archer asked the Secretary of State for Northern Ireland whether he will publish the Deloitte, Haskins and Sells report on the Kinsale gas project; and whether he will place a copy in the Library.

Dr. Boyson: The underlying assumptions and key conclusions of the report have been made available to interested parties and the Government remain prepared to answer any specific questions about these. In common with the other investigations commissioned by the Government in connection with the gas industry, it is not intended that the detailed Deloitte Haskins and Sells report should be published.

Conservation

Mr. Archer asked the Secretary of State for Northern Ireland (1) what ornithological or other scientific surveys were carried out on the area of scientific interest land at

Lough Ross, Lisnakea, County Fermanagh, before the agricultural improvements recently approved by the Northern Ireland Department of Agriculture went ahead; what steps are being taken to monitor and assess the impact of drainage and related works on breeding wetland birds and other aspects of nature conservation interest present on the site; and if he will make a statement on the destruction of the nest and eggs of a species of bird specially protected by the Nature Conservation and Amenity Lands (Northern Ireland) Order 1985, during the course of the agricultural scheme;

(2) if he will make a statement on his policy on the conservation of wetland areas notified as areas of special interest because of their special interest for wetland flora and fauna.

Mr. Chris Patten: I shall reply to the right hon. and learned Member as soon as possible.

Housing Executive

Mr. Walker asked the Secretary of State for Northern Ireland (1) if he will detail the measures which have been introduced by the Housing Executive to avoid the recurrence of overpayments to contractors;

(2) whether the total extra costs to the Housing Executive, resulting from the liquidation of the firm involved in the overpayment investigated by the Local Government Auditor, have been computed; and what advice his Department has given to the Housing Executive about the avoidance of a recurrence of similar cases in the future;

(3) what procedures have now been laid down by the Housing Executive to avoid losses due to solicitors withholding proceeds of sales, bankruptcy or deaths of individuals involved in transactions;

(4) what progress has been made by the Housing Executive towards reconciliation of the amount of rates collectable with payments actually made to the rating authority for 1981-82 and 1982-83 in respect of the Belfast region;

(5) how many posts are vacant in the claims management section of the Northern Ireland Housing Executive; and what difficulties are being experienced in filling these posts.

Mr. Chris Patten: These are matters for the Northern Ireland Housing Executive, but I understand from the chairman that the information is not readily available. I shall reply to the hon. Gentleman as soon as possible.

Royal Ulster Constabulary

Mr. A. Cecil Walker asked the Secretary of State for Northern Ireland (1) if he will revise the vetting procedure for potential recruits to the Royal Ulster Constabulary and its reserve to ensure that information about the intentions of potential recruits is not obtained by terrorist organisations;

(2) what advice is given by the Chief Constable of the Royal Ulster Constabulary to persons applying to join the force or its Reserve regarding vetting procedures; and what safeguards exist to avoid drawing attention to potential recruits during visits to relatives, friends and so on during the vetting process;

(3) what procedures are laid down to ensure that civilian staff engaged in processing the applications of members of the public to join the Royal Ulster Constabulary Reserve maintain confidentiality;

(4) what steps are taken to ensure the confidentiality of vetting procedures for potential recruits to the Royal Ulster Constabulary and its Reserve.

Mr. Scott: Vetting procedures for potential recruits to the Royal Ulster Constabulary and its Reserve are designed to take account of the need to maintain confidentiality; and appropriate advice about these procedures is given by the Royal Ulster Constabulary to applicants. For security reasons, it would not be right to release details of this advice or the arrangements made to protect the identity of applicants. These arrangements, and other aspects of the vetting procedures, are however kept under regular review.

Mr. Gary Smith

Mr. A. Cecil Walker asked the Secretary of State for Northern Ireland if he will make a statement on the progress of the inquiry into the fatal shooting of Mr. Gary Smith in Millfield, North Belfast, on Tuesday 28 May.

Mr. Scott: Intensive police inquiries are continuing, but as yet no one has been charged with this despicable crime.

River Roe (Restocking)

Mr. William Ross asked the Secretary of State for Northern Ireland if he will publish in the *Official Report* an account of the steps taken to restock the River Roe and its tributary the Owenreagh river after the accidental poisoning of the river and the annual costs of the restocking programme to date; and if he will indicate the success of the programme and whether the insect and fish life has yet recovered.

Dr. Boyson: I shall reply to the hon. Gentleman as soon as possible.

Caugh Hill Water Treatment Plant

Mr. William Ross asked the Secretary of State for Northern Ireland when he expects work on the sludge treatment works at the Caugh Hill water treatment plant to be completed and the plant to be operating.

Mr. Chris Patten: I shall reply to the hon. Gentleman as soon as possible.

Richmond Centre, Londonderry

Mr. William Ross asked the Secretary of State for Northern Ireland (1) what percentage return on the capital costs of constructing the Richmond centre he expects when all the accommodation currently accepted or occupied by tenants is producing rent;

(2) if he will list in the *Official Report* the tenants of the office accommodation in the Richmond centre in Londonderry; and if he will indicate *(a)* the minimum, *(b)* the maximum and *(c)* the average rent paid per square foot for such accommodation;

(3) what are the current annual interest charges being paid on the sums expended on the Richmond centre; and what was the total final cost of the centre;

(4) what rental is being paid by the Housing Executive, per square foot, for its accommodation in the Richmond centre, Londonderry; and what was the annual cost over each of the last five years in respect of the accommodation presently occupied by those elements of the Housing Executive which are transferring to the Richmond centre;

(5) if he will list in the *Official Report* the commercial tenants of the Richmond centre in Londonderry and indicate *(a)* the minimum, *(b)* the maximum and *(c)* the average rents being paid per square foot and the total income from such tenants.

Mr. Chris Patten: I shall reply to the hon. Gentleman as soon as possible.

Foyle and Craigavon Bridges (Traffic Flows)

Mr. William Ross asked the Secretary of State for Northern Ireland what are *(a)* the average, *(b)* the minimum and *(c)* the maximum hourly traffic flows across *(a)* the new Foyle bridge and *(b)* the Craigavon bridge; and what is the hourly capacity of each bridge.

Mr. Chris Patten: I shall reply to the hon. Gentleman as soon as possible.

Terrorism (Explosive Materials)

Mr. William Ross asked the Secretary of State for Northern Ireland if he will list the materials known to have been used to manufacture the home-made explosive material used in Northern Ireland by terrorists and seized by the security forces in Northern Ireland since 1 January 1983, and which such materials are available for sale in Northern Ireland in significant quantities through normal commercial outlets.

Mr. Scott: There are a number of substances which can be used to produce improvised explosives. For security reasons, I do not believe it would be right if I were to list these.

Mr. William Ross asked the Secretary of State for Northern Ireland what weight of explosive material, believed to be in the possession of a terrorist organisation, was seized by the security forces in Northern Ireland in each month since 1 January 1983 to the latest convenient date; and of that explosive material how much was of commercial origin and how much home-made.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Firearms Certificates

Mr. William Ross asked the Secretary of State for Northern Ireland (1) how many persons in Northern Ireland now hold firearms certificates; and of these how many are in respect of *(a)* shotguns only, *(b)* rifles only and *(c)* handguns only;

(2) if he will publish a table in the *Official Report* setting out the number of *(a)* applications, *(b)* renewals and *(c)* variations of firearms certificates dealt with in each of the last six years or financial years; and how many in each case in each year were (i) granted and (ii) refused.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Terrorism

Mr. William Ross asked the Secretary of State for Northern Ireland (1) how many persons in each year since 1 January 1969 are known to have been killed by a legally-held weapon that had been stolen from its owner; in each case what kind of weapon was used; and in each year how many persons were murdered by shooting by a terrorist organisation;

(2) if he will publish a table in the *Official Report* showing for each year since 1 January 1969 the number of persons who have used their own legally-held (i) rifle, (ii) handgun and (iii) shotgun, to commit a murder connected with the terrorist campaign in Northern Ireland; how many other murders, or cases of manslaughter by shooting, by the holder of a legally-held firearm, using that firearm, in each of the categories listed are known; and if he will make a statement.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Maze Prison (Orderlies)

Mr. William Ross asked the Secretary of State for Northern Ireland how many persons worked as orderlies in the Maze prison during the dirty protest and the hunger strike period; of these, how many were murdered after release; if any of them are still in prison; and of those released what information he has as to how many remain in Northern Ireland and how many have left the Province.

Mr. Scott: One hundred and fifteen prisoners are recorded as having been employed as orderlies at Maze cellular prison during the period in question. Three are still in custody. Information is not readily available as to the present whereabouts or subsequent histories of those released.

Firearms

Mr. William Ross asked the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* to show *(a)* how many firearms, by type, namely, handguns, rifles, shotguns or fully automatic weapons, were seized by the security forces in Northern Ireland in each year since 1969; and in each year and for each type how many were legally held weapons stolen by terrorist organisations from (i) civilians, (ii) the Royal Ulster Constabulary, (iii) the Royal Ulster Constabulary Reserve, (iv) the Ulster Special Constabulary, (v) the Ulster Defence Regiment and (vi) the Regular Army.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Castledawson Bypass

Mr. William Ross asked the Secretary of State for Northern Ireland when he expects work to start on the Castledawson bypass.

Mr. Chris Patten: I shall reply to the hon. Gentleman as soon as possible.

Maghaberry Prison

Mr. William Ross asked the Secretary of State for Northern Ireland (1) if he will list in the *Official Report*

the modifications made to the new prison at Maghaberry over the last two years, or financial years, which have cost more than £1,000 and the cost of each such modification;

(2) whether the roof of the new prison at Maghaberry was designed and built of fireproof materials.

Mr. Scott: I shall reply to the hon. Gentleman as soon as possible.

Mr. William Ross asked the Secretary of State for Northern Ireland what material has been used for the ceilings and roofs of the cells in the new prison at Maghaberry; and if this material was included in the original specification.

Mr. Scott: High quality reinforced concrete with an emulsion paint have been used. These materials were included in the original specification.

Mr. William Ross asked the Secretary of State for Northern Ireland whether the doors of the new prison at Maghaberry open outwards; what width they are; and what is the width of the passage serving the cells.

Mr. Scott: For security reasons, the cell doors in the male prison open outwards. They are 620 mm wide and the passageways serving the cells are 1,500 mm wide.

SOCIAL SERVICES

Dalkon Shield

Ms. Richardson asked the Secretary of State for Social Services what steps his Department is taking to trace women fitted with the Dalkon shield and to ensure that they are recalled for advice.

Mr. Kenneth Clarke: Following discussions with our Department, the manufacturers of this device wrote in January this year to all general practitioners, family planning clinics, obstetricians and gynaecologists asking them to identify any women who might still be wearing it and to recommend that they have it removed. This repeated similar action taken in 1980.

Nurses (Back Pain)

Mr. Pavitt asked the Secretary of State for Social Services if he has now completed his consideration of the report on nurses' back pain submitted to his Department in August 1984 from the University of Surrey.

Mr. Kenneth Clarke: No. As I explained in my reply to the right hon. Member for Stoke-on-Trent, South (Mr. Ashley) on 27 March, at columns *253-54*, we are still considering the report.

Chiropodists (South Bedfordshire)

Mr. John Carlisle asked the Secretary of State for Social Services what advice has been given by his Department to the South Bedfordshire health authority about its intention to cease using the services of chiropodists in private practice for National Health Service work.

Mr. Kenneth Clarke: We always welcome any proposals by a health authority to improve its chiropody service. I understand that south Bedfordshire is now consulting locally about its proposals. We would welcome any changes that would improve the service to the people of south Bedfordshire and provide it in a more cost effective way.

Occupational Therapists

Mr. Pawsey asked the Secretary of State for Social Services (1) if he has any evidence of difficulties in recruiting occupational therapists in the National Health Service; and if any information is available to him about the recruitment of occupational therapists in the private sector;

(2) if he will make a statement on the adequacy of the supply of occupational therapists in the National Health Service; and if he will indicate such information that he has about the supply of occupational therapiss in the private sector of medicine.

Mr. Kenneth Clarke: The results of a sample survey by health authorities last year suggested that nationally about 15 per cent. of funded posts for occupational therapists were unfilled after three months. We have had discussions with representatives of the College of Occupational Therapists. We are now considering ways in which we might increase the numbers of occupational therapy students in training. We have accepted and will implement the substantial additions to the salary scales of occupational therapists that have been recommended by the pay review body for professions allied to medicine.

We do not hold information about occupational therapists employed in the private sector.

Mr. Pawsey asked the Secretary of State for Social Services what assessment he has made of the correlation between the trend towards greater use of community care and the demand for occupational therapists.

Mr. Kenneth Clarke: The greater use of community care has implications for the deployment of occupational therapists. The precise demand depends on the level, nature and organisation of National Health Service and local authority occupational therapy services in a particular locality. We are examining the organisational issues and the relationship between the two services to ensure that trained occupational therapists are used in the most effective manner.

Operational Research Service

Mr. Malone asked the Secretary of State for Social Services whether he will announce the outcome of the studies by his Department's operational research service into specialist claims control and the comparative cost-effectiveness of other types of anti-fraud work.

Mr. Tony Newton: The summary report of the two studies by the operational research service has now been received and I have today placed in the Library of the House a copy of the report together with a detailed statement on the conclusions reached in the light of the recommendations made.

The main conclusions are *(a)* that the method of calculating benefit savings achieved by anti-fraud efforts should be revised; *(b)* that although this revision has the effect of reducing the estimated yield of benefit savings, specialist claims control remains a highly cost-effective operation and will therefore continue; *(c)* that in order to increase cost-effectiveness further, specialist claims

control teams will in future target their investigations more closely towards those cases which the study showed to be the most successful.

Mental Health Act 1983 (Code of Practice)

Mr. Proctor asked the Secretary of State for Social Services when he anticipates receiving from the Mental Health Act Commission the draft code of practice referred to in section 118 of the Mental Health Act 1983; for how long he intends to consult individuals and organisations about the draft code; and when he anticipates laying the draft code before Parliament.

Mr. Kenneth Clarke: I understand that it may be some weeks before the commission submits its draft. We have already received representations from professional organisations about the need for an adequate period of wider consultation before the code of practice is laid before Parliament.

Spectacles (Prices)

Mr. Speller asked the Secretary of State for Social Services whether he is monitoring changes in the price of spectacles since 31 December 1984; and if he will make a statement.

Mr. Kenneth Clarke: We are observing how the new expanded market in spectacles is developing. Although there are difficulties in determining the prices actually being charged for some types of spectacles, there is clear evidence that lower priced spectacles are now available.

Family Practitioner Services

Mrs. Currie asked the Secretary of State for Social Services what percentage of family practitioner services' gross current expenditure has been met from charges from each year since 1974-75.

Mr. Kenneth Clarke: The information requested is as follows:

Year ending 31 March	*FPS charges as a percentage of gross FPS expenditure*
1975	9·6
1976	7·7
1977	7·9
1978	8·0
1979	7·3
1980	8·1
1981	9·1
1982	9·6
1983	10·0
1984	10·2
1985*	10·0

* Provisional.

Residential Homes

Ms. Harman asked the Secretary of State for Social Services (1) what was the number of people in Lancashire living in residential care homes for the elderly in each of the following sectors: *(a)* voluntary, *(b)* private and *(c)* public for each of the years 1979 to 1985;

(2) what was the number of residential care homes for the elderly in Lancashire for each of the following sectors: *(a)* voluntary, *(b)* private and *(c)* public for each of the years 1979 to 1985.

Mr. John Patten: The available information is in the table.

Lancashire—Residential care for the elderly and disabled

As at 31 March	*Number of homes*				*Number or residents*						
	Statutory	*Voluntary*	*Private*	*Total*	*Statutory*		*Voluntary*		*Private*		*Total*
					under 65	*65 plus*	*under 65*	*65 plus*	*under 65*	*65 plus*	
1979	93	20	93	206	247	3,475	115	605	65	1,141	5,648
1980	95	23	95	213	241	3,599	149	590	50	1,214	5,843
1981	95	22	132	249	223	3,598	136	604	78	1,679	6,318
1982	97	23	151	271	179	3,669	168	545	67	1,854	6,482
1983	97	23	178	298	206	3,567	175	525	72	2,301	6,846

1985*	100	24	319	443	155	3,512	na	na	na	na	na

* Provisional.
na = Not yet available.

Mobility and Attendance Allowances

Mr. Alfred Morris asked the Secretary of State for Social Services for each of the last three years for which figures are available, what was the average time between a decision to award on *(a)* mobility allowance and *(b)* attendance allowance and notification of the claimant of this decision; and, in each case, what was the average such time when arrangements were made for payment of the allowance to an appointee.

Mr. Newton: The available information at March of the three latest years available is as follows:

(a) Mobility Allowance

Year	*Time taken (Weeks)*
1983	2·0
1984	1·2
1985	0·6

(b) Attendance Allowance

Year	*Time taken (Weeks)*
1983	4·6
1984	4·0
1985	4·7

The time taken between the making of a decision and notification of that decision in respect of each benefit is not directly comparable because each is administered and adjudicated differently. The latest overall average time taken to clear cases from receipt of a claim to the issue of an order book is 8½ weeks for mobility allowance and 9 weeks for attendance allowance.

Action to make an appointment, where appropriate, is normally taken before a decision is made. No separate figures are kept on the average time taken to make appointments.

Mr. Alfred Morris asked the Secretary of State for Social Services in what proportion of Welsh claims for *(a)* mobility allowance and *(b)* attendance allowance the examining doctor is the claimant's own general practitioner.

Mr. Newton: A claimant's own general practitioner does not, at present, undertake any examinations for mobility allowance. General practitioners who are already examining medical officers will undertake the examination of their own patients for attendance allowance but I regret that it is not possible to identify, from the records now kept, the proportion of claims where this occurs.

Disabled People (Home Adaptations)

Mr. Alfred Morris asked the Secretary of State for Social Services what progress has been made in the collection of accurate returns from social services departments regarding their expenditure on adaptation to the homes of disabled people; when he expects this information to be available; and if he will make a statement.

Mr. Newton: There has been no interruption in the collection of returns on expenditure on adaptations. As explained, however, in my reply to the right hon. Member on 24 April, at column *499*, returns on the number of cases of assistance by local authorities with adaptations was temporarily suspended following concern about the accuracy of the data. The relevant return has now been redesigned to counter this problem and was reintroduced on 1 April 1985. Preliminary results for the year ending 31 March 1986 are expected to be available by November 1986.

Headway

Mr. Alfred Morris asked the Secretary of State for Social Services what recent representations his Department has received from Headway, the National Head Injuries Association; what reply is being sent; if there is any action he will be taking; and if he will make a statement.

Mr. Newton: Since 1981 the association has been in receipt of an annual grant from the Department in recognition of the valuable work that it does. The association has recently written to me in connection with its application for increased financial assistance to enable it further to develop its work and to put its activities on to a more secure financial basis. I have replied, asking that further information be supplied to officials to enable a decision to be reached quickly on the application in the meantime, an interim payment is being made to assist with the association's immediate needs.

Surrogate Motherhood Agencies

Mr. Peter Bruinvels asked the Secretary of State for Social Services whether he has any details about the number of further surrogate motherhood agency agreements that have been made and the number of surrogate babies that have been born since baby Cotton; and if he will make a statement.

Mr. John Patten: According to recent press reports, the commercial surrogacy agency involved in the case of baby Cotton had been involved in arranging two further surrogate pregnancies, one of which had not yet come to term. We have introduced the Surrogacy Arrangements Bill which, when enacted, will prohibit the operation of commercial surrogacy agencies in this country.

Social Security Review

Mr. John asked the Secretary of State for Social Services what was the growth in the value of the benefits covered by figure 2 of volume 1 of the social security Green Paper in relation to the increase in *(a)* average male gross earnings and *(b)* average male net earnings between 1949 and 1984.

Mr. Whitney: I shall let the hon. Member have a reply as soon as possible.

Mr. John asked the Secretary of State for Social Services what was *(a)* the total number of payments made to supplementary benefit claimants and *(b)* the total expenditure on such payments in respect of (i) community care needs as defined in paragraph 2.98 of volume 2 of the social security Green Paper, (ii) maternity and funeral expenses, (iii) other needs in respect of which single payments were made and (iv) urgent needs in the last year for which figures are available.

Mr. Whitney: Available information requested on single payments is estimated to be as follows (Figures are for 1983, the latest year for which a breakdown is available):

	Number of payments (000s)	*Expenditure (£ million)*
Maternity needs	171	10·2
Funeral expenses	11	2·5
Other needs	1,708	130·9

Information on single payments of supplementary benefit is not presently categorised by community care needs.

In the year ending 7 May 1985, about 234,000 one-off payments of supplementary benefit were made to meet urgent need. In addition, weekly payments were made to meet continuing urgent need on about 14,200 occasions. No information is available on the total cost of these payments.

Mr. John asked the Secretary of State for Social Services (1) whether deductions from benefit made to

recover loans made as part of the budgeting element of the social fund will be offset against the cash limit for that fund;

(2) whether each of his local offices will have its own cash limit in respect of the social fund;

(3) whether separate cash limits will be applied to the four elements of the social fund;

(4) whether the lump sum to be paid to widows on breavement will be disregarded in the means test for help with funeral costs;

(5) how many losers and how many gainers there would be in each of the following categories of supplementary benefit claimants if each supplementary benefit claimant who is *(a)* over 60 years, *(b)* unemployed, *(c)* a single parent, *(d)* long-term sick or disabled or *(e)* caring for the sick or disabled, had his or her requirements assessed at the average for that category; what in each case would be the average gain and the average loss; and what in each case would be the maximum gain and the maximum loss;

(6) if he has made any estimate of the likely rate of take-up of help from the social fund with funeral costs;

(7) if he has made any estimate of the proportion of *(a)* births and *(b)* deaths which will qualify for help from the social fund with maternity and funeral costs, respectively.

Mr. Newton: I shall let the hon. Member have replies as soon as possible.

From October 1985 (Proposed)

	Employer (per cent.)				*Employee (per cent.)*			
	Total earnings within the range				*Total earnings within the range*			
	LEL to £54·99	*£55·00 to £89·99*	*£90·00 to £129·99*	*£130·00 or more*	*LEL to £54·99*	*£55·00 to £89·99*	*£90·00 to £265·00*
Not-contracted-out							
Rate payable on total earnings	5·0	7·0	9·0	10·45	5·0	7·0	9·0
Contracted-out							
Rate payable on portion of earnings below LEL	5·0	7·0	9·0	*10·45	5·0	7·0	9·0
Rate payable on portion of earnings between LEL and UEL	0·9	2·9	4·9	6·35	2·85	4·85	6·85

* Also payable on any earnings in excess of £265·00.

No decisions have yet been taken about what rates of national insurance contribution employers and employees respectively should pay during and after the proposed phasing out of the state earnings-related pension scheme.

National Insurance

Mr. John asked the Secretary of State for Social Services what proportion of national insurance contributions are met by employers and employees, respectively, in respect of *(a)* contracted-in employment and *(b)* contracted-out employment; and what proportion he estimates will be met by each party in respect of the new common rate of national insurance contribution.

Mr. Whitney: The proportions of national insurance contributions which are met by employers and employees in respect of not-contracted-out and contracted-out employments are shown by the following percentage rates of contributions on earnings:

From April 1985

	Employer (per cent.)	*Employee (per cent.)*
Not-contracted out	10·45	9·0
Contracted-out	10·45 up to the LEL*	9·0 up to the LEL
	+6·35 between the LEL and UEL†	+6·85 between the LEL and UEL

* Lower earnings limit (£35·50 per week).

† Upper earnings limit (£265·00 per week).

EC (Welfare Support)

Mr. Marlow asked the Secretary of State for Social Services what information he has as to which European Economic Community countries provide financial support and where appropriate, the way it is provided to destitute or unemployed visitors or settled non-citizens.

Mr. Whitney: Such information as is available is contained in the Department's publication. "Tables of Social Benefit Systems in the Member States of the European Communities, Portugal and Spain (Position at 1 January 1984)," a copy of which is in the Library.

Severe Disablement Allowance

Mr. Freud asked the Secretary of State for Social Services what publicity has been given to the eligibility of blind people for the severe disablement allowance by his Department; and what is his estimate of the proportion of those eligible who have claimed, or are in the process of claiming, the severe disablement allowance.

Mr. Newton: Our £400,000 publicity campaign designed to ensure maximum take-up of severe disablement allowance (and non-contributory invalidity pension — including house-wives' non-contributory invalidity pension—the benefit which severe disablement allowance replaced) utilised the national newspapers and magazines and specialist, professional and disabled people's media, including publications specifically for people with a visual handicap. In addition, the publicity campaign was backed up by a special exercise to invite claims from those, including blind people, drawing supplementary benefit who appeared to have underlying title to non-contributory invalidity pension.

I regret that information is not available on the number of blind people who may be eligible for severe disablement

allowance and the proportion of those who have claimed, or are in the process of claiming it. Overall, however, we have received over 24,000 new claims for severe disablement allowance and our special exercise for people drawing supplementary benefit has resulted, as at 7 May, in the issue of 61,000 invitations and the receipt of some 36,000 non-contributory invalidity pension claims.

Lipotriad

Mrs. Beckett asked the Secretary of State for Social Services which drug or drugs on the limited list meets the clinical need of the drug Lipotriad in the treatment of serious eye disorders.

Mr. Kenneth Clarke: Lipotriad is a multi-vitamin preparation which is of no proven efficacy in the treatment of macular degeneration. An adequate range of vitamins remains available on NHS prescription for use in cases where they are clinically indicated.

Complaints Procedures

Mr. Meadowcroft asked the Secretary of State for Social Services what plans he has to establish a complaints procedure for hospitals directly managed by his Department.

Mr. John Patten [*pursuant to his reply*, 11 June 1985, c. *441*]: Each of the four special hospitals for which we have direct responsibility—Broadmoor, Moss Side, Park Lane and Rampton hospitals — has established procedures for dealing with complaints. A proportion of complaints relating to these hospitals come direct to Ministers or officials in the Department, where procedures for dealing with them are also well established. In reporting in October 1984 on matters which he had been asked to investigate, the Parliamentary Commissioner for Administration expressed his satisfaction with the way complaints made by a patient in Broadmoor hospital had been dealt with, both at the hospital and in the Department.

Mr. Meadowcroft asked the Secretary of State for Social Services if he will introduce legislation to prevent National Health Service doctors entering into contracts which would impede investigations pursuant to the Hospital Complaints Procedure Bill.

Mr. John Patten [*pursuant to his reply*, 11 June 1985, c. *441*]: We see no need to introduce such legislation.

Mr. Gordon Brown asked the Secretary of State for Social Services which of the new benefits mentioned in his Green paper on the welfare state will rise in line with inflation.

Mr. Newton [*pursuant to his reply*, 7 June 1985, c. *290-91*]: The Government stand by their pledge to uprate retirement pensions and linked long-term benefits in line with rising prices. Future upratings of other benefits will be determined as they are now in the light of circumstances at the time.

Health Authorities (Ancillary Services)

Sir John Farr asked the Secretary of State for Social Services if he will publish in the *Offical Report* details of the progress made by district health authorities in England in putting their ancillary services out to competitive tendering, including the savings made to the latest date available.

Mr. John Patten: The position on 31 March 1985 is shown in the tables. We are aware of 66 contracts which have been let to private contractors and these will realise an estimated £10·4 million in annual savings. Fifty-five tenders have been secured by in-house organisations and these will produce estimated annual savings of £2·7 million.

FOREIGN AND COMMONWEALTH AFFAIRS

Nuclear Weapons

Mr. Best asked the Secretary of State for Foreign and Commonwealth Affairs what information he has as to which North Atlantic Treaty Organisation countries have *(a)* supported and *(b)* abstained from any declaration in the United Nations or elsewhere calling for a freeze on nuclear arsenals; and what information he has as to the terms of each such declaration.

Mr. Rifkind: At the 1984 session of the United Nations general assembly three resolutions calling for a nuclear weapons freeze were tabled.

Resolution 39/63C, sponsored by Mexico and Sweden, was supported by Denmark and Greece; Iceland, Norway and Spain abstained; all other members of the North Atlantic Treaty Organisation voted against.

Resolution 39/63G, sponsored by India, was supported by Denmark, Greece and Iceland; Norway and Spain abstained; all other North Atlantic Treaty Organisation members voted against.

Resolution 38/151D, sponsored by the Union of Soviet Socialist Republic, was supported by Greece. All other NATO members voted against.

Copies of these resolutions are being placed in the Library of the House.

Israel (Trade Boycott)

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs whether he will ensure that the answer by the Minister of State, the hon. Member for Shoreham (Mr. Luce) on 23 May, *Official Report*, column *512*, about United Kingdom opposition to attempts by third parties to restrict United Kingdom trade with Israel, is circulated to all diplomatic missions overseas, to be conveyed to Governments of their host countries, as appropriate.

Mr. Renton: Our diplomatic missions and foreign Governments are well aware of the Government's long-standing opposition to the Arab boycott.

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs whether, pursuant to the Minister of State's reply on 23 May, *Official Report*, column *512*, about the Arab trade boycott of Israel, he will now reconsider the practice of departmental authentification of signatures on Arab boycott documents; and whether he will make a statement.

Mr. Renton: As my right hon. and learned Friend made clear in his reply to the hon. and learned Member for Leicester, West (Mr. Janner) on 14 November 1984, at columns 673-4, we have concluded that it would not be right to change our present policy or the practice of authentication. It is a standard legal procedure and does no more than confirm the validity of the signature.

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs what report he has received from Her Majesty's ambassador in Washington about the recent report from the Office of Anti-Boycott Compliance for the fiscal year ended September 1984 regarding alleged compliance by United Kingdom subsidiaries of American companies with Arab boycott requests; what comparable figures were given for other European Community countries; and whether he will discuss this matter with the United States Administration.

Mr. Renton: It is for the companies concerned to decide what action, if any, they should take about any such allegations.

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs what report he has received from Her Majesty's ambassador in Washington about the fine payable by the Atlanta branch of Lloyd's Bank International Limited on the grounds of illegal compliance with the Arab trade boycott; and what guidance is given to British firms operating in the United States of America about the need for strict compliance with American legislation.

Mr. Renton: We noted reports that in May 1983 Lloyds Bank International Limited paid a civil penalty of $25,000 for allegedly infringing US legislation on the boycott. The Department of Trade and Industry is ready to advise companies about all aspects of the boycott's operations. It remains our view that individual companies should decide in the light of their own commercial interests what attitude to take to the boycott.

United Nations (Cambodia Representation)

Sir Geoffrey Finsberg asked the Secretary of State for Foreign and Commonwealth Affairs what is the policy of Her Majesty's Government towards the presence of the Khmer Rouge movement in the coalition of interests currently representing Cambodia in the United Nations general assembly.

Mr. Rifkind: We support the aims of the resistance coalition as a whole, which is seeking to bring about the complete withdrawal from Cambodia of Vietnam's illegal occupation forces. However, we have no dealings with the Khmer Rouge; the withdrawal of our formal recognition of the Pol Pot regime was announced on 6 December 1979.

Mr. Ahmed Walid Rajab

Mr. Latham asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the contacts between his Department and the Syrian embassy regarding the conduct of Mr. Ahmed Walid Rajab, Counsellor for Arab League Affairs; and if he will list the dates on which his Department took active steps in this matter.

Mr. Renton: This case first came to our notice in August 1983 when the Syrian ambassador told officials that the landlord, Mr. Chaffey, had forced an entry into the flat at 21 Stonor road where Mr. Rajab was living. Our policy in civil disputes of this kind is that the parties should exhaust all legal remedies open to them before the Government can consider intervening. In response to questions from both parties, we gave advice on this basis. We also gave factual information on the status of Mr. Rajab.

The Foreign and Commonwealth Office became directly involved in February 1985 when we were told by Mr. Chaffey's solicitors that Mr. Rajab was not ready to observe a court order to vacate Mr. Chaffey's flat.

The head of protocol department in the Foreign and Commonwealth Office wrote to the Syrian ambassador on

16 April and on 14 May, and summoned him to the Foreign and Commonwealth Office on 31 May to protest strongly about Mr. Rajab's unacceptable behaviour in ignoring a court order.

The ambassador was warned at that stage that we would request the removal of Mr. Rajab from this country if he did not vacate the flat by 14 June.

In view of the stringent standards which we now expect from the Diplomatic Corps in accordance with the criteria layed down in the recent White Paper on diplomatic immunities and privileges, we have today told the Syrian ambassador that, in view of Mr. Rajab's unacceptable behaviour, it would be best to transfer him from this country soon.

William and Mary (Tercentenary)

Mr. Viggers asked the Secretary of State for Foreign and Commonwealth Affairs what progress has been made with arrangements to mark the tercentenary of William and Mary in 1988.

Mr. Renton: The British Committee described in the reply by my hon. Friend the Member for Wycombe (Mr. Whitney) to my hon. Friend on 30 July 1984, at column 65, has been set up, together with a number of specialist sub-committees. Mr. Charles Tidbury has taken over as chairman from Sir Charles Troughton, and the committee will hold its second meeting on 18 June.

We anticipate a programme of commemorative events in 1988-89 which will be a fitting celebration and reminder of our joint cultural heritage with the Dutch people, and which will help further to strengthen our already excellent relations with The Netherlands.

Written Answers to Questions

Thursday 13 June 1985

TRADE AND INDUSTRY

Nissan UK (Undertakings)

Mr. Cyril Smith asked the Secretary of State for Trade and Industry what undertakings regarding spin-off benefits for United Kingdom suppliers Nissan Motors UK made to Her Majesty's Government in return for financial assistance; to what extent those undertakings, with particular reference to control gear, have been fulfilled; and if he will make a statement.

Mr. Butcher: A statement on Nissan was made by my right hon. Friend the Secretary of State for Trade and Industry on 1 February 1984. Whilst not bound to achieve specific local content levels in its purchases of machinery and equipment, the company is seeking to provide the maximum practicable opportunity for local suppliers to compete in this area. My Department is in close touch with Nissan on all purchasing matters, but sourcing decisions on individual items must remain a matter for the company's commercial judgment.

Origin Marking Regulations

Mr. Lawler asked the Secretary of State for Trade and Industry what is the Government's response to the European Court judgment 207/83 on the United Kingdom's origin marking regulations.

Mr. Fletcher: The Government are consulting bodies representative of those likely to be affected on how best to implement the court's ruling.

EC Trade Mark Office

Mr. Boyes asked the Secretary of State for Trade and Industry when he expects a decision to be taken on the location of the European Community trade mark office.

Mr. Butcher: I understand that the Commission hopes to make a proposal to the Council of Ministers on the site of the office in the spring of 1986.

British Telecom (Shares)

Mr. Gould asked the Secretary of State for Trade and Industry whether City firms involved in the sale of British Telecom shares, as underwriters and in other capacities, had any privileged access to the shares; and whether the same limitations as applied to the general public, in terms of the maximum number of shares allotted to each purchaser, also applied to such firms and their employees.

Mr. Butcher [*pursuant to his reply*, 4 June 1985, c. *136*]: Fifty-five per cent. of the United Kingdom offer of British Telecom shares was placed at the beginning of the offer period with over 2,000 institutional investors, who also undertook to purchase any of the shares to be offered to the public which remained unsold at the end of the offer period. These arrangements were set out in the prospectus and noted in my hon. Friend's statement of 16 November 1984. The remainder of the United Kingdom offer was allocated to members of the public, BT employees and other firms and institutions, on the basis announced by my hon. Friend on 3 December 1984. Employees of City firms involved in the offer were subject to the same application and allocation process as members of the public.

HOME DEPARTMENT

Vagrancy Acts

Mr. Knox asked the Secretary of State for the Home Department what assessment he has made of the implications of the new regulations on board and lodging accommodation payments for the operation of the Vagrancy Acts.

Mr. Mellor: The Vagrancy Acts will continue to operate as previously. The general effect of the new regulations will be closely monitored by the Department of Health and Social Security.

Police Complaints Commissioner

Mr. Austin Mitchell asked the Secretary of State for the Home Department what transport is provided for the new Police Complaints Commissioner.

Mr. Giles Shaw: Arrangements have been made for the present chairman of the Police Complaints Authority to retain the access on the Government car service which he enjoyed in his former post as Parliamentary Commissioner for Administration and Health Service Commissioner. The service is provided subject to the authority's repayment of the costs.

Crime Prevention

Dr. Twinn asked the Secretary of State for the Home Department if the Standing Committee on crime prevention has considered the case for encouraging better lighting in inner city areas; and if he will make a statement.

Mr. Giles Shaw: At the request of the Home Office standing conference on crime prevention, the British Standards Institution is preparing a guide for architects and planners on the security of buildings. The first chapter, which is to be published and widely disseminated later this year, will include advice on lighting as a preventive measure. The Institution of Public Lighting Engineers has agreed to inform the Home Office crime prevention unit of any projected major new lighting schemes in inner city areas so that the possibility of evaluating their effect on street crime can be considered.

Prison Sentences (Statistics)

Mr. Skinner asked the Secretary of State for the Home Department what percentage of convicted *(a)* males and *(b)* females were given prison sentences of between three and six months in magistrates courts in 1981, 1982, 1983 and 1984.

Mr. Mellor: Information on the length of custodial sentences is published annually in "Criminal Statistics, England and Wales": for 1981 and 1982, for immediate

imprisonment, in table 7.18 of the volume for 1982 (Cmnd. 9048) and for 1983 in supplementary tables Vol. 1, tables S1.3 (partly suspended sentences) and S1.4 (unsuspended sentences) and table 7B of Cmnd. 9349 (youth custody). Corresponding information for 1984 is not yet available.

Sri Lankans (Residence)

Mr. Greenway asked the Secretary of State for the Home Department how many Sri Lankans were admitted to permanent residence in the United Kingdom in each year since 1955; and if he will make a statement.

Mr. Waddington: The total numbers of Sri Lankan citizens accepted for settlement in the United Kingdom in each of the years 1973 to 1984 were published in the annual Command Paper "Control of Immigration: Statistics" (tables 14*(a)* and 18 of the issues for 1978 and 1984, Cmnd. 7565 and 9544 respectively). Comprehensive information is not available on Sri Lankan acceptances for settlement for the years 1963 to 1973; before 1 July 1962 Commonwealth citizens were not subject to immigration control.

Holloway Prison

Mr. Pike asked the Secretary of State for the Home Department whether he has any long-term plans to provide a regional psychiatric facility for disturbed women prisoners at Holloway prison.

Mr. Soley asked the Secretary of State for the Home Department what plans his Department has to improve care and treatment facilities for disturbed women at Holloway prison.

Mr. Mellor: My right hon. and learned Friend is awaiting the report of the project committee set up to advise on the organisation and future role of Holloway prison, including its psychiatric facilities. The project committee has been asked to report at the beginning of July and he will make a statement as soon as practicable thereafter.

Mr. Andrew F. Bennett asked the Secretary of State for the Home Department what are the terms of reference of his Department's present inquiry into Holloway prison; and whether the inquiry will take oral evidence from employees, inmates and voluntary organisations concerned with prisoners' welfare.

Mr. Mellor: The terms of reference of the Holloway project committee are:

To prepare a plan for the development of Holloway Prison as the main local prison for women in the south of England, within the framework of the statement of functions of Prison Department establishments recently approved by the Prisons Board and having regard to the staff and the resources likely to be available and their optimum deployment; and, in particular:

(i) to assess what population of prisoners, both in numbers and in composition, can most appropriately be held in Holloway prison;

(ii) to identify any specialist function currently performed at Holloway prison which could be better and more appropriately performed elsewhere within the women's prison system, having regard to Holloway's role as a local prison;

(iii) to consider the regimes that may best be operated in Holloway prison; with the aim of enabling the prisoners to spend the maximum time possible out of their cells and to have access to a variety of activities;

and to report to the Director General of the Prison Service by 1 July 1985.

The committee has not invited oral submissions. It is open to anyone to send comments in writing.

Mental Health Act 1983 (Accused Persons)

Mr. Dubs asked the Secretary of State for the Home Department what information he has as to the number of cases in which the courts have exercised their powers under the Mental Health Act 1983 to remand, where appropriate, accused persons to hospital for reports and treatment and as to the number of cases where places have not been found for such prisoners by regional health authorities.

Mr. Mellor: The number of persons remanded under the Mental Health Act 1983 has been collected centrally from the courts only from the beginning of 1985 and information will not become available until 1986. A court may exercise these powers only where arrangements have been made for the person's admission to hospital and information is not collected centrally about the number of cases in which a hospital place was not available. My right hon. Friend the Secretary of State for Social Services expects to have later this year information about the number of admissions to hospital under these powers during the final quarter of 1984 and in the autumn of 1986 to have information on such admissions during 1985.

Stafford Prison

Mr. Kilroy-Silk asked the Secretary of State for the Home Department what has been the effect on the certified normal accommodation of Crescent hall, Stafford prison, of the introduction of integral sanitation; what is the rationale behind the new certified normal accommodation; how the space available in a cell now certified fit for double occupation in Crescent hall compares with that in a double cell in a new prison; and if he will make a statement on the implications of the change in certified normal accommodation in this case for estimates as to the cell loss anticipated from the introduction of integral sanitation into all local prisons and remand centres.

Mr. Mellor: The scheme to introduce integral sanitation in the crescent wing at Stafford was approved as a pilot project. One half of the wing was completed in September 1984, and the new facilities are being evaluated in use. It is expected that work on the second half of the wing will be completed later this year. The pilot scheme was approved on the basis that there would be no loss of certified normal accommodation. The proposal was to use some of the refurbished cells, which differ in size, for single occupancy and some as two-man cells, and the current cell certificates reflect this position. The size of the two-man cells is approximately 10·15m^{2}including 2·25m^{2}provided by the separate toilet annex. The size of two-man cells being planned for new establishments is not less than 9·2m^2, inclusive of the sanitary annex. No implications for any change in certified normal accommodation in local prisons and remand centres can be drawn until the Stafford scheme is complete and fully evaluated.

Detained Schoolchildren (Kirkby)

Mr. Kilroy-Silk asked the Secretary of State for the Home Department if he will call for a report from the chief

constable of Merseyside on how many schoolchildren were detained in Kirkby police station on 18 and 19 April; how long each one was detained; why they were not allowed to telephone their parents, relatives or solicitors; why no food or drinks were provided; and why some were detained from 11am to after 8 pm.

Mr. Giles Shaw: Yes. I shall make inquiries of the chief constable of Merseyside and will write to the hon. Member.

Young Persons

Mr. John Fraser asked the Secretary of State for the Home Department what percentage of people aged between 14 and 21 years have experienced a custodial sentence.

Mr. Mellor: An estimate is available only for those born in 1953 and 1958 from the sample study of their convictions, results of which were published in "Home Office Statistical Bulleting Issue 7/85". About 2 per cent. of such persons had received a custodial sentence by the age of 21.

Penal Establishments

Mr. Kilroy-Silk asked the Secretary of State for the Home Department what is the budget in each penal establishment for *(a)* dental treatment and *(b)* medical services.

Mr. Mellor: The Department meets the patient's share of the National Health Service charge for dental treatment received by prisoners. The financial allocations to each establishment for this purpose, and for medical services generally, are set out in the table. "Medical Services" includes the provision of drugs, dressings and small items of medical equipment, and contributions to charges for dental and optical treatment.

Name of Establishment	*Medical services*	*Dental Contributions*
Acklington	12,775	4,000
Albany	5,785	4,650
Aldington	2,315	300

Werrington	2,890	1,700
Wetherby	8,155	4,100
Whatton	1,255	85
Winchester	26,280	6,900
Wormwood Scrubs	83,560	25,000
Wymott	18,775	9,000

Note: In some cases where a nil or nominal allocation is shown above a smaller establishment will 'feed off' a larger one nearby for its medical supplies.

Mr. Kilroy-Silk asked the Secretary of State for the Home Department if he will list the industrial action currently being taken by staff in penal establishments, the establishments concerned and the number of staff involved; and what were the stated reasons for the dispute and the effects of the dispute.

Mr. Mellor: In addition to a number of disputes at particular establishments over local matters such as manning levels and efficiency improvements, there are four national disputes relating to procedural issues on the use of force reports, procedures for internal investigations, non-co-operation in the use of radio-pagers and non-co-operation in the supply of statistical information regarding movements to courts. Discussions are taking place or are to take place on the resolution of all these issues. None of the disputes at present has had any more than a marginal effect on prisoners and others.

Care of Children (Steering Group)

Mr. Rowe asked the Secretary of State for the Home Department (1) what are the criteria by which appointments were made to the steering group appointed to review the arrangements by which information is handled on the criminal background of those seeking positions where they will have substantial opportunities for access to children;

(2) if he will list the names of all the members on the steering group appointed to review the arrangements by which information is handled on the criminal background of those seeking positions where they will have substantial opportunities for access to children;

(3) if he will make it his policy that the steering group appointed to review the arrangements by which information is handled on the criminal background of those seeking positions where they will have substantial opportunities for access to children will seek evidence or proposals from the Association of Directors of Social Services, before reporting;

(4) if he will make it his policy that the review of the arrangements by which information is handled on the criminal background of those seeking positions where they will have substantial opportunity for access to children will seek evidence and proposals from all bodies with a direct interest in the outcome of the review before it reports.

Mr. Mellor: The review was set up in the wake of the Colin Evans case to devise as a matter of urgency a system for disclosing criminal backgrounds in relevant cases for the protection of children. The steering group supervising the work, which was kept small to facilitate a speedy review, includes a director of social services and representatives of other major central and local government interests, and the police. Other bodies are being consulted in the course of the review and there will be an opportunity for comments on recommendations resulting from the review.

The Membership of the steering group is:

Mr. D. E. R. Faulkner (Chairman)—Home Office
Mrs. J. Hale—Inner London Education Authority
Mr. D. James—Director of Social Services, Leeds
Mr. B. Johnson—Chief Constable, Lancashire
Mr. D. Pullen—County Secretary, Buckinghamshire
Mr. E. Soden—Home Office
Mr. D. Wilkinson — Department of Education and Science
Commander D. Williams — National Identification Bureau
Mr. C. Wilson — Department of Health and Social Security

Observers:
Mr. R. Scott—Scottish Office
Mrs. D. Brown—Northern Ireland Office

Police Establishment (Newham)

Mr. Tony Banks asked the Secretary of State for the Home Department if he will state the police establishment for the two police divisions covering Newham and the number available for duty in the area for each month since March 1984; how many in the establishment were sent out on weekly tours of duty in mining areas; and how many such weekly tours there have been since March 1984.

Mr. Giles Shaw: There are no fixed establishments for police divisions in the Metropolitan police district. An establishment is set for each police district and it is for the district commander to deploy available manpower to his divisions according to operational needs and priorities.

The Commissioner of Police of the Metropolis tells me that the establishment and strength of "K" district (which includes the borough of Newham) for each month since March 1984 are as set out in the table. Officers from "K" district were sent to the mining areas for periods of duty ranging from one to eight days on 62 occasions between March 1984 and March 1985. The average number of officers sent on each occasion was 39.

Metropolitan Police "K" District
Police establishment and strength (March 1984 to May 1985)

	District establishment	District strength
1984		
March	1,320	1,215
April	1,320	1,221
May	1,320	1,224
June	1,320	1,203
July	1,320	1,201
August	1,320	1,209
September	1,320	1,204
October	1,320	1,214
November	1,320	1,203
December	1,320	1,209
1985		
January	1,320	1,202
February	1,321	1,202
March	1,321	1,198
April	1,321	1,196
May	1,321	1,200

Prisoners (Assaults)

Mr. Tony Banks asked the Secretary of State for the Home Department what action is being proposed to

determine the precise situation regarding the assault on one of the defendants of the Newham seven trial at the Central Criminal Court; and what measures are taken to protect prisoners from such assaults.

Mr. Mellor: The incident is being investigated by the City of London police and it would not be appropriate for me to comment at this stage.

NATIONAL FINANCE

Export of Goods Control Orders

Mr. Ashdown asked the Chancellor of the Exchequer why Her Majesty's Customs and Excise is no longer offering compounding in cases arising under the Export of Goods Control Orders 1974 to 1981 et al; and if he will make a statement.

Mr. Hayhoe: Customs and Excise has not changed its policy and does offer to compound proceedings in appropriate cases. That policy was set out in my answer to my hon. Friend the Member for Leicester, East (Mr. Bruinvels) on 26 April 1984 at column *542*.

EC Commission (Staff)

Mr. Teddy Taylor asked the Chancellor of the Exchequer how many persons were employed by the European Economic Community Commission on the most recent date for which figures are available; what was the total cost of administering the Commission on the same date; and what were the comparable figures, respectively, five and 10 years previously.

Mr. Ian Stewart: I shall let my hon. Friend have a repy as soon as possible.

EC Commission (Expenditure)

Mr. Teddy Taylor asked the Chancellor of the Exchequer if he will make a statement outlining the procedures for controlling and supervising the spending of public funds by the Common Market Commission.

Mr. Ian Stewart: The community budgetary authority, the Council and Parliament, are responsible, under the treaty, for the authorisation of funds through the annual budgetary procedure. The Court of Auditors is responsible for the audit of the Community's accounts, including those of the Commission, and reports annually on them.

Bad Debt Relief

Mr. Michael Forsyth asked the Chancellor of the Exchequer when he proposes to provide for bad debt relief in the value added tax system, as recommended in the "Burdens on Business" report.

Mr. Hayhoe: The Chancellor announced in his Budget statement an extension of the existing arrangements for VAT. Legislative provision is included in clause 31 of the current Finance Bill. The extended relief is to be available on the coming into force, early next year, of the provisions of the Insolvency Bill, where the administrator or administrative receiver certifies that the debtor's assets are insufficient to cover the payment of any dividend to unsecured creditors. Relief is also to be available where the debtor agrees a voluntary scheme or enters into a formal deed of arrangement with his creditors.

Black Economy

Mr. Eggar asked the Chancellor of the Exchequer what action he proposes to take to reduce the black economy in the construction industry and other industries; and if he will make a statement.

Mr. Hayhoe: I refer my hon. Friend to my remarks in the Adjournment debate on 25 January, at columns 1305-1312. Both Revenue Departments continue to keep the methods used to counter tax evasion in the black economy in the construction and other industries under careful review.

Mr. Eggar asked the Chancellor of the Exchequer what representations he has received from the construction industry regarding the black economy in building work and the effect of competition within the industry of the value added tax exemption limit for small businesses; and what action he proposes to take.

Mr. Hayhoe: A total of 146 representations have been identified in the past year. They all in some way alluded to the black economy in the construction industry and a few sought to have the level of the VAT registration threshold reduced. The present VAT threshold of £19,500 excludes from registration many small traders in the construction industry, and there is no firm evidence to suggest that there is a significant number of businesses which are properly registrable but have failed to notify their liability.

Mr. Eggar asked the Chancellor of the Exchequer what is the estimated number of traders in the construction industry who are failing to comply with their legal obligation to be registered for value added tax with Her Majesty's Customs and Excise; and whether there is any evidence that the number of such traders is increasing.

Mr. Hayhoe: There are no estimated figures available for the number of traders who fail to notify their liability to be registered for VAT. In a sample exercise, based on information supplied by the industry, Customs and Excise was unable to establish that out of 132 cases a single trader had failed to comply with his legal obligation.

Value Added Tax

Mr. Eggar asked the Chancellor of the Exchequer what penalties are imposed by Her Majesty's Customs and Excise upon a trader whose taxable turnover for value added tax purposes is in excess of the prevailing exemption limit for small businesses and who breaks the law by failing to notify Her Majesty's Customs and Excise.

Mr. Hayhoe: The maximum penalty, on summary conviction, for failing to notify a liability for VAT registration is £1,000 or, if greater, three times the amount of the tax evaded by the failure.

Mr. Tom Cox asked the Chancellor of the Exchequer if he has any plans to reintroduce the scheme for deferred value added tax and duty for goods imported by registered traders; and if he will make a statement.

Mr. Hayhoe: Arrangements are available under which importers, once approved, may defer payment of duty and value added tax chargeable at importation until the 15th of the following month. However, the hon. Member may have in mind the former postponed accounting system for VAT alone. As indicated in my answer to my hon. Friend

the Member for Basingstoke (Mr. Hunter) on 14 February, at column *290*, we would revert to this system if other member states agreed to the Commission's proposals, in the draft 14th directive on VAT, to adopt it throughout the Community.

Mr. Tom Cox asked the Chancellor of the Exchequer if any discussions are taking place within the European Economic Community as to the introduction of a standard system for the removal of value added tax on goods coming into a European Economic Community country on a sale-or-return basis; and if he will make a statement.

Mr. Hayhoe: Yes. Discussions are taking place on a draft 17th VAT directive, which proposes that temporary imports on approval of certain categories of goods, including made-up articles of fur, precious stones, carpets and articles of jewellery, should be relieved of VAT.

Mr. Tom Cox asked the Chancellor of the Exchequer what information he has as to the types and volume of goods coming into the United Kingdom on a sale-or-return basis, on which value added tax has to be paid.

Mr. Hayhoe: Importers are not required to identify sale-or-return goods separately, and I regret therefore that no information of the kind requested is collected.

Construction Industry (Taxation)

Mr. Eggar asked the Chancellor of the Exchequer if he will estimate the increase in revenue to the Exchequer of small businesses in the construction industry being required to register for value added tax when their taxable turnover exceeds £9,750 per annum.

Mr. Hayhoe: In the absence of reliable information on businesses in the construction industry that are currently not required to register for value added tax, I regret that it is not possible to provide a meaningful estimate.

Mr. Eggar asked the Chancellor of the Exchequer if he will estimate the loss of revenue to the Exchequer from the construction industry of the value added tax exemption limit for small businesses being raised to *(a)* £50,000 and *(b)* £100,000.

Mr. Hayhoe: Such large changes make any prediction of the likely revenue effects very difficult and subject to considerable uncertainty. I regret therefore that a reliable estimate of the revenue loss cannot be given.

Jewellery Trade (Free Port)

Mr. Tom Cox asked the Chancellor of the Exchequer what plans he has to set up in the United Kingdom a free port for the jewellery trade; and if he will make a statement.

Mr. Hayhoe: Experimental free zones have already been designated at Belfast international airport, Birmingham international airport, Cardiff, Liverpool, Prestwick international airport and Southampton. Members of the jewellery trade may apply to become free zone traders.

THE ARTS

Castle Howard

Mr. Faulds asked the Parliamentary Under-Secretary of State answering in respect of the Arts what arrangements the Minister for the Arts is making to seek to save the art treasures in Castle Howard; and whether he will make a statement.

Mr. Waldegrave: No formal approach has yet been made to the Government concerning works of art at Castle Howard.

CIVIL SERVICE

Civil Servants (Reinstatement)

Mr. Teddy Taylor asked the Minister for the Civil Service what is the policy of Her Majesty's Government towards reinstatement in the British Civil Service of former British civil servants who have taken up posts in the European Economic Community Commission and who have subsequently been made redundant by that organisation; and if he will make a statement.

Mr. Hayhoe: The Community terms of service common to all its institutions do not recognise any form of secondment from national civil services for permanent staff; officers must therefore resign from the United Kingdom Civil Service on taking up an appointment with the Communities. It is important to promote full United Kingdom representation in the European Communities; individuals are encouraged to apply for advertised vacancies as part of their career development and Departments have discretion to offer a guarantee of reinstatement.

Officers given the guarantee of reinstatement have an absolute right of return to their substantive grade for the first five years after departure from the United Kingdom Civil Service. Thereafter, until the 55th birthday the right of return is retained but is not absolute. The parent Department, and the Cabinet Office (MPO) on behalf of the service in general, undertake to use their best endeavours to find an officer a post in his substantive grade. Where a post cannot be found, the officer is retired prematurely on grounds of redundancy.

An officer who has been absent for more than five years and is aged 55 or over has no right of return, but may be reinstated in accordance with normal procedure.

DEFENCE

Chemical Weapons

Mr. Cohen asked the Secretary of State for Defence, pursuant to the answer of 3 May, *Official Report*, column 259, concerning chemical weapons, on what evidence the Minister of State based his statement that United States moves towards modernisation would underline to the Russians the benefits of reaching early agreement on a total ban; and if he will make a statement.

Mr. Stanley: The statement was based on a reasonable assessment.

Mr. Cohen asked the Secretary of State for Defence what information he has as to the measures taken by Warsaw pact countries to modernise their chemical weapons; and if he will make a statement.

Mr. Stanley: I refer the hon. Member to paragraph 18 of annex A to the Statement on the Defence Estimates 1985.

Stainmore (Training Land)

Mr. Maclean asked the Secretary of State for Defence what was the starting price per acre he offered for land for dry training at Stainmore; and what is he currently offering.

Mr. Lee: The Property Services Agency, as our agents has made no offer for the Land at Stainmore, pending the outcome of the notification to the local authority to use the land for training.

IBM

Mr. Ashdown asked the Secretary of State for Defence how many copies of the letter from IBM of 22 December 1983 regarding the movement of advanced IBM machines within the United Kingdom his Department has received; and how many complaints relating to the letter, or similar letters he has received.

Mr. Butler: The letter from IBM was not addressed to the Ministry of Defence. No complaints relating to the letter, or similar letters, have been received.

Warship Contracts

Mr. Nicholas Brown asked the Secretary of State for Defence what assessment he makes of the balance of consideration between competitive tendering and social policy when placing warship contracts.

Mr. Lee: Our policy is to place warship contracts, wherever practicable, by competitive tendering. The primary considerations in evaluating tenders are costs and performance, but account can also be taken of other relevant factors.

Mr. Nicholas Brown asked the Secretary of State for Defence what is his policy towards privatised British warship yards competing for types of work currently carried out in British naval dockyards.

Mr. Lee: The Royal dockyards currently carry out the bulk of the Royal Navy's warship refitting requirements. In their defence open government documents, entitled "The future of the Royal Dockyards", published on 17 April, the Government, in setting out the options for the future management of the dockyards, expressed their intention to open up more warship refit work to competition in future. It would be up to the privatised British warship yards to decide whether they were interested in bidding for such work. For their part, the Government would seek to enourage as wide a competition as possible from suitable firms.

Dockyard Apprentices

Miss Fookes asked the Secretary of State for Defence (1) what action he is taking to resolve the problem of apprentices within the Devonport apprentice training centre not being given on-the-job training in Her Majesty's dockyard, Devonport;

(2) if he will announce the numbers of apprentices to be taken on at Her Majesty's dockyard, Devonport.

Mr. Lee: These matters are currently the subject of discussion between management and trades unions at Devonport dockyard.

Miss Fookes asked the Secretary of State for Defence if he has any plans to utilise the Devonport apprentice training centre for the training of young people in addition to those apprentices in training for work at Her Majesty's dockyard, Devonport.

Mr. Lee: There are no plans to utilise the apprentice training centre at Devonport dockyard for the training of any young people other than Ministry of Defence apprentices in the immediate future because of the continuing refusal by the trades unions there to support the introduction of a youth training scheme.

EDUCATION AND SCIENCE

Metallic Marker Pens

Mr. Gregory asked the Secretary of State for Education and Science what information he has over the use in schools in England of metallic marker pens with gold and silver lettering that contain xylene/xylol; and if he will make a statement.

Mr. Dunn: My right hon. Friend has no information as to the extent of the use of such pens in schools.

Science and Engineering Graduates

Mr. Freud asked the Secretary of State for Education and Science what effect the reductions in University Grants Committee grants to some universities in 1981 has had on the output of graduates in science and engineering.

Sir Keith Joseph: The table gives the actual output of first degree science and engineering home graduates (university and CNAA) in Great Britain for 1981-82 and 1982-83, and the Government's output projections for 1983-84 to 1989-90.

Output of First Degree Home Graduates (University and CNAA) in Great Britain, in science and engineering

	(thousands)
Actuals	
1981-82	31·1
1982-83	32·8
Projections	
1983-84	35·3
1984-85	35·4
1985-86	35·4
1986-87	35·7
1987-88	36·1
1988-89	36·7
1989-90	36·9

Notes:
(1) The figures are based on statistics obtained from the universities statistical record (USR) and CNAA. Figures for the numbers awarded CNAA first degrees are estimates.
(2) The projections include graduates from the Government's information technology in higher education initiative (announced in 1982) but do not take account of the engineering and technology programme announced in March 1985.
(3) Science includes biological sciences, physical sciences, mathematics, computer science, agriculture and veterinary science.

School Meals Service

Mr. Freud asked the Secretary of State for Education and Science whether he will make a statement on the implications of the Green Paper on social security for the school meals service.

Mr. Dunn: The Government's proposals on entitlement to remission of the charge for a school meal are set out in volume 1 paragraph 8.12 and volume 2 paragraph 4.51 of the Green Paper.

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science what is the average cost to pupils of school meals in primary and secondary schools; which are the cheapest local authorities and the dearest in each sector; and how much they charge.

Mr. Dunn: I refer the hon. Member to my reply to the hon. Member for Dunfermline, East (Mr. Brown) on 17 May at column *244*.

Teachers (Qualifications)

Mr. Freud asked the Secretary of State for Education and Science how many and what percentage of teachers working with integrated classes hold a specialist qualification; how many and what percentage have received in-service training since the implementation of the Education Act 1981; and whether he will make a statement.

Mr. Dunn: Some of the information requested by the hon. Member is not collected centrally. The remainder is contained in my answer of 3 April 1985 to the hon. Member at columns *617-18*.

Mr. Freud asked the Secretary of State for Education and Science how many teachers teaching in special schools had a specialist qualification at the latest date for which figures are available; and what proportion of the special school teaching force this represents.

Mr. Dunn: In England, in January 1984, there were 5,339 full-time and part-time teachers in maintained and non-maintained special schools holding one or more specialist qualifications; this represents around a third of the special school qualified teaching force.

School Rolls

Mr. Freud asked the Secretary of State for Education and Science whether he will list in the *Official Report* the percentage by which school rolls have fallen in *(a)* mainstream schools, *(b)* all special schools and *(c)* special schools for ESN(M) and ESN(S) pupils for those of compulsory school age in the period (i) 1972 to 1984 and (ii) 1981 to 1984.

Mr. Dunn: The number of pupils of compulsory school age in maintained primary and secondary schools in England has fallen by 10 per cent. both between 1972 and 1984 and between 1981 and 1984. In maintained and non-maintained special schools, the number of pupils of compulsory school age has fallen by 5 per cent. between 1972 and 1984 and by 9 per cent. between 1981 and 1984. Equivalent information for special schools for ESN(M) and ESN(S) pupils is not available.

Children (Special Educational Needs)

Mr. Freud asked the Secretary of State for Education and Science whether he will list in the *Official Report* the number and proportion of children with special needs who *(a)* are awaiting the completion of their statement and *(b)* have had a statement made as to their needs; and what information he has as to the time taken between identification of a child with special educational needs and the completion of the statement process.

Mr. Dunn: No information is collected centrally on the number of children with special needs who are awaiting the completion of their statements or on the average duration of the waiting period. There were 166,000 children in maintained primary and secondary schools and maintained and non-maintained special schools in England in 1984 with statements of special education needs.

Mr. Freud asked the Secretary of State for Education and Science what information he has as to *(a)* the number and proportion of children identified as having special educational needs currently being educated in (i) special and (ii) maintained schools and *(b)* the variation in these figures between local education authorities.

Mr. Dunn: The number and proportion of children with statements of special educational needs being educated in maintained primary, middle and secondary schools and maintained and non-maintained special schools in each LEA in England in January 1984, the latest date for which information is available, are as follows:

LEA	*Number of pupils with statements in Special schools*	*Number of pupils with statements in Primary Middle and Secondary Schools*	*All pupils with statements*	*Percentage of pupils with statements in Special schools*	*Percentage of pupils with statements in Maintained schools*
Barking	297	26	323	92·0	8·0
Barnet	445	67	512	86·9	13·1
Bexley	377	74	451	83·6	16·4
Brent	545	177	722	75·5	24·5

University Grants

Mr. Freud asked the Secretary of State for Education and Science what representations he has received concerning the staffing implications for the University Grants Committee of its selective policy in the allocation of university grants.

Sir Keith Joseph: I have received no specific representations on this point. The University Grants Committee in discussing with the Department its staffing requirements in relation to its future programme of work. As I announced to the House on 21 May, at column 861, the Government have accepted a recommendation of the Jarratt report to review the role, structure and staffing of the UGC.

Teacher Training

Miss Fookes asked the Secretary of State for Education and Science how much importance he attaches to church foundations in the provision of initial teacher training.

Mr. Dunn: My right hon. Friend recognises the important contribution which denominational colleges have made to the provision of initial teacher training. As he has previously made clear, however, he cannot commit himself to the maintenance of a particular level of training places for such colleges, any more than he can for other teacher training institutions.

Miss Fookes asked the Secretary of State for Education and Science if he will take action to ensure that initial teacher education continues to be provided in Plymouth, in view of the recommendations made by the secretariat of the national advisory board for public sector higher education.

Mr. Dunn: Proposals for the distribution of intakes to initial teacher training between public sector institutions in England are being considered by the national advisory body for public sector higher education. I cannot anticipate what advice the NAB will submit but I can assure my hon. Friend that in reaching decisions my right hon. Friend will give careful consideration to the representations that have been made to him concerning the future location of initial teacher training.

Dental Hospitals and Schools

Lord James Douglas-Hamilton asked the Secretary of State for Education and Science what was the intake at all dental hospitals and schools within England and Wales during each of the last five years to date, giving figures for each year for each institution to date.

Sir Keith Joseph: The total intake to pre-clinical dental courses in England and Wales during each of the last five years was as follows:

Intake of full-time home and overseas students

During year	Numbers
1979-80	781
1980-81	792
1981-82	791
1982-83	798
1983-84	768
1984-85	*741

* Provisional.

Figures for intakes to individual institutions are not readily available.

Lord James Douglas-Hamilton asked the Secretary of State for Education and Science what is the estimated cost of redeveloping dental hospitals and schools in England and Wales, giving the figures in each case.

Sir Keith Joseph: I am not aware of any current redevelopment plans for dental schools in England and Wales. Dental hospitals are a matter for my right hon. Friend the Secretary of State for Social Services.

Public Expenditure Survey

Mr. Patrick Thompson asked the Secretary of State for Education and Science if he has yet received the advice of the advisory board for the research councils on the public expenditure survey for 1985; and if he will make a statement.

Sir Keith Joseph: Yes. I received the board's advice in April and am publishing it today. Copies are available in the Library. This advice will be considered carefully in discussions on the 1985 public expenditure survey, and I shall inform the board of my conclusions in due course.

Departmental Cash Limits

Mr. Powley asked the Secretary of State for Education and Science what will be the revised 1985-86 cash limits in his Department's vote to cover the increased provision of additional places in engineering and technology in higher education.

Sir Keith Joseph: As I announced on 19 March at columns 482-84, the Government are to mount a £43 million programme over the next three years for the provision of additional places for students in higher education to study engineering and technology.

I subsequently announced on 3 April at columns 618-20 details of the institutions participating in phase 1 of the programme in 1985-86. The current estimate of cost of phases 1 and 2 in 1985-86 is £10 million, of which £3 million will be met from within the resources announced for the University Grants Committee; the remaining £7 million will be met from within the existing resources of programmes other than education. A list of the revised cash limits resulting from the changes is shown in the following table. Parliamentary approval for the changes in voted expenditure will be sought through Revised or Supplementary Estimates as appropriate.

There is no net effect on public expenditure.

£'000

Class	Vote	Accounting department	Description of expenditure	Current cash limit	Increase Decrease	Revised cash limit
X	2	Department of Education & Science	Student awards, etc.	*695,768	+195	*695,963
X	3	Department of Education & Science	Universities, etc.	1,506,144	+6,377	1,512,521
X	8	Department of Education & Science	Science and engineering research council	297,960	+428	298,388
IV	5	Department of Energy	Research and development and industrial support	290,174	−500	289,674
IV	6	Department of Trade & Industry	Scientific and technological assistance	381,483	−2,500	378,983
XV	3	Industrial Department for Scotland	Regional and general industrial support, Scotland	132,802	†1,200	131,602

* Class X vote 2 is not subject to a cash limit.

† Of this reduction £1 million relates to the engineering and technology programme; the remaining £200,000 relates to expected increased receipts from the ERDF in respect of grants to enterprise trusts.

In addition to items listed, a reduction of £500,000 was made by the Welsh Office in the Main Estimate for class XVI, vote 1 (the Welsh block vote covering roads, transport, housing, education etc.) in respect of the transfer of funds for this programme; no revision of the cash limit is therefore required.

There is also a contribution from the Department of Employment (£2,500,000) from non-voted expenditure. It represents part of a public expenditure saving from deferring implementation of an increase in maternity pay from 90 per cent. to 100 per cent. of salary. There will therefore be no change to a DE vote and no revised estimate.

PRIME MINISTER

GCHQ Cheltenham

Q90. **Mr. Dalyell** asked the Prime Minister what proportion of the work of Government communications headquarters is subcontracted to private companies or ex-employees.

The Prime Minister: It is not our practice to give details of the operations of intelligence and security agencies.

Council House Sales

Q117. **Mr. Heddle** asked the Prime Minister what is the number of council houses purchased under the right-to-buy legislation since the enactment of the Housing Act 1980.

The Prime Minister: By the end of 1984, 527,485 homes had been bought under the right-to-buy legislation by tenants of local authorities and new towns in Great Britain. This figure excludes other homes which have been bought under voluntary sale schemes. If those are included, the number rises to about 820,000.

Engagements

Mr. Parry asked the Prime Minister if she will list her official engagements for Thursday 13 June.

Dr. Mawhinney asked the Prime Minister if she will list her official engagements for Thursday 13 June.

Mr. Adley asked the Prime Minister if she will list her official engagements for Thursday 13 June.

Mr. Peter Bruinvels asked the Prime Minister if she will list her official engagements for Thursday 13 June.

The Prime Minister: This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in this House I shall be having further meetings later today. This evening I shall be attending a banquet given by President de la Madrid of Mexico.

Pay Review Bodies (Payments to Members)

Mr. Dobson asked the Prime Minister what fees, honoraria or expenses are paid to each or any member of the doctors and dentists, nurses, midwives, health visitors and professions allied to medicine and armed forces pay review bodies.

The Prime Minister: No payments are made to any of the members of these review bodies other than reimbursement for travel and subsistence expenditure which they may claim under normal public service regulations.

Mr. Idris Pearce

Mr. Dobson asked the Prime Minister whether the appointment of Mr. Idris Pearce to the National Health Service management board is within the rules of the Civil Service Commissioners.

The Prime Minister: Yes. Mr. Pearce's appointment as a part-time adviser to the management board comes under article 1(2)(*d*) of the Civil Service Order in Council 1982.

EC (Budgetary Controls)

Mr. Teddy Taylor asked the Prime Minister if the strict budgetary controls agreed at the Fontainebleau Council were designed to apply to the Common Market Commission; and if she will make a statement.

The Prime Minister: The conclusions on budget discipline adopted by the Council on 4 December are binding on the Council. The Commission last year specifically endorsed those parts of the budget discipline text that apply to it.

ENVIRONMENT

Norman Shaw South (Taps)

Mr. Corbett asked the Secretary of State for the Environment whether he will arrange for a drinking water tap to be provided in the toilet in the corridor leading to office GO1 in Norman Shaw South building.

Sir George Young: Yes, a tap will be installed in the corridor outside the toilet during the coming summer recess.

Mr. Corbett asked the Secretary of State for the Environment whether he will arrange for the temperature of the water from the hot taps in toilets in Norman Shaw South to be substantially reduced.

Sir George Young: The thermostat which controls the temperature of the hot water is set at 60 C. This ensures that the temperature of the water at the furthest tap does not fall below 55C, which is the highest temperature at which legionella bacteria can breed. I am not prepared to authorise a temperature reduction which could create a health hazard.

Board and Lodging Payments

Mr. Knox asked the Secretary of State for the Environment what assessment he has made of the implications of the new regulations on board and lodging accommodation payments for the rights of supplementary benefit claimants living temporarily in such accommodation to register on the waiting lists for local authority housing; and whether he has considered issuing a circular on the subject to housing authorities.

Sir George Young: It is too early to say what effect, if any, the new regulations on board and lodgings will have on persons registering on the waiting lists for local authority housing. My right hon. Friend, the Secretary of State, is considering whether further steps are needed to encourage local authorities to concentrate their provision of houses on those in greatest need and in this context the effects of the regulations will be carefully monitored.

Fire (Leyton)

Mr. Cohen asked the Secretary of State for the Environment if he plans any investigations of the implications of the fire in Clifford Hicks Tower, Oliver Close, Leyton, on 24 May for the structural integrity of high rise tower blocks; and if he will make a statement.

Mr. Gow: The Building Research Establishment (BRE) is carrying out a programme of investigations of buildings constructed using large panel systems, including the Wates system used at Clifford Hicks Tower. The programme includes investigation of the stability of such buildings under fire loads. The BRE has consulted the fire officers who attended the fire at Clifford Hicks Tower on 24 May. I am pleased to say that no-one was injured. The fire did not cause any severe heating of the concrete panels and the BRE sees no advantage in investigation of this particular incident.

North-West

Mr. Jim Callaghan asked the Secretary of State for the Environment what steps his Department is taking to reduce the existence of large areas of industrial dereliction in the north-west.

Mr. Macfarlane: My Department is funding through derelict land grant (which is payable at the rate of 100 per cent. to local authorities in most of the north-west) a large number of reclamation schemes designed both to return derelict land to beneficial use and to improve the general environment. In 1985-86, £25·1 million has been allocated for expenditure by local authorities in the north-west. In addition, grants will be made available to the private sector for land reclamation schemes.

Between 1974 and 1982 over 4,200 hectares of derelict land were restored in the north-west, more than in any other region of England, though the task remains a large one.

Statutory Blight Provisions

Sir Geoffrey Johnson Smith asked the Secretary of State for the Environment if he will publish a report analysing the reasons for and against the bringing of oil and gas operations, appraisal and production, under the statutory blight provisions and the payment of compensation for off-site depreciation in value.

Mr. Macfarlane: As my hon. Friend has now written to me on this subject, I will write to him in answer to the detailed points he raises as soon as possible.

Local Government Reform

Mr. Tony Banks asked the Secretary of State for the Environment (1) which individual members of the Greater London concil and metropolitan county councils have accepted membership of preparatory committees of successor authorities;

(2) which individual members of the Greater London council have been approached with a view to becoming members of preparatory committees of successor authorities.

Mr. Waldegrave: I do not know.

Mr. Tony Banks asked the Secretary of State for the Environment if he intends to maintain a party political balance on the preparatory committees of successor authorities.

Mr. Waldegrave: This will be a matter for the authorities concerned to decide.

Mr. Tony Banks asked the Secretary of State for the Environment what control he will exercise over the expenses of preparatory committees of successor authorities.

Mr. Waldegrave: None.

Mr. Tony Banks asked the Secretary of State for the Environment (1) if he will publish details in the *Official Report* of the members of shadow preparatory committees of successor authorities;

(2) if he will list the shadow preparatory committees of successor authorities already set up under clause 93 of the Local Government Bill.

Mr. Waldegrave: No.

Mr. Tony Banks asked the Secretary of State for the Environment (1) what proportion of costs associated with the abolition of the Greater London council will fall directly on London ratepayers; and what proportion will fall on national taxpayers;

(2) what are the transitional costs and savings which he expects will be incurred over the first and subsequent five years after the proposed abolition of the Greater London council in respect of the rearrangement of the computer systems of successor authorities;

(3) what are the transitional costs and savings which he expects will be incurred over the first and subsequent five years after the proposed abolition of the Greater London council in respect of transitional administrative arrangements.

Mr. Waldegrave: I have nothing to add to the estimates in the answer my right hon. Friend gave to my hon. Friend the Member for Surbiton (Mr. Tracey) on 30 November 1984 at column *611*.

Mr. Tony Banks asked the Secretary of State for the Environment which individual authorities have sought from his Department information secured under section 5 of the Local Government (Interim Provisions) Act 1984.

Mr. Waldegrave: My Department forwards to each London borough council and metropolitan district council any information relevant to them which the Secretary of State obtains under section 5 of the Local Government (Interim Provisions) Act 1984.

Mr. Tony Banks asked the Secretary of State for the Environment when he expects to announce further names of shadow chairmen of the residuary bodies.

Mr. Kenneth Baker: Shortly.

Local Government (Grant Penalties)

Mr. Tony Banks asked the Secretary of State for the Environment if he proposes to disregard transitional costs incurred by London authorities for the purpose of assessing grant penalties in 1985-86.

Mr. Waldegrave: My right hon. Friend is considering the representations to that effect which he has received.

Hazardous Waste

Mr. Tony Banks asked the Secretary of State for the Environment what response he has had from the Health and Safety Executive regarding the first report of the Hazardous Waste Inspectorate.

Mr. Waldegrave: My Department received some initial comments from the Health and Safety Executive prior to the publication of the Hazardous Waste Inspectorate's report.

Mr. Tony Banks asked the Secretary of State for the Environment if the Health and Safety Executive and its inspectorates will be present at the meeting planned between his Department and local authority associations regarding the disposal of hazardous waste.

Mr. Waldegrave: Government representation at the meeting we propose to hold with the local authority associations has not yet been decided.

Housing Corporation (Corporate Plan)

Mr. Thurnham asked the Secretary of State for the Environment if he will make a statement about the Housing Corporation's corporate plan.

Mr. Gow: The Housing Corporation's first corporate plan for England and Wales, prepared as part of the Government's financial management initiative, was published on Tuesday 11 June.

The plan reviews the achievements of the corporation's programme of investment in housing association projects, sets out its objectives and proposes an investment strategy for its future programme. It also outlines the corporation's administrative responsibilities and operating costs, and lists its corporate targets. Of the options for the level of public and private investment by the corporation, the board's preferred option is for a substantial increase over the next four years, for example from gross expenditure in England of £685 million in the present year to £1,144 million in 1989/90. The plan must be considered against the background of the continued need for restraint on public expenditure but my right hon. Friends and I have taken note of the information set out in the plan, which will be taken into account in the forthcoming public expenditure survey.

The Government aim to direct the resources available for housing where they are most needed. We pay tribute to the important contribution of the voluntary housing movement particularly in meeting the needs of the elderly, handicapped and others, such as single parent families, who face special difficulties, and to its role in developing innovative schemes for low-cost home-ownership. The publication of this corporate plan is an opportunity to pay tribute to the corporation and to the voluntary housing movement in England and Wales for their success and resourcefulness.

Housing Defects Act 1984

Sir David Price asked the Secretary of State for the Environment when the booklet explaining the assistance provided by the Housing Defects Act 1984 will be published.

Mr. Gow: A booklet, which gives details of assistance provided by the Housing Defects Act for private owners

of certain types of prefabricated reinforced concrete houses and flats designated under the Act is being published today. The Department is writing today to local authorities in England sending copies of the booklet and asking them to forward copies to all private owners of homes of the designated types in their area. I understand that the Welsh Office is taking similar action in Wales. A copy of the booklet has been placed in the Library.

Council House Sales

Mr. Gerald Bowden asked the Secretary of State for the Environment what action he proposes to take concerning delays being experienced by tenants in Southwark in being sent draft legal documents in connection with the purchase of their council houses.

Mr. Gow: My Department has taken up with the London borough of Southwark complaints made by right-to-buy purchasers, in particular those that result from the council's policy of referring all prospective sales to members for approval before legal documents are dispatched. This can lead to unnecessary delays of over three months. Southwark council's attention has been drawn to the Secretary of State's powers and responsibilities under section 23 of the Housing Act 1980 and warned of the possibility of intervention should its procedures continue to cause unnecessary delay. My Department is monitoring the position very closely.

Outturn Expenditure

Mr. John Fraser asked the Secretary of State for the Environment if he will list in the *Official Report* the outturn amount of expenditure for 1983-84 and 1984-85 in each of the inner city and urban programme areas of inner city programme expenditure and distinguishing in each case between capital and revenue and voluntary and statutory sectors.

Mr. Kenneth Baker [*pursuant to his reply*, 10 June 1985, c. *358*]: Outturn information by authority is not yet available for 1984-85. Outturn figures do not distinguish between spending on statutory, as opposed to voluntary sector, projects. The latest outturns on which grant may be paid for partnership or programme expenditure in 1983-84 are as follows (all £ million to one decimal place):

Partnerships	*Capital*	*Revenue*
Birmingham	16·2	8·0
Hackney	8·2	4·3
Islington	5·8	4·1
Lambeth	4·8	6·1
Liverpool	14·6	10·4
Manchester/Salford	16·2	7·3
Newcastle/Gateshead	15·8	5·3
Docklands	3·2	1·6
Programmes		
Blackburn	1·5	0·1
Bolton	3·5	0·9
Bradford	3·2	2·7
Brent	0·9	0·5
Coventry	1·4	0·3
Hammersmith and Fulham	2·9	2·7
Kingston upon Hull	4·5	0·8
Knowsley	0·8	0·2
Leeds	3·2	1·4
Leicester	4·2	2·3
Middlesbrough	4·4	1·2

Wolverhampton	4·5	1·3

AGRICULTURE, FISHERIES AND FOOD

Veterinary Investigation Services

Mr. Steel asked the Minister of Agriculture, Fisheries and Food if he will make a statement concerning the main aspects of the administration of the veterinary investigation services in England and Wales.

Mr. Jopling: We have accepted in general terms the principal recommendations of two major reviews bearing on the administration and other features of the veterinary investigation service as stated previously in my right hon. Friend's reply to my hon. Friend the Member for Torridge and Devon, West (Sir P. Mills) on 13 November 1984 on Professor Bell's report of a study of ADAS and in my reply to my hon. Friend the Member for Tiverton (Mr. Maxwell-Hyslop) on 15 April 1985 on an efficiency study of the veterinary investigation service. Copies of these reports are in the Library of the House.

European Community (Food Exports)

Mr. Teddy Taylor asked the Minister of Agriculture, Fisheries and Food if he has now received details of the amount of food and wine sent from the European Economic Community to the Soviet Union and Eastern Europe, respectively, in 1984; and if he will publish details of such exports.

Mr. MacGregor: The information requested is contained in the following table.

European Community Exports of the Main Agricultural Commodities in 1984

	To the Soviet Union	*To Eastern Europe‡ (excluding Soviet Union)*
	000 tonnes	*000 tonnes*
Wheat	4,937	1,631
Barley	70	65
Wheat flour	187	*
Rice	*	8
Malt	79	*

Grain Stores and Silos

Mr. Lyell asked the Minister of Agriculture, Fisheries and Food what representations he has received about the effect on competition in the grain trade of the grants made to farmers' co-operatives for the construction of grain stores and silos; and if he will make a statement.

Mr. Jopling: Representatives of private merchanting interests have from time to time expressed the view that grants to cereal co-operatives cause unfair competition and are unnecessary because they are able to provide all the facilities that are required at no public cost.

I believe that grant-aid to cereal co-operatives has encouraged farmers to replace outdated on-farm storage with modern facilities and given them access to more sophisticated drying methods. Nevertheless, I am very aware of the strong views held by private merchants and understand them. Grants to cereal co-operatives have been reduced by two thirds in the last two years and 90 per cent. of the cost of facilities now has to be found by a co-operative's members. Where merchanting groups successfully apply for grant under the EC marketing and processing regulation, 355/77, the percentage of both United Kingdom and EC grant will now be similar to that awarded to co-operatives. Furthermore, a number of co-operatives have employed merchants as marketing agents and the costs incurred by the co-operatives can be grant-aided in certain circumstances. I hope that merchants will recognise that the position is now more balanced than before.

Animal Welfare

Mr. Nicholls asked the Minister of Agriculture, Fisheries and Food when he expects to receive recommendations for new regulations based on welfare codes from the Farm Animal Welfare Council; and if he will make a statement.

Mrs. Fenner: I understand that the council has consulted many interested organisations about its proposals for new legislation and is now considering the responses. I am unable to say when the council will be ready to put its recommendations to Agriculture Ministers, but we await them with interest.

Council of Agriculture Ministers

Sir Peter Mills asked the Minister of Agriculture, Fisheries and Food what was the outcome of the Council of Agriculture Ministers meeting held in Luxembourg on 11 and 12 June; and if he will make a statement.

Mr. Jopling: I refer my hon. Friend to the statement I made earlier today in the House.

EMPLOYMENT

Skillcentre, Middlesbrough

Mr. Bell asked the Secretary of State for Employment what was the underutilised capacity at the Middlesbrough skillcentre in 1983-84 and 1984-85; and what was the projected underutilised capacity for 1986-87.

Mr. Peter Morrison: In 1983-84 Middlesbrough skillcentre had a capacity of 190 training places, 180 of which were purchased by the training division of the Manpower Services Commission. In 1984-85, after disposing of surplus property, capacity at the centre was 150 places, of which training division purchased 118. In 1985-86 training division will purchase 54 places of the centre's 150-place capacity.

Mr. Bell asked the Secretary of State for Employment (1) what was the trading income from the Middlesbrough skillcentre in 1983-84 and 1984-85; and what was the projected trading income for 1986-87;

(2) what were the operating costs of the Middlesbrough skillcentre in 1983-84 and 1984-85; and what were the projected operating costs for 1986-87.

Mr. Peter Morrison: No financial information relating to individual skillcentres is available for 1983-84 prior to the establishment of the skillcentre training agency as a trading account. The trading income and operating costs for Middlesbrough skillcentre in 1984-85, excluding any contributions towards regional and head office costs, are £793,000 and £843,000 respectively. In 1985-86 it is forecast that the centres trading income will be £403,000 and its operating costs £626,000. Detailed forecasts about individual skillcentres for 1986-87 will not be prepared until nearer the start of the year.

Open Tech (Exhibition)

Mr. Baldry asked the Secretary of State for Employment if he will arrange for an exhibition relating to Open Tech to be displayed in the Upper Waiting Hall.

Mr. Peter Morrison: I understand that, under procedures agreed by the Services Committee, arrangements have been made with the authorities of the House for the exhibition to be held in the Upper Waiting Hall from 24 to 28 June.

Community and Industry Scheme

Mr. Lawler asked the Secretary of State for Employment if he will provide a breakdown of the occupancy rates on the community and industry scheme within Yorkshire and Humberside; and if he will give each area's allocation.

Mr. Peter Morrison: The latest statistics for the community industry scheme in Yorkshire and Humberside are set out in the table:

Community Industry Area	*Occupancy**	*Allocation*
Barnsley	95	110
Bradford	77	75
Doncaster	145	145
Leeds	132	135
North Humberside	146	145
Rotherham	145	145

Community Industry Area	Occupancy*	Allocation
Sheffield	75	75
South Humberside	108	105
Wakefield	110	110

* At 11 April 1985.

Areas are allowed to fill places above their allocation of places to ensure the 7,000 national filled place target is achieved over the year.

National Carriers, Sheffield (Fire)

Mr. Caborn asked the Secretary of State for Employment if, in relation to the 14 December fire at the National Carriers warehouse in Sheffield, he will give the grade of the Health and Safety Executive inspector who made the first visit to the site following the fire; whether any firemen were present on site at the time of the first visit; whether any advice was given by the Health and Safety Executive inspector making the visit on the wearing by the firemen of breathing apparatus; and if he will make a statement.

Mr. Peter Bottomley: The first visit was made by Her Majesty's principal inspector of factories during the fire, when firemen were still active on site. No advice was given by the inspector on the wearing of breathing apparatus by firemen.

We await the Health and Safety Executive's report.

Mr. Caborn asked the Secretary of State for Employment, in relation to the 14 December fire at the National Carriers warehouse in Sheffield, if a log is kept detailing the day-by-day involvement of Health and Safety Executive inspectors investigating the fire; if he will give the date of the first witness statement taken from a fireman by the Health and Safety Executive, the number of Health and Safety Executive inspectors who have worked paid overtime taking witness statements and interviewing firemen and the date on which paid overtime began to be paid and the amount of overtime which has been worked to date.

Mr. Peter Bottomley: A log is not kept detailing day-by-day involvement of Health and Safety Executive inspectors investigating the fire. The first witness statement taken from a fireman by the Health and Safety Executive is dated 26 April 1985.

The amount of overtime worked by officials in this investigation is a matter for the Health and Safety Executive.

Labour Statistics

Mr. Freud asked the Secretary of State for Employment what information he has about the extent to which temporary summer employment was *(a)* available and *(b)* taken up in 1984.

Mr. Alan Clark: The information is not available.

Mr. Tony Banks asked the Secretary of State for Employment how many young people completing youth training schemes in the London borough of Newham *(a)* have found employment within the field they were trained; *(b)* have found employment outside the field they were trained and *(c)* have not been employed since leaving the scheme.

Mr. Peter Morrison: Information is not available in the precise form requested. However, information based on a 15 per cent. sample of young people in the Manpower Services Commission's London north-east area who left the youth training scheme between July and September 1984 shows that, at the time of the survey, 38 per cent. of those who responded were in employment related to the training undertaken on the scheme, 30 per cent. were in jobs not directly related to that training and 20 per cent. were unemployed. The remainder were on a full-time course at a college or training centre (4 per cent.), on another youth training scheme (3 per cent.), back at school (1 per cent.) or doing something else (4 per cent.)

Mr. Tony Banks asked the Secretary of State for Employment how many pople have been unemployed for *(a)* between six months and one year, *(b)* between one year and two years and *(c)* over two years in the London borough of Newham.

Mr. Alan Clark: The following information is in the library. On 11 April 1985, the latest date for which an analysis of unemployment by duration is available, in the East Ham, Plaistow and Stratford jobcentre areas, which correspond closely to the London borough of Newham, 4,005 claimants had been unemployed for between six months and one year, 3,448 for between one year and two years and 4,868 for over two years.

Mr. Tony Banks asked the Secretary of State for Employment what is the number of people aged 18 years or under 18 years who have never had a job since leaving school; and what percentage of young people aged 18 years or under this represents.

Mr. Alan Clark: On 9 May 1985 there were 163,787 unemployed claimants aged 18 or under in Great Britain who had never had a job since leaving school, which represents about 6 per cent. of the estimated population in this age group.

Mr. Tony Banks asked the Secretary of State for Employment what is the number of school leavers aged 18 or under in the London borough of Newham; and what percentage of these have never had a job since leaving school.

Mr. Clark: On 9 May 1985 there were 878 unemployed claimants aged 18 or under in the London borough of Newham who had never had a job since leaving school. An estimate of the corresponding population of this age group who have left school in the relevant academic years is not available.

Noise Levels

Mrs. Beckett asked the Secretary of State for Employment why the Council directive arising from the proposal of the Commission of the European Communities on the subjeect of noise at work, calling for the maximum exposure of 85 dB(A) Leq has not yet come into force; and if he will make a statment.

Mr. Peter Bottomley: The Commission proposal to which the hon. Member refers was formally amended by the Commission itself in July 1984 to take account of the opinion delivered by the European Parliament. In its amended form, the proposal provides for a maximum exposure limit of 90 rather than 85 dB(A) Leq. Discussions based on this amended proposal have

continued between officials of the member states, and the outcome of those discussions is being considered at today's Labour and Social Affairs Council in Luxembourg.

Bank Holidays

Mr. Henderson asked the Secretary of State for Employment if he will give the dates of the Christmas and new year bank holidays in the years 1987 to 1989.

Mr. Peter Bottomley: In the years 1987-89 certain bank holidays in the Christmas period fall on Saturdays and Sundays. Some of these are automatically transferred to weekdays under the Banking and Financial Dealings Act 1971. In the other cases it is our intention to declare substitute holidays on weekdays subject to the necessary orders being made by royal proclamation. As a result, the dates of the Christmas and new year bank holidays in 1987-89 will be as set out in the table.

We have considered carefully whether it would be helpful to have all of these substitute holidays falling in the working week between Christmas and the new year, but the banks, the only organisations bound by the arrangements we make, require three working days to meet the needs of their customers during that very busy period.

Many people are uncertain about the status of bank holidays. It is important that they are aware that the majority of employers are free to make their own arrangements (unless they are bound by the Banking and Financial Dealings Act 1971 or by a wages council order or agricultural wages board order). I would encourage employers and employees to negotiate other arrangements if they find the official dates inconvenient.

Christmas and new year bank holidays 1987-89

In England, Wales and Northern Ireland	*In Scotland*

	Tuesday 26 December*

* To be declared by royal proclamation.

Wages Councils

Mr. Dixon asked the Secretary of State for Employment if he has received any further representations from Trades Union Congress affiliated unions regarding the future of wages councils.

Mr. Peter Bottomley [*pursuant to his reply*, 11 June 1985, c. *407*]: I wish to correct my previous reply, which should have read as follows:

I have to date received a total of 693 responses to our consultative paper on wages councils, including a number from trade unions affiliated to the Trades Union Congress.

ENERGY

Alternative Power Sources

Mr. Pawsey asked the Secretary of State for Energy what organisations involved in the development of alternative power sources in the United Kingdom receive funding directly or indirectly from his Department; and how much each has received since 1979.

Mr. David Hunt: Support has been given to the private sector, research institutes, universities and the nationalised industries for work under my Department's programme on the renewable sources of energy. The total number of contracts in place and incurring expenditure between 1979 and the present time is 426.

Mr. Pawsey asked the Secretary of State for Energy what is his assessment as to which alternative source of energy has the greatest potential for development in the United Kingdom.

Mr. David Hunt: It is not possible to pick the single alternative source with the greatest potential for development at the present stage of development. Some technologies, such as passive solar and waste combustion, have been shown to have considerable economic potential now, but others which at present we consider to be in the promising but uncertain category, may eventually show greater potential.

Mr. Pawsey asked the Secretary of State for Energy what percentage of all United Kingdom power requirements is forecast to be produced from alternative power sources by 1999 and 2009; and if he will make a statement.

Mr. David Hunt: Projections of the contribution that aternative energies might make to United Kingdom power requirements by the year 2010 are given in the Department of Energy's proof of evidence for the Sizewell B public inquiry as up to 8 million tonnes of coal equivalent per annum.

Mr. Allan Roberts asked the Secretary of State for Energy if he will provide a breakdown of expenditure on alternative energy resources; and how this compares with figures for the last 10 years.

Mr. David Hunt: Total expenditure by my Department on renewable energy in 1985-86 is forecast to be £14 million. Actual expenditure from 1975-76 to 1984-85 was as follows:

£ million

	1975-76	*1976-77*	*1977-78*	*1978-79*	*1979-80*	*1980-81*	*1981-82*	*1982-83*	*1983-84*	*1984-85 Estimate*
Wind				0·3	0·6	0·8	0·9	2·5	2·5	4·8
Wave				1·8	3·0	3·3	4·4	3·1	1·0	0·4
Geothermal aquifers				0·2	1·3	1·7	2·6	1·5	1·8	1·1
Geothermal hot dry rocks	}0·5	}0·3	}1·3	—	—	0·6	5·6	3·0	2·9	4·6
Solar				0·2	1·2	0·9	0·7	1·4	0·9	0·5

ETSU services		0·7	1·2	1·1	1·4	2·2	2·3	2·0	1·9	2·1
TOTAL	*·5	*1·0	*2·5	3·6	8·2	11·2	17·3	14·2	11·3	14·0

* Includes energy conservation Research and Development.

No information available for 1974-75.

Wave Power

Mr. Pawsey asked the Secretary of State for Energy (1) what funding is earmarked in 1985-86 for the development of wave power; and how this compares with each year since 1979;

(2) how much has been spent on developing alternative power sources from *(a)* waves and *(b)* geothermal energy since 1979.

Mr. David Hunt: Expenditure by my Department on wave and geothermal energy since 1979-80 was as follows:

	Wave £ million	*Geothermal £ million*
1979-80	3·0	1·3
1980-81	3·3	2·4
1981-82	4·4	8·1
1982-83	3·1	4·5
1983-84	1·0	4·7
*1984-85	0·4	5·7

* Estimate.

My Department's funding on wave energy research in 1985-86 is expected to be approximately £300,000.

Mr. Pawsey asked the Secretary of State for Energy what information he has as to progress made in Norway with a wave power station and its projected operating costs; and if he will make a statement.

Mr. David Hunt: My Department is in touch with the current Norwegian wave energy work which is based on the installation in 1986 of two different devices, each with a capacity of approximately 350kW.

The Norwegian manufacturers' present estimates for follow-up stations at cliff sites similar to those being used in Norway lie in the range 3-4p/kWh.

Mr. Pawsey asked the Secretary of State for Energy what is the best present estimated cost of a kilowatt-hour of electricity produced by wave power; and how this compares with the best performance of coal-fired power stations.

Mr. David Hunt: Consultants' assessments made for my Department conclude that there is a low probability of wave energy for large-scale power generation in the United Kingdom achieving an energy cost below 8p/kWh.

According to the latest CEGB update of its booklet "Analysis of Generation Costs," the cost of generation from a future coal fired station is just over 4p/kWh.

Mr. Pawsey asked the Secretary of State for Energy when it is anticipated that a wave power prototype will be in place.

Mr. David Hunt: Wave energy is not sufficiently attractive in the United Kingdom at present to justify the funding of a wave energy prototype. However, the Department remains receptive to new ideas which could lead to the major cost reductions required.

Sizewell B

Mr. Pawsey asked the Secretary of State for Energy what is the latest estimate of the cost of the proposed Sizewell B power station.

Mr. Goodlad: The CEGB in its closing statement to the Sizewell inquiry, confirmed its latest estimate to be £1,147 million at March 1982 prices.

National Energy Managers' Exhibition

Mr. Peter Bruinvels asked the Secretary of State for Energy why there is no lighting content in the forthcoming national energy managers' exhibition at the national exhibition centre at Birmingham in November which is being arranged in conjunction with his Department.

Mr. David Hunt: On the contrary, several companies specialising in lighting and lighting control systems have reserved stands at the national energy management exhibition in November.

Nuclear Plants (Safeguards)

Mr. Corbett asked the Secretary of State for Energy whether he will list those member countries of the European collaborative programme on fast reactors which refuse access to civil nuclear plants to inspectors from the International Atomic Energy Agency or do not fully comply with Euratom safeguards.

Mr. Goodlad: The nuclear safeguards arrangements covering the European fast breeder collaborative programme were set out in my reply of 1 April 1985 to the hon. Member for Meirionnydd Nant Conwy (Mr. Thomas).

The situation regarding access to United Kingdom facilities by safeguards inspectors was set out in my reply of 3 December 1984 to the hon. Member for Meirionnydd Nant Conwy. I cannot speak for other countries on specific safeguards matters.

FOREIGN AND COMMONWEALTH AFFAIRS

COCOM

Mr. Faulds asked the Secretary of State for Foreign and Commonwealth Affairs how many officials of his Department are assigned to COCOM.

Mr. Rifkind: Two: the United Kingdom delegate to the Co-ordinating Committee (COCOM) and his assistant, both of whom are members of the staff of Her Majesty's ambassador at Paris. Other members of the diplomatic service based in London attend COCOM meetings in Paris as part of the United Kingdom delegation from time to time, as the need arises.

EC (Staff Redundancies)

Mr. Teddy Taylor asked the Secretary of State for Foreign and Commonwealth Affairs if he will raise at the next meeting of the Council of Ministers the decision of the Common Market Commission to offer terms of redundancy to its civil servants which amount to sums totalling £250,000 per person; and if he will make a statement.

Mr. Rifkind: Discussions of these Commission proposals are at an early stage. The United Kingdom will be working towards a fair and cost-effective scheme which will allow for the entry of Spanish and Portuguese nationals to the Commission, without any overall increase in the Commission's size.

Nuclear Weapons (Conference)

Mr. Craigen asked the Secretary of State for Foreign and Commonwealth Affairs what position Her Majesty's Government are adopting in preparation for the third review conference of the treaty on the non-proliferation of nuclear weapons with a view to reductions in nuclear weapons.

Mr. Rifkind: I refer the hon. Member to the reply given by my hon. Friend the Member for Shoreham (Mr. Luce) to the hon. Member for Meirionnyd Nant Conwy (Mr. Thomas) on 10 June, at column 312.

EC (Spain and Portugal)

Mrs. Virginia Bottomley asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a further statement about the signature of the Spanish and Portuguese treaty of accession to the European Communities.

Sir Geoffrey Howe: The treaty on the accession of Spain and Portugal to the European Communities was signed in Lisbon and Madrid on 12 June. I was the United Kingdom signatory together with our permanent representative to the European Communities.

The Government intend to introduce a Bill on Spanish and Portuguese accession at the beginning of the next parliamentary Session, which will provide the House with an opportunity to examine the treaty of accession before ratification. As soon as a certified copy of the treaty, with the lengthy Act of Accession annexed to it, is available, a copy will be placed in the Library of the House to enable hon. Members to study it. An account of the outcome in the main chapters of the negotiations has been made available meanwhile to hon. Members in the document entitled "Annex to the Statement made by the President-In-Office of the European Council to the European Parliament", which was placed in the Library of the House on 23 April.

I would also draw the attention of hon. Members to a joint Foreign and Commonwealth Office and British Overseas Trade Board booklet called "Basic Facts on Spanish Accession". It gives a summary of the relevant transitional arrangements and is designed to help British exporters to the Spanish and Portuguese markets and was

published on 12 June. Copies have been placed in the Library of the House and in the Vote Office. A companion booklet on Portuguese accession will be available on 22 June and copies will also be placed in the Library of the House.

Before leaving Madrid, I had an exchange of letters with the Spanish Foreign Minister, in which we agreed that our respective positions concerning Gibraltar had not been affected by signature of the accession treaty. I am arranging for copies of the exchange to be placed in the Library of the House.

TRANSPORT

Goods Vehicles (Licensing Appeals)

Mr. Moate asked the Secretary of State for Transport if he will take steps to provide a right of appeal against the decision of the licensing authority for those making representations under the Goods' Vehicles (Operators' Licences Qualifications and Fees) Regulations 1984 (S.I., 1984, No. 176); and if he will make a statement.

Mrs. Chalker: I have undertaken to review the working of these regulations after a year in operation. The review is to commence shortly, and if as a result of it there appears to be a need to extend the right of appeal I will consider doing so.

Mr. Moate asked the Secretary of State for Transport if he will take steps to introduce a requirement for those wishing to make representations in connection with an appeal to be heard under the Goods' Vehicles (Operators' Licences Qualifications and Fees) Regulations 1984 (S.I., 1984, No. 176) to have a right to be informed when the licensing authority is to hear the appeal; and if he will make a statement.

Mrs. Chalker: If a licensing authority decides to hold an inquiry into an application for a goods vehicle operator's licence, people who have made valid representations are informed of the date. Appeals against the decision of the licensing authority are to the transport tribunal, but representers have no right of appeal and there are no arrangements for them to be informed. In reviewing the operation of the system I will consider whether these arrangements need to be amended.

Manchester Airport (American Airlines)

Mr. Arnold asked the Secretary of State for Transport what action he intends taking on the application by American airlines to operate services to and from Manchester international airport.

Mr. Michael Spicer: The US Government, with whom any new traffic rights have to be negotiated and agreed, have now expressed an interest in securing access to Manchester airport for US airlines operating scheduled passenger services. In accordance with section 6.31 of the White Paper, "Airports Policy" (Cmnd. 9542), we are now considering with the United Kingdom interests affected, including Manchester airport, the basis on which such traffic rights should be made available to US airlines, including American Airlines, in preparation for a meeting with the US Government very soon.

Crash Barriers (A38)

Mr. Steen asked the Secretary of State for Transport (1) if, whilst reviewing the criteria for providing crash barriers on the central reservations of dual carriageways, he will as an interim measure place short stretches of crash barriers on the central reservation on black spots on the A38 between Exeter and Plymouth; and if he will make a statement;

(2) if, in view of the level of fatalities on the Plympton bypass on the A38 in the last two months, he will now provide crash barriers on the central reservation of this stretch of road; and if he will make a statement;

(3) if, in view of the fatalities on 8 June on the winding stretch of the A38 between Ivybridge and South Brent, he will now provide crash barriers on the central reservation of this stretch of road; and if he will make a statement.

Mrs. Chalker: The special assessment of the provision of safety fences on the A38 between Exeter and Plymouth has been completed. As a result of that, I have agreed to the provision of two additional lengths of safety fences, one between Plympton and Bittaford, and the other between Syon Abbey and Dean Prior. I shall write to my hon. Friend to give him full details of the lengths concerned.

PTAs (Secession)

Mr. Snape asked the Secretary of State for Transport what are the criteria on which district councils will be allowed to secede from passenger transport authorities in respect of railways; whether they will include arrangements to continue support for rail services within that district council's area; and whether he will take into account the effect on the rail network throughout the passenger transport authorities area of any such secession.

Mr. David Mitchell: As we said in our White Paper "Streamlining the Cities" (Cmnd. 9063):

"The Government will be prepared to consider proposals by individual districts to provide separate services . . . But, before any such arrangements are made, the Government will have to be satisfied about the relationship between the district and the PTA in respect of facilities such as rail services which benefit the whole metropolitan area."

"Airports Policy"

Mr. Clifford Forsythe asked the Secretary of State for Transport what efforts are being made, following the publication of Cmnd. 9542, "Airports Policy", to liberalise regulations and increase the scope for new services for Northern Ireland.

Mr. Michael Spicer: Northern Ireland has already benefited from the Government's commitment to greater competition on domestic air services. We are also actively seeking more liberal arrangements for international air services, particularly in Europe, from which it could benefit. In addition, we are already to discuss with airport authorities in Northern Ireland how we can help with their development, including the introduction of new services.

London Underground (Fire)

Mrs. Dunwoody asked the Secretary of State for Transport on what dates he received the reports by London Regional Transport and of the London fire brigade into the Oxford Circus fire of 23 November 1984.

Mr. Ridley: London Regional Transport completed a preliminary report in December 1984. The London fire brigade's report was submitted to Her Majesty's Chief Inspector of Fire Services in February 1985. Copies of these reports were received by the Railway Inspectorate in my Department in December 1984 and March 1985, respectively.

Mrs. Dunwoody asked the Secretary of State for Transport, pursuant to the answer of 10 June, if he will place copies of the reports into the Oxford Circus fire made by London Regional Transport and by the London fire brigade in the Library.

Mr. Ridley: I am arranging for a summary of the London fire brigade's report to Her Majesty's Chief Inspecting Officer of the Fire Service to be placed in the Library. The report of the LRT panel of inquiry is a preliminary working document, internal to LRT, which addresses some of the immediate operational issues. There are many additional matters arising from the fire which LRT is also considering. It will be publishing a statement on the circumstances of the fire and action being taken to prevent a recurrence. I shall see that this statement is placed in the Library when it is published.

Mrs. Dunwoody asked the Secretary of State for Transport, pursuant to the answer of 10 June, if he will make a statement on the recommendations contained in the report by the London fire brigade into the fire at Oxford Circus on 23 November 1984.

Mr. Ridley: The London fire brigade report was concerned with establishing the cause of the fire and does not include any recommendations. Action necessary to prevent a recurrence was agreed at a series of meetings between LRT and the London fire brigade. Implementation of these measures is proceeding and LRT will include a report on them in the statment that it will be publishing.

Light Dues

Mr. Viggers asked the Secretary of State for Transport if he will make a statement about the structure of light dues.

Mr. David Mitchell: In September last I invited Arthur Andersen and Co., the consultant accountants, to undertake a wide ranging review of light dues structure. I have now had its report, and copies have been placed in the Library.

The report makes a number of recommendations which, if implemented, would extend liability for dues to categories of vessels that at present are exempt and redistribute the liability within those categories that have borne it hitherto.

These recommendations will be of general concern to the marine community and I propose, therefore, to make the report available for comment to all those bodies that Arthur Andersen and Co. consulted in the course of preparing the report.

Vehicle Excise Licences

Mr. Cash asked the Secretary of State for Transport what plans he has to increase the number of sub-post offices authorised to issue vehicle excise licences.

Mr. Michael Spicer: At a meeting this week I reached agreement with the chairman of the Post Office to extend the vehicle relicensing service by an extra 500 sub-post offices over the next three years. Details of the extension will be worked out with the Post Office in conjunction with my Department, and when the particular outlets have been selected I will notify the hon. Members concerned. I believe that this new extension, taken with the 160 sub-offices added last year, will considerably improve the convenience of the relicensing service, particularly for those living in rural areas.

Other measures designed to improve the arrangements for vehicle licensing are also under consideration, including more stringent checks on MOT certificates presented with licensing applications.

SCOTLAND

Acid Rain

Mr. Ron Davies asked the Secretary of State for Scotland what plans the Forestry Commission has for a systematic survey of trees outside its plantations, to examine them for symptoms similar to those of acid rain damage in Holland, France or Germany.

Mr. John MacKay: The Forestry Commission's plantations are widely distributed throughout Great Britain and occur at a wide range of elevations. In view of the good cover thus provided, it is not intended to make a systematic survey of trees outside these areas.

Mr. Ron Davies asked the Secretary of State for Scotland if he will list those sites used in the recent Forestry Commission survey of conifers investigated for signs of acid rain damage.

Mr. John MacKay: The sites at which trees were assessed in the 1984 survey for symptoms associated with air pollution are as follows:

Alice Holt, Hampshire
Afan, West Glamorgan
Affric, Highland Region
Bowland, Lancashire
Brechfa, Dyfed
Carron Valley, Central Region
Challock, Kent
Dalton, Cumbria
Dartmoor, Devon
Dean, Gloucestershire
Fife, Fife Region
Glasfynydd, Powys
Grizedale, Cumbria
Hamsterley, Durham
Harwood, Northumberland
Hope, Derbyshire
Inshriach, Highland Region

Mr. William Macrae

Mr. McTaggart asked the Secretary of State for Scotland if he will call for a report from the chief constable of the Highland region about whether police protection was given to Mr. William Macrae of Balvicar drive, Glasgow, following his car accident near Loch Loyne on 6 April until his death at Aberdeen Royal infirmary on 7 April.

Mr. Ancram: As the hon. Member will be aware from the reply he received on 10 June 1985 from my hon. and learned Friend the Solicitor-General for Scotland, the procurator fiscal at Inverness has been conducting an investigation into the circumstances surrounding Mr. Macrae's death. A report from the Northern constabulary was submitted to the procurator fiscal as part of the investigation. The matter is therefore being considered in the normal way, and it would not be appropriate for me to comment at present. The Solicitor-General will, however, write to the hon. Member in due course.

Dental Hospitals and Schools

Lord James Douglas-Hamilton asked the Secretary of State for Scotland what was the intake at all dental hospitals and schools within Scotland during each of the past five years to date giving figures for each year for each institution to date.

Mr. John MacKay: The intake for each of the dental hospitals and schools within Scotland during the past five years is as follows:

	1980-81	*1981-82*	*1982-83*	*1983-84*	*1984-85*
Dundee	53	51	40	48	50
Edinburgh	46	51	54	56	41
Glasgow	74	74	75	75	70
Scotland	173	176	169	179	161

Lord James Douglas-Hamilton asked the Secretary of State for Scotland what is the estimated cost of redeveloping Edinburgh dental hospital and school.

Mr. John MacKay: The estimated cost depends upon the nature and scale of the redevelopment proposed. The joint working party of Edinburgh university and Lothian health board, to which I referred in my answer to the hon. Member for Edinburgh, East (Mr. Strang) on 24 May, at col. *583*, considered four redevelopment options. The total costs of these options which would fall on Edinburgh university and Lothian health board, are as follows:

Options	**Costs (£ million)*	
	Capital	*Recurrent*
New building, enhanced postgraduate facilities	7·845	0·239
New building, typical postgraduate facilities	7·286	0·231
Upgrade existing building and relocate academic accommodation	1·996	(0·009)†
Upgrade and extend existing building and relocate academic accommodation	2·925	0·027

* Costs are based on 1983-84 levels.
† Figures for recurrent expenditure represent additional net costs; the figure in brackets represents net savings.

Primary Postgraduate Certificate in Education

Mr. Wilson asked the Secretary of State for Scotland if he intends to approve the guidelines drawn up for primary postgraduate certificate in education; and if he will make a statement.

Mr. Allan Stewart: Planning is proceeding on the basis of the broad guidlines drawn up by the working party on primary teacher training in order that revised one-year postgraduate courses may be offered in the 1986-87 academic session. I hope to make a further statement when I have received the report of a working party which is currently considering corresponding matters in relation to secondary teacher training.

HOUSE OF COMMONS

Refreshment Department

Mr. Harrison asked the Lord Privy Seal why the Refreshment Department is selling water in bottles whose label includes a competition with a closing date of September 1983.

Mr. Biffen: In response to demand from many Members, the Refreshment Department in 1982-83 ordered stocks of a variety of brands of mineral water. Not all brands proved equally popular, and some stocks have only recently been exhausted. The Department will take account of the actual pattern of demand when re-ordering in future.

Mr. Harrison asked the Lord Privy Seal if he will seek to make it the policy of the Services Committee that goods supplied by the Refreshment Department should not be marked with labels advertising private medical insurance schemes.

Mr. Biffen: No. Any such policy would entail impracticable constraints on the Refreshment Department's commercial suppliers.

NORTHERN IRELAND

Higher Education

11. **Mr. Sean Hughes** asked the Secretary of State for Northern Ireland when he proposes to implement the recommendations of the Williams report dealing with higher education in Northern Ireland.

Mr. Scott: I have welcomed this report and its recommendations are now being considered by the Department of Education for Northern Ireland and other interested parties. Implementation is mainly a matter for higher education institutions on both sides of the border.

Council House Sales

12. **Mr. John Mark Taylor** asked the Secretary of State for Northern Ireland if he will make a statement on the progress of the Government's right-to-buy policy for council dwellings.

Mr. Chris Patten: I am glad to say that the Northern Ireland Housing Executive operates a successful voluntary sales scheme which has enabled 26,000 dwellings to be

sold to sitting tenants. So far, no tenants have invoked the provisions of the right-to-buy legislation in Northern Ireland.

Town Gas

13. **Mr. Bell** asked the Secretary of State for Northern Ireland how many jobs will be lost as a result of the decision to close the town gas industries in Northern Ireland.

Dr. Boyson: Approximately 1,000 over the closure period. But this will be offset by higher employment in other fuels, particularly coal and liquid petroleum gas, which are heavily labour-intensive in distribution.

Explosives

14. **Mr. Molyneaux** asked the Secretary of State for Northern Ireland what measures he intends to take to halt the movement of explosives into Northern Ireland from the Irish Republic.

Mr. Hurd: The security forces use a variety of measures in border areas, which, among other objectives, are directed to preventing the movement of explosives and munitions. We keep these measures under regular review. It would not be sensible to announce what detailed security measures are or will be taken.

Security

15. **Mr. Yeo** asked the Secretary of State for Northern Ireland if he will make a statement on the security position in Northern Ireland.

16. **Rev. William McCrea** asked the Secretary of State for Northern Ireland if he will make a statement on the latest security situation in Northern Ireland.

17. **Mr. Maginnis** asked the Secretary of State for Northern Ireland if he will make a statement on the security situation in Northern Ireland.

Mr. Hurd: I refer my hon. Friend and the hon. Gentlemen to the answer I gave my hon. Friend the Member for Billericay (Mr. Proctor) earlier today.

22. **Sir John Farr** asked the Secretary of State for Northern Ireland what further steps he is taking to improve cross-border security in Northern Ireland.

Mr. Hurd: Because terrorists regularly exploit the existence of the border in their operations, cross-border security co-operation is an essential part of our campaign against terrorism. At present it is on the whole good, but we constantly seek to improve it. It would not be sensible to disclose in detail what action is taken.

Natural Gas

18. **Mr. Stephen Ross** asked the Secretary of State for Northern Ireland whether he will give further consideration to the revised scheme for piping natural gas put forward by the gas employers, the trade unions and Belfast city council.

Dr. Boyson: The revised scheme has already been very fully considered. It does not provide the basis for a viable gas industry and the Government are therefore unable to support it.

Cross-border Co-operation

19. **Mr. A. Cecil Walker** asked the Secretary of State for Northern Ireland what advice he has received from the Chief Constable of the Royal Ulster Constabulary as to the level and quality of co-operation that he is receiving from the Garda Siochana in the fight against terrorism.

Mr. Hurd: I consult the Chief Constable on a range of security and policing matters. The content of his advice to me is confidential.

Gas Industry

20. **Mr. Hugh Brown** asked the Secretary of State for Northern Ireland if he will estimate the cost of providing full compensation to all gas consumers on the closure of the industry.

Dr. Boyson: The cost of the conversion assistance scheme is estimated at £20 million.

24. **Mr. Nellist** asked the Secretary of State for Northern Ireland if he will make a further statement on the future of the gas industry in Northern Ireland.

Dr. Boyson: There is nothing to add to what I have already said on a number of occasions both inside and outside the House.

Royal Ulster Constabulary

21. **Dr. Mawhinney** asked the Secretary of State for Northern Ireland what is the present recruitment rate of Catholics into the Royal Ulster Constabulary; and how that compares with the rates which obtained in 1960, 1965, 1970, 1975 and 1980.

Mr. Scott: The religious denominations of the Royal Ulster Constabulary and its reserve have not been recorded since 1970, thus comparative statistics are not available. Nevertheless, I understand that about 12 per cent. of those recruited to the force in 1984 were Catholics.

The RUC is anxious to attract suitably qualified recruits from all parts of the community.

31. **Rev. Ian Paisley** asked the Secretary of State for Northern Ireland if he will make a statement on the condition of certain border Royal Ulster Constabulary stations.

Mr. Scott: The provision and maintenance of buildings for the Royal Ulster Constabulary is the responsibility of the Police Authority for Northern Ireland, working in conjunction with the Chief Constable. Pressure on accommodation has arisen due to the substantial growth in the size of the Royal Ulster Constabulary in recent years; but, with the support of the Northern Ireland Office, the Police Authority is giving high priority to the provision of new accommodation and the upgrading of existing accommodation. This programme of work will extend to all Royal Ulster Constabulary premises, including rural stations. In excess of £55 million has been earmarked for this purpose over the next three years.

Mr. Canavan asked the Secretary of State for Northern Ireland what subjects he discussed at his last meeting with the Chief Constable of the Royal Ulster Constabulary.

Mr. Scott: My right hon. Friend meets the Chief Constable of the Royal Ulster Constabulary regularly. Their meetings are confidential and it would not be right for me to disclose their content.

Elections

23. **Mr. Peter Bruinvels** asked the Secretary of State for Northern Ireland if he will report on the security arrangements surrounding the recent local government elections.

Mr. Scott: The police as usual made the arrangements they deemed necessary to ensure the maintenance of law and order during the period up to the district council elections on 15 May and on the day itself. While a number of incidents occured during the period, none significantly affected the poll. I know the House will join me in paying a warm tribute to the security forces in Northern Ireland for their work in preserving the integrity of the electoral system.

25. **Mr. William Ross** asked the Secretary of State for Northern Ireland what proposals he has to make for amending the provisions of the Elections (Northern Ireland) Act 1985.

Mr. Scott: Following the recent Northern Ireland district council elections, the Government are considering whether any such amendment is necessary and, if so, what form it might take.

Constitutional Conference

26. **Mr. Flannery** asked the Secretary of State for Northern Ireland if he will consider initiating a round table conference of all political parties in Northern Ireland, the Republic of Ireland and Britain to discuss the present situation in Northern Ireland.

Mr. Hurd: No.

Dairy Industry

27. **Mr. Nicholson** asked the Secretary of State for Northern Ireland what progress he has made in resolving the problems facing the dairy industry in Northern Ireland.

Dr. Boyson: In recognition of the special problems facing the Northern Ireland dairy industry, the consumer subsidy on liquid milk, worth a maximum of £5·5 million, has been renewed for the 1985-86 financial year. My right hon. Friend the Secretary of State is still in consultation with agricultural colleagues on the problem of allocations of quota to certain catgories of producers in Northern Ireland.

Labour Statistics

28. **Mr. Loyden** asked the Secretary of State for Northern Ireland if he will give the latest figures for unemployment in Northern Ireland.

Dr. Boyson: At 9 May 1985 there were 120,072 unemployed claimants in Northern Ireland, giving an unemployment rate of 20·8 per cent. This represented a decrease of 1,370 on the April figure.

Nurses

29. **Mr. Martin** asked the Secretary of State for Northern Ireland how many nurses qualified for work in Northern Ireland hospitals in 1984.

Mr. Chris Patten: 1,423.

Rev. Martin Smyth asked the Secretary of State for Northern Ireland if he will make it his policy to seek to ensure that implementation of the nurses' pay award does not lead to any decrease in the number of nurses employed by the health service in Northern Ireland.

Mr. Chris Patten: It is for the health and social services boards to determine the number of nurses they employ in the light of the various demands on their resources, including priorities for the development of services.

Rev. Martin Smyth asked the Secretary of State for Northern Ireland how many nurses and midwives in Northern Ireland earn less than £101 per week take-home pay; what proportion of the total nursing and midwifery staff in Northern Ireland this represents; and if he will break down the figures into grades.

Mr. Chris Patten: 16,601, including approximately 8,500 part-time staff and student nurses. Excluding the latter this represents about 40 per cent. of the total. The breakdown is:

Grade	*Number*
Nursing Officer II	139
Health Visitor Fieldwork Teacher	6
Nursing Sister II	341
Deputy Nursing Sister	58
Staff Nurse	6,396
National Nursing Examination Board	14
Enrolled Nurse	3,408
Nursing Auxiliary	3,053
Student Nurse	3,186
Total	16,601

Note: The available information does not distinguish between statutory and non-statutory deductions (for example car loans, national savings, union deductions and so on).

Rev. Martin Smyth asked the Secretary of State for Northern Ireland if he will now arrange a meeting between himself and representatives of the Royal College of Nursing Board for Northern Ireland to discuss the findings of the review body on nurses and midwives pay.

Mr. Chris Patten: No. I refer the hon. Gentleman to the answer given by my right hon. Friend the Prime Minister to my hon. Friend the Member for Mid-Worcestershire (Mr. Forth) on 6 June 1985, at columns 194-96. The awards will be applied to Northern Ireland.

Sinn Fein

30. **Mr. McCusker** asked the Secretary of State for Northern Ireland if he will now proscribe Sinn Fein.

Mr. Hurd: I have no plans to do so at present.

Scheduled Air Services

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland what steps he is taking to encourage growth in scheduled air services between Northern Ireland and destinations in the European Community and the United States of America.

Mr. Chris Patten: The provision of scheduled air services is primarily a matter for the commercial judgment of airlines, (subject to their obtaining the requisite route licence under the Civil Aviation Act 1982) and for the airport authorities. The Government have encouraged growth in such services by assisting the development of Belfast international airport to the requisite standard.

Airports

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland what plans he has for consultations with interested parties concerning the possible privatisation of Northern Ireland airports.

Mr. Chris Patten: None at present, but I shall be keeping the matter under review.

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland what plans exist for capital expenditure on expansion and improvement of airports in Northern Ireland.

Mr. Chris Patten: The expansion and improvement of airports in Northern Ireland are a matter for the airport licensee. A further stage in the development of Belfast international airport at Aldergrove is currently under way at an estimated cost of £4·5 million. In addition, I understand that a minor works scheme is being undertaken at Eglinton.

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland whether the Government's policy, as expressed in Cmnd. 9542, "Airports Policy", that as many airports as possible should be placed in private hands, extends to Northern Ireland.

Mr. Chris Patten: Yes, and I shall be considering the application of that policy where relevant.

Housing

Mr. John David Taylor asked the Secretary of State for Northern Ireland how many houses the Northern Ireland Housing Executive has at Portaferry, Kircubbin, and Portavogie; what is the present waiting list at each of these three locations; and what is the Northern Ireland Housing Executive's future building programme at each of these three locations.

Mr. Chris Patten [*pursuant to his reply*, 3 June 1985, c. *84-85*]: This is a matter for the chairman of the Housing Executive who, has advised me that the information is as follows:

	Number of Houses	*Waiting List**
Portaferry	475	44
Kircubbin	292	18
Portavogie	183	15

* As at 30 April 1985

The future building programme, which has regard to the priority and urgent need categories within total waiting lists, as well as to factors such as annual relets is:

Portaferry

21 dwellings planned to start 1 May 1986.

10 dwellings planned to start in November 1988.

Kircubbin

10 dwellings planned to start in April 1988.

Portavogie

3 dwellings planned to start in October 1987.

Conservation

Mr. Archer asked the Secretary of State for Northern Ireland if he will make a statement on his policy on the conservation of wetland areas notified as areas of special interest because of their special interest for wetland flora and fauna.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *477*]: Such areas of special scientific interest will be conserved by controlling any potentially damaging operations in accordance with the provisions of articles 24 and 25 of the Nature Conservation and Amenity Lands (Northern Ireland) Order 1985. Sites will be monitored by staff from conservation branch, DOE (Northern Ireland).

Caugh Hill Water Treatment Plant

Mr. William Ross asked the Secretary of State for Northern Ireland when he expects work on the sludge treatment works at the Caugh Hill water treatment plant to be completed and the plant to be operating.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *478*]: December 1985. The treatment process should be operational early in 1986.

Richmond Centre, Londonderry

Mr. William Ross asked the Secretary of State for Northern Ireland what percentage return on the capital costs of constructing the Richmond centre he expects when all the accommodation currently accepted or occupied by tenants is producing rent.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. 478-89]: The Richmond centre (offices and shops) is 83·6 per cent. let and these agreed tenancies (in occupation or not) will produce a 6·97 per cent. return on the estimated capital cost of construction plus fees.

Mr. William Ross asked the Secretary of State for Northern Ireland if he will list in the *Official Report* the tenants of the office accommodation in the Richmond centre in Londonderry; and if he will indicate *(a)* the minimum, *(b)* the maximum and *(c)* the average rent paid per square foot for such accommodation.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *478-79*]: Tenants of the Richmond centre office accommodation (known as Richmond Chambers) are as follows:

Northern Ireland Housing Executive
Londonderry Development Office
Londonderry Enterprise Zone Office
Valuation and Lands Office
Industrial Development Board

Rentals per square foot are as follows:

(a) minimum £2·79
(b) maximum £3·50
(c) average £2·92

Mr. William Ross asked the Secretary of State for Northern Ireland what are the current annual interest charges being paid on the sums expended on the Richmond centre; and what was the total final cost of the centre.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *478-79*]: Since the Richmond centre project has been financed from Voted money no interest charges are being paid.

The total final cost will not be known until April 1986, that is at the end of the period for final measurement allowed in the contract. However, the estimated total final cost is £9·8 million. This figure does not allow for additional costs which may arise from final measurement and unsettled contractual claims.

Mr. William Ross asked the Secretary of State for Northern Ireland what rental is being paid by the Housing

Executive, per square foot, for its accommodation in the Richmond centre, Londonderry; and what was the annual cost over each of the last five years in respect of the accommodation presently occupied by those elements of the Housing Executive which are transferring to the Richmond centre.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *478-79*]: This is a matter for the chairman of the Housing Executive, who has advised me that the rent for the Housing Executive's accommodation in the Richmond centre is £2·48 per square foot. The accommodation being vacated is largely owned by the Housing Executive; the average rent per square foot for the remainder, approximately 6,200 sq ft out of a total of 18,200 sq ft was as follows for each of the last five years:

	£
1980	1·41
1981	1·41
1982	1·41
1983	1·57
1984	1·80

Mr. William Ross asked the Secretary of State for Northern Ireland if he will list in the *Official Report* the commercial tenants of the Richmond centre in Londonderry and indicate *(a)* the minimum, *(b)* the maximum and *(c)* the average rents being paid per square foot and the total income from such tenants.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *478-79*]: Commercial tenants of the Richmond centre (shopping centre) are as follows:

Dunne's Stores
Boots PLC
F. O'Hagan
Mrs. M. Hasson (Benetton)
Mr. K. Harrigan
Mrs. G. Pearson (Top Notch 3)
Mr. G. McGrory
Enterprise Zone Office
McGovern PVC Windows (NI) Ltd.
RHC Motor Spares (Derry) Ltd.
Western Distributors Ltd.
GUS (Paige)
Wine Inns Ltd. (Winemark)
Pennywise
Europa Models Ltd.
Apollo Blinds
BSC Trueform
BSC Dolcis
Burton's Topshop
Ratner's
Connect
Esmond Black
Halifax Building Society
Harry Curry
A. M. Dowsall (Bureau de Change)
Mr. and Mrs. M. Doherty

Rentals per square foot let are as follows:

(a) minimum £3·50
(b) maximum £13·00
(c) average £5·50

Storage areas are generally let at £2·00 per square foot.

The total income from the above tenants is approximately £517,000 per annum.

Foyle and Craigavon Bridges (Traffic Flows)

Mr. William Ross asked the Secretary of State for Northern Ireland what are *(a)* the average, *(b)* the minimum and *(c)* the maximum hourly traffic flows across *(a)* the new Foyle bridge and *(b)* the Craigavon bridge; and what is the hourly capacity of each bridge.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *479*]: The information is as follows:

	Foyle bridge	*Craigavon bridge*
Average hourly traffic flows	436	1,119
Minimum hourly traffic flows	8	13
Maximum hourly traffic flows	969	2,542
Hourly capacity	5,000	6,000

Terrorism

Mr. William Ross asked the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* showing for each year since 1 January 1969 the number of persons who have used their own legally-held (i) rifle, (ii) handgun and (iii) shotgun, to commit a murder connected with the terrorist campaign in Northern Ireland; how many other murders, or cases of manslaughter by shooting, by the holder of a legally-held firearm, using that firearm, in each of the categories listed are known; and if he will make a statement.

Mr. Scott [*pursuant to his reply*, 12 June 1985, c. *480*]: Information in the form requested is not readily available and could be obtained only at disproportionate cost.

Castledawson Bypass

Mr. William Ross asked the Secretary of State for Northern Ireland when he expects work to start on the Castledawson bypass.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *480*]: No starting date has been fixed.

Maghaberry Prison

Mr. William Ross asked the Secretary of State for Northern Ireland if he will list in the *Official Report* the modifications made to the new prison at Maghaberry over the last two years, or financial years, which have cost more than £1,000 and the cost of each such modification.

Mr. Scott [*pursuant to his reply*, 12 June 1985, c. *481*]: A substantial amount of planning work has been undertaken over the last two years for a range of modifications to the prison. The transfer of liquid petroleum gas tanks to meet new health and safety regulations has been completed at a cost of just under £27,000. Site works have started on several other projects, but since they have not yet been completed their final costs are not available.

Mr. William Ross asked the Secretary of State for Northern Ireland whether the roof of the new prison at Maghaberry was designed and built of fireproof materials.

Mr. Scott [*pursuant to his reply*, 12 June 1985, c. *481*]: The design and material used take proper account of the dangers of combustion, and comply with the fireproofing requirements in the building regulations.

SOCIAL SERVICES

Local Government (Consultation)

Dr. Cunningham asked the Secretary of State for Social Services if he is planning to make any changes to the way in which he consults local government following the judgment in R. v. Secretary of State for Social Services: ex parte AMA.

Mr. Newton: We shall be reviewing consultation arrangements with local authorities as part of wider discussions on our proposals for reforming housing benefit. The implications of the AMA action for future consultation arrangements will be considered when the written judgment is available.

NHS (Privatisation)

Mr. Willie W. Hamilton asked the Secretary of State for Social Services if he will make a statement on the future plans for further privatisation of National Health Service facilities.

Mr. Tony Banks asked the Secretary of State for Social Services if he will make a statement on the future plans for further privatisation of National Health Service facilities in the Greater London area.

Mr. Kenneth Clarke: We have no plans for privatisation of National Health Service facilities. Perhaps the hon. Members are referring to competitive tendering for the provision of services to the National Health Service. Even at this early stage we can see that the introduction of competitive tendering for National Health Service domestic, catering and laundry services is a success. Already 121 tendering exercises have achieved savings of £13·1 million a year. Health authorities are adding the money released to the increased finance provided by the Government and using it to provide improved services for patients in their localities.

We do not want health authorities to restrict themselves to the three services mentioned when seeking to get value for money by competitive tendering. In view of the worthwhile savings being achieved, we would expect them to be applying the same approach for other support services.

Radioactivity

Mr. Adley asked the Secretary of State for Social Services if he will make a statement on the health implications of the levels of natural radioactivity present in the atmosphere, and through domestic appliances such as colour television sets, in so far as they relate to levels of radioactivity adjacent to nuclear power installations.

Mr. John Patten: The radiation exposure which derives from all sources of natural radioactivity greatly exceeds that from waste discharged from nuclear power installations. The most recent survey carried out by the National Radiological Protection Board (NRPB) on radiation exposure of the United Kingdom population indicated that 87 per cent. was due to all natural sources as compared to about 0·1 per cent. from the discharge of radioactive waste from nuclear installations.

Colour TV sets produce very low levels of radiation, these being negligible compared to natural sources. In the NRPB report quoted above it was estimated that the average annual dose received by the United Kingdom population from this source was less than half a millionth of that due to natural background radiation.

Exposure to radiation may ultimately result in cancer, and it is generally accepted that the effects of radiation are directly proportional to the dose, down to the lowest dose levels. This assumes that any dose of radiation, however small, carries with it some risk to health. It has been estimated that exposure to natural background levels of radiation is associated with an annual risk of serious harm of about 1 in 50,000.

Residential Homes

Ms. Harman asked the Secretary of State for Social Services how many private residential homes for the elderly in Lancashire were deregistered in each of the years 1979 to 1985.

Mr. Tony Banks asked the Secretary of State for Social Services (1) how many private residential nursing homes for the elderly in the Greater London area have been de-registered in each year since 1979;

(2) how many staff were employed by his Department for monitoring the de-registrations of private residential nursing homes for the elderly, in each of the years 1981, 1982, 1983 and 1984.

Mr. John Patten: Prior to 1 January 1985 this information was not held centrally. Since that date we have received no notifications of cancelled registrations in Lancashire or the Greater London area.

Mr. Ashley asked the Secretary of State for Social Services, for each year since 1978, how many homes have been registered *(a)* as nursing homes, *(b)* as residential care homes and *(c)* dually as both nursing and residential care homes; and in each case how many homes are run by (i) voluntary organisations and (ii) private proprietors.

Mr. John Patten: The number of homes registered under the Residential Homes Act 1980 and under the Nursing Homes Act 1975 was as follows:

Residential Homes Act 1980			*Nursing Homes Act 1975*	
	Number of Homes			
31 March	*Voluntary*	*Private*	*31 December*	*Number of Homes*
1978	1,200	2,067	1978	1,111
1979	1,226	2,190	1979	N/A
1980	1,274	2,425	1980	1,135
			1981 (30	
1981	1,283	2,653	June)	1,132
1982	1,322	2,989	1982	1,214
1983	1,414	3,558	1983	1,316
*1984	1,459	4,315	1984	N/A

* Provisional.
N/A not available.

Until the Registered Homes Act 1984 was implemented on 1 January 1985 homes registered as nursing homes were excluded from registration as residential homes. It is not possible to differentiate between types of nursing homes.

Mr. Ashley asked the Secretary of State for Social Services what representations he has received on how residential and nursing homes will be affected by the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985; and if he will make a statement.

Mr. Whitney: We have received a number of representations on the possible effects of the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985 on residential care and nursing homes. These have come from hon. Members and from individuals and organisations representing residential care and nursing home interests. We are monitoring closely the impact of the regulations and will take appropriate account of the representations received as part of that process.

Mr. Ashley asked the Secretary of State for Social Services whether he has received complaints that some local authorities are failing to accept responsibility for making assessments for residential or nursing home care.

Mr. John Patten: Local authority social services departments would normally assess applicants only for places in their own residential homes or for places provided by them under arrangements made with voluntary or privately run residential care homes. It would be for district health authorities to do likewise for patients placed in nursing homes under contractual arrangement. We have received no complaints about local authorities failing to make such assessments, but we are aware of concern about assessment of clients otherwise supported from public funds in residential care homes. A joint working party with the local authority associations has been considering what scope there is for improving collaboration between the Department and local authorities over assessment of need and in ensuring that charges met from public funds are reasonable and represent value for money. The working party's report is being considered by us and the associations and we shall be discussing it with them in due course.

Mr. Ashley asked the Secretary of State for Social Services, for each year since 1978, what financial support each local authority has given to *(a)* residents in residential homes, *(b)* day-care centres and *(c)* topping up payments.

Mr. John Patten: Information relating to total and net spending by each local social services authority on residential care and day centres is published by the Chartered Institute of Public Finance and Accountancy in its annual volumes "Personal Social Services Statistics: Actuals", copies of which are in the Library. These cover years up to 1983-84; figures for 1984-85 are not yet available. Under the supplementary benefit regulations, local authority topping up of supplementary benefit support for people in private and voluntary homes has been possible only since 29 April 1985.

Mr. Tony Banks asked the Secretary of State for Social Services how many *(a)* private, *(b)* voluntary and *(c)* public residential homes for the elderly there were in London in each of the last five years.

Mr. John Patten: Information on the numbers of homes for the elderly and disabled in Greater London is given in the table:

Number of Homes

As at 31 March	*Statutory*	*Voluntary*	*Private*	*Total*
1979	334	212	179	725
1980	333	208	183	724
1981	336	218	185	739
1982	336	212	198	746
1983	332	210	224	766
1984	333	211	251	795

Information as at 31 March 1985 is not yet available.

Pensions

Mr. John Fraser asked the Secretary of State for Social Services if he will introduce legislation to enable increases in the state retirement pension to be given to pensioners who emigrate.

Mr. Whitney: The cost of paying increases in the state retirement pension to British pensioners living outside the United Kingdom would be £144 million per year. The Government have examined the resources available for public expenditure and have concluded that it is not possible at present to make the necessary funds available to provide for uprating of pensions paid to those settled overseas whose pensions are not already uprated.

Specialist Claims Control

Mr. McTaggart asked the Secretary of State for Social Services if he will publish in the *Official Report* the number and percentage of those claimants whose benefits were adjusted as a result of inquiries carried out by specialist claims control teams, who thereafter returned to claiming benefit in full.

Mr. Whitney: The information requested is not available and could be obtained only at disproportionate cost.

Mr. McTaggart asked the Secretary of State for Social Services how many officers there are in Scotland, working either full-time or part-time, as members of specialist claims control teams; and what is his estimate of the annual cost in salaries and expenses of specialist claims control teams in Scotland.

Mr. Whitney: During the year ended 12 March 1985 16·6 man years were used on specialist claims control in Scotland, at a cost of approximately £295,000.

Statutory Sick Pay Scheme

Mrs. Beckett asked the Secretary of State for Social Services what is the annual loss of tax revenue under the eight week statutory sick pay scheme arising from the reduced level of occupational sick pay paid out by employers.

Mr. Whitney: None.

Occupational sick pay and statutory sick pay are both subject to deductions for income tax.

Supplementary Benefit

Mrs. Beckett asked the Secretary of State for Social Services what arrangements he has made to monitor the effects of the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985 in relation to households claiming supplementary benefit, ordinary board and lodging allowance *(a)* until 28 July and *(b)* after 28 July who fall within each of the following categories: (i) single persons under the age of 26 years, (ii) single persons over the age of 26 years, (iii) couples with

both partners under the age of 26 years, (iv) couples with one partner over the age of 26 years, (v) couples with both partners over the age of 26 years, (vi) single parents with children under the age of 11 years, (vii) single parents with children over the age of 11 years, (viii) couples with children under the age of 11 years and (ix) couples with children over the age of 11 years.

Mr. Whitney: As part of our monitoring of the effects of the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985 we have arranged to collect and collate statistical returns from local offices. Offices will also be asked to complete a quarterly statistical inquiry. These exercises will include information on the age of the claimant and on the number of children within the assessment unit. In addition to this the Social Security Policy Inspectorate has been asked to extend its preliminary work on supplementary benefit board and lodging payments to look at the operation of the new arrangements.

Mrs. Beckett asked the Secretary of State for Social Services if he will publish in the *Official Report* the latest available information concerning the number of *(a)* single persons under the age of 26 years, *(b)* single persons over the age of 26 years, *(c)* couples with both partners under the age of 26 years, *(d)* couples with both partners over the age of 26 years, *(e)* single parents with children under the age of 11 years, *(f)* single parents with children over the age of 11 years, *(g)* couples with children under the age of 11 years and *(h)* couples with children over the age of 11 years claiming supplementary benefit ordinary board and lodging allowance who are, or have been, affected by the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985; and if he will publish this information for (i) Great Britain as a whole, (ii) England, (iii) Wales and (iv) Scotland, respectively.

Mr. Whitney: The information requested on the numbers of those in ordinary board and lodging accommodation affected by the Supplementary Benefit (Requirements and Resources) Miscellaneous Provisions Regulations 1985 is not yet available.

Mr. Peter Sutcliffe

Mr. Peter Bruinvels asked the Secretary of State for Social Services what privileges are currently accorded to Mr. Peter Sutcliffe at Broadmoor hospital; what is the basis on which these privileges are permitted; if he receives any privileges not available to other patients of similar status; and if he will make a statement.

Mr. Kenneth Clarke: It would be an improper breach of medical confidence to discuss the circumstances of individual hospital patients. I can, however, tell my hon. Friend that a recent newspaper report concerning special privileges was in all important respects untrue and in some respects was quite ridiculously inaccurate.

NHS Management Board

Mr. Dobson asked the Secretary of State for Social Services if he will list the terms and conditions of appointment of each member of the National Health Service management board together with all their outside financial interests known to his Department.

Mr. Kenneth Clarke: The following members of the NHS management board were already established civil servants prior to their appointment to membership of the board and remain subject to the terms and conditions of service of established civil servants:

Dr. E. D. Acheson (Chief Medical Officer)
Mrs. A. A. B. Poole (Chief Nursing Officer)
Mr. G. A. Hart (Director of Operations)
Mrs. G. T. Banks (Director of Health Authority Finance)
Mr. C. Graham (Director of Health Authority Liaison)

Of the other members of the board:

Mr. V. G. Paige (Chairman) has been appointed on a three-year contract in accordance with the Civil Service Commission's procedures for limited-period appointments. He is subject to the conditions of service applicable to civil servants. He remains a non-executive member of the board of the National Freight consortium.

Mr. M. J. Fairey (Director of Planning and Information Technology) is an employee of North East Thames RHA on secondment to his present position.

Mr. G. I. Mills (Director of Financial Management) is being made available for three years from 1 July 1985 by his firm, Price Waterhouse. A fee will be paid to Price Waterhouse. The Civil Service Commission are satisfied with the arrangement.

The personnel director of the board has yet to be appointed. The post will be (at least initially) a limited-period appointment and will be subject to the conditions of service applicable to civil servants.

Mr. Dobson asked the Secretary of State for Social Services what remuneration and expenses will be paid to Mr. Idris Pearce in respect of his part-time service on the National Health Service management board.

Mr. Kenneth Clarke: Mr. Pearce's firm, Richard Ellis, will be paid a fee for his services of £15,000 per annum plus VAT. Expenses incurred in the course of Mr. Pearce's duties within our Department will be reimbursed at civil service rates.

Mr. Dobson asked the Secretary of State for Social Services whether any special arrangements to cope with potential conflicts of interest have been made in relation to the appointment of Mr. Idris Pearce to the National Health Service management board.

Mr. Kenneth Clarke: Mr. Pearce as adviser to the National Health Service management board will be precluded from taking any part in discussions which may directly affect commercial relations between our Department or Health authorities and his firm Richard Ellis. He will be required to make a declaration of interest on each occasion when Richard Ellis submits a tender or obtains a commission with our Department or a health authority coming within the NHS management board's area of responsibility.

Mr. Dobson asked the Secretary of State for Social Services if he will make it a condition of Mr. Idris Pearce's appointment as a member of the National Health Service management board that during its currency, Richard Ellis, chartered surveyors, may not buy or sell National Health Service property.

Mr. Kenneth Clarke: Mr. Pearce has been appointed part-time property adviser to the National Health Service management board. We are satisfied that adequate arrangements have been made for declarations of interest by Mr. Pearce. Mr. Pearce has been as concerned as we have been to ensure that arrangements have been made which will preclude him from direct involvement in any commercial dealings between our Department and health authorities and Richard Ellis.

Contraceptives

Mr. Dobson asked the Secretary of State for Social Services whether his Department was involved in assessing the Today contraceptive sponge before it was put on the market; and if he will make a statement.

Mr. Kenneth Clarke: The Today contraceptive sponge was the subject of an application to our Department for a product licence under the Medicines Act 1968. We decided that the application should be referred for advice to the Committee on Dental and Surgical Materials, one of the advisory committees established under section 4 of the Act. The committee took account of all the available evidence and recommended that a licence should be granted and this advice was accepted.

Mr. Dobson asked the Secretary of State for Social Services what rules limit the description of any form of contraceptive as safe.

Mr. Kenneth Clarke: Those contraceptives that are licensable as medicinal products under the Medicines Act 1968 are assessed by the licensing authority for safety quality and efficacy. One of the advisory committees set up under the Medicines Act is consulted where necessary. Any data sheets, labels, package inserts and promotional material must be consistent with the terms and conditions of the product licence and must not be false or misleading.

Hospitals (Infection Rates)

Mr. Dobson asked the Secretary of State for Social Services what has been the post surgical infection rate in National Health Service hospitals in each year since 1979.

Mr. Kenneth Clarke: I shall let the hon. Member have a reply as soon as possible when we have had an opportunity to see whether sufficient worthwhile information is available.

Complaints Procedures

Mr. Meadowcroft asked the Secretary of State for Social Services whether he intends to establish complaints procedures to apply to services directly managed by regional health authorities, those managed by special health authorities and those managed by boards of governors.

Mr. John Patten: I assume the hon. Member is referring to those special health authorities which provide hospital services to National Health Service patients. Services provided by those authorities, together with those managed directly by regional health authorities, are already covered by the Department's guidance on complaints procedures.

Limited List Prescribing

Mr. Meadowcroft asked the Secretary of State for Social Services (1) what discussions he has had about an appeals mechanism for National Health Service prescription of scheduled drugs with representatives of pharmaceutical companies;

(2) whether he has sought from the drug companies any undertaking that they will not seek directly or indirectly to subject decisions or appeals against refusals to prescribe drugs not on the limited list by whatever mechanism to judical review;

(3) what advice he will give committees determining applications to prescribe scheduled drugs on the National Health Service with a view to minimising the danger of their decisions being overturned by judicial review.

Mr. Kenneth Clarke: I assume that the hon. Member is referring to our offer to the British Medical Association of a locally based appeals mechanism if they believed it to be necessary to allow general practitioners to prescribe scheduled drugs in exceptional cases.

We have had no discussions about these arrangements with pharmaceutical companies, who would not be a party to the appeals. The proposed local professional committees would be concerned solely with the clinical aspects of individual cases. Clinical decisions are not normally a matter for the courts.

Low-income Families

Dr. McDonald asked the Secretary of State for Social Services what is his latest estimate for the number of low-income working families with effective marginal tax rates taking into account loss of benefits of 100 per cent. or over, 80 per cent. or over and 60 per cent. or over, if possible, divided into those with and without children; and, in each case, what percentage of all working families they represent.

Mr. Whitney: I regret that the exact information requested is not available. The family expenditure survey data have been analysed to give estimates of working families with various ranges of marginal tax rates but not precisely those requested. The largest estimates derived wholly from these data relate to 1981. Further tentative estimates have been made of the current position and these are shown in the table.

Estimated number of working families with marginal tax rates of 50 per cent. or more†*

Marginal tax rate (per cent.)	*Number*	*Percentage of appropriate group of working families*
Families with children		
100 or over	70,000	about 1
75 or over	210,000	about 3½
50 or over	300,000	about 5
Families without children		
50 or over‡	60,000	about ½

* Excludes families subject to higher rates of income tax.

† These estimates do not take account of the number taken out of tax as a result of the 1984 and 1985 Budgets. It is estimated that about 20,000 families with children with marginal tax rates of 50 per cent. or over will have been affected in this way.

‡ The sample numbers are too small to allow further analyses.

Single Payments

Dr. McDonald asked the Secretary of State for Social Services if he will publish in the *Official Report* an update for 1983 of the information on single payments in table 34.97 of "Social Security Statistics 1984," or publish as much of that information which is available.

Mr. Whitney: The information for 1983 is as follows:

	Thousands	*Average amount* £
All payments	*1,890	75·71
Pensioners	188	62·23
Unemployed	976	76·02
Others	728	78·57

* Rounded to nearest 10,000.
Source: 100 per cent. count.

Work Expenses

Dr. McDonald asked the Secretary of State for Social Services what are the average work expenses of those on supplementary benefit with part-time earnings; and what are the average work expenses of lone parents with part-time earnings on supplementary benefit.

Mr. John asked the Secretary of State for Social Services what is the average amount allowed for work expenses to supplementary benefit claimants with part-time earnings.

Mr. Whitney: The only information on average work expenses of persons receiving supplementary benefit comes from a study* of the tapered earnings disregard applicable to lone parents which was commissioned by the Department and carried out by the social policy research unit of the University of York in 1982. Of those lone parents who had work expenses the average weekly costs of travel to work and child care were £1·18 and £0·94 respectively.

* Lone Mothers Paid Work and Social Security; Occasional Papers on Social Administration 77.

Social Security Review

Dr. McDonald asked the Secretary of State for Social Services why he has not published the findings of the research commissioned from Social and Community Planning Research into child benefit in the background papers to the Green Paper on the "Reform of Social Security".

Mr. John asked the Secretary of State for Social Services (1) whether the assessment unit for income support will in all cases be the same as the assessment unit for supplementary benefit;

(2) whether all those receiving income support or family credit will be automatically eligible for help with funeral expenses from the social fund;

(3) whether the loss to supplemetary benefit claimants of a proportion of their housing benefit in respect of rates will be balanced by a compensating adjustment in the levels of income support;

(4) whether the transitional protection to be introduced at the time of change from supplementary benefit to income support will preserve the real value or the cash value of benefit;

(5) whether a couple claiming income support *(a)* with children or *(b)* without children will receive less than the rate for a couple over 25 years when (i) the income support claimant is under 25 years, (ii) the claimant's partner is under 25 years or (iii) both are under 25 years; and whether, where this is the case, the differential will in each instance be the same;

(6) whether a disabled person claiming income support who is also a lone parent will receive a premium in respect of each of these conditions;

(7) whether a premium rate of income will be paid to those caring for elderly or disabled persons;

(8) if he will list in order of magnitude all the premium rates to which persons claiming income support may be entitled;

(9) whether attendance allowance and mobility allowance will be disregarded in the means test for income support;

(10) whether he proposes to make changes in benefits payable to those caring for elderly and disabled people.

Mr. Freud asked the Secretary of State for Social Services how the sum in the proposed family credit allowance to cover the cost of school meals will be calculated.

Mr. McCrindle asked the Secretary of State for Social Services if he will amplify the meaning of accrued pension rights under the state earnings related pension scheme as the term is used in the Green Paper of 3 June.

Mr. Newton: I shall let the hon. Members and my hon. Friend have replies as soon as possible.

Child Care Hearings

Mr. Frank Field asked the Secretary of State for Social Services (1) what is the average length of delay of child care hearings involving a guardian ad litem in the year to May 1984 and for the period since May 1984;

(2) if he will make available details of the total number of guardians ad litem appointed for child care cases since May 1984 and the regional variation in such appointments.

Mr. John Patten: Information is not held centrally on the numbers of guardians ad litem in child care cases nor on the duration of hearings in which they are involved. The Department commissioned preliminary research from Bristol university into how the new guardian ad litem arrangements were working in practice. The results of the research suggested that the arrangements had made a reasonable start. There were indications of diversity from court to court in the rates of appointing guardians ad litem and of more measured consideration of complex cases involving guardians. However, Bristol is now undertaking a more comprehensive study on representation of the child which will help ascertain how well the arrangements are working in the longer term.

NHS (Pay)

Mr. Dobson asked the Secretary of State for Social Services what will be the total amount of pay received in 1985-86 by each of the categories of National Health Service staff mentioned in the note to editors appended to his Department's press release 85/148, following the implementation of the Government's decisions on the pay review body's recommendations; what was the equivalent figure in each case for 1984-85; and what percentage increase this represents in each case.

Mr. Kenneth Clarke: We cannot provide the information requested as the final details of the implementation of the pay award for nursing staff and professions allied to medicine have not yet been settled with the staff sides.

Written Answers to Questions

Friday 14 June 1985

NORTHERN IRELAND

Metallic Marker Pens

Mr. Gregory asked the Secretary of State for Northern Ireland what information he has over the use in schools in Northern Ireland of metallic marker pens with gold and silver lettering that contain xylene xylol; and if he will make a statement.

Mr. Scott: The information is not readily available centrally and could be obtained only at disproportionate cost.

Government Grants

Mr. Beggs asked the Secretary of State for Northern Ireland if he has given consideration to seeking to recover Government grants paid out to successful and profitable Northern Ireland companies which cease manufacturing in Northern Ireland and transfer their production to mainland factories; and if he will make a statement.

Dr. Boyson: It is the practice to attach repayment conditions where companies receive selective financial assistance or standard capital grant from the Department of Economic Development. Conditions vary depending upon the nature of the assistance and are time limited. Where a company ceases manufacturing in Northern Ireland while recovery conditions are current, repayment of grant, either in whole or in part, would normally be sought.

Kinsale Gas

Mr. Mikardo asked the Secretary of State for Northern Ireland whether he will publish the external advice he received which led him to cancel the Kinsale gas project.

Dr. Boyson: I refer the hon. Member to the answer I gave to the right hon. and learned Member for Warley, West (Mr. Archer) on 12 June 1985 at column *476*.

Firearms Dealers (Ammunition)

Mr. William Ross asked the Secretary of State for Northern Ireland how many rounds of each type of commonly used ammunition for *(a)* ·22 rifles and *(b)* shotguns, a firearms dealer in Northern Ireland is allowed to hold on his premises.

Mr. Scott: Each year the Secretary of State gives a direction to the Chief Constable under Article 37(3) of the Firearms (Northern Ireland) Order as to the conditions to be imposed on firearms dealers' certificates of registration. The directive includes restrictions on the amount of ammunition which firearms dealers may hold on their premises. The numbers of rounds in individual cases varies between dealers in the light of the previous year's sales of each category of ammunition by the dealer, as well as the standard of security provided.

Investment

Mr. Clifford Forsythe asked the Secretary of State for Northern Ireland what information he has as to the level of investment in Northern Ireland industry by people residing in Northern Ireland.

Dr. Boyson: Information on shares in Northern Ireland industry held by Northern Ireland residents is not available.

Conservation

Mr. Archer asked the Secretary of State for Northern Ireland what ornithological or other scientific surveys were carried out on the area of scientific interest land at Lough Ross, Lisnakea, County Fermanagh, before the agricultural improvements recently approved by the Northern Ireland Department of Agriculture went ahead; what steps are being taken to monitor and assess the impact of drainage and related works on breeding wetland birds and other aspects of nature conservation interest present on the site; and if he will make a statement on the destruction of the nest and eggs of a species of bird specially protected by the Nature Conservation and Amenity Lands (Northern Ireland) Order 1985, during the course of the agricultural scheme.

Mr. Chris Patten [*pursuant to his reply*, 12 June 1985, c. *476-77*]: No such surveys were carried out by conservation branch of the Department of the Environment (Northern Ireland) prior to the commencement of agricultural improvement previously notified to the Department of Agriculture (Northern Ireland) as it was apparent that the prime scientific interest of the site was not going to be damaged.

No steps are being taken to monitor the site on a regular basis as there is no evidence to suggest that the works will have any impact on the intrinsic nature conservation significance of the site.

I am not aware of the destruction of nests or eggs of a species of bird specially protected by wildlife legislation.

River Roe (Restocking)

Mr. William Ross asked the Secretary of State for Northern Ireland if he will publish in the *Official Report* an account of the steps taken to restock the River Roe and its tributary the Owenreagh River after the accidental poisoning of the river and the annual costs of the restocking programme to date; and if he will indicate the success of the programme and whether the insect and fish life has yet recovered.

Dr. Boyson [*pursuant to his reply*, 12 June 1985, c. *478*]: Following the accidental chemical spillage from Caugh Hill water treatment works in 1982, a biological survey was carried out and an extensive electro-fishing survey was jointly undertaken by the Department of Agriculture for Northern Ireland and the Foyle Fisheries Commission; in the light of the information from these and subsequent surveys, the following fish stocks have been placed in the Rivers Roe and Owenreagh.

	1983	*1984*
Salmon:		
Eyed ova	118,000	—
Under 1 year old	56,300	—

	1983	1984
Over 1 year old	30,000	15,000
Brown Trout:		
Under 1 year old	20,000	—
Over 2 years old	400	1,200

The cost of this restocking was as follows:

	£
1982-83	20,218
1983-84	25,233
1984-85	754

Continuing monitoring surveys and the annual counts of spawning redds by the Foyle Fisheries Commission indicate a good recovery of fish life and invertebrate fauna in the affected areas of the rivers.

Firearms Certificates

Mr. William Ross asked the Secretary of State for Northern Ireland if he will publish a table in the *Official Report* setting out the number of *(a)* applications, *(b)* renewals and *(c)* variations of firearms certificates dealt with in each of the last six years or financial years; and how many in each year were (i) granted and (ii) refused.

Mr. Scott [*pursuant to his reply*, 12 June 1985, c. *479*]: The information is as follows:

	1979	1980	1981	1982	1983	1984
Applications	4,389	4,362	3,639	4,297	3,714	4,011
Granted	4,122	4,068	3,279	3,920	3,378	3,698
Refused	267	294	360	377	336	313
Renewals	19,121	14,201	29,704	21,685	17,016	30,066
Granted	19,029	14,122	29,626	21,608	16,937	29,978
Refused	92	79	78	77	79	88
Variations	10,278	8,934	9,140	9,246	7,748	8,574
Granted	9,947	8,547	8,750	8,807	7,359	8,109
Refused	331	387	390	439	389	465

FOREIGN AND COMMONWEALTH AFFAIRS

BBC External Services

Mr. Merlyn Rees asked the Secretary of State for Foreign and Commonwealth Affairs when the review of the BBC external services received by him on 9 December 1984 is to be published.

Mr. Renton: I announced publication of the 1984 review of the BBC external services in the course of the Adjournment debate on 4 February at columns 725-28. Copies of the report were placed in the Library of the House on the same day.

Namibia

Mr. Rhodes James asked the Secretary of State for Foreign and Commonwealth Affairs whether any representative of Her Majesty's Government will be present in Windhoek, Namibia, when the new transitional administration will be inaugurated; and if he will make a statement.

Mr. Rifkind: No. We have made it clear to the South African Government that we do not recognise the new administrative arrangements for Namibia. They do not affect South Africa's responsibility to bring about Namibian independence in accordance with the terms of SCR 435.

ATTORNEY-GENERAL

Law Society (Report)

Mr. Nicholas Brown asked the Attorney-General if he has yet received a copy of the draft of the final report submitted by Coopers and Lybrand Associates to the Law Society reviewing the Law Society's affairs.

The Attorney-General: I understand a copy was sent by the Law Society to the Lord Chancellor's Department for information on 31 May.

Public Record Office

Mr. Best asked the Attorney-General what changes have been made to the cash limit on class XIII, vote 13, (Public Record Office).

The Attorney-General: The cash limit on class XIII, vote 13 (Public Record Office) has been reduced by £334,000 from £10,821,000 to £10,487,000.

The reduction takes account of £334,000 transferred to class XIV, vote 1 (Property Services Agency) and reflected in the Main Estimate, to provide funds towards modifications and improvements to the air-conditioning system at the Public Record Office, Kew, as recommended by the independent review commissioned following the closure of the building last year. A copy of the report on the review was placed in the Library on 27 March.

The reduction will have no effect on the total of public expenditure.

WALES

Metallic Marker Pens

Mr. Gregory asked the Secretary of State for Wales what information he has over the use in schools in Wales of metallic marker pens with gold and silver lettering that contain xylene/xylol; and if he will make a statement.

Mr. John Stradling Thomas: My right hon. Friend has no information on the extent of the use of these pens in schools. The provision and use of writing materials in schools is a matter for local education authorities.

Sheep Scab

Mr. Geraint Howells asked the Secretary of State for Wales how many cases of sheep scab were reported in Wales during the past 12 months; what were the corresponding figures for the last 10 years; and if he will make a statement.

Mr. Nicholas Edwards: The table gives the number of outbreaks of sheep scab in Wales in each of the past 10 years, each year beginning on 1 July.

Year	*Outbreaks*
1975-76	2
1976-77	3
1977-78	0
1978-79	0
1979-80	0
1980-81	11
1981-82	1
1982-83	12
1983-84	11
1984-85	*15

* To 31 May.

Welfare Rights Officers

Mr. Wigley asked the Secretary of State for Wales what information he has as to how many welfare rights officers are currently employed by social services departments in Wales and as to the distribution of such welfare rights officers by county.

Mr. Wyn Roberts: This information is not available centrally.

Motorways (Lighting)

Dr. Marek asked the Secretary of State for Wales how many miles of motorway there are in Wales; and what types of lighting are in use thereon and where.

Mr. John Stradling Thomas: There are 74 miles of motorway. Eighteen miles are lit by low pressure sodium lighting, of which 12 miles are in Gwent and South Glamorgan (Coldra to St. Mellons) and six miles in West Glamorgan (Margam to Baglan).

Milk Quotas

Mr. Alex Carlile asked the Secretary of State for Wales whether he has any further proposals for investigating the effect in Wales of the introduction of dairy quotas, in cases of farmers who are still suffering severe financial hardship.

Mr. Nicholas Edwards: I am already fully aware of the effect which the introduction of milk quotas have caused for some producers in Wales. However re-allocation of quota under the outgoers' scheme has enabled us to restore small producers to their 1983 levels of production and make exceptional hardship awards in full for 1985-86.

Agricultural Workers

Mr. Alex Carlile asked the Secretary of State for Wales how many full-time agricultural workers there are in Wales; and how many there were on 1 January 1970, 1980, 1981, 1982, 1983 and 1984, respectively; and if he will make a statement.

Mr. Nicholas Edwards: Details of the numbers of workers on agricultural holdings are collected in a full census in June and a sample census in December each year. The numbers of persons recorded as working full-time on agricultural holdings in Wales in the years requested were as follows:

	June	*December*
1970	32,280	34,946
1980	33,351	33,257
1981	33,339	32,704
1982	32,851	32,558
1983	32,171	32,487
1984	32,707	32,307

Figures exclude wives of farmers and directors; and salaried managers for which no data on full-time working are available. The 1970 figure is thought to be affected by definitional changes at that time.

Mid Wales Development

Mr. Alex Carlile asked the Secretary of State for Wales whether he has any proposals for increasing the funding available to Mid Wales Development; and if he will make a statement.

Mr. Nicholas Edwards: Decisions about the funding of Mid Wales Development will be considered in the normal way in his year's review of public expenditure.

OVERSEAS DEVELOPMENT

Aid-for-Trade Provision

Mr. Arnold asked the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the future funding of the aid-for-trade provision.

Mr. Renton: The funding of the aid trade provision is kept under continuous review as part of the financial planning of the aid programme. The planning allocation for 1985-86 is £66 million.

Operation Roadrunner

Mr. Baldry asked the Secretary of State for Foreign and Commonwealth Affairs whether he will consider making funds available to support operation roadrunner in operating lorries into Ethiopia and Sudan.

Mr. Renton: We channel our assistance to voluntary efforts largely through the member agencies of the Disasters Emergency Committee. We have therefore suggested to representatives of operation roadrunner that they should offer their services through one of the established voluntary agencies operating in Sudan, to whom we have already provided very substantial assistance.

Bilateral Aid

Mr. Barnett asked the Secretary of State for Foreign and Commonwealth Affairs what were the totals of bilateral aid expenditure in the renewable natural resources and other agriculture-related economic sectors for 1983 and 1984; and what proportion of the total bilateral aid programme each of the figures represents.

Mr. Renton: Following are the figures:

	£ million	As per cent. of total bilateral allocable by sector
1983	163	28
1984	124	19

Falkland Islands

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs (1) how many Falkland Islands-based firms which do not have outside ownership have received grants or loans from the Falkland Islands Development Corporation;

(2) how many firms have received grants or loans from the Falkland Islands Development Corporation since it was established; and how many of those firms have their head office in the United Kingdom.

Mr. Renton: The Falkland Islands Development Corporation has provided assistance to 54 companies to date, both limited and sole traders, of which three have head offices in the United Kingdom.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs if Falklands Islands Development Corporation building projects are subject to planning control.

Mr. Renton: Yes. The Falkland Islands Development Corporation is subject to the same planning regulations as all other individuals and corporate bodies in the islands.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs how many houses for the permanent residents of the Falkland Islands have been built and are planned to be built under the auspices of the development corporation.

Mr. Renton: The Falkland Islands Development Corporation is not responsible for housing construction except in cases where accommodation is required in a remote location as an integral part of a project which is being assisted. Only one home has been built to date and this is occupied by permanent residents.

The corporation will shortly be considering a proposal for the creation of a wholly owned property development subsidiary which would undertake a programme of housing construction.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs how many seats on the board of the Falkland Islands Development Corporation are held by permanent local residents of the Falkland Islands.

Mr. Renton: Five.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs (1) how many jobs have been created by the Falkland Islands Development Corporation since its creation; and what was the average cost per job;

(2) how many construction jobs have been created by the Falkland Islands Development Corporation; and how many of these have been taken by permanent local residents of the Falkland Islands.

Mr. Renton: In view of the shortage of labour in the Islands, the Falkland Islands Development Corporation is not specifically required to create new employment opportunities and does not therefore maintain records of relevant information. However, I understand that assistance has been given in the establishment of three construction-related businesses with a total of five jobs, three of which are held by permanent local residents and two by immigrants who are now permanently resident.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs what is the ratio of public to private investment in the Falkland Islands Development Corporation investment.

Mr. Renton: As at 31 December 1984 the ratio was 44·5 per cent. public to 55·5 per cent. private.

Mr. Tony Banks asked the Secretary of State for Foreign and Commonwealth Affairs if he will list in the *Official Report* the chief executive, general manager and board members of the Falkland Islands Development Corporation; and what are the salaries of the chief executive and general manager.

Mr. Renton: The membership of the development corporation is as follows:

Sir Rex Hunt—Chairman
Mr D Taylor — Executive Vice Chairman (Chief Executive, Falkland Islands Government)
Mr S Armstrong—General Manager
Mr S Wallace
Mr R Binnie
Mr T Betts
Mr N Watson
Mr A Cameron
Mr H Rowlands
Mr M Gaiger
Mr M Crosse

The salaries of the executive vice chairman and general manager are £34,500 and £21,700 respectively.

HOME DEPARTMENT

Stonehenge (Disturbances)

Mr. Alex Carlile asked the Secretary of State for the Home Department how many persons were *(a)* arrested and *(b)* charged in connection with recent disturbances at and near to Stonehenge; what were the grounds of arrest and the nature of the charges; how many police officers and others were injured; and if he will make a statement.

Mr. Giles Shaw: I shall reply as soon as possible.

Women's Prisons

Mr. Alex Carlile asked the Secretary of State for the Home Department (1) whether he has any long-term proposals in respect of Cookham Wood women's prison; and if he will make a statement;

(2) whether he has any long-term proposals in respect of Bullwood Hall women's prison; and if he will make a statement.

Mr. Mellor: My right hon. and learned Friend has no plans which affect the roles performed by Cookham Wood prison and Bullwood Hall prison and youth custody centre.

Durham Prison

Mr. Alex Carlile asked the Secretary of State for the Home Department whether he has any long-term proposals in respect of "H" wing at Durham prison; and if he will make a statement.

Mr. Mellor: My right hon. and learned Friend has no plans which affect the role of H wing, Durham prison. Its use for female prisoners is, however, kept under constant review.

Holloway Prison

Mr. Alex Carlile asked the Secretary of State for the Home Department whether he has any proposals to increase the capacity of Holloway prison, and the place in any such proposals of the CI psychiatric unit; and if he will make a statement.

Mr. Mellor: I have nothing to add to the reply I gave to questions from the hon. Members for Burnley (Mr. Pike) and Hammersmith (Mr. Soley) on 13 June at column *501*.

Concessionary Television Licences

Mr. Madden asked the Secretary of State for the Home Department what response he has made to the letter from the social services committee of Bradford metropolitan council, dated 26 April, concerning the conditions of eligibility for concessionary television licences; and if he will make a statement.

Mr. Giles Shaw: Since television licensing matters are for the Home Office the letter from the director of social services of Bradford Metropolitan Council to my right hon. Friend the Secretary of State for Social Services has been passed to me and I shall reply to it shortly.

Charity Commission

Mr. Yeo asked the Secretary of State for the Home Department if he has any changes to announce in the cash limit for the Charity Commission Vote, class XIII, vote 16.

Mr. Brittan: Subject to Parliamentary approval of the necessary Supplementary Estimate, the cash limit on the Charity Commission Vote will be raised by £368,000 from £4,861,000 to £5,229,000. The increase provides for additional costs associated with the computer installation in the official custodian's division.

The additional expenditure will be charged to the reserve and does not add to the planning total of public expenditure.

NATIONAL FINANCE

Capital Transfer Tax

Mr. John Mark Taylor asked the Chancellor of the Exchequer whether he has received any proposals from the Forestry Commission advocating the extension of exemption from capital transfer tax for lands of heritage value to ancient semi-natural woodlands, subject to their management meeting the approval of the Nature Conservancy Council and the Forestry Commission; and if he will make a statement.

Mr. Moore: I have not received any such proposals. Conservation objectives are already recognised in the capital transfer tax code, which provides exemption for land of outstanding scenic, historic or scientific interest, and for land essential for the protection of the character and amenities of a building of outstanding historic or scientific interest. Woodlands may qualify for this relief if they represent an integral or primary element in either case.

Britoil

Mr. Forth asked the Chancellor of the Exchequer if he will make a statement about his plans for the Britoil sale.

Mr. Moore: I am now able to give further details of the arrangement for this sale.

Subject to market conditions, the offer for sale, which will be for a total of some 243 million shares, is intended to take place later during the summer. The offer price, which will be fixed and announced at that time, will be payable in two instalments; one on application and the second approximately three months later. A "pathfinder" document, setting out most of the up-to-date information on the company, but not including the offer for sale price, will be published some weeks before impact day.

Special arrangements will be made so that holders of the shares to be sold will receive the interim dividend for 1985 which will be declared by Britoil on publication of its interim results in mid-July. Existing shareholders will, subject to any legal restrictions overseas, be given certain preferential allocation entitlements to acquire the shares on offer. Any shareholder wishing to purchase shares in addition to those which he will be entitled to on a preferential basis will be able to do so by applying on a public application form.

Fifteen million of the shares on offer will be available for preferential allocation to employees of Britoil, subject to a limit of 10,000 shares per employee.

To encourage wider share ownership throughout the UK stockbroking firms across the country have been approached to act as regional co-ordinators for this offer for sale to encourage applications from private investors. Allotment commissions will be payable to certain financial intermediaries in respect of successful applications submitted by them.

PRIME MINISTER

Cruise Missiles (Exercises)

Mr. Andrew F. Bennett asked the Prime Minister, if any test communication exercises on United States Air Force ground-based cruise missile launch procedures have been conducted between herself and the President of the United States of America since cruise missiles became operational in the United Kingdom.

The Prime Minister: It has been the practice of successive Governments not to discuss the details of arrangements for ministerial control of nuclear weapons.

Sailing Vessel Marques (Loss)

Mr. Dobson asked the Prime Minister whether she has received a letter from Ms. Shirley Cooklin about the loss of the Marques.

The Prime Minister: Yes. I sympathise with her in the loss of her son and she is right to refer to all those who lost their lives in this tragedy as splendid examples of adventurous youth at its best. She also expressed her concern about the timing of the formal investigation into the loss of the Marques. Arrangements are being made to set up the court of inquiry as soon as practicable.

Portsmouth Health Authority

Mr. Dobson asked the Prime Minister, further to her answer to the hon. Member for Holborn and St. Pancras on Monday, 10 June, *Official Report*, column *304*. (1) whether the discussions referred to were initiated by officials of the Department of Health and Social Security or the administrators of the Portsmouth and South East Hampshire health authority;

(2) whether Department of Health and Social Services officials put forward the possibility of any relaxation of financial restraint or additional funding in the event of the health authority contracting out management of a hospital.

The Prime Minister: As I explained in my previous reply, Ministers are always interested in examining options for improving the management of NHS hospitals. Contracting out the management of a hospital is one such option and officials of the Department acting on behalf of Ministers got in touch with the Administrator of the health authority to see if he was interested in this approach.

Obviously the Department of Health and Social Security would not have offered financial inducements to the health authority to contract out management of a hospital, since the whole object of doing so would be to obtain better value for money in the provision of services.

ENVIRONMENT

Yelland Power Station

Dr. Cunningham asked the Secretary of State for the Environment if there are any site investigations currently being undertaken with a view to the possible storage of low, intermediate or high-level nuclear waste at Yelland power station on the Yaw estuary.

Mr. Patrick Jenkin: No site investigatons are being undertaken in connection with the storage of nuclear waste at East Yelland power station. So far as the development of disposal facilities for radioactive waste is concerned, I refer the hon. Member to the reply I gave the hon. Member for Yeovil (Mr. Ashdown) on 25 April at column *548*.

Improvement Grants (Stockport)

Mr. Arnold asked the Secretary of State for the Environment what has been the level of take-up of general improvement grants in the Stockport metropolitan borough in the most recent year for which figures are available.

Sir George Young: The figures for 1984 appear on page 93 of "Local Housing Statistics" no. 73; a copy is in the Library.

Local Government (Computer, Technical and Scientific Services)

Mr. Cohen asked the Secretary of State for the Environment pursuant to the answer of 20 May, *Official Report*, columns *343-4*, to which authorities and bodies the Minister for Local Government has offered his Department's good offices in considering how worthwhile work on *(a)* central computer services, *(b)* technical services and *(c)* scientific services currently provided by the metropolitan counties and the Greater London council could be maintained; in what form the offer was made in each case; on what date; and if he will make a statement.

Mr. Kenneth Baker: This offer has been made to all successors, in my reply to a question from my hon. Friend the member for Harlow (Mr. Hayes) on 16 November last at columns *378-79*.

European Non-quota Textile Scheme

Mr. Pike asked the Secretary of State for the Environment if he will list in the *Official Report* allocations approved to date for each local authority under the European regional development fund non-quota textile measures scheme.

Mr. Waldegrave: The allocations approved to end-May 1985 under ERDF non-quota textile measures are as follows:

Zone and Authority	*Grant* £
Lancashire	
Rossendale district	100,025
Hyndburn district	108,525
Pendale district	307,025
Lancaster district	721,683
Burnley district	197,784
Lancashire Enterprises Ltd.	895,090
Total	2,330,132
Greater Manchester	
Rochdale Metropolitan Borough	565,625
Bolton Metropolitan Borough	598,560
Wigan Metropolitan Borough	157,300
Bury Metropolitan Borough	45,613
Tameside Metropolitan Borough	222,850
Oldham Metropolitan Borough	377,886
Greater Manchester Council/Greater Manchester Economic Development Company	200,000
Total	2,167,834
West Yorkshire	
Calderdale Metropolitan Borough	23,500
Kirklees Metropolitan Borough	436,425
West Yorkshire County Council	352,371
Total	812,296

Local Government Reform

Mr. Tony Banks asked the Secretary of State for the Environment if he will assess grant-related expenditure for transition costs to the London boroughs resulting from abolition of the Greater London council.

Mr. Waldegrave: No. Grant related expenditure for local authorities in London will continue to be assessed on the same basis as for authorities elsewhere in the country.

Mr. Tony Banks asked the Secretary of State for the Environment which abolition authorities responded favourably to his letter of 17 April regarding discussions with the Government about the mechanics of abolition; and what was the response of the Association of Metropolitan Authorities and the Trades Union Congress.

Mr. Waldegrave: This information should be sought from the organisations concerned.

London Residuary Body

Mr. Tony Banks asked the Secretary of State for the Environment whether he intends to direct the London residuary body to meet any of its transition costs from borrowing.

Mr. Kenneth Baker: I refer the hon. Member to Clause 75 of the Local Government Bill.

DEFENCE

Stealth and UHSIC Technology

Mr. Ashdown asked the Secretary of State for Defence if the United States Government have provided the United Kingdom Government with access to stealth and UHSIC technology.

Mr. Butler: There are general arrangements covering the exchange of information between the United States and United Kingdom on various aspects of defence technology. It is not our practice to give details of these.

TRADE AND INDUSTRY

Aid and Trade

Mr. Richard Page asked the Secretary of State for Trade and Industry what was the proportion of United Kingdom produced materials used in the projects supported through the aid and trade provisions in each year since 1979.

Mr. Channon: Support from the aid and trade provision is generally confined to foods and services provided from the United Kingdom. The information my hon. Friend requests is not available but the content of projects won with ATP backing is overwhelmingly of United Kingdom origin.

Post Office (Delivery Delays)

Mr. Murphy asked the Secretary of State for Trade and Industry when he next meets the chairman of the Post Office, if he will discuss the recent report from the Post Office Users' National Council on postal delivery delays.

Mr. Trippier: My right hon. Friend welcomes the determined steps the Post Office is taking to ensure that its customers receive a satisfactory service, and he discusses progress with the chairman of the Post Office whenever it is appropriate to do so.

COCOM

Mr. Faulds asked the Secretary of State for Trade and Industry how many officials from his Department, and of what grade, are assigned permanently or temporarily to COCOM in Paris.

Mr. Channon: None; but officials from my Department, up to assistant secretary level and including technically qualified staff, regularly form part of the United Kingom delegation to COCOM meetings.

South Africa

Mr. Anderson asked the Secretary of State for Trade and Industry if he will set out details of all trade missions financed in whole or in part by his Department which have visited South Africa since 1979.

Mr. Channon: Details of the sponsoring organisations, the cost to BOTB, and the number of participants taking part in BOTB supported outward missions to South Africa are:

* Up to 31 March.

Note:

Due to a clerical error, the total number of missions supported for 1979 was incorrectly stated in my answers of 3 April and 21 May 1985 to the hon. Member for Sheffield Central. The total number of missions was 14 and not 13 as stated. This affects the total financial expenditure for 1979 and 1980.

Business Statistics

Mr. Fallon asked the Secretary of State for Trade and Industry what has been the surplus of business formation over closures in the northern region since 1979; and whether he will give a breakdown by turnover.

Mr. Trippier: Information on the numbers of starts and stops of businesses in the regions during the period 1980-1983 broken down by sizebands of turnover was published in an article in "British Business" on 2 November 1984. Further information showing the breakdown by sector of trade was published in "British Business" on 18 January 1985.

Copies of both articles have been placed in the Library.

House of Fraser

Mr. Gould asked the Secretary of State for Trade and Industry, pursuant to the answer of 6 June, *Official Report*, column *193*, if he had full information as to the source of financial backing for the Al Fayed bid for the House of Fraser.

Mr. Fletcher: The Secretary of State had sufficient information to enable him to take a decision as to whether or not to refer the acquisition of House of Fraser plc by Al Fayed Investment Holdings plc to the Monopolies and Mergers Commission.

EDUCATION AND SCIENCE

Infant Teachers

Mr. Cartwright asked the Secretary of State for Education and Science how many qualified infant teachers completed teacher training in 1982, 1983 and 1984; what is the estimated number for the current year; and how these figures compare with the estimated number of vacancies for such teachers in England and Wales.

Mr. Dunn: Separate information about infant teachers is not readily available. Estimates for primary teachers, covering infant and junior age groups but not nursery or middle, suggest that about 2,700 qualified in 1983 and 2,900 in 1984. Comparable estimates are not available for numbers qualifying in 1982 or for those expected to complete their training in 1985. Nor is information available on the numbers of vacancies for those groups of teachers in the years requested.

Secondary Schools (Selection System)

Mr. Andrew F. Bennett asked the Secretary of State for Education and Science which local authorities retain a selective secondary school system.

Mr. Dunn: The table shows those local authorities which retained a partially selective secondary school system as at January 1984, the latest date for which firm figures are available. No authority operated a fully selective system.

LEAS maintaining at least one grammar school—January 1984

University Places

Mr. Maxton asked the Secretary of State for Education and Science what was the number of university places available in England and Wales for each year since 1978.

Sir Keith Joseph: Statistics on available places are not collected. The total number of full-time undergraduates and postgraduates at universities in England and Wales since 1978 has been:

	Number
1978	245,300
1979	249,500
1980	254,200
1981	255,200
1982	250,600
1983	246,900
1984*	245,000

* Provisional

School Leavers

Mr. Maxton asked the Secretary of State for Education and Science (1) what was the number of school leavers in England and Wales for each year since 1978;

(2) what was the number of school leavers with minimum university qualifications for each year since 1978.

Mr. Dunn: The numbers of school leavers in England in total and with two or more A-level passes are:

School leavers, England

Academic year	*Total leavers* (000s)	*Leavers with two or more A level passes** (000s)
1977-78	724·31	91·13
1978-79	737·37	92·19
1979-80	750·73	94·94
1980-81	733·96	98·78
1981-82	751·13	103·90
1982-83	765·52	106·30
1983-84	752·82	105·80

* Data on school leavers examination attainments are subject to sampling error.
Source: School Leavers Survey.

The figures for Wales are the responsibility of my right hon. Friend the Secretary of State for Wales.

ENERGY

Plutonium (Member's Correspondence)

Mr. D. E. Thomas asked the Secretary of State for Energy if he will publish in the *Official Report* his correspondence with the hon. Member for Meirionnydd Nant Conwy on the topic of civil and military plutonium.

Mr. Goodlad: I have arranged for copies of this correspondence to be placed in the Library.

Gas Showrooms

Mr. Pike asked the Secretary of State for Energy what proposals he has for the future of gas showrooms arising from his plans to privatise British Gas.

Mr. Buchanan-Smith: As my right hon. Friend the Secretary of State made clear in his statement on 7 May, we intend to transfer to the new private sector company all the assets of the British Gas Corporation. The future of the gas showrooms will be a matter for the gas corporation —but these activities will of course be subject to review by the Monopolies and Mergers Commission.

Britoil

Mr. Millan asked the Secretary of State for Energy what representations his Department has had from British Petroleum over the possible acquisition by it of the Government's shareholding in Britoil; what discussions have taken place with British Petroleum on this matter; and if he will make a statement.

Mr. Buchanan-Smith: My Department has received no representations.

SCOTLAND

Scottish Development Agency (Holiday Package)

Mr. Bill Walker asked the Secretary of State for Scotland whether any public funds, time of public servants, or other public resources have been or are involved in the arrangements for a special holiday package deal at concessionary rates negotiated on behalf of its staff by the Scottish Development Agency with a leisure club in Glasgow.

Mr. Allan Stewart: The Scottish Development Agency staff club has arranged with the Holiday Inn Hotel, Glasgow for corporate membership of the hotel's leisure club for agency staff. There are no arrangements whatsoever for any holiday package deal. I am assured by the agency that the scheme is completely financed by staff contribution and that no public resources are involved.

School Leavers

Mr. Maxton asked the Secretary of State for Scotland what was the number of school leavers in Scotland for each year since 1978.

Mr. Allan Stewart: The information requested is as follows:

Session	*Number of leavers*
1977-78	93,221
1978-79	91,737
1979-80	91,722
1980-81	87,475
1981-82	88,607
1982-83	90,988
1983-84	89,737

Mr. Maxton asked the Secretary of State for Scotland what was the number of school leavers with the minimum university entrance qualifications for each year since 1978; and how many failed to obtain entrance to university in each year.

Mr. Allan Stewart: Generally, the minimum requirement for university entrance is three highers and two O grades (or equivalent): entrance requirements for individual faculties or courses may be higher. The numbers of school leavers with three or more highers were as follows:

Number of school leavers with 3 or more Highers

Session	*Number*
1977-78	16,069
1978-79	15,760
1979-80	16,661
1980-81	17,208
1981-82	18,347
1982-83	18,954
1983-84	n.a.

Information from the Scottish school leavers survey indicates that, of those who left school in 1979-80 with three or more highers, and who applied for university entrance, 67 per cent. entered university in the following session. The corresponding figure for 1981-82 leavers is 61 per cent. The percentages of this group who entered other forms of higher education, or who entered university at a later date, are not readily available.

NHS (Privatisation)

Mr. Willie W. Hamilton asked the Secretary of State for Scotland if he will make a statement on the further plans he has for privatisation within the National Health Service in Scotland.

Mr. John MacKay: Health Boards were asked to test the cost-effectiveness of their catering, domestic and laundry services by putting them out to competitive tender, and I have had a preliminary discussion about progress with health board chairmen to ensure the delivery of savings.

EMPLOYMENT

Electricity Regulations (Infringement)

Mr. Tom Cox asked the Secretary of State for Employment how many employers have *(a)* been cautioned and *(b)* been prosecuted, and with what result, for infringement of Regulation 28 of the Electricity Regulations 1908 in each year of the last five years to the nearest convenient date.

Mr. Peter Bottomley: In 1981 there was a prosecution for breach of regulation 28 of the Electricity Regulations 1908. The employer was convicted and fined £50. Figures for cautions are not kept centrally and can only be obtained at disproportionate cost.

Mr. Tom Cox asked the Secretary of State for Employment how many employers have *(a)* been cautioned and *(b)* been prosecuted, and with what results, for infringement of the Electricity (Factories Act) Special Regulations 1908 and 1944 in each of the last five years to the nearest convenient date.

Mr. Peter Bottomley: The number of employers prosecuted for infringement of these regulations in 1980-84 inclusive, and the results are included in the following table.

Year	Employers prosecuted	Informations	Convictions	Total fines £
1980	31	66	66	14,050
1981	21	47	47	7,225
1982	32	61	55	12,480
1983	29	56	54	15,500
1984	31	62	61	11,770

Figures for cautions are not kept centrally and can be obtained only at disproportionate cost.

Disabled Persons

Mr. Ashley asked the Secretary of State for Employment, in the light of the recommendation by the Manpower Services Commission report on the quota scheme that further research should be carried out, what initiative the Government will take; and if he will make a statement on the other recommendations of the report.

Mr. Alan Clark: I shall reply to the right hon. Member as soon as possible.

Trade Unions (Ballots)

Mr. Hancock asked the Secretary of State for Employment which trade unions have applied to the certification officer for reimbursement of the cost of ballots, under the provisions of section 1 of the Employment Act 1980; what is the size of payments made to each of the trade unions; what is the purpose of the ballots for which payments were sought; and on which dates these payments were made.

Mr. Peter Bottomley: The certification officer has provided the following information for the period from the introduction of the scheme on 1 October 1980 up to 13 June this year.

Applicant		Purpose of Ballot(s) (see key below)	Amount of Payment (£)	Date Payment Authorised
Royal College of Nursing of the United Kingdom	(1)	D	Nil

Ballot purposes

A Ballots on strikes or other industrial action.
B Election of members of trade unions' principal executive committees.
C Election of trade union officers.
D Amending trade union rules.
E Trade union merger proposals.
F Ballot on employers' offers on pay and conditions of service.
G Ballots for a purpose outside the scope of the Scheme.

Youth Training Scheme

Mr. Lawler asked the Secretary of State for Employment if he will publish the results of the recent survey of trainees' attitudes to the youth training scheme.

Mr. Peter Morrison: The Manpower Services Commission conducts a regular survey of youth training scheme leavers. Questionaires are sent to 15 per cent. of ex-trainees some three months after they leave the scheme. The destinations of leavers in the survey are reported monthly. In addition, a detailed report is prepared each quarter. A copy of the latest report covers leavers between July and September 1984, and I have arranged for a copy to be placed in the Library. It includes a range of information about the attitudes of trainees to the youth training scheme.

Labour Statistics

Mr. Hancock asked the Secretary of State for Employment how many people were unemployed in the Portsmouth travel-to-work area in 1979 and in 1985; how many unemployed people in 1979 and 1985 were aged under 25 years; and how many of those unemployed in 1979 and 1985 were women.

Mr. Alan Clark: The following is in the Library. Direct comparisons with 1979 are not possible. The following table shows the figures requested for the old Portsmouth travel-to-work area in respect of registrants for April 1979 and claimants for April 1985, the latest date for which an analysis of unemployment by age is available. Figures are also on both bases for October 1982, when the basis of the unemployment count was changed. Comparisons are also affected by the provisions of the 1983 Budget which mean that certain men aged 60 and over no longer need to sign on at an unemployment benefit office.

Unemployment—old Portsmouth travel-to-work area

Registrants	Total	Under 25 years	Female
April 1979	10,272	3,413	2,891
October 1982	25,551	10,979	7,688
Claimants			
October 1982	24,138	10,431	7,250
April 1985	26,411	10,387	8,610

Mr. Hancock asked the Secretary of State for Employment how many people at present registered as unemployed have never had a job.

Mr. Alan Clark: The following information is in the Library. On 9 May 1985 there were 315,669 unemployed claimants in the United Kingdom who had never had a job since leaving school, of which 107,704 were aged under 18 years.

Mr. Hancock asked the Secretary of State for Employment how many people at present registered as unemployed have only had a youth training scheme or community programme as their only means of employment.

Mr. Alan Clark Such an analysis of the unemployment count is not available.

Skillcentres (Hampshire)

Mr. Hancock asked the Secretary of State for Employment how many places are currently available at skillcentres in Hampshire; if he can give figures for each; how many vacancies there are at present in skillcentres; and how many people have passed through the skillcentres in each of the past three years, giving individual numbers for each.

Mr. Peter Morrison: For each of the skillcentres in Hampshire the following tables show:

(a) for April 1985 the number of training places made available and the average number of trainees in the centre;

(b) the number of adults who began a course of training in 1982-83, 1983-84 and 1984-85

(a)

Skillcentre	Places (April 1985) Made Available	Occupied
Portsmouth	up to 170	152
Southampton	up to 190	153
Southampton Annex	up to 150	134

(b)

Skillcentre	Adult Trainees (Starts) 1982-83	1983-84	1984-85
Portsmouth	298	343	381
Southampton	394	376	849
Southampton Annex	235	329	401

Table *(b)* refers to adults only because information on the numbers of young people trained in the skillcenters is not readily available.

Wood Preservatives

Mr. Campbell-Savours asked the Secretary of State for Employment if, pursuant to the answer of 14 February, *Official Report*, column *250*, he will list in the *Official Report* the products used as wood preservatives currently known to the Health and Safety Executive to contain lindane, tributyl tin oxide, or both.

Mr. Peter Bottomley [*pursuant to his reply*, 3 June 1985 c. 567]: As the list is of considerable length I write to the hon. Member with the information; and I will place a copy of my letter in the Library.

AGRICULTURE, FISHERIES AND FOOD

Milk Quotas

Mr. Maclean asked the Minister of Agriculture, Fisheries and Food what representations he has received on the possibility of owner-occupiers being allowed to sell milk quotas; and if he will make a statement.

Mr. MacGregor: I have received a representation from the NFU in response to the "Mobility of Quotas" discussion paper (copies of which are available in the Library of the House) that occupiers of dairy farms, whether owner-occupiers or tenants, should be free to sell or buy quota. Other organisations in favour are the Milk Marketing Board, the Tenant Farmers' Association and the Farmers' Union of Wales. The Country Landowners' Association on the other hand is against tenants having the right to sell quota. At present quota can only be transferred with land. We are actively pursuing in Brussels the possibility of more flexible arrangements, but there has been opposition from the Commission (although following our pressure it has agreed to look at the possibilities) and from some other member states. I cannot predict the outcome at this stage.

DDT

Dr. David Clark asked the Minister of Agriculture, Fisheries and Food what instances of use of DDT in the United Kingdom in 1985 his Department is aware of; and what action he will take to seek to prevent such use.

Mrs. Fenner: We have no direct evidence of the use of DDT on crops in 1985. Surveys of crops of types on which DDT was used before clearance was withdrawn will be carried out during 1985 as part of the work of the working party on pesticide residues.

Part III of the Food and Environment Protection Bill seeks to provide Ministers with statutory powers not only to prevent the supply and use of non-approved products but also to seize and dispose of stocks where necessary.

Food Labelling

Mr. Dobson asked the Minister of Agriculture, Fisheries and Food why new guidelines on food labelling require sugar to be included under the general heading of carbohydrates.

Mr. Jopling: Draft guidelines for voluntary full nutrition labelling were issued on 27 March, and would provide the option of declaring one figure for total carbohydrates, or of declaring total carbohydrates plus a separate figure for sugar within that total. All interested bodies were invited to comment, and all comments will be considered before any final decision is reached.

Hayling Island

Mr. Ian Lloyd asked the Minister of Agriculture, Fisheries and Food (1) what steps he has taken to examine the loss of amenity and environmental damage resulting from the beach protection scheme currently being implemented on Hayling Island;

(2) whether he has called for, received, suggested or costed any proposals designed to restore the amenities hitherto associated with the sand beaches on Hayling Island before the implementation of the beach protection scheme;

(3) whether he will initiate urgent technical discussions, with Havant borough council and other qualified Government bodies to examine whether there is any alternative to the completion of the existing beach protection scheme on Hayling Island, which, within the overall cost limits for that proportion of the scheme yet to be completed, will achieve a more acceptable environment impact;

(4) whether he will allocate further funding, on the same basis as that applying to the current beach protection scheme on Hayling Island, to any suitable scheme designed to restore the amenity value of the beaches on Hayling Island affected by the current beach protection scheme.

Mr. Jopling: In 1983 a scheme was approved for beach replenishment on Hayling Island. If Havant borough council wishes to make proposals for its modification I will consider them. Additionally I have arranged for one of my officials to visit the site and have technical discussion with the borough council about the environmental impact of the scheme.

Aerial Spraying

Mr. Kennedy asked the Minister of Agriculture, Fisheries and Food to what extent, in granting any recent approvals for use by the Forestry Commission of fenitrothion for blanket aerial spraying, his Department took account of the evidence available to the joint meeting on pesticides residues of the World Health Organisation concerning the veracity of tests conducted into the matter by Industrial Biotests of Chicago.

Mrs. Fenner [*pursuant to her reply*, 7 June 1985, c. 294]: The clearances granted to the Forestry Commission for the use of fenitrothion are not dependent on any tests conducted by Industrial Biotests of Chicago.

Mr. Kennedy asked the Minister of Agriculture, Fisheries and Food (1) what evidence is available to his Department concerning international research, particularly Canadian, into the suitability of fenitrothion for use in blanket aerial spraying; and if he will make a statement;

(2) if he will list the categories under which approval has been granted by his Department to the Forestry Commission for the use of fenitrothion for the purposes of blanket aerial spraying; if he will indicate the reasoning for the specific choice of category in each case; and if he will make a statement;

(3) on what basis his Department granted approval for use by the Forestry Commission of fenitrothion for the purposes of blanket aerial spraying.

Mrs. Fenner [*pursuant to her reply*, 7 June 1985, c. 294.]: All clearances granted under the pesticides safety precaution scheme including those for fenitrothion, are based on an objective evaluation of scientific data on toxicity, crop residues and wildlife environmental effects, as outlined in the scheme, the text of which is available in the Library of the House. Additionally, information derived from Canadian research on fenitrothion was considered by the Advisory Committee on Pesticides in 1978. The committee concluded that there was no

evidence of a causal relationship between use of fenitrothion and Reyes syndrome and that United Kingdom clearance conditions did not therefore require amendment. Currently, fenitrothion is cleared for limited use in the United Kingdom, ie on 5,333 hectares of forestry provided stringent conditions are met.

Mr. Kennedy asked the Minister of Agriculture, Fisheries and Food what information he has as to which countries have banned the use of fenitrothion for the purposes of blanket aerial spraying and as to the reasons for such laws.

Mrs. Fenner [*pursuant to her reply*, 7 June 1985, c. *294*.]: I understand that the use of fenitrothion for aerial spraying is not permitted in certain provinces of Canada because of what was believed to be a possible association between the large scale use of fenitrothion in Canada and Reyes syndrome.

TRANSPORT

Motorway Service Stations

Mr. Harrison asked the Secretary of State for Transport (1) what was the annual cost of the inspection carried out by his officials at the Leicester forest east service station on the M1 motorway from May 1979 to 1985;

(2) what was the annual cost of the inspection carried out by his officials at the Toddington service station on the M1 motorway from May 1979 to 1985;

(3) what was the annual cost of the inspection carried out by his officials at the Trowell service station on the M1 motorway from May 1979 to 1985.

Mr. Ridley: The information is not available. Each inspection of a service area takes about a half-day and the cost, including overheads, is approximately £55 excluding travel.

Solvents (Driving Offences)

Mr. Maclean asked the Secretary of State for Transport if he will introduce legislation to make driving under the influence of solvents a specific criminal offence.

Mrs Chalker: The Road Traffic Act 1972, as amended by the Transport Act 1981, provides that a person is guilty of an offence if he drives or attempts to drive while unfit to do so through drink or drugs. Although the meaning of drug for this purpose is not defined in the Act, the High Court has ruled that solvents can be regarded as a drug and successful prosecutions for driving under the influence of solvents have already been brought under the existing legislation. I therefore do not believe that further legislation is needed.

Driving Test

Sir John Farr asked the Secretary of State for Transport if he will take steps to reduce the waiting time that learner motor cyclists have to wait before being able to take their driving test.

Mrs. Chalker: My right hon. Friend is already doing so. Additional examiners have been recruited and trained to produce a net increase of 36 on a year ago. Substantially more are being recruited in order to reduce the waiting time for L tests, including part II of the test for motor cycles. The average wait for part I of the motor cycle test for the Department remains reasonable, but most learner riders take the part I test with the appointed organisation with which they also take their training.

Mr. Speed asked the Secretary of State for Transport if he will list his Department's driving test centres in Kent, together with their establishment of examiners, actual current strengths of examiners, average waiting time for car and motor cycle driving tests for each centre, respectively, and the current national average waiting times for these categories.

Mrs. Chalker: The information requested is:

Waiting Period (Weeks) at 24 May 1985

	Complement	*In post*	*Waiting period (weeks) at 24 May 1985*	
			L tests motor cars & Part II m/c	*Part I m/c tests*
Southern Eastern TA				
Ashford	4	2	24	—
Canterbury Margate	6	6	17	—
Folkestone	4	4	14	—
Gillingham*	6	6	22	—
Gravesend*	4	4	17	—
Herne Bay	4	3	20	—
Maidstone	5	4	17	—
Tunbridge Wells	4	3	21	—
Canterbury HGV	1	1	—	13
Gillingham HGV	2	2	—	14
Metropolitan TA				
Belvedere	6	6	31	—
Bexleyheath*	5	5	30	—
Sevenoaks	4	4	23	—
Sidcup	4	4	29	—
West Wickham*	7	7	30	—

*. The numbers of staff in-post include 2 examiners on long term sick leave at Gillingham and 1 each at Gravesend, Bexleyheath and West Wickham.

The waiting periods nationally are 18½ weeks for L tests and 13 weeks for part I motor cycle tests.

I am filling the vacant posts by transfer of staff or recruitment of extra examiners as quickly as I can.

Sailing Vessels Marques (Loss)

Mr. Dobson asked the Secretary of State for Transport if he will release to the parents of young persons lost when the Marques sank with all hands the marine survey of the vessel prepared by Mr. John Perryman of Great Yarmouth.

Mr. Ridley: The report prepared by Mr. Perryman will be part of the evidence submitted to the court of inquiry and I would not wish to risk prejudicing the outcome of the investigation by the premature release of documents.

Mr. Dobson asked the Secretary of State for Transport why the inquiry into the loss of the Marques is not being held before January-February 1986.

Mr. Ridley: The date for the public formal investigation has not yet been set. Arrangements for the hearing are being made as expeditiously as possible but a number of factors, such as the selection and appointment by the Lord Chancellor of a senior member of the Admiralty Bar as wreck commissioner and the need for the parties to have time to prepare their cases, have to be considered. Nevertheless, I hope that it will be possible for the investigation to commence before the end of the year.

London Underground (Fire)

Mrs. Dunwoody asked the Secretary of State for Transport what proportion of the costs of the Oxford Circus fire London Regional Transport are trying to recover through insurance claims; and whether these claims include any claims for damages against other companies.

Mr. Ridley: I understand that LRT is claiming from insurers, all of the costs given in my answer of 10 June at column *386* together with loss of revenue estimated at £0·4 million. It knows of no grounds for claims from other companies.

Heathrow Airport

Mr. Soames asked the Secretary of State for Transport if, when he next meets the chairman of the British Airports Authority, he will discuss its operations in terminal 3 at Heathrow Airport.

Mr. Michael Spicer: I have no immediate plans to do so, but we keep in close touch with the British Airports Authority about the performance and development of Heathrow.

Drivers (Medical Standards)

Mr. Madden asked the Secretary of State for Transport when he proposes to introduce medical standards reflecting the recommendations made by his Advisory Committee on Medical Standards for heavy goods vehicle and public service vehicle licensing; what significant changes in medical standards he proposes to make; whether compensation will be available to those whose employment is terminated through the loss of their driving licence arising from failure to meet higher medical standards; and if he will make a statement.

Mrs. Chalker: The working party on this subject was set up in June 1977 because there was concern both within and outside the Department over the effectiveness of current procedures and inconsistent application of standards at several stages in the licensing process. Its report, which was published in September 1983, basically endorsed the standards recommended by the medical profession but proposed changes in procedures. The Department received comments on these proposals from a number of organisations and has held discussions with some of these.

In reaching conclusions on the proposals, the Government have also taken into account the fact that the study and subsequent debate have increased awareness of the recommended standards and greatly improved the way in which existing arrangements are operated by doctors and by the licensing authorities in the traffic areas. Revised licence application and medical report forms are proving much more effective in identifying cases requiring medical investigation.

In these circumstances I am not proposing regulations, as was advocated by the working party, to extend the list of conditions which would bar the grant of a vocational (heavy goods or public service vehicle) driver's licence. There are no plans to alter the present procedure under which it is for the applicant to obtain and submit a medical report when this is required. Nor will there be a specialist panel to give advice on appeals against decisions taken by the licensing authorities on medical grounds.

There is a need for continuing advice on policy in relation to the conditions which are most often responsible for collapse at the wheel. A panel, now chaired by Dr. Christopher Earl, has for many years advised on diseases of the nervous system as they affect driving. My right hon. Friend has appointed two similar honorary advisory panels, one chaired by Professor Michael Oliver to advise on cardio-vascular conditions, and the other chaired by Dr. David Pyke to advise on diabetes.

The Government accept the recommendations that the duration of heavy goods vehicle drivers' licences should be five years, as for public service vehicle drivers, and that the driving test to establish a licence-holder's continued fitness after developing a limb disability should be free of charge: the necessary parliamentary legislation will be introduced at the next opportunity. When it comes into effect, the age after which heavy goods vehicle drivers have to submit a fresh medical report on renewal will come down from 60 to 46, as it now is for public service vehicle drivers.

I share the concern expressed to me by organisations representing both sides of the road transport industry, and by others, about the position of those who have to give up vocational driving in mid-career for medical reasons. This is not a new problem, but it occurs more widely to the extent that medical standards designed to protect road-users from the consequences of collapse at the wheel are being more effectively applied. It may be that the provisions of insurance schemes which exist in the industry can be improved in this direction, and be more generally adopted. But such issues will need to be dealt with through the normal employer-employee procedures.

SOCIAL SERVICES

Single Homeless (Hartlepool)

Mr. Leadbitter asked the Secretary of State for Social Services how many single homeless people are registered in Hartlepool for social security allowances; and how many will be disqualifiable under any time rule applied to the nature of their accommodation.

Mr. Whitney: I assume the hon. Member is referring to single supplementary benefit claimants who live in board and lodging accommodation. When cases were examined following the introduction of new regulations effective from 29 April 1985, 219 claimants in the Hartlepool area were single boarders. Of these 107 were subject to a limit of four weeks following which, although they would not be disqualified, they would no longer be eligible to be treated as boarders in that area for supplementary benefit purposes.

Elderly Persons

Ms. Harman asked the Secretary of State for Social Services what was the number of people of *(a)* 65 to 75 years of age and *(b)* 75 years and over living in Lancashire in each of the years 1979 to 1985; and what was the percentage increase over that period.

Mr. John Patten: The latest information available is as follows:

Mid-year	Lancashire: Resident Population Aged 65 to 74	75 and over
(i) Estimated number		
1979	145,900	88,400
1980	144,500	91,900
1981	142,600	93,300
1982	139,200	95,200
1983	132,900	96,100
(ii) Percentage change		
1979-83	−8·9	+8·7

Statutory Sick Pay Scheme

Mrs. Beckett asked the Secretary of State for Social Services what is the estimated extra cost in terms of supplementary benefit and housing benefit of extending statutory sick pay to 28 weeks.

Mr. Whitney: It is not expected that there will be any significant increase in the numbers claiming supplementary benefit and housing benefit as a result of extending statutory sick pay to 28 weeks.

Ms. Beckett asked the Secretary of State for Social Services what is the extra annual cost in terms of supplementary benefit and housing benefit of the eight week statutory sick pay scheme.

Mr. Whitney: The information requested is not available. Statistics of those receiving both statutory sick pay and housing benefit are not collected. Supplementary benefit statistics provide information of claimants getting sick pay from an employer but do not differentiate between occupational sick pay and SSP.

Housing Benefit

Mr. John Fraser asked the Secretary of State for Social Services (1) how many people are now receiving housing benefit in the London borough of Lambeth giving separate certificated and standard benefits and rent rebate, rate rebate and housing allowance;

(2) what payments have been made by his Department to Lambeth council for rate rebates in 1984-85 and since 1 April.

Mr. Whitney: Firm figures on the number of people now receiving housing benefit are not available, but the London borough of Lambeth estimates that in 1985-86 the numbers receiving rent rebate, rent allowance and rate rebates would be:

	Rent rebate	Rent allowance	Rate rebate
Certificated	18,000	17,000	38,000
Standard	10,000	8,000	25,000

Lambeth was paid subsidy of £24·6 million by this Department for rate rebates awarded in 1984-85. No payments of rate rebate subsidy have been made to Lambeth since 1 April since rate rebates are not payable under the housing benefits scheme when an authority has not set a rate.

Pensioners

Ms. Harman asked the Secretary of State for Social Services whether he has issued guidance to local authorities on meeting the needs of pensioners from ethnic minority groups.

Mr. Kenneth Clarke: Our social services inspectorate seeks to stimulate an awareness in local social services authorities of the special needs of ethnic minority groups. During May 1985 a copy was sent to each social services department of a report "Triple Jeopardy: growing old in a second homeland", which had been commissioned from the Centre for Policy and Ageing by our Department. Our centrally funded initiative, "Helping the Community to Care", includes a number of schemes designed to provide knowledge and guidance for voluntary organisations on ways of meeting the needs of elderly members of the ethnic minority communities.

Residential Homes

Ms. Harman asked the Secretary of State for Social Services how many people between the ages of *(a)* 65 and 75 years and *(b)* 75 years and over, were, in Lancashire, living in residential care homes for the elderly in each of the following sectors (i) voluntary; (ii) private and (iii) public in each of the years 1979 to 1985.

Mr. John Patten: The available information on the numbers of elderly and disabled residents is given in the table:

Number of residents

As at 31 March	Statutory homes		Voluntary homes		Private homes		All homes	
	Aged		Aged		Aged		Aged	
	65-74	75+	65-74	75+	65-74	75+	65-74	75+
1979	(3475)*		85	520	202	939	NA	NA
1980	614	2,985	78	512	168	1,046	860	4,543
1981	641	2,957	69	535	266	1,413	976	4,905
1982	584	3,085	81	464	251	1,603	916	5,152
1983	578	2,989	83	442	289	2,012	950	5,443
1984	540	3,021	80	458	357	2,751	977	6,230
†1985	520	2,992	NA	NA	NA	NA	NA	NA

* Further breakdown not available.
† Provisional.
NA Not yet available.

Mr. Peter Sutcliffe

Mr. Bendall asked the Secretary of State for Social Services what special privileges for good behaviour are being afforded to Peter Sutcliffe, a patient at Broadmoor; and if he will make a statement.

Mr. Kenneth Clarke: I refer my hon. Friend to my reply to my hon. Friend the Member for Leicester, East (Mr. Bruinvels) yesterday.

Welfare Rights Officers

Mr. Wigley asked the Secretary of State for Social Services what information he has as to how many welfare rights officers are currently employed by social services departments in England and as to the distribution of such welfare rights officers by county.

Mr. John Patten: Such information is not collected centrally.

Junior Doctors

Mr. Dobson asked the Secretary of State for Social Services whether the Trent regional health authority has dropped the allowance for continuity of care in a junior doctor's contract.

Mr. Kenneth Clarke: The assessment of a junior doctor's contractual commitments is a matter for local judgment by the employing authority in the light of the requirements of each post including, where appropriate, such commitments outside normally rostered duties as are necessary for the continuity of patient care. If the hon. Member has a particular problem in mind, he may wish to write to the chairman of Trent regional health authority.

Mr. Dobson asked the Secretary of State for Social Services (1) if he will list the regional health authorities who are paying their junior doctors for an 84 hour week except when covering for a colleague who is on holiday, irrespective of the number of hours worked in excess of that time;

(2) if his Department's circular (PM(85)1) regarding pay and conditions of service of junior hospital medical and dental staff; hours of work, is being used by some regional health authorities to reduce the remuneration of junior house officers by not paying them for time worked in excess of 84 hours per week.

Mr. Kenneth Clarke: A junior doctor cannot be obliged to undertake unpaid duty in excess of his contractual commitment other than, exceptionally, in occasional emergencies or unforeseen circumstances. Where he agrees to undertake duty in excess of this commitment, he is entitled to receive additional pay or, in the limited circumstances envisaged in PM(85)1, time off in lieu. I have no evidence that these arrangements are not being followed, but I should be happy to consider any that the hon. Member can provide.

Mr. Dobson asked the Secretary of State for Social Services what is his policy towards junior house officers in future working more than 84 hours a week except when covering for a colleague who is on holiday.

Mr. Kenneth Clarke: I refer the hon. Member to my reply on 23 May to the hon. Member for Warrington, North (Mr. Hoyle) at columns *538-9*.

Abortions

Mr. Teddy Taylor asked the Secretary of State for Social Services if he will list in the *Official Report* those hospitals in the Greater London area which are equipped to perform abortions; how many beds each unit has; what is the latest average gestation period of weeks at which abortions are performed; and how many staff are employed in each unit.

Mr. Kenneth Clarke: The following private hospitals and nursing homes in the Greater London area are approved by our Department under Section 1(3) of the Abortion Act:

	Approved beds
Gordon Hospital	3
Leigham Private Clinic	29
London Private Hospital	50
Marie Stopes Nursing Home	13
New Cross Nursing Home	13
New Victoria Hospital	2
Park View Clinic	30
Raleigh Nursing Home	19
Rosslyn Nursing Home	37
Royal Masonic Hospital	4

We do not hold information centrally about the total numbers of staff employed in these places, or about facilities for abortions or related staff in NHS hospitals. In 1983, the average gestation period at which abortions were carried out was 10·5 weeks. This includes abortions carried out on resident and non-resident women.

Note

For this purpose, the Greater London area covers those health districts falling wholly or partly within the boundaries of the Greater London council.

Supplementary Benefit (Earnings Limit)

Mr. Madden asked the Secretary of State for Social Services when the earnings limit for those in receipt of supplementary benefit was last increased; what is the current earnings limit; what the present limit would now be if it had been increased in line with inflation from the date of the last increase; if he will now take steps to increase the limit; what reasons he advanced previously for not increasing the limit; and if he will make a statement.

Mr. Whitney: The information requested is as follows:

Claimant group	*Present level of disregard*	*Date increased to present level*	*Level needed if increased in line with inflation since last increase**
Unemployed	£4	November 1980	£5·46
Single parents	£4 plus half of earnings between £4 and £20	November 1980	£5·46 – £27·28
Others	£4	November 1975	£10·37

* Based on increase in Retail Price Index between date of last increase and April 1985 (latest date for which information is available).

We have not increased earnings disregards since the dates shown because we have taken the view that any additional resources available should be used to improve the scale rates for all recipients rather than to increase the earnings disregards of those beneficiaries who have earnings. In the Green Paper "Reform of Social Security" we have put forward our proposals for improving the structure of the earnings disregards for certain groups of claimants.

Thames Regional Health Authority

Mr. Chapman asked the Secretary of State for Social Services, pursuant to the answer to the hon. Member for Chipping Barnet on 6 June, *Official Report*, column *241*, if he will give details of the 1982 boundary changes relating to the individual Thames regional health authority areas and the percentage real increase in revenue expenditure between 1978-79 and 1984-85 in each Thames area notwithstanding the boundary changes.

Mr. Kenneth Clarke: In 1982 part of the Kensington, Chelsea and Westminster area health authority in North-West Thames region was transferred to North-East Thames region and included in the district of Bloomsbury. The borough of Spelthorne was transferred from South-West Thames region to North-West Thames region and included in the district of Hounslow and Spelthorne.

In addition to these boundary changes, there was a major restructuring of the boards of governors for the London postgraduate teaching hospitals which had implications for the Thames regions. Bloomsbury district in North-East Thames region now manages the Royal National Throat, Nose and Ear hospitals, the Royal National Orthopaedic hospitals and St. Peter's hospitals. West Lambeth district in South-East Thames region now manages St. John's hospital for diseases of the skin. All other former boards of governors hospitals are now special health authorities. The Hammersmith hospital was removed from its local district in North-West Thames region and made an SHA.

The table gives the percentage increase in revenue expenditure in each Thames regional health authority and in the London postgraduate special health authorities between 1978-79 and 1984-85, after taking account of general inflation as measured by the gross domestic product deflator. The figures take no account of the boundary changes and changes in management responsibility I have listed.

Percentage Real Increase in Revenue Expenditure 1978-79 to 1984-85*

Region	*per cent.*
North-West Thames	4·1
North-East Thames	18·8
South-East Thames	9·6
South-West Thames	9·2
Boards of Governors/SHAs	11·3

* Percentages are based on actual revenue expenditure from health authorities' summarised accounts for 1978-79; and on provisional outturn figures for 1984-85.

Fuel Deposits (Assistance)

Mr. Madden asked the Secretary of State for Social Services what instructions have been issued to local offices of his Department regarding assistance to claimants who are asked to pay deposits in respect of supplies of electricity or gas.

Mr. Whitney: A single payment of supplementary benefit to prevent the disconnection of a fuel supply may be made under regulation 30 of the single payment regulations where in the adjudication officer's opinion such a payment is the only means by which to prevent serious damage or serious risk to health or safety. Guidance issued by the Chief Adjudication Officer on the application of regulation 30 in cases of threatened disconnection is published in paragraphs 7556-7558 of the "S Manual"—a copy of which is in the Library.

Local Office Staffs

Mr. Madden asked the Secretary of State for Social Services what action he has taken to ensure that those local offices of his Department which serve substantial ethnic minority communities employ staff who originate from those minorities; if he is satisfied that staff in such offices can readily secure the assistance of full-time, salaried interpreters; if he is satisfied with the present proportion of counter staff in local offices of his Department who come from the ethnic minorities; and if he will make a statement.

Mr. Whitney: As the hon. Member may know, the Civil Service as a whole does not at present have records of the ethnic origins of its staff. I am not, therefore, in a position to answer fully the questions the hon. Member has raised.

Recently the Civil Service undertook a pilot scheme to monitor the ethnic origins of all staff in the north-west planning area and the county of Avon. Following evaluation of the results of these surveys, my hon. Friend the Minister for the Civil Service announced in January of this year that ethnic monitoring was to be extended to the rest of the civil service on a phased basis over the next three years. When this information is available detailed analyses will be possible.

I can, however, deal with the question of interpreters. Local offices operating in areas with substantial ethnic minorities will normally, through local recruitment, have a pool of bilingual staff to call on where necessary. In addition local office managers have the facility to engage professional interpreters and translators on an ad hoc basis where they encounter particular problems or difficulties.

Pension Rights

Mr. Higgins asked the Secretary of State for Social Services whether Government proposals regarding transferability of pension rights will cover company pensions which have already been frozen following an individual's early retirement.

Mr. Whitney: The provisions of part II of schedule 1A which would be inserted into the Social Security Pensions Act 1975 by the Social Security Bill currently before Parliament are intended to apply only to a member of an occupational pension scheme whose pensionable service terminates after those provisions come into effect, which is expected to be 1 January 1986.

Benefit Payments

Mr. Millan asked the Secretary of State for Social Services what are the limits laid down by his Department above which Girocheques issued are payable only through a bank; how these limits are determined; whether they are applied by all local offices of his Department; and when they were last updated.

Mr. Whitney: The amount above which Girocheques issued by the Department are crossed is £150. The level at which Girocheques should be crossed is determined in conjunction with National Girobank and the Post Office. The level is subject to periodical review at which account is taken of *(a)* the number of payments of benefit above a given level; and *(b)* the need to protect both the beneficiary and the Department from fraudulent encashment of large amounts. All local offices of the Department apply the £150 crossing limit; which took effect from December 1981 and is currently under review.

Legionnaire's Disease (Inquiry)

Mr. Cash asked the Secretary of State for Social Services if he will announce the names of the two further members of the independent committee of inquiry looking into the outbreak of legionnaire's disease in Stafford.

Mr. Kenneth Clarke: I am pleased to announce that Mr. Christopher Holland QC will be the lawyer member of the inquiry team and will act as vice chairman. Professor Patrick O'Sullivan, chair of architectural sciences, University of Wales, Institute of Science and Technology, Cardiff will be the engineer member.

Pensions

Mr. Gordon Brown asked the Secretary of State for Social Services what are his estimates of the numbers of people expected to receive additional component under the state earnings related pension scheme in the tax years 1985-86, 1986-87 and 1987-88; what is the maximum estimated additional component; and what is the estimated average additional component in those years.

Mr. Whitney [*pursuant to his reply*, 6 June 1985, c. *245*]: I regret that a figure provided in respect of the weekly amount of net additional component was incorrect. The entry should have read:

Estimated weekly amounts of net additional component*

	Maximum £	*Average* £
1985-86	19·50	1·85
1986-87	23·77	2·20
1987-88	28·55	2·65

* After deduction of any guaranteed minimum pension(s) from contracted-out occupational pension scheme(s).

Child Accident Statistics

Mr. Dobson asked the Secretary of State for Social Services if any changes have been made in the collection of child accident statistics since 1979; and if he will make a statement.

Mr. John Patten [*pursuant to his reply*, 6 June 1985, c. *234*]: There have not been any changes since 1979 in the collection of such statistics in the Department, which are limited to sample information on hospital in-patients and to mortality data, both held at the Office of Population, Censuses and Surveys.

The steering group on health services information examined accident statistics in general as part of its review of information about hospital clinical activity in the National Health Service. Its recommendations on the subject were published in 1982 in the group's first report. The group recommended that accident and emergency departments with computerised information systems should collect more detailed information on patients seen. For all patients who are admitted to hospitals after an accident, the group has recommended the use of the 'E' codes of the ninth revision of the international classification of diseases which record the direct physical cause of an accident and where it occurred. Health authorities have been asked to plan on the basis that this and other recommendations in the first report should be implemented by April 1987.

Mr. Dobson asked the Secretary of State for Social Services how much money the Health Education Council has spent on child accident prevention campaigns each year since 1979 in constant terms.

Mr. John Patten [*pursuant to his reply*, 6 June 1985, c. *234*.]: Expenditure at 1985 pay and price levels has been:

	£
1979-80	—
1980-81	1,453
1981-82	*357,811
1982-83	986
1983-84	2,733
1984-85	79,734

* Primarily for the 'Play It Safe' campaign.

Drug Addicts

Mr. Higgins asked the Secretary of State for Social Services what National Health Service facilities are available in Sussex for the treatment of drug addicts.

Mr. John Patten [*pursuant to his reply*, 10 June 1985, c. *367*.]: The Herbert home clinic in Brighton provides a specialist outpatient clinic, and there is access to six inpatient beds in Brighton. Services for drug misusers may also be provided by primary health care teams or by the general psychiatric services. I shall be publishing a summary of health authorities existing services and plans for developing these shortly.

INDEX TO THE

PARLIAMENTARY DEBATES

OFFICIAL REPORT

SIXTH SERIES **VOLUME 80**

SESSION 1984–85

3rd June—14th June 1985

SCOPE OF THE INDEX, ARRANGEMENT AND ABBREVIATIONS

This index is derived from the House of Commons Library's Parliamentary On-Line Information System (POLIS), and the subject terms used are based on those used in POLIS. There are often changes in column numbering, etc., between the daily part or weekly Hansard (which simply collects together the daily parts without revision) and the bound volume. The index for the bound volume is revised to take account of these changes.

Scope and arrangement of the Index

Oral and Written Parliamentary Questions are indexed under subject headings and the names of Members asking and Ministers replying to them. Questions are not listed under the names of Departments replying. Departmental listings can be arrived at indirectly by looking under the names of the Minister(s) of that Department. There will, however, be headings 'Northern Ireland', 'Scotland', and 'Wales' under which one will find not only most Questions answered by the Northern Ireland Office, Scottish Office, Welsh Office but also Questions about these areas of the United Kingdom which are answered by other Departments. Ministerial statements are indexed under subject headings, under 'Ministerial statements' and the names of Ministers making them and Members speaking on them. General debates are indexed under broad subject headings and under the names of all Members and Ministers taking part. Debates on legislation (Bills, Orders, Regulations etc.) are indexed under the name of the Bill, Statutory Instrument etc., under subject headings and under the names of those taking part.

Rulings and Statements by Mr. Speaker and his deputies are brought together under the heading Speakers rulings and statements.

Other contributions by Mr. Speaker and his deputies appear under the heading Speaker.

Opposition Day Debates, Estimates Day Debates and Standing Order No. 10 applications are listed under those respective headings and under subject headings too.

The date of each item except Parliamentary Questions is inserted immediately before the reference.

Members' names are given in the form by which they prefer to be known and are printed in bold italics. Under their names, entries are arranged under one of the two headings *Debates etc.* (to include interventions on statements, points of order and so on) or *Questions*.

Abbreviations

Bills 1R=first reading, 2R=second reading, Money res=money resolution, Com=Committee stage, Rep=Report stage, 3R=third reading, amendt/amendts=amendment/amendments, *=matter taken formally, without debate.

Column numbers followed by the letter W refer to Written Questions. These appear at the end of each daily part or volume with their own sequence of column numbers printed in italics.
